NEW YORK, JULY 5, 1883.

WHOLE NO. 419.

Correspondence.

ST. LOUIS NOTES.

[FROM OUR REGULAR CORRESPONDENT.]

St. Louis, July 2, 1883.

I wonder whether the trade in other cities know of the stationery broker. We are going to try to find out in St. Louis if he is not also movable. If you have not met the gentleman I refer to you will recognize him from the description, if he can be persuaded by the trade to "fold his tent, like the Arab, and silently go to 'stealing' somewhere else," and happens to come within your borders. But we almost despair of his leaving us until our street paving, now in progress, is finished. The blocks of granite piled up on the sidewalks furnish him such convenient and reasonable desk room and the weather is so favorable to curbstove offices, that he will no doubt linger with us until fall. By that time, I firmly believe, the trade here will have unanimously and in a body sat down upon the broker to such an extent that an absence from the city will be preferable to a repetition of his part in that humiliating drama. Therefore keep your weather ear open and sweep the cobwebs out of your eyelashes, so that if a rather seedy young man—without any visible means of support, apparently acquainted with your business better than you are yourself, with his headquarters in the stores of the trade and his hindquarters in the offices of their customers—"too busy" to get him some cards printed, and "too much rushed" to have an office of his own, steers his ship your way and the following occurrences are found in its wake, he is a St. Louis stationery, printing, lithographing, blank-book, &c., broker. His first step will be to get track of the cream of your trade and to secure their orders for staple goods at 5, 10, or 15 per cent. less than you have been selling them or can afford to sell them. He is a good salesman—at lower prices than customers can get elsewhere—and a good buyer at still lower ones. His smartness, if he has any, lies in two accomplishments—the ability to soft-soap the trade into selling him at almost cost, and the keen perception which teaches him how long he can prey upon others without being shot. He has injured the trade here greatly by slashing and cutting the prices of staple goods all to pieces.

Not only this, but business which is done through such a medium is not satisfactory to any of the principal parties concerned, and tends to shake the confidence of business houses in even the best firms. My advice to the sta-

tionery broker is to get a permanent position as hod-carrier or driving a street car. He is weather-hardened, has ability enough to draw his pay at the end of the week, and reserve sufficient for even a more hazardous employment. As a broker and a sponge he does tolerably well, but I have faith to believe that the trade can do without such parasites, and will make a different field of uselessness more quietly enjoyable. This much for that.

Activity in some wholesale houses has given a new impetus to the printing and stationery business here, but the usual summer dullness is apparent in all lines. The paper houses are more or less busier on account of one of the number withdrawing from active business life. The coming of hot weather brings with it some suggestion of coolness in the traveling salesman for Christmas cards. It was said by one of the trade that these gentlemen might sell off what was left from January in May and June, and then have time to make a full line additional for the same fall trade. This is good—for them.

"Thrift, gentlemen, thrift." Representatives of the Globe Files Company are in the city, and report quite a number of victories over all competitors in cabinet file warfare, and over old fogysim, this last being the most formidable foe. Parker, Ritter & Co. have put in a great number of Globe files the past season, and most of them large in size.

The gentlemanly pusher for the Parson Paper Company was here a few days ago, and reported favorable receptions at every point. Paper makes the world go. I don't mean "paper" at bank.

I note a growing habit among the busy men here of taking more recreation during summer days than formerly. One of our agents said: "I have been to twenty-five places to-day, and they were all out to the Park, or to the races or base-ball, or on the river." Saturday 3 o'clock closing is becoming a business principle.

Did you hear that there was another stylistic pen? What, two?

You have read the papers (doubtless you read) that the river here is higher than it ever was before. Thousands of homes have been desolated, and much suffering has been occasioned; but there is the wealth to the soil that the overflow leaves, and the great nation to take care of and relieve suffering in any of its parts.

I understand that the house of Parker, Ritter & Co. closed a contract the other day for \$120,000 worth of its stenographs, the new machine for shorthand writing. This bids fair to supplant in a few years all of the present methods and systems of shorthand.

It is hot here, and the tar boiler in front of

where they are laying new streets makes me pause as dense clouds of smoke tint our newly-painted and furnished store.

I pause.

MINERVA.

CINCINNATI GOSSIP.

[FROM OUR REGULAR CORRESPONDENT.]

CINCINNATI, July 2, 1883.

Here is the trade-dollar flurry in full feather on us now. There were not many trade dollars in circulation in Cincinnati, and nobody was caught to any considerable extent. The currency since Saturday has not been bankable and many small shopkeepers and individuals are holding the small stock they have on hand of this coin in the full belief that this is only a spurt brought about by speculators, and that before long they can get dollar for dollar for their coin. The price that brokers offer for the discredited dollar is eighty-five cents.

For a dull season business is bright and thrifty here. All manufacturers are actively occupied to the extent of their facilities. There is no working over hours and no particular complaint of an overcrowd of orders, but a good stiff business keeps the factories busy. In the line of business circulars and pamphlets for fall trade there is considerable activity. This indicates a good feeling in general business. Blank-books also are going out freely and the present use orders for mercantile stationery desk conveniences and inks are good.

The building at the corner of Sycamore and Canal streets, recently used by the Globe Carriage Company, has been vacated within a fortnight and workmen are fitting it up for the Enquirer Job Printing Company, which will be a large concern devoted to work indicated by its name.

Russell, Morgan & Co. are moving their playing card presses and machinery from Race street into their new gigantic factory on Eggleston avenue. They will be out of the Race street building by August 1, unless they conclude between now and that time to run two great establishments, which is not probable.

Mr. Sheppard, one of the clerks in A. H. Pounsford & Co.'s establishment, will go East within ten days on a tour of inspection and recreation. Mr. Sheppard has won an enviable distinction here by his skill in arranging goods for display. Few succeed better in fitting up a window, a show-case or a counter.

C. T. Woodrow will leave his pretty shop on Walnut street, for a season of summer recreation, probably to the sea-shore this time.

Charles Stewart has been East and West and

is now at the centre, which is Cincinnati, and he is as busy as a bee in his big warerooms.

Louis Snider's Sons are turning goods at a pretty lively rate.

That Peerless Paper File Company can't be kept down if anybody was malicious enough to make the attempt. It runs now by a momentum derived from its merits.

Fulton has an agency in the east which is handling his gravity scales briskly. Western and southern agencies, also are keeping them moving.

Samuel C. Tatum is full of orders from far and near for his letter copying presses. In offices in Cincinnati, scarcely any other make of letter-press is to be seen.

The Globe Files Company is in normal condition and, therefore, is receiving orders by every mail that comes in, and sending away shipments of goods by every train that goes out.

William Skinner has done a driving spring and summer's trade. That little ducking he got from the flood last winter, served as a tonic apparently, as it did in the case of many others.

Snider & Hoole are keeping up the standard stir, pushing business with a system that is characteristic of that house.

W. B. Carpenter & Co. are cheerful, lively and busy as ever. The boys find fun in base-ball on Saturday when weather permits. Trade during the week keeps all hands fairly busy, but there are times when there are more sellers than buyers in the house.

C. F. Bradley's presses keep rattling away in spite of hot weather.

Wilstach & Baldwin are enjoying their usually thrifty trade and their facilities are increasing with their trade.

The Strobridge Lithographing Company is a long way behind with orders on most splendid colored show work.

The general tendency of business is to conservatism. A disposition to go fast enough prevails, but there is a feeling that very high speed just now is not consistent with safety. General business is irregular owing to inconsistencies in the prices of sundry commodities and wares, some fair and others at about bottom figures, some active, others dull to sluggishness.

PRINCE WILLIAM.

BOSTON ITEMS.

[FROM OUR REGULAR CORRESPONDENT.]

EASTERN OFFICE LOCKWOOD PRESS,
49 Federal St., Boston, July 3, 1883.

Between the inevitable hubbub incident to the Fourth of July week and the very general preparations making to get out of town and thus escape the sultry weather of the past few days, very little business is doing beyond that necessary and of a routine character.

The Christmas card and diary men have now been on the road nearly two weeks. There are about a dozen houses in Boston who send out one or more travelers each in Christmas cards.

Charles H. Whiting, carrying four lines of Christmas cards, sends out two men from whom very good reports are received thus far.

Charles K. Wadham, of C. K. Wadham & Co., wholesale stationers, sails from England, where he has been spending a few weeks, on the 4th.

H. H. Carter has the exclusive sale of Hack's roll calendar for 1884.

William H. Evans, of M. R. Warren, has patented a device for taking goods from show windows.

Good judges look for a quite perceptible increase in the stationery trade, when the two-cent postage law goes into effect.

The following named have been in town during the past few days: M. J. Anderson, formerly Anderson & Cameron; Mr. Graham, of Liebenroth, Von Auw & Co.; Mr. Hemphill, of Higgins, Tooke & Co.; Richard R. Watson; Mr. Knight, of Nevins & Co., Detroit; Mr. Pollard, of Pollard & Morse, and S. W. H. Sears, of Acme Stationery and Paper Company.

C. A. Merrill, of Geo. F. King & Merrill, is about to make a tour of the Great Lakes. He will take his family and go for rest, a thing which, in view of the increasing business of his house, Mr. Merrill stands in need of. He will be absent about five weeks.

An eye to the convenience of its patrons is again evinced by the live management of the Eastern Railroad by the issue of a large pamphlet, giving not only information as to the means of access to the numerous summer resorts on its line, but also a list of the hotels and boarding houses, with prices of board, &c., at each. It will be found very convenient for those who show their good taste by "recreating" in New Hampshire or "Down East."

CHICAGO SIFTINGS.

[CORRESPONDENCE OF THE STATIONER.]

CHICAGO, July 3, 1883.

Since my letter of June 14 business has been fairly good, but seems now to be settling down to what may be called the dullness of the summer months, that is, if former years can be given as a precedent, for July and August are extremely slow. September, toward the latter part, brings in a little more stir, with the importation of new goods, and travelers getting ready their samples for what is generally the best trip with largest sales of the year. The Christmas and New Year card men, the principal of whom are L. Prang & Co., Boston, domestic goods, and Willy Wallach & Co., New York, foreign manufactures, have long since been over the ground, and large orders are reported, so that we may look forward to a brisk business a little later on in this line of goods, as the jobbers have their travelers ready with samples for the campaign, and the prospect seems really good. Last year I did not hear of one merchant who complained of his sales of cards.

Ed. W. Curtis, manager for Thos. Kelly, the publisher, of your city, has been in town for some days, and is as genial and happy as ever. He has left for home after making a number of new friends for himself.

I might here put in a word in regard to ladies' shopping bags. Manufacturers may make a note of it; if too late for this season it may be of use hereafter. Put better material—leather, sewing, clasps, &c.—in the make-up and less fancy work, and make for the market a much more substantial and solid article than has been done heretofore. I take for my authority what I hear frequently, that some of the bags are almost shabby before they are a month in use. This is only a young business yet, and simply a fashion in its infancy, and may doubtless eventually die, but a good article will be for a long time yet in demand.

Pocket photograph albums are again reviving, and very little if anything can be had, as for a long time they have been a dead letter. Something in plain russias, calf, seal or morocco, both stiff and flexible, to hold from two to six pictures in carte-de-visite size and say two, three and four in cabinets. The only thing I have seen is in plain American russias, flexible. I trust this will bring out something new.

Writing portfolios are now in demand for

travelers, business men and tourists. Liebenroth, Van Auw & Co. make a fine line. But I have seen nothing yet to compare with the old English traveling portfolios sold for many years past. They are expensive, especially after freight and duty are added. The material is generally good, at least what comes to this country and Canada. There is no doubt whatever that they could be made and sold in this country at one-half the price of foreign goods. Writing desks in leather could be greatly improved upon. And why should we not have the wooden ones of our own manufacture instead of importing them. The wood in these cannot be seasoned to stand this climate, and invariably warps either with heat or cold. I have seen imported desks—yes, dozens of them in one lot—worth from four to twelve dollars each, with splits in top or bottom half an inch wide, while the veneering was warped and cracked, like the painting on a safe after being in a fire.

I have often thought that there is a great mistake made by the stationers of Chicago as well as of other Western cities, but more particularly Chicago, as it is the biggest market and chief distributing point of the West, in telling their customers everything that they know of trade terms (I mean, of course, the consumer), giving information where it is not asked and totally unnecessary for the sale of the article. Selling paper by the pound, or even selling it at all by weight, not with an intention to defraud, but a person who wants a few quires of paper has no need to know the number of pounds to the ream or the name of the mill, &c.

The English way is to give the weight of a folio ream on the note or letter size as the case may be. Another bad practice is that of allowing rubber bands, memorandum blocks, &c., to be sold by the pound; in fact, many other things of this description of which the consumer has no right to know. A stop should be put to another growing evil of allowing part or even trade discounts to any other than a dealer. I don't see how this can be remedied until discounts are abolished and a net wholesale and retail price fixed upon. A little thought on these subjects by the dealers in such goods and some instructions to their salesmen ought soon to convince them of the truth of these observations.

I am pleased to notice that other cities, Boston, Philadelphia, New York, Cincinnati, St. Louis and Milwaukee, are all joining in the early closing movement for Saturdays during the summer months. If this continues as successfully as it has commenced, it will, eventually, be a recognized thing that salesmen and other employes can look forward to at least part of a day each week that he may call his own, with no loss whatever to the employer.

The old firm of Skeen & Stuart, stationers, Madison street, has formed its business into a joint stock company; capital, one hundred thousand dollars. Seventy-five thousand will be paid up in shares of one thousand dollars each. The company is composed of Messrs. Skeen and Stuart, the original firm; Jackson, formerly cashier and bookkeeper; Thayer, head salesman and manager of the store department, and perhaps one or two others of the chief employes may get a slice of the shares, but I guess that Messrs. S. & S. are shrewd enough to keep the better part of them to themselves. I am sure that THE STATIONER will congratulate them on their new venture, and wish them all of the prosperity which their former success warrants.

I paid a visit a few days ago to Jansen, McClurg & Co.'s new warehouse, on Wabash av-

Being Triple Sized (a process entirely our own) and Loft Dried, can be erased and written upon the fifth time distinctly. None genuine without the water mark, thus—Old Berkshire Mills Linen Ledger, and date.

CARSON & BROWN CO., Manufacturers.

Extra Fine Papers

Manufactured by

Z. CRANE, JR., & BRO.,

DALTON, MASS., U.S.A.

These Goods, which are acknowledged to equal the finest foreign manufactures, are presented in the following styles and qualities:

SUPERFINE QUALITY.

- in handsome Light Blue Boxes containing one-quarter of a ream of Note Paper each, and bearing in blue letters description of contents.
- in separate Boxes of uniform size, are one-eighth of a thousand Envelopes corresponding in tint and quality to the paper.

EXTRA SUPERFINE QUALITY.

- In attractive Lavender Colored Boxes containing one-quarter ream of Extra Fine Paper each, with contents printed in red. Corresponding to this, in like Boxes, are Envelopes to match.
- All this Stationery may be relied on to be according to representation. It is suited to the tastes of the most select trade.

In addition to the above lines, our other Specialties are put up with care, in attractive and substantial form. Goods can be seen at the Mill, or at our New York General Agency, GEO. B. HURD & CO., 79 Beekman Street.

SEASON 1883-1884.

SEASON 1883-1884.

L. PRANG & CO.'S

Christmas and New Year Cards.

WE beg to express our thanks to our patrons and friends for the kind and flattering appreciation of our past efforts, and feel a pardonable pride at the very emphatic endorsement which our Cards have received from the American, English, German and Australian press. With one accord these exponents of public taste have given our Cards the first rank over all similar productions in the market. We are bound to maintain this superiority; and we have, as heretofore, spared no expense to create, with the aid of our enlarged experience, a Series of Novelties for the Christmas Season, which, we have no doubt, will meet the expectations of the Trade. We have been singularly fortunate in procuring the assistance of, we may say, **REPRESENTATIVE AMERICAN TALENT** in the preparation of designs, and besides have secured the coöperation of some of the most **EMINENT EUROPEAN ARTISTS**.

OUR LINE IS NOW COMPLETED, and our agents are on the road to call on our patrons and friends. An inspection of the Sample Books will convince them that in regard to **ORIGINALITY AND VARIETY OF DESIGN, EXCELLENCE AND RICHNESS IN EXECUTION**, it far exceeds our last year's efforts. To give an idea of the high artistic order of the line, we would say that it comprises:

FIGURE DESIGNS by Miss DORA WHEELER, Miss ROSINA EMMET, Miss L. B. HUMPHREY, Miss L. B. COMINS, ELIHU VEDDER, WALTER SATTERLEE, A. F. BROOKS, and others.

LANDSCAPE DESIGNS by W. HAMILTON GIBSON, THOMAS MORAN, F. L. SMITH, and others.

ANIMAL DESIGNS by B. E. BENSELL and HARRY BEARD.

FLOWER AND BIRD DESIGNS by Miss FIDELIA BRIDGES, Mrs. O. E. WHITNEY, JEAN ROBIE, of Brussels; H. GIACOMELLI, of Paris, and others.

THE LITERARY MATTER in connection with our designs has been carefully attended to—among others, by Mrs. CELIA THAXTER, Mrs. EMILY SHAW FORMAN and JOAQUIN MILLER.

OUR REGULAR LINE of Christmas and New Year Cards will comprise plain cards, fringed cards, and double fringed cards, varying in price from 30 cents to \$60, per set of 12.

PROTECTORS are furnished with all fringed cards, and also **ENVELOPES** for all series costing \$1.80 per set and more.

Besides our **REGULAR LINE**, we would call special attention to the following

NOVELTIES AND SPECIALTIES:

ALADDIN'S LAMP. This is one of the most elaborate and elegant Christmas Gift Cards we have ever offered to the trade. It is a large folding card, heavily fringed, and provided with a leatherette protector. The front outside page is a design of peacock feathers on satin; the left inside page contains a poem specially written for this gift by JOAQUIN MILLER, also on satin, and surrounded by a delicate border of Oriental design; the right inside page presents Aladdin bearing his lamp, after a painting by the eminent American artist, ELIHU VEDDER; and to complete the whole, the back is embellished with a most unique, artistic design of high order.

RUSKIN CALENDAR FOR 1884. At the solicitation of some of our business friends, we have this year decided to bring out a Calendar, and are happy to be able to announce that we shall issue **A CALENDAR FROM JOHN RUSKIN, FOR 1884**. This consists of an artistic mount with a block calendar, having suitable selections from JOHN RUSKIN's works for each day of

the year. The selections have been made by a lady well-known for her cultivated taste and judgment. The mount has been designed by a well-known Boston artist, and, coming from her thought and tasteful skill, the form and decoration will be a fitting accompaniment to the words within. This Calendar will be a source of pleasure to all who love and appreciate RUSKIN, that they may have every morning a jewel from the treasure of his noble and earnest thought.

"THE CHRISTMAS SHEAF." A folding card, with inside pages, in color, stamped out in the shape of a sheaf of wheat. Tied with silk cord and tassels.

"THE CHRISTMAS BOOK." A surprisingly natural representation of an open book, with floral designs by Mrs. FISHER, and original poems by JOAQUIN MILLER.

CHRISTMAS ART PRINTS ON SATIN.

The great success attending our efforts in this line has induced us to bring out a number of new Series, consisting of Flowers, Landscapes and Figure Designs. These are elegantly finished in several styles, in fringed tinted mats, with cord and tassels; on mount, with silk fringe and cord; in book form, richly fringed and with leatherette protectors, and on rich Plush mounts. Prices vary from \$1.50 to \$3.50 each.

We have made large additions to our **BIRTHDAY** line, comprising Plain Cards, Fringed and Double Fringed Cards and Art Prints on Satin. Numerous Series at popular prices have been added to our list of **SCRIPTURE TEXT CARDS**. New **FLOWER PIECES** in Mats, &c. **THANKSGIVING CARDS**,—Our line will also be shown now.

Descriptive Price Lists of our **CHRISTMAS** and **NEW YEAR CARDS** are now ready, and will be sent on application.

THE PARSONS PAPER COMPANY,

— HOLYOKE, MASS., —

In addition to their already extensive establishments at Holyoke (which rank among the largest mills in this country), have recently built a separate mill, specially constructed and equipped for the production of the Best Grades of Linen Papers, and are now manufacturing all the various sizes and weights of BOND, PARCHMENT, BANK-NOTE, AND LEDGER PAPERS. They have already demonstrated their ability to produce of these papers a quality EQUAL TO THE BEST ESTABLISHED BRANDS IN THE MARKET.

Having great strength of fibre (an essential requisite in all Legal, Government and Commercial Papers), they are recommended for use in Bonds, Deeds, Certificates, County and State Records, etc. They are thoroughly sized to stand writing upon with fluid inks, and will permit of repeated erasures and re-writing thereon, when required. Great care is exercised to produce uniformity of color, strength and finish, and to do this, they have the latest improved machinery, specially adapted to the manufacture of Linen Papers.

They would call the attention of the Trade to the following brands, which are their trade-marks, viz.: In all Bond, Bank Folio, and Parchment appears the water-mark

"PARSONS PAPER COMPANY, HOLYOKE, MASS."

The Ledger Papers, of which they manufacture two Brands, are water-marked

"PARSONS LINEN LEDGER."

"SCOTCH LINEN LEDGER."

It is the intention of the Company to maintain the quality of these brands equal to any in the market.

STEAM PRINTING WORKS, AMSTERDAM.

When People are Traveling Comfort and Safety are the

TWO PRINCIPAL OBJECTS IN LIFE!

COMFORT!

"The Erie is by far the smoothest road I ever traveled on, either in this country or in Europe; and I consider it the perfection of railroad traveling. With the clean, light and airy coaches, polite attendance, freedom from dust, noise and jar, we reached Chicago hardly realizing what a long journey we had performed. And then such a breakfast as we had the morning after leaving New York, at Hornellsville, is certainly deserving 'honorable mention.' Such a table as they have there, with a full half an hour to enjoy it, is enough of itself to attract passengers."—*Ex. U. S. Minister, E. B. Washburne.*

SAFETY!

"5,491,447 Passengers were carried over the Erie Railway in 1881. Of this vast number, only two were killed—one by falling from the platform of a car on which he insisted on standing, and the other in jumping from a train while in motion."—*New York State Engineer's Report for 1881.*

No better evidence than the above need be wanted that both of these objects are secured to the traveler who purchases his ticket over the

PRICE LIST NOW READY.

RELIEFS (SCRAP PICTURES).

The constant growing demand for Reliefs has impressed upon us the necessity of an improvement of the present way dealers are obliged to keep their stock, and we are pleased to say that we are now able to offer the trade a complete solution to the matter in the form of a

— RELIEF CABINET, —

of which the cut herewith given is an exact illustration. This Cabinet will hold 5,000 to 6,000 Reliefs (according to the sizes desired), and will be presented to every retailer who purchases that number of sheets, amounting to at least \$100 net.

The assortment may be made up of one hundred each of fifty kinds, or fifty each of one hundred kinds. This Cabinet is a solidly built, durable piece of work, in black walnut, and an ornament to any store.

TESTIMONIALS.

"I am most emphatically pleased with the Prouty. I would not trade it for a C—press (price \$1,000). It runs easier, it is much simpler, and does its work as rapidly and well."

J. F. MITCHELL, Greenville, Texas.

"Would not exchange it for any of the 'Big Injun' presses."

J. A. AVERY, Waukeegan, Ill.

"The Prouty is the 'Boss press.'"

C. G. STARKS, Berl n, Wis.

"For the country office, printing 1000 to 4000 circulation, there is no other press worthy to be compared with it."

Waterloo TRIBUNE, Waterloo, Iowa.

"We profess to be a practical pressman, and having had experience with nearly all kinds of presses, believe ourselves to be a competent judge. The Prouty is the simplest and easiest running power press in the market, and will do as good work as any machine made."

F. M. HAISLET, Newhampton, Iowa.

PHILADELPHIA,

— MANUFACTURERS OF —
GLUCINUM PENS.

NOTICE TO THE TRADE.—We call attention to our circular letter, dated June 10 1883, which has been directed to our patrons and principal stationers in this country, containing some very important information to consumers of our celebrated Glucinum Pens. We confidently claim that they are the best series of writing pens ever placed before the public. The demand for them is constantly increasing on account of the uniformity, smoothness of points, and durability over all other steel pens. These

Pens and the word Glucinum are copyrighted and registered at the Patent Office, at Washington, D. C., United States of America, and every box has a fac-simile of our signature, so beware of unscrupulous parties misrepresenting us.

A Revolution in Stylographic Pens.
The Latest Improvement.

THE KERNER.

\$1.

It is constructed on strictly scientific principles, and being devoid of the complications which exist in old styles is less liable to get out of order. It has no springs to be affected by the action of the ink. The reedle is rigidly fixed to a FLEXIBLE air tube extending entirely through the barrel, which when writing is constantly vibrating throughout the entire length of the barrel agitating the ink and causing a perfect flow to the point. It is unequalled by any writing instrument of the kind ever offered for public favor, and gives entire satisfaction to all who use them. It is constructed of the best material throughout, and the point is of platinum alloyed with iridium. Prices: No. 1, Plain, \$1; No. 2, Engraved, \$1.25; No. 3, Gold Mounted, \$1.50; No. 4, Entire Gold Cap, \$3; No. 5, Mottled Ruling Pen, \$1.50. Send for Circulars.

Trade Gossip.

All new goods and designs which are not, strictly speaking, "Novelties" will be noticed under this head. The trade are requested to forward descriptions with samples in order to secure proper notice.

B. Saunders, printer, South Auburn, Neb., has failed.

E. G. Alberson, paper hanger, Newark, N. J., has sold out.

W. G. Jones, publisher of the *Democrat*, Hollister, Cal., has sold out.

E. F. Beckwith, publisher, Longmont, Col., has sold out to J. H. Floy.

C. W. Rice, fancy goods dealer, Baldwinville, N. Y., has made an assignment.

F. C. Brobst, publisher of the *Reporter*, Minden, Neb., is reported to have left that town.

George B. Owen, bookseller and stationer, Mankato, Minn., has sold out to E. A. Tiffany.

Waddell & Harris, publishers of the *Journal-Observer*, Charlotte, N. C., have dissolved partnership.

Mrs. G. W. Wesley, fancy goods dealer, Bridgeport, Conn., has sold out to Mrs. R. Fitzgibbons.

Spinks & Maier, paper-box manufacturers, Atlanta, Ga., have dissolved partnership. W. R. Spinks continues.

Tracy & Pomeroy, dealers in wall-paper, Louisville, Ky., have dissolved partnership. D. W. Pomeroy continues.

John M. Adams, of the firm of Adams & Terry, paper manufacturers, Monroe, Mich., died on June 27, aged sixty-seven. His estate is in the hands of trustees for adjustment.

Boorum & Pease, 28 to 34 Reade street, New York, have issued a new catalogue of blank books, albums, scrap books and other goods of their manufacture. The trade are invited to send for it.

Mary W. Johnson has withdrawn from the firm of T. & J. W. Johnson, dealers in law books, Philadelphia, Pa. Thomas W. Parry, Joseph W. Johnson, Jr., and J. Toplippe Johnson continue under the same style.

Charles H. Crosby, printer and lithographer, Boston, is reported in insolvency, with liabilities of \$10,950, of which \$2,200 is secured by mortgage on machinery and stock. The unencumbered assets are doubtful claims for \$103.

The Hoglen Brothers Pulp Company, Medway, Ohio, executed a deed of assignment, on June 28, to M. J. Hoack for the benefit of their creditors. The liabilities are understood to be \$40,000 and the assets are given as \$12,000.

W. T. Barker & Co., paper manufacturers and dealers, 43 Federal street, Boston, have sold the stock and good will of the manilla department of their business to Stone & Forsyth, 60 Federal street, Boston. J. E. Peckham, for four years salesman with W. T. Barker & Co., will transfer his services to Stone & Forsyth.

The Powers Paper Company, Springfield, Mass., invites the attention of the trade to its brand of "Perfection Linen," which is said to merit the name in every sense of the word. The paper is made of pure linen stock, and is made in all of the regular sizes and weights, and can be supplied at short notice. Special sizes are made to order. Samples and prices may be had on application to the New York office, 62 and 64 Duane street, J. L. St. John, agent.

A large increase in the business of the New York Silicate Book-Slate Company is reported. For the past sixteen years this company has met with success in the manufacture of its goods, and has attained a wide reputation in its silicate book slates, blackboards, black-diamond slating, &c. The silicate business was established in the year 1867, on the southwest corner of Cortlandt and Church streets, and remained there four years, until the building was removed. The company then located at 191 Fulton street, corner of Church, its present office, salesroom and manufactory. The great durability and smooth surface of the goods has won encomiums throughout the country, at the Philadelphia Exhibition in 1876, and at the Paris Exposition of 1878. The silicate books for lead or slate pencil have been in constant use by the Board of Education of New York city (in every public school) for the past twelve years, and they are in use by a large number of the boards of education throughout the country. The private schools have also adopted these books in preference to slate or paper pads, finding them more economical and more advantageous to the pupil. They are handsomely bound in fine black cloth, attractive in appearance and finely finished. The blackboards will last for years, and are slated on both sides with the "black diamond" slating, which is said to be the best liquid slating made. The prices are in the reach of all.

The business of the late John R. Nunemacher, railway printer and stationer, 38 and 40 East Main street, New Albany, Ind., will be continued by his family, under the name of John R. Nunemacher Company. Walter C. Nunemacher, for twelve years connected with the house, is the manager for the new company. Frank C. Nunemacher is not in the interest of the firm. The trade are invited to forward price lists to this company.

Kueffel & Esser have been awarded the only gold medal given at the Chicago Exposition for surveying, engineering and drawing materials. They have also been awarded three bronze medals for the best draughtsman's drawing tables, leveling rods, and engineers' railroad curves, respectively. S. L. Johnson, who had charge of the firm's exhibits, has returned to this city, and is preparing to visit the trade.

McCarty & Hasberg are preparing and will be ready very soon with their line of novelties for the fall trade. The firm claims to be able to offer a line of goods that cannot be seen elsewhere, and of such a description that the articles will meet with a ready sale.

J. H. Bevans has succeeded to the book and stationery business of A. J. Wallace, Decatur, Ill. He asks publishers and manufacturers of stationery goods to send him their latest catalogues.

Munzinger & Pitzipio, New York city, have dissolved partnership, and a new firm has been formed under the style of Pitzipio & Co.

Torsch Brothers, book and job printers, Baltimore, Md., have changed their style to Torsch & Lee.

S. A. Bristol, printer, Cheyenne, W. T., has sold a half interest to William N. Knabe.

William N. Knabe, printer, Laramie City, Wyo., has moved to Cheyenne.

Thomas P. Murray, fancy goods dealer, Fall River, Mass., is insolvent.

Ahigail F. Pope, bookseller and stationer, Milton, Mass., is dead.

James F. Price, paper stock dealer, Philadelphia, Pa., is dead.

John Branch, stationer, St. Albans, Vt., has sold out.

Murphy & McCarthy, publishers, Boston, Mass., have failed.

Charles H. Crosby & Co., printers, Boston, Mass., have failed.

Johnson P. Pusey, of Pusey & Rooney, printers, New York, is dead.

W. H. Bradley, publisher of the *Record*, Wilkesbarre, Pa., has sold out.

A. L. Thiele, publisher of the *Humorist*, San Francisco, Cal., has been attached.

Charles R. Savage, stationer, Salt Lake City, Utah, has been attached for \$1,408.

J. C. Swash, publisher of the *Grande Ronde Post*, Union, Ore., has been burned out.

C. W. Rice, fancy goods dealer, Baldwinville, N. Y., has made an assignment to A. Marvin.

The sheriff is in possession of the premises of Mrs. J. Sutherland, fancy goods dealer, Toronto, Ont.

C. T. Willis, publisher of the *Guide*, Tarbow, N. C., has admitted Charles F. Cooke to partnership.

The James Dixon Crucible Company has given notice that Wm. L. Marks is no longer its representative.

Charles H. Crosby & Co., lithographers, Boston, Mass., have been attached on an action of contract for \$1,000.

Charles R. Savage, stationer, Salt Lake City, Utah, has been burned out. Loss, from \$8,000 to \$10,000; insurance, \$4,000.

Murphy & McCarthy, publishers, Boston, Mass., are reported suspended. They were also at Providence, R. I., the senior partner residing in that city.

John Gibson's travelers, J. Aikenhead, R. L. Thomas, and Homer P. Beach, start this week on the road with samples of Christmas cards. A description of the firm's line appears elsewhere.

J. D. Whitmore & Co.'s new lines are meeting with much favor. This is to be expected, judging from the originality and excellence of the goods.

F. G. Bufford left on Monday evening to spend this week at Cape Ann with his family who are summering there. Mr. Bufford owns a beautiful residence at this favorite resort.

The Artistic Box Company is showing some beautiful lines of plush mirrors, which are elaborately gotten up and deserve the inspection of parties interested in that class of goods.

The Esterbrook Steel Pen Company has brought out a new pen called the "Probate;" it is a large engrossing pen with long nibs and a fine inflexible point, and is constructed so as to contain a large quantity of ink.

The attention of the trade is called to the new advertisement of school stationery by Charles J. Cohen, Philadelphia. This department of Mr. Cohen's business is fully equipped with all necessary goods and useful novelties for the school trade.

D. F. Foley, of Aiken, Lambert & Co., will leave on Saturday for the "Thousand Islands," where he will spend the next two weeks. There is no doubt but Mr. Foley will enjoy his recreation, as he is one of the hardest working men in the trade.

Geo. W. Leman & Brother have placed on the market a new stylographic pen, called the "Peno-graph." It combines a pen in connection with the stylograph, and consequently a writer can

preserve in the tracings the individuality of his handwriting.

F. Freeman, publisher of the *Times*, Orland, Cal., has sold out.

L. A. McDonald, newsdealer, Jacksonville, Ill., has been burned out.

Arthur McAvoy, publisher of Catholic books, Philadelphia, Pa., is dead.

McCamont & Schott, printers, San Antonio, Tex., have dissolved partnership.

C. M. Loomis, printer, Grand Rapids, Mich., has been succeeded by Loomis & Co.

S. Stratton, bookseller and stationer, Lawrence, Mass., is advertising to close out.

A meeting of the creditors of Jerome B. Secor, toy manufacturer, Bridgeport, Conn., has been held.

F. C. Brown, manager of the Fountain Ink Company, has gone to Canada for a months' vacation.

C. A. Perkins & Co., picture frame dealers, Boston, Mass., have been damaged by fire. Insured.

The stock of C. Stuebing & Co., wholesale fancy-goods dealers, Berlin, Ont., is advertised for sale.

D. M. Dickinson & Co., paper stock dealers, Norwich, Conn., are advertising their business for sale.

J. K. Gill, Portland, Ore., who left this city some weeks ago on an Eastern trip, has returned.

Geo. W. Leman and family left on Monday for the Catskills, where they will remain during this month.

John W. Leshner & Brother, dealers in paper hangings, Philadelphia, Pa., have dissolved partnership.

Joseph Hyrum Parry, bookseller and stationer, Salt Lake City, Utah, has been partly burned out. Insured.

New Mexico and Arizona News Company, Albuquerque, N. M., have dissolved partnership. C. M. Schultz retires.

Hugh Henry, manufacturer of type cases, Philadelphia, Pa., has been burned out. Loss, \$5,000; insurance, \$1650.

Phinney & Starbuck, publishers of the *Free Press*, Waltham, Mass., have dissolved partnership. N. G. Phinney continues.

George P. Bonfoey, printer, Springfield, Mass., has transferred to his wife, Mary A. Bonfoey, through P. J. Saunders, press, type, woodcuts, and shafting.

The Fountain Ink Company is reported to have sold ten thousand gallons of Caws black fluid ink last year.

Henry Hoe, the well-known agent of the Gillett steel pens, reports that his business is quite up to his expectations.

Genuine cheerfulness is an almost certain index of a happy mind and a pure, good heart.

WATERING-PLACE LITERATURE.

The publishers are now bestirring themselves to supply the tens of thousands who are scurrying off to seaside and mountain with light summer reading. People go off for the summer to be lazy and cease thinking. Thinking is a very useful occupation for nine months or so in the year, but during June, July and August, it is a bore and a burden. To provide for one's palate and toilet adequately and to flirt, exhaust about all the summer saunterer's surplus nerve and brain energy. To suit their wares to the market, the publishers feel it necessary to give the public only the slightest of light books for the most part, which, like Champagne, shall have plenty of froth, and sparkle without being very heady. Above all, these books (of course, they are novels) must be full of love and sentiment; for watering-place life feeds on love, and without it would be as flat, stale, and unprofitable as salad without a dressing. It is here that the annual marriage crop of society ripens.

The parsons get ready for the harvest with their cradles, most prophetic of reaping implements. Hosts of young people come home from the watering places engaged. Sea foam and mineral waters irrigate the seeds sown by Cupid into a lush growth. Statues of Hymen should be erected in the central squares of summer resorts. Perhaps social logic would require them to be flanked with golden calves. But there are enough calves that carry the gold in their pockets to dispense with this. But though the pro-

saic and practical elements of life enter so deeply into the love-making at summer resorts, novels of the most high-flown, romantic, and sentimental sort are the vogue. The pretty woman, who would scrutinize narrowly her suitor's bank account before saying the momentous "yes," will weep in sympathy over the woes of lovers parted by the conventionality and selfishness of social life. The crop of summer novels has hardly ripened yet fully, but we may expect it to be of the usual sort, full of emotional pungency and rather lacking in anything which will call for thought, or appeal to the more serious sides of human nature. —*American Bookseller.*

ASBESTOS DISCOVERY.

Colonial papers record that deposits of very considerable extent of this remarkable crystalline rock have been discovered in New South Wales at Gundagai. Its existence in Tasmania has long been known, but gold has been too profitable for attention to be given to the mining task of securing asbestos. A great advantage in mining for this rock is that it is taken out of its bed in a similar way and almost as rapidly as we take out a particular layer of chalk or coal. It is described as having the appearance of solidified "silkworm produce," and exists in large bunches petrified. This mineral is found to be a perfect non-conductor of electricity, and for this reason gloves have been prepared from the substance for the use of electricians, which will prove very useful in diminishing the risks of that most dangerous occupation.

FOLEY'S PAT. IMPROVED STYLOGRAPHIC PEN.

Great reduction in price: No. 1, \$1.75; No. 2, \$2.50; No. 3, \$2.50; No. 4, \$3. A liberal discount to the Trade. FOLEY'S PATENT STYLUS is the best and only Pen with point, spring and cleaner in air tube. Fully warranted, and exchangeable for gold pens and pencils.

We, the subscribers, who know the value of FOLEY'S PENS from constant use of them for a number of years, cheerfully recommend them to those who wish for the best and most perfect Gold Pen ever made. Signed by the following gentlemen and over 1,000 others: G. S. Coe, Pres. Am. Ex. Nat'l Bank; J. A. Beardsley, Cashier Nat'l Bank of North America; Wm. A. Fall, Pres. Corn Exchange Bank; E. H. Lowry, Pres. Nat'l Bank of the Republic; F. D. Tappan, Pres. Gallatin Nat'l Bank; C. F. Timpson, Cashier Continental Bank; I. G. Ogden, Cashier New York Co. Nat'l Bank; Chas. Dennis, Vice-Pres. WASTE PAPER IN CHINA.

Litera scripta manet is a phrase which is literally true of China. It is generally mentioned in popular books on that country that the respect for paper on which any words are written is so great that scavengers are specially employed to collect it in the streets and preserve it. Whatever doubt existed on this score must now be set at rest, for in a recent issue of the *Pekin Gazette* we find a memorial to the throne from the police censor of the central division of the capital, reporting that there are in that city over eighty establishments for the remanufacture of waste paper. Paper, with characters on it, the memorialist complains, used to be mixed up with the waste paper and defiled by being put to such base uses. The memorialist and his colleagues published proclamations embodying the sacred edict of the great Emperor Kang-hi that in heaven and earth there is nothing more precious than written characters.

Shopkeepers were forbidden to traffic in printed or written paper, and the manufacturers were ordered to pick out all such paper from among the waste paper purchased by them, and send it to the offices, where a certain amount per pound would be paid for it. Two temples were selected where this paper could be properly burned periodically. The police magistrates on inquiry find that now the manufacturers have some idea of the reverence due to written characters, but some permanent means of supporting the expenses of the purchase and sacred process of destruction should be established, as at present the memorialist has to pay them out of his own pocket. He further suggests that the sale of the house and furniture of a certain escaped criminal, though they will not bring much, will be sufficient, if put out at interest, to meet these expenses, and he further requests that the sale of written papers to manufacturers be forbidden. The imperial rescript on this memorial has not come to our notice, but in all probability the escaped criminal's house and furniture are now employed in preventing the defilement of the "*Fliegende Bälter*" of Pekin.

J. M. DE BUSSY,
General Commission Merchant,

Publisher and Wholesale Bookseller and Stationer, is prepared to

ACT AS AGENT

At the INTERNATIONAL EXHIBITION, to be opened in Amsterdam, on the 1st of May, 1883, for AMERICAN MANUFACTURERS, INVENTORS, &c., and will guarantee that their interests shall receive careful and personal attention. The following branches will be represented by him.

Publishing Department.

THE INDIA MERCURY, an export journal of world-wide circulation, published in Dutch and English. THE INDIA GUIDE. THE SEA, and THE SHIPPING GAZETTE.

Agency Department.

THE AMERICAN MAIL AND EXPORT JOURNAL. THE PAPER TRADE JOURNAL. THE AMERICAN STATIONER. THE MILLERS' JOURNAL. The East India Daily Papers: ALGEMEEN DAGBLAD VAN NEDERLANDSCH-INDIË of Batavia. THE LOCOMOTIEF of Samarang.

His Export Department Includes—

India, South Africa, East and West Indies, Australia and New Zealand, Egypt, China, &c.

Intending exhibitors should make early application. Every information will be supplied by addressing

J. H. DE BUSSY,

93, Heerengracht, Amsterdam

THE STATIONER.

DEVOTED TO THE INTERESTS OF THE

Stationery and Fancy Goods Trades.

WEEKLY—\$2.00 PER ANNUM.

Single Copies - - - 10 Cents.

NEW YORK, THURSDAY, JULY 5, 1883.

Advertisements cannot be received for insertion in the current week later than 12 M. on Wednesday. The charge for advertising is 25 cents a line, each insertion. Special terms for standing and displayed advertisements to be had on application.

This journal aims to be a medium of information for and a representative of the interests of every one connected with the stationery and fancy goods trades. It contains a full and trustworthy survey of the market for stationery in this country, in all cases giving the actual prices at which goods can be bought of importers and jobbers in this city, together with a detailed account of novelties in the trade, patents relating to stationery, and current items of interest. A review of foreign markets and accounts of movements abroad will also be furnished, and no pains will be spared to make THE STATIONER a thorough and complete exponent of the trade.

Subscription and postage for Great Britain, per annum..... 12s.

Any information our readers may wish to obtain shall be cheerfully given, and prompt replies will be made to all inquiries addressed to us on any subjects of interest to the trade.

Communications on all trade matters are earnestly solicited. Address

Subscribers to THE STATIONER can be supplied with the best cloth binder in the market. Deliverable at the publication office. Price, fifty cents.

Readers of this paper who avail themselves of the information obtained from its columns, by advertisement or otherwise, are requested to notify their correspondents of the source of their information.

THE "Glorious Fourth" has come and gone. It was remarkable in only one feature—it was a warm day. This recollection inclines us to the belief that "it will be a cold day" when young America "gets left" on the Fourth of July.

DESPITE the fact that the municipal laws—passed in the interest of the insurance companies—prohibit the explosive fire-cracker or any other sort of thing that "goes off" by combustion, spontaneous or otherwise, the small boy of the Metropolis had his innings and the usual quantity of burned fingers, &c., was made up. Otherwise the day was very quiet. It was a good day to be quiet—90° was the coolest spot we could find.

SOME people may think that the insurance companies have done the public a good turn by securing the prohibition of the explosive *feu de joie* system of celebrating the country's "natal day." We don't think that they have. They are the means of adding an item of indifference and contempt to the day which every American does, or ought to, regard as one of the greatest national import and solemnity. Had we stood in the shoes of our revolutionary sires we should have chosen a different time of year for protesting against the tyranny of King and Parliament, but as the day stands, it ought to be celebrated "with ringing of bells and firing of guns," and with all the panoply of pride and splendor which patriotic feeling can bestow. Shall the custom of fitly observing the day fall into desuetude at the bidding of corporations? Is there no fervor that will bring men to the old-time celebration and insure "a grand, a glorious Fourth?" We hope to see the parsimonious, picayune methods of dealing with the day overborne. Public rejoicing, illumination and fireworks, cannon and bells, and all things that go to make up the elements of joy, excitement and jubilation ought to be encouraged to unite in one glad chorus of congratulation and rejoicing.

TRADE discloses very little for us to moralize about this week and indications continue that there will be a fairly prosperous season of business with the reawakening soon to occur. Running over the reports from other cities, as presented by our correspondents, we note an easy, assured vein of comment with hopeful prognostications which are not unlikely to be borne out. It is satisfactory at the same time to observe that there is no tendency to extravagance in the dealings. Buyers are said to display unusual care, and while making pretty full reassortments, are by means indifferent to the more probable chances of the demand, repressing to a great extent speculative orders. They weigh the merits of goods as applied to the requirements of customers. If reports of the nature of trade to the extent above noted are true, they indicate the exercise of sound common sense and wise discretion which ought to be very assuring.

Our readers can judge for themselves how closely this line of policy is followed out, and if there are digressions these should be noted and looked after. We do not advocate parsimony in buying. The stationer's stock should, above all other things, be complete and full enough for ordinary trade requirements in all lines of standard goods. It will not do to make the shelving the sole depository of good stock. A reasonable amount of reserve should be kept on hand. Lines in which sudden price changes are likely to occur should be more carefully held and the course of the market should be watched lest shortages should occur on a sustained advance or accumulations be made in face of prospective decline. In novelties and in all lines which depend upon caprice or fancy, or upon the purchasing power of the community, an equal amount of caution should prevail. Some people may say that in making these suggestions we are going down to the A, B, C of business. Even so; there are many who need the reminder. There are good-natured buyers, easy fellows, who permit goods to be thrust upon them, even against their better judgment. There are also thoughtless purchasers, who never stop to reckon up or to prejudge the features of trade. None are so wise that they can afford to despise the homely principles of business when brought to their attention, even though they knew them all before. Monition brings about remembrance and prudence.

MORTGAGES, ETC.

[In the appended list R. signifies a renewal of a pre-existing mortgage; B. S., bill of sale; and Real, a mortgage on real estate.]

ANSWERS TO CORRESPONDENTS.

J. E. & Co. want address of manufacturers of cheap flat rulers for school and advertising purposes.

Ans.—H. Chapin, Pine Meadow, Conn. The Tower Manufacturing Company, New York, is general agent for and carries a full line of these goods.

H & Co. want address of American Steel Pen Company.

Ans.—D. W. Glass & Co., Baltimore, carry the name for the line of pens, which they control.

A. B. C. made inquiry a week ago for Lake Champlain black blotting sand.

Ans.—James Leach, 86 Nassau street, New York, tells us that he can supply it in quantity from one box to one hundred boxes.

COATING STEEL WITH COPPER.

Experiments are at present carried on in Belgium to preserve steel, and steel gunbarrels in particular, by coating them thinly with copper by a process of which F. Weil is the inventor. Its peculiarity consists in the composition of the baths used, in which the usual and always dangerous cyanides of the alkalis are replaced by organic acids and glycerine. According to F. Weil, these baths require no renewal of organic elements, and can be used continuously when they are saturated with peroxide of copper. They possess, also, the advantage, owing to the property inherent in organic alkaloids of dissolving the peroxide of iron without attacking the metallic iron itself, of cleansing the steel before the commencement of the coppering process, and more perfectly than can be done mechanically. The coppering is effected by putting porous clay vessels filled with caustic soda lye, in which zinc plates have been immersed, in the basin containing the organic copper base (alkaloid) and the steel. The zinc plates are connected by a thick copper wire with the steel articles to be coated with copper. The caustic lye may be used over and over again. Should it become saturated with oxide of zinc, it is sufficient for its regeneration to treat it with sulphide of sodium, when the oxide (of zinc) will be precipitated and a by-product obtained, by which the cost of the process will be considerably reduced. The coppering process, it is said, occupies only a very short time.

Market Review.

OFFICE OF THE AMERICAN STATIONER, {
WEDNESDAY, July 4, 1883. }

THE MONEY MARKET.—Money continues easy and the rates to borrowers unchanged. The supply of funds is of course abundant and promises to be for some time to come, with the additions of the disbursements usual at this season. Call loans on stock collateral were $2\frac{1}{2}$ to 3 per cent. and $1\frac{1}{2}$ per cent. on United States bonds. The stock market is feverish, with alternate advances and declines. The "bulls" appear to be sanguine of a better market during the ensuing month, on the strength of easy money, good crop prospects, the healthy condition of the coal trade and the assumption that prices are now on a safe basis for investment. Government bonds were firm. Railroad bonds were dull and without feature. The market for foreign exchange is quiet and steady.

THE PAPER MARKET.—Although we have had a dull market during the past month, the distribution of paper has probably been as large as usual at the close of June. In a few instances we have heard business spoken of as unusually good considering the time of the year; at all events, even if prices are very low and profits quite slender, we think we are safe in saying that the volume of business in the paper trade for the month of June has not fallen be-

low that of any corresponding month in late years. We hear of quite a number of mills which have shut down for thirty days beginning with July 1, among them a number of Book and News mills, whose aggregate daily production is estimated at about 150 tons. To this number are to be added quite a great many more which shut down ostensibly for repairs. This should exert a very beneficial effect upon the market in strengthening prices and preventing further decline. We hear that the proprietor of the *Herald* has renewed the contract for twelve months' supply of paper beginning on July 1, with three of the five concerns which have recently been supplying it. The price is said to be between 6c. and $6\frac{1}{4}$ c., presumably about $6\frac{1}{4}$ c. This is said to be a fair figure when the quality is taken into consideration. The straw-board manufacturers and dealers met last week at Albany and advanced prices 1c. per ream on the small sizes and others in proportion, but refused to continue the shut-down of thirty days longer than July 15.

THE STATIONERY MARKET.—In the review of the week, one of the most notable features is perhaps the exodus of traveling representatives from this city on their annual fall trip. Some of the travelers have only recently returned, while others have not been on the road for several months owing to the inactivity of business. It has been expected for some time that July 1 would be the turning-point in business, and as this seems to be realized, manufacturers and importers being now about to make the most of it. At present the volume of business is quite as large as could be expected at this season of the year, and it is daily getting into a stronger position. At the same time more than the usual caution is exercised by buyers, notwithstanding the fact that they will have to secure large quantities of goods for the fall trade. This indicates that while a steady trade is expected there will be no reckless buying, which is something very much desired by most of our largest and best houses. Some of the firms handling Christmas and holiday lines already report sales far in advance of last year, the orders being secured principally by travelers. In general staple stationery the week has been the liveliest for several months. The gold pen and pencil manufacturers are doing the amount of business generally transacted at this time of year. In domestic steel pens trade is reported good, and in the imported articles it is said to be picking up since July 1, as on that day the tariff affecting those goods went into effect. In fancy stationery business is said to be brisk, and in blank books it is fair. Novelties in general are eagerly sought after.

VALUE OF IMPORTS OF PAPER, BOOKS, &c.,
AT THE PORT OF NEW YORK,

STATIONERY EXPORTS FROM NEW YORK.

FROM JUNE 27 TO JULY 4, 1883.

BOOKS, cases, to Hamburg, 4; to Liverpool, 25; to Glasgow, 5; to London, 1; to British West Indies, 4; to Havre, 6; to Cuba, 2; to United States of Colombia, 2; to Japan, 1; to Bremen, 2; to Hull, 1; to Genoa, 2; to Santo Domingo, 3; to Venezuela, 4.

PAPER, to Hamburg, 10 cs., 12 pkgs.; to Liverpool, 16 cs.; to London, 15 cs., 176 pkgs.; to British West Indies, 5 pkgs., 181 rms.; to Cuba, 35 pkgs.; to Brazil, 5 pkgs., 3 cs., 3,600 rms.; to United States of Colombia, 8 pkgs.; to Hull, 11 cs.; to Porto Rico, 2 cs.; to Santo Domingo, 864 rms., 9 pkgs.; to Venezuela, 80 pkgs.; to Dutch West Indies, 7 cs.; to Copenhagen, 1 cs.; to British Guiana, 500 rms.; to Spanish Africa, 250 rms.; to Genoa, 200 cs.; to Peru, 1 cs.; to Mexico, 8 pkgs., 1 cs.

STATIONERY, cases, to Hamburg, 5; to Liverpool, 4; to Cuba, 4; to Mexico, 13; to British West Indies, 3; to United States of Colombia, 6; to London, 276; to Dutch West Indies, 10; to Bremen, 1; to Glasgow, 1; to Central America, 7; to Santo Domingo, 3; to Venezuela, 6.

PERFUMERY, packages, to Brazil, 113; to Liverpool, 12; to United States of Colombia, 6; to Venezuela, 70; to Hamburg, 5; to Hull, 7; to British West Indies, 100; to Palermo, 1; to Spanish Africa, 50; to Argentine Republic, 3; to Peru, 386; to Hayti, 55; to Santo Domingo, 60.

INK, packages, to United States of Colombia, 7; to Cuba, 22; to Central America, 19; to Mexico, 7.

SLATES, cases, to Hull, 262; to Venezuela, 4; to Amsterdam, 213; to British West Indies, 20; to Mexico, 2.

SPORTING GOODS, TOYS, GAMES, &c., cases, to Liverpool, 4; to Mexico, 1; to Hamburg, 1; to Hull, 1; to London, 19; to British West Indies, 5; to Central America, 1; to Venezuela, 10; to United States of Colombia, 6; to Cuba, 1.

PENCILS, cases, to Liverpool, 9; to Hamburg, 1; to Brazil, 1; to Mexico, 1.

TYPE WRITERS, cases, to Hamburg, 2.

CRAYONS, cases, to Havre, 10.

PRINTING MATERIALS, packages, to British West Indies, 11; to Liverpool, 2; to Cuba, 25; to United States of Colombia, 13; to Dutch West Indies, 9; to Hamburg, 4; to Newfoundland, 2; to Brazil, 5; to Mexico, 15; to Santo Domingo, 13.

ENGRAVINGS, CHROMOS, &c., cases, to Dutch West Indies, 1; to Liverpool, 1; to Venezuela, 1.

FANS, cases, to Mexico, 4.

MAPS, packages, to Mexico, 1.

PRINTED MATTER, cases, to Peru, 1.

PRINTING PRESSES, packages, to Bremen, 7.

ALBUMS, cases, to Bremen, 1; to Mexico, 1.

RULERS, cases, to Liverpool, 2.

CROQUET, cases, to Hamburg, 2.

FANS, cases, to Cuba, 1.

CELLULOID GOODS, cases, to London, 11; to Porto Rico, 1.

ARTISTS' MATERIALS, packages, to Mexico, 5.

ELECTROTYPES, cases, to Liverpool, 4.

GOVERNMENT STATIONERY AWARDS.

TREASURY DEPARTMENT.

Appended is a statement of the prices bid by the contractors to whom the awards were made on the Treasury Department stationery. All of the articles were required to be of the best quality, and samples were required in every case. The numbers at the end of the paragraphs, separated by leaders, refer to the list of contractors immediately below, whose bids have been accepted by the Department:

- 1.—Wm. Ballantyne & Son, awarded items 1, 2, 3, 4, 5, 7, 8, 15, 16, 19, 22, 32, 33, 34, 36, 37, 39, 44, 62, 64, 65, 66, 68, 74, 76, 77, 78, 80, 96, 100, 102, 105, 106, 107, 108, 111, 112, 114, 117.
- 2.—George McDowell, items 6, 38, 40, 41, 47, 82, 83, 84.
- 3.—Wm. A. Wheeler, Jr., items 9, 42, 43, 46, 63, 70, 71, 72, 73, 103, 109, 110, 119.
- 4.—Brown & Lockhart, item 10.
- 5.—C. W. Thorn & Co., items 11, 12, 13, 49, 51, 79, 93, 98, 99, 118.
- 6.—Holyoke Envelope Company, item 14.
- 7.—White, Corbin & Co., items 17, 18, 20, 21, 24, 28, 29.
- 8.—E. D. Lockwood, items 23, 27, 30, 31, 35, 58, 59, 60, 69, 90, 115, 116.
- 9.—Morgan Envelope Company, items 25, 26.
- 10.—William A. Davis, items 45, 50, 52.
- 11.—J. D. Free, Jr., items 48, 53, 54, 61, 85, 92.
- 12.—G. A. Whitaker, items 55, 67.
- 13.—Jos. L. Savage, items 56, 57.
- 14.—Wm. H. Dempsey, item 75.
- 15.—J. M. E. Drake, items 81, 87, 88, 89.
- 16.—J. J. Chapman, item 86.
- 17.—Parker, Jones & Co., items 94, 95.
- 18.—R. B. Dovel's Son's Manufacturing Company, item 97.
- 19.—C. C. Purcell, item 104.
- 20.—Jos. H. Mann, item 112.

No awards were made on items 91 and 101.

- 1—300 reams foolscap, white, ruled, 14 lbs. to the ream, per ream, \$1.93....1.
- 2.—300 reams legal cap, white, ruled, 14 lbs. to the ream, per ream, \$1.93....1.
- 3.—2,500 reams letter, white, flat, 10x16, 12 lbs. to the ream, per ream, \$1.47....1.
- 4.—400 reams letter, white, folded, ruled, 12 lbs. to the ream, per ream, \$1.64....1.
- 5.—500 reams note, white, commercial, flat, 7 lbs. to the ream, per ream, 5c....1.
- 6.—500 reams note, white, commercial, ruled, 6 lbs. to the ream, per ream, 76c....2.
- 7.—200 reams card blotter, Treasury, No. 100, to weigh 90 lbs. to the ream, equal to J. Parker, Son & Co.'s, per ream, \$17.81....1.
- 8.—100 reams envelope paper, gold, 26 lbs. to the ream, per ream, \$2.73....1.
- 9.—500 reams manilla paper, thin, cap size, 480 sheets to the ream, per ream, 17c....3.
- 10.—20 reams manilla paper, strong brown, rope, 18x34½, flat, 56 lbs. to the ream, per ream, \$5.12....4.
- 11.—200 reams manilla paper, strong brown, rope, 20x36, 45 lbs. to the ream, per ream, \$1.08....5.
- 12.—500 reams manilla paper, strong brown, rope, 24x36, 50 lbs. to the ream, per ream, \$1.54....5.
- 13.—200 reams manilla paper, strong brown, rope, 36x40, 80 lbs. to the ream, per ream, \$7.26....5.
- 14.—600,000 envelopes, No. 5, white, per M., 75c....6.
- 15.—800,000 envelopes, No. 6, white, sample furnished by the Department, per M., 95c....1.
- 16.—50,000 envelopes, No. 6½, white, sample furnished by the Department, per M., \$1.18....1.
- 17.—3,000,000 envelopes, 8½x37½, white, sample furnished by the Department, per M., \$1.63....7.
- 18.—700,000 envelopes, 9½x4½, white, sample furnished by the Department, per M., \$1.79....7.
- 19.—300,000 envelopes, 10½x4½, white, sample furnished by the Department, per M., \$2.04....1.
- 20.—20,000 envelopes, 4½x3½, XX, manilla, per M., 54c....7.
- 21.—400,000 envelopes, 8½x3½, X, manilla, per M., 89c....7.
- 22.—125,000 envelopes, 9½x4½, X, manilla, per M., 98c....1.

- 23.—5,000 envelopes, 9½x4½, XXX, manilla, rope, open end, per M., \$3.15....8.
- 24.—15,000 envelopes, 9½x4½, XX, manilla, rope, unglued, per M., \$1.69....7.
- 25.—100,000 envelopes, 9½x5½, XX, manilla, rope, per M., \$2.84....9.
- 26.—100,000 envelopes, 10x6½, XX, manilla, rope, per M., \$3.28....9.
- 27.—25,000 envelopes, 10½x4½, XXX, manilla, rope, unglued, per M., \$3.24....8.
- 28.—10,000 envelopes, 11½x4½, XX, manilla, rope, per M., \$2.60....7.
- 29.—3,000 envelopes, 11½x9, XX, manilla, rope, per M., \$5.40....7.
- 30.—100,000 envelopes, 12½x6, XX, manilla, rope, per M., \$3.75....8.
- 31.—30,000 bags, manilla rope, 5½x3½ deep lap, per M., \$1.39....8.
- 32.—100,000 tags, linen, eyeletted, 2½x1½, per M., \$1.80....1.
- 33.—20,000 tags, manilla, eyeletted, 3½x1½, per M., 66½c....1.
- 34.—10,000 tags, manilla, eyeletted, 4½x2½, per M., 86½c....1.
- 35.—100,000 straw boards (white on one side), 7x3, in wooden cases of 55,000 each, per M., \$1.39....8.
- 36.—75,000 money straps, manilla, 10x1½, gummed on one end, in boxes of 1,000 each, per M., 27c....1.
- 37.—25 doz. quarts copying ink, Arnold's genuine, per doz., \$7.21....1.
- 38.—50 doz. qts. copying ink, A. W. Faber's French, per doz., \$1.52 9-10....2.
- 39.—200 doz. qts. writing fluid, Arnold's, genuine, per doz., \$4.09....1.
- 40.—50 doz. qts. ink, Carter's combined copying ink and writing fluid, per doz., \$5.81 8-10....2.
- 41.—25 doz. qts. ink, Stafford's commercial, per doz., \$3.68....2.
- 42.—50 doz. qts. ink, David's black, per doz., \$2.99....3.
- 43.—75 doz. ½ pts. ink, David's black, per doz., \$1.09....3.
- 44.—25 doz. ½ pts. ink, Spencerian jet black, per doz., \$1.49....1.
- 45.—50 gr. ink, cone black, per gr., \$2.50....10.
- 46.—20 doz. pts. ink, crimson, Carter's, per doz., \$7.96....3.
- 47.—20 doz. pts. ink, crimson, Stafford's, per doz., \$7.93....2.
- 48.—20 doz. pts. ink, crimson, Wm. A. Davis's, per doz., \$7.55....11.
- 49.—50 doz. bottles ink, carmine, David's, No. 3, ground-glass stoppers, per doz., \$2.31....5.
- 50.—200 doz. bottles mucilage, 4 oz. (name of manufacturer to appear on label), with brushes, in boxes of 1 doz. each, per doz., 45c....10.
- 51.—150 doz. qts. mucilage (name of manufacturer to appear on label), per doz., \$3.10....5.
- 52.—24 doz. mucilage brushes, per doz., 10c....10.
- 53.—1 doz. gold pens, John Holland's, desk-holders, gold tips, short nibs, No. 8, per doz., \$19.20....11.
- 54.—1 doz. gold pens, Leroy W. Fairchild's, desk-holders, gold tips, short nibs, No. 8, per doz., \$25.04....11.
- 55.—3 doz. gold pens, Edward Todd & Co.'s, desk-holders, gold tips, short nibs, No. 8, per doz., \$22.10....12.
- 56.—15 doz. knives, buck handles, large, 4 blades, per doz., \$10.25....13.
- 57.—200 doz. erasers, steel, per doz., \$2.25....13.
- 58.—20 doz. scissors, 6-inch, per doz., \$1.23....8.
- 59.—10 doz. shears, 9-inch, per doz., \$5.18....8.
- 60.—10 doz. shears, 10-inch, per doz., \$7.14....8.
- 61.—2 doz. hones, in cases, per doz., \$5.40....11.
- 62.—100 doz. inkstands, heavy, 2-inch, No. 308 glass stoppers, in heavy straw-board boxes of one-half doz. each, per doz., \$1.05....1.
- 63.—100 doz. inkstands, heavy, 3-inch, No. 308 glass stopper, in heavy straw-board boxes, of one-half doz., each, per doz., \$1.50....3.
- 64.—500 inkstands, Brower's patent, in heavy straw-board box, each, \$1.35½....1.
- 65.—12 inkstands, bankers' double, cut glass, each, \$2.85½....1.
- 66.—100 doz. sponge-cups, glass, in heavy straw-board boxes, of one-half doz., each, per doz., 74c....1.
- 67.—50 doz. paper-weights, metal, in heavy straw-board boxes, per doz., \$1....12.

- 68.—50 doz. pen racks, single, in heavy straw-board boxes, per doz., 53c....1.
- 69.—100 doz. paper-folders, ivory, 10-inch, heavy, per doz., \$6.19....8.
- 70.—25 doz. paper-folders, tin, japanned, per doz., 69c....3.
- 71.—50 doz. clips, board, letter size, in heavy straw-board boxes, per doz., \$2.55....3.
- 72.—5 doz. clips, board, cap size, in heavy straw-board boxes, per doz., \$2.98....3.
- 73.—100 doz. clips, metal, small size, in boxes of one dozen each, per doz., 45c....3.
- 74.—50 doz. files, Shipman's patent, 9x11, cloth sides, 2½ leaves, per doz., \$5.24....1.
- 75.—50 doz. copying-brushes, 3½ inch, per doz., \$2.25....12.
- 76.—5 doz. arm rests, polished mahogany, medium size, in boxes, per doz., \$5.22....1.
- 77.—2 doz. call-bells, No. 6400, per doz., \$10.97....1.
- 78.—100 doz. baskets, waste, straight cylinder, 16 inches high, 13 inches diameter, per doz., \$6.38....1.
- 79.—10 doz. baskets, table, straight sides, 14 inches long, 10 inches wide, 3 inches deep, per doz., \$7.20....5.
- 80.—10 gross thumb-tacks, German silver, steel points, screwed in and riveted, ½ inch diameter, per gross, \$3.90....1.
- 81.—100 gross pencils, Eagle Pencil Company's best round black, Nos. 2 and 3, per gross, \$2.91....13.
- 82.—250 gross pencils, A. W. Faber's best round black, Nos. 2, 3 and 4, per gross, \$4.06½....2.
- 83.—50 gross pencils, American Lead Pencil Company's best round black, Nos. 2 and 3, per gross, \$2.90....2.
- 84.—100 gross pencils, Dixon's American Graphite best round black, S. M. and M., per gross, \$3.39....2.
- 85.—75 gross pencils, A. W. Faber's best blue, per gross, \$6.12....11.
- 86.—25 gross pencils, A. W. Faber's best carmine, per gross, \$6.30....15.
- 87.—1 gross pencils, Eagle Pencil Company's blue, automatic, per gross, \$17.46....13.
- 88.—1 gross pencils, Eagle Pencil Company's carmine, automatic, per gross, \$17.46....13.
- 89.—100 gross pencils, Eagle Pencil Company's carmine and blue, hexagon, 9-inch, per gross, \$7....13.
- 90.—7,800 gross pens, steel, viz.: Spencerian—No. 1,500; No. 2, 300; No. 3, 200. Gillott's—No. 294, 500; No. 303, 500; No. 390, 100; No. 404, 1,000. Estabrook's—No. 9, 500; No. 11, 100; No. 14, 1,000; No. 048, 1,000; No. 122, 100; No. 161, 500; No. 284, 50. Miscellaneous—Dreka No. 2, 500; Dreka No. 3, 500; Miller Brothers' Falcon, 500; Pratt's bevel pointed, 50, av. per gross, 44 9-10c....8.
- 91.—200 gross penholders, assorted, per gross.
- 92.—1 gross penholders, cork, per gross, \$6.36....11.
- 93.—2 gross penholders, gutta percha, Davidson Rubber Company, No. 3, per gross, \$13.44....5.
- 94.—8,500 gross rubber bands, A. W. Faber's, Davidson Rubber Company's, or Parker, Jones & Co.'s, viz.: 2,000 No. 30, 1,500 No. 31, 1,500 No. 32, 1,500 No. 33, 1,000 No. 45, 600 No. 00¼, 300 No. 00½, 100 No. 90¾, av. per gross, 42 7-10c....16.
- 95.—800 Gt. gross rubber bands, A. W. Faber's, Davidson Rubber Co.'s, or Parker, Jones & Co.'s, viz.: 400 each Nos. 11 and 17, av. per gt. gross, \$1.19....16.
- 96.—2,000 lbs. sealing wax, red, best, per lb., 31½c....1.
- 97.—1,000 lbs. sealing wax, brown, per lb., 14c....17.
- 98.—5,000 lbs. twine, samples furnished by Department if requested, per lb., 31c....5.
- 99.—3,000 lbs. twine, No. 1, sample furnished by Department if requested, per lb., 9¼c....5.
- 100.—800 lbs. pins, American & Howe Pin Co., best solid-headed, in one-half pound boxes, viz.: 200 No. 1; 300 No. 3; 200 No. 4; 100 No. 5; av. per lb., 50½c....1.
- 101.—200 lbs. sponge, per lb., —.
- 102.—50 lbs. rubber, No. 20, A. W. Faber's improved artist's, per lb., 85½c....1.
- 103.—50 lbs. rubber, No. 20, Eagle Pencil Co.'s diamond, per lb., 77½c....3.
- 104.—50 lbs. rubber, No. 20, Davidson's velvet, per lb., 90c....18.
- 105.—500 boxes, cut quills, per box, 68c....1.

106.—3,000 boxes paper fasteners, No. 2, tin or white metal, 100 in box, per box, 17c....1.
 107.—100 boxes seals, notarial, large, no gilt, per box, 9½c....1.
 108.—3,000 boxes seals, bond, thin, green paper, gummed, 100 in box, per box, 2½c....1.
 109.—2,000 spools tape, red, No. 21, 72 yards per spool, per spool, 18 1-10c....3.
 110.—1,000 spools tape, red, No. 31, 72 yards per spool, per spool, 27c....3.
 111.—1,200 copying-books, 10x12, full 500 pp., half-bound, cloth sides, each, 63½c....1.
 112.—300 copying books, 10x12, full 500 pp., half-bound, cloth sides, without index, each, 63½c....1.
 113.—200 copying books, 10x14, full 500 pp., half-bound, cloth sides, each, 85c....19.
 114.—21 mucilage reservoirs, large, each, 51½c....1.
 115.—24 tapes, Chesterman's metallic, 50 ft., in 11ths, in cases, each, \$1.77....8.
 116.—50 tapes, Chesterman's metallic, 100 ft., in 10ths, in cases, each, \$2.77....8.
 117.—20 copying-presses, T. Schriver & Co.'s, French pattern, 10x15, in boxes, each, \$18.40....1.
 118.—10 copying-presses, T. Schriver & Co.'s, style F, best, 11x16, in boxes, each, \$12.35....5.
 119.—40 copying-presses, T. Schriver & Co.'s, or R. Hoe & Co.'s, 10x15, cast-iron arch, wood-cut to accompany proposal, in boxes, each, \$6.07....3.

POST-OFFICE DEPARTMENT.

Appended is a list of contractors to whom awards were made on the Post Office Department stationery. All of the articles were required to be of the best quality, and samples were required in every case. The numbers at the ends of the paragraphs, separated by leaders, refer to the contractors, designating whose bids have been accepted by the Department:

1.—Nelson M. Baldwin, Newark, N. J., item 73.
 2.—Ballantyne & Son, 428 Seventh street, Washington, D. C., items 22, 24, 29, 30, 31, 32, 34, 38, 39, 40, 42, 44, 61, 69, 82, 92, 93, 95, 104.
 3.—James J. Chapman, 915 Pennsylvania avenue, Washington, D. C., items 3, 9, 11, 99.
 4.—William A. Davis, 18 Arch street, Boston, Mass., item 66.
 5.—Joseph D. Free, Jr., 1343 F street, Washington, D. C., items 64, 76, 97, 102, 107.
 6.—Holyoke Envelope Company, Holyoke, Mass., items 16, 17, 18, 19, 25, 26, 27, 28, 35.
 7.—George McDowell & Co., 18 and 20 South Sixth street, Philadelphia, Pa., items 6, 10, 12, 86.
 8.—James R. Michael, 455 Broadway, New York, N. Y., items 15, 20, 43, 51, 52, 53, 54, 55, 56, 57, 58, 59, 60, 62, 63, 67, 68, 80, 81, 83, 87, 88, 89, 90, 91, 94, 105.
 9.—Platner & Porter Manufacturing Company, Unionville, Conn., items 4, 5, 4, 108.
 10.—C. W. Tborn & Co., 315 Ninth street, Washington, D. C., items 8, 13, 47, 49, 50, 65, 70, 71, 72, 75, 79, 98, 103.
 11.—Wm. A. Wheeler, Jr., 206 Broadway, New York, N. Y., items 41, 46, 74, 78, 96, 101, 106.
 12.—G. A. Whitaker, 911 Pennsylvania avenue, Washington, D. C., items 1, 2, 7, 23, 36, 45, 48, 77, 84, 100.
 13.—White, Corbin & Co., Rockville, Conn., items 21, 33, 37.
 No acceptance recommended, item 85.
 1.—40 reams foolscap paper, "P," white, flat, 16 lbs. to the ream, per ream, \$2.07....12.
 2.—30 reams legal cap, "P," white, trimmed and ruled, various widths, 16 lbs. to the ream, per ream, \$2.23....12.
 3.—40 reams quarto post, "P," white, flat, 10 lbs. to the ream, per ream, \$1.23....3.
 4.—300 reams quarto-post, "P," white, flat, 12 lbs. to the ream, per ream, \$1.73....9.
 5.—100 reams quarto-post, "P," white, flat, 14 lbs. to the ream, per ream, \$2.02....9.
 6.—100 reams commercial note, "P," white, ruled, various widths, 7 lbs. to the ream, per ream, 94c....7.
 7.—20 reams note, Marcus Ward & Co., R. I. L., commercial, heavy, ruled or unruled, per ream, 98c....12.
 8.—20 reams packet note, "P," white, flat, 7 lbs. to the ream, per ream, 93c....10.

9.—5 reams folio post, "P," white, flat, 28 lbs. to the ream, per ream, \$3.47....3.
 10.—10 reams B. & P. Lawrence, Kent linen, 16½x 21½, heavy, per ream, \$5.50....7.
 11.—5 reams double cap, "P," white, flat, 17x28, 36 lbs. to the ream, per ream, 4.47....3.
 12.—3 reams imperial cap, "P," flat, 21x31, 70 lbs. to the ream, per ream, \$10....7.
 13.—10 reams Treasury card-blotter, No. 100, 19x21, to weigh not less than 100 lbs. to the ream, per ream \$11....10.
 14.—4,000 sheets bond paper, pure linen stock, white, 19x24, per sheet, 1 1-10c....9.
 15.—10 doz. packs bristol board visiting cards, plain, medium size, per doz., 58c....8.
 16.—20,000 envelopes, ad., white, heavy, XX, 8½x3½, per M., \$1.48....6.
 17.—60,000 envelopes, ad., white, heavy, XX, 8½x 3½, per M., \$1.48....6.
 18.—60,000 envelopes, ad., white, heavy, XX, 9½x4, per M., \$1.72....6.
 19.—15,000 envelopes, ad., white, heavy, XX, 10¼x 4¾, per M., \$2.16....6.
 20.—5,000 envelopes, ad., white, heavy, XX, 11x5, per M., \$2.47....8.
 21.—10,000 envelopes, ad., white, heavy, 10x4½, per M., \$2.24....13.
 22.—10,000 envelopes, ad., manilla, 7½x10, heavy, per M., \$1.75....2.
 23.—10,000 envelopes, ad., manilla, 7x5, per M., \$1.70....12.
 24.—10,000 envelopes, ad., manilla, 8½x5½, per M., \$1.35....3.
 25.—10,000 envelopes, ad., manilla, 5½x10½, heavy, per M., \$2.20....6.
 26.—200,000 envelopes, ad., manilla, 3½x8½, thin, per M., 80c....6.
 27.—5,000 envelopes, ad., manilla, 15x9, heavy, per M., \$6.25....6.
 28.—10,000 envelopes, ad., manilla, 8x9½, heavy, per M., \$3.75....6.
 29.—10,000 envelopes, ad., manilla, 11½x7½, heavy, per M., \$3.90....2.
 30.—5,060 envelopes, ad., manilla, 12x9, heavy, per M., \$4.60....2.
 31.—3,000 envelopes, ad., manilla, 12x15, heavy, per M., \$6.35....2.
 32.—2,000 envelopes, ad., manilla, 20x16, per M., \$23.50....2.
 33.—6,000 envelopes, ad., heavy, pure linen stock, No. 6, per M., \$1.75....13.
 34.—6,000 envelopes, ad., heavy, bond paper, pure linen stock, No. 5, per M., \$2.15....2.
 35.—20,000 envelopes, ad., white, No. 6½, XX, per M., \$1....6.
 36.—10,000 envelopes, Marcus Ward & Co., R. I. L., No. 1, Baronial, heavy, per M., \$2.52....12.
 37.—75,000 envelopes, ad., white, No. 5, XX, per M., 88c....13.
 38.—516 gr. rubber bands, 0¼, 00½, 000¼, 000¾, 0000¼ (see Note 1), av., per gr., 52½c....2.
 39.—2,724 gr. rubber bands, Nos. 11, 16, 19 and 31 (see Note 1), av., per gr., 20½c....2.
 40.—910 gr. pens, Gillott's, Esterbrook's, Spencerian, Perry's, Dreka's, Cohen & Son's, Payson, Dunston & Scribner's (see Note 2), av., per gr., 50½c....2.
 41.—15 gross pens, Perry's, No. 127, gilt points, per gross, 49c....11.
 42.—10 doz. barrel pens, Perry's, No. 70, per doz., 18½c....2.
 43.—10 doz. cut quills, per doz., \$2.70....8.
 44.—25 doz. swan-quill pens, Gillott's, No. 808, per doz., 33½c....2.
 45.—5 doz. drawing or ruling pens, per doz., \$3.75....12.
 46.—36 doz. pen-holders, assorted, per doz., 13c....11.
 47.—100 doz. pen-holders, gutta-percha, 10 d z. No. 1, 30 doz. No. 2, and 60 doz. No. 3, av. per doz., \$1.05....10.
 48.—3 doz. pen-holders, gutta-percha, reversible, per doz., \$2.23....12.
 49.—6 doz. propelling pencils and pen-holders, gutta-percha, with leads, per doz., \$1.20....10.
 50.—3 doz. propelling pencils, ivory or gutta-percha, with leads, per doz., \$2.10....10.
 51.—300 doz. pencils, black, A. W. Faber's, Nos. 2, 3 and 4, equal quantities round and hexagonal, av. per doz., 33c....8.

52.—264 doz. pencils, A. W. Faber's, round; 193 doz. blue; 36 doz. red, and 36 doz. green, per doz., 58c....8.
 53.—120 doz. pencils, Dixon's American graphite, equal quantities round and hexagonal, various grades, per doz. 31c....8.
 54.—25 doz. carmine and blue, A. W. Faber's hexagonal, per doz., 66c....8.
 55.—20 doz. Eagle automatic pencils; 10 doz. blue, 5 doz. red, 5 doz. green, av. per doz., \$1.48....8.
 56.—240 boxes leads, of 6 leads each, for Eagle automatic pencil; 120 blue, 60 each red and green, per box, 10 74-100c....8.
 57.—180 doz. Eagle Pencil Company's black pencils, Nos. 2, 3 and 4, equal quantities round and hexagonal, per doz., 27c....8.
 58.—10 doz. Eagle Pencil Company's cedar-polished crayon marking pencils, blue, per doz., 26c....8.
 59.—3 doz. writing fluid, Maynard & Noyes, quarts, per doz., \$3.25....8.
 60.—2 doz. writing fluid, Arnold's, genuine, quarts, per doz., \$3.90....8.
 61.—3 doz. copying ink, Arnold's, genuine, quarts, per doz., \$7.28....2.
 62.—10 doz. combined copying and writing ink, Carter's, quarts, per doz., \$5.75....8.
 63.—8 doz. French imperial violet copying ink, A. W. Faber's, genuine, quarts, per doz., \$4.40....8.
 64.—4 doz. carmine ink, John B. Davids', pints, glass stoppers, per doz., \$8.50....5.
 65.—4 doz. blue-black copying ink, John B. Davids', quarts, per doz., \$6....10.
 66.—2 doz. blue ink, Thaddeus Davids', quarts, per doz., \$2.75....4.
 67.—4 doz. carmine ink, Stafford's, quarts, glass stoppers, per doz., \$8.20....8.
 68.—3 doz. writing fluid, Sheets', quarts, per doz., \$1.40....8.
 69.—3 doz. writing fluid, Spencerian, blue-black, quarts, per doz., \$4.98....2.
 70.—15 doz. black ink, Thomas', quarts, per doz., \$3.90....8.
 71.—5 doz. universal black ink, Staffords', quarts, per doz., \$2.23....10.
 72.—20 doz. mucilage, quarts, per doz., \$3.07....10.
 73.—15 doz. mucilage stands, 5 doz. 5 oz. and 10 doz. 8 oz., with brush, Morgan's patent, av. per doz., \$1.88....1.
 74.—8 doz. pen racks, per doz., \$1....11.
 75.—15 doz. rulers, india-rubber, flat, 5 doz. 16-inch, 6 doz. 18-inch and 4 doz. 24-inch, av. per doz., \$2.78....10.
 76.—6 doz. paper-folders, ivory, heavy, 9-inch, "Congress," per doz., \$2.53....5.
 77.—15 doz. inkstands, glass, 5 doz. 2½-inch, 5 doz. 3-inch and 5 doz. 3½-inch, round, av. per doz., \$1.65....12.
 78.—20 doz. inkstands, square, 8 doz. 2½-inch, 12 doz. 3½-inch, av. per doz., \$7.20....11.
 79.—12 doz. sponge-cups, 3 inches in diameter, thick glass, per doz., 65c....10.
 80.—20 lbs. Eagle Pencil Company's bevel eraser, 20 pieces to the pound, per pound, 66c....8.
 81.—25 doz. pencil and ink erasers, A. W. Faber's "Mammoth," per doz., \$1.36....8.
 82.—36 doz. steel erasers, 30 doz. knife and 6 doz. spear, ivory handles, av. per doz., \$4.60....2.
 83.—10 doz. office shears, 6 doz. 9-inch, 2 doz. each 10 and 11-inch, per doz., \$5.58....8.
 84.—10 doz. paper weights, metal, assorted, per doz., \$1....12.
 85.—10 doz. envelope knives, samples unsuitable.
 86.—10 doz. paper weights, glass, assorted, per doz., \$1.94....7.
 87.—5 doz. press-copy books, white paper, 10x12, 600 pages, per doz., \$9.75....8.
 88.—6 doz. press-copy books, white paper, 10x12, 1,000 pages, per doz., \$14.50....8.
 89.—10 doz. press-copy books, white paper, 10x14, 1,000 pages, per doz., \$17.75....8.
 90.—1 doz. press-copy books, white paper, 11½x14½, 1,200 pages, per doz., \$31.50....8.
 91.—15 doz. memorandum books, demy, 8vo., sheep, 100 leaves, dollars and cents, or plain, as ordered, 7½x4½, per doz., \$1.84....8.
 92.—30 doz. office scratch-books, Hindsill's, Nos. 5002, 5006, 5,008, 5010, per doz., 70c....2.
 93.—10 doz. blotting-pads, Moore's, large, plain, per doz., \$4....2.

- 94.—4 doz. pounce, assorted, per doz., 57c...8.
 95.—2 doz. pounce sifters, per doz., \$1.55...2.
 96.—12 doz. boxes seal papers, gilt, 2¾ in. in diameter, 100 in a box, per doz., \$2.30...11.
 97.—2 doz. boxes of eyelets, "D. B." large boxes, per doz., 18c...5.
 98.—15 doz. spools red tape, best quality, No. 21, per doz., \$2.10...10.
 99.—12 doz. hanks silk taste, various colors, per doz., 48c...3.
 100.—6 doz. stamping ribbon, 1 to 3 in. wide, per doz., \$3.75...12.
 101.—15,000 paper fasteners, McGill's, No. 2, round heads per M., \$2.35...11.
 102.—50 lbs. sealing-wax, 4 sticks to the lb., Pomeroy & Son's first quality, per lb., 25c...5.
 103.—1.0 doz. papers pins, best solid-head, Pyramidal Pin Company's, Nos. 3, 4, 5 and 6, per doz., 13c...10.
 104.—25 lbs. sponge for sponge cups, fine, per lb., 56c...2.
 105.—20 lbs. linen twine, white, various size, per lb., 34c...8.
 106.—3 doz. arm rests, polished mahogany, medium size, per doz., \$5.40...11.
 107.—3 doz. Excelsior pasteboard clips, nickel, per doz., \$2.50...5.
 108.—1,000 reams electric pen paper, cap size, per ream, 53c...9.

Note 1.—The following quantities and varieties of rubber bands will be required: 60 gross 0¼, 24 gross 0¼; 36 gross 000¼; 103 gross 0000¼; 288 000¼ (item No. 39); 36 gross No. 11; 108 gross No. 19; 1,032 gross No. 31; 1,440 gross No. 16; 108 gross No. 14 (item No. 39).

Note 2.—The following quantities and varieties of pens will be required: Gillott's—25 gross 17; 35 gross 304; 25 gross, 332; 35 gross 390; 100 gross 404; 25 gross 417. Spencerian—75 gross 1; 40 gross 2; 35 gross 3; 10 gross 5; 5 gross 6; 20 gross 26, fine; 25 gross editorial, 20 f. Esterbrook's—100 gross 048; 40 gross 122; 40 gross 16; 15 gross 14; 10 gross Silverine, 1; 10 gross Silverine, 2; 15 gross 9; 20 gross 135; 13 gross 130; 20 gross 205; 20 gross 182. Dreka's—25 gross 2; 75 gross 3. Payson, Dunston & Scribner's—25 gross 111. H. Cohen & Son's—15 gross 1,022, 10 gross Pratt's bevel pointed.

Note 3.—All envelopes to be full government cut with wide lap; sizes may be slightly larger than called for above, but no smaller. Each box to be plainly labeled with item number and actual size, and to contain 500 envelopes (except those furnished under items Nos. 26, 27, 28, 29, 30, 31 and 32, which must be put up in boxes of 250 each). Charges for intermediate sizes ordered must not be greater than prices bid for next larger size.

Note 4.—Any different sizes or quantities ordered of articles that are designated by quantities or measurement to be furnished at prices corresponding with prices of designated quantities or sizes.

Note 5.—Each sample should be plainly marked with the name of the bidder, number of the item and price. Proposals must not be sent in the same package with samples.

A CAVERN OF CURIOSITIES.

One of the most remarkable caves on the continent is to be found in Gallatin County, Ill. It has long enjoyed a local fame, but, strange to say, its interior wonders have never been described in print. A correspondent of the *St. Louis Globe-Democrat* arrived there after traversing a well worn country road through a good farming region, with stretching woods here and there, and a series of rolling hills. The road terminates at the foot of a miniature mountain, whose crest is 500 feet above the level of the valley below, and which overlooks Shawneetown, Harrisburg, Eldorado, Equality, and the Ohio River for twenty miles up and down. At the base of the hill there are some five sulphur springs where people camp in the summer time. There is a small grocery there and a rural restaurant and a farm house. The mouth of the cave is situated about half-way up the side of the hill. The way leading up is fearfully

rocky, and in places it is too broken and steep for a horse to ascend. On the north side, among a grove of cedars, the opening, about the size of an ordinary doorway, was found, and in a sort of weather box near by there was an attendant who charges a small fee for conducting casual visitors through the cavern and pointing out its curiosities. The entrance is fully high enough for the tallest man to walk erect. The guide called attention to the fact that the air at that point was almost freezing cold, but that the temperature would be quite warm and comfortable when the inside was fairly reached. He mentioned this diversity as a phenomenon that is observable both winter and summer, which had often excited the wonder of travelers, but had never been explained. Absolute darkness reigns within, and explorers are provided with lighted candles, lamps going out too easily. From the opening there is a passageway 40 feet long and 6 feet wide. The walls are of sandstone that appear to have been subjected to intense heat. The ceiling is not over eight feet over head, but in the second passageway, running at right angles to the first, it is fully 25 feet to the top. Here are a series of corridors, laid off with the regularity of city thoroughfares, and leading to all points of the compass. The floor is of dirt mainly, but here and there long slabs of burned sandstone make a secure and easy path. A distance of 500 feet is traversed before the first capacious apartment is reached. Here a natural grotto about seventy feet in length and breadth presents a wild and weird appearance. The ceiling forty feet above is studded with stalactites, many of them pendant like icicles and reflecting a brilliant light, where the rays of the candles fall. The walls are of a light yellow sandstone, and many curious inscriptions, with names notable and names unknown, are cut deep in the rock.

Through this apartment a stream of water three or four feet wide tickles to the south, where it is lost in the earth. It is about two feet deep, and it is said that eyeless fishes have been caught from it, as well as an amphibious lizard, coal black in color and without eyes.

Further on, in an apartment nearly as large as the former, the correspondent's attention was directed to a large inscription on the wall, cut deep in the rock, which read, "Sepulchre of Shawnee Braves." The guide, in explaining this inscription, said that the Shawnee Indians once inhabited the region surrounding the cave, and it was a legend that this particular cavern was used as a burial-place for the great chiefs of the tribe. No mounds were visible on the surface of the floor, but it was related that an early settler once brought a spade, and on digging a foot below found a regular charnel house, and the guide said there could be no doubt that this particular part of the cavern was full of human bones.

From the mouth of the cave on the north to its extreme southern limit the distance is two and a half miles, the route being easily passable all the way. There are innumerable passages leading to the right and left, and only a few of these have been explored. From a series of yawning holes in the west wall of one compartment a dozen separate torrents leap down on the rocks below, and rush into a subterranean channel that opens in the centre of the rocky floor. The wild roar and still wilder echoes from the cataract can be heard hundreds of yards away, and on a nearer approach become somewhat deafening. The water is as clear as crystal, reflecting a million diamonds in the light of the tallow candles. The underground channel here is over thirty feet deep, as was proved by letting

down a line and heavy lead. The current is so strong that it was difficult to get a perpendicular measurement, though the lead weighed a pound. One of the strangest features to be encountered was pointed out by the guide as he conducted the party to a small chamber on the east of what appears to be the main thoroughfare of this great hollow in the earth. In the wall, within a foot of the surface of the floor, there is an aperture three or four feet in diameter, with torn and jagged edges as if the rock had been rent asunder with giant powder. Candles held to the hole show a rough inclined plane, extending downward for ten feet, and then an abrupt termination on the verge of what appears to be an illimitable cave of darkness. The echo of the human voice from this inner cavern is something fearful. A rock rolled down the inclined plane and into the inner chasm is not heard from for fully thirty seconds, when there comes a sound as if a gun had gone off, succeeded by a terrific discharge of musketry, volley following volley, until the sound dies away like a faint moan in the bowels of the earth.

PAPER FLOOR COVERING.

A new kind of matting or carpet for covering floors is composed of a fabric woven or knit from strands or threads of paper in such manner that when laid upon a floor it will serve all the purposes of ordinary straw matting or textile carpets, and can be cleansed by washing when such becomes necessary or desirable.

Any kind of strong paper is taken and cut or formed into strips of the required or suitable size, and then twisted or spun into strands or threads. If a fine texture is desired, the strips are made smaller than where a coarse texture is preferred; but in either event the twisted or spun strands or threads are woven or knit into a fabric by any of the well-known methods practised in weaving or knitting textile material. Before or after the paper strands or threads are woven or knit into the matting or carpet the paper may be rendered water-proof by saturation or impregnation with any known waterproofing material; or it may be otherwise chemically treated in order to strengthen it and permit the use of water or other cleansing fluid in washing the floor covering when desired to free it from dirt or stains, and it may also be treated with carbolic acid or other material to prevent the ravages of insects.

If the strips of paper are properly and tightly twisted or spun into strands or threads and closely woven or knit the fabric can be subjected to a moderate amount of washing without liability to injury. The strips of paper may be formed very narrow and spun or twisted with strands of yarn; or the twisted paper strands may be woven or knit with some suitable animal or vegetable matter, the strips of twisted paper forming the warp or the woof and the animal or vegetable matter forming the warp or the woof, as desired.

Paper strands or threads produced from differently-colored paper, produce a variety of designs in the fabric during the process of weaving or knitting, as well as the various designs that are produced in ordinary tapestry; and the fabric can be woven or knit into any determined dimensions to be fitted to the floor of an apartment, so that the floor covering will be in a single piece.

Paper produced from what is known as the "palmetto-leaf" is preferred for this use as it is strong and durable; but it is obvious that paper produced from other substances can be used.

BASE-BALL.

A return match at base-ball will be played between the nines representing the Philadelphia and Baltimore paper trade on Saturday next. The following will explain the arrangements therefor:

An informal meeting of the Philadelphia Paper Trade was held in parlor 28, American House, Wednesday, June 27, to adopt measures for the entertainment of the Baltimore Paper Trade.

O. E. Thomas was called to the chair. Edwin J. Howlett was elected permanent chairman, M. O. Raiguel secretary and Louis Armstrong treasurer.

It was unanimously agreed that the entertainment should be held on Saturday, July 7, to consist of a base-ball match between picked nines of the paper trade of the two cities, to be followed on the same evening by a banquet given to the visitors at some place to be selected.

The following Committees were nominated and elected:

Committee on Reception.—J. G. Ditman, A. M. Bossé, A. S. Rudolph, Charles E. Howlett, and J. L. Weatherly.

Committee on Banquet.—A. R. Cox, Benjamin Wolf and Louis Armstrong.

Committee on Badges, Printing, &c.—F. E. Miller, Archer Tevis, and E. S. Hart.

Committee on Subscription.—S. M. Kennedy, O. E. Thomas, A. S. Rudolf and M. O. Raiguel.

Committee on Grounds.—Archer Tevis and A. S. Watson.

E. J. Howlett was elected a Committee of One on "Toasts."

A. R. Cox was unanimously elected Captain of the Philadelphia "Nine," with authority to select the same and engage the umpire.

On motion, it was unanimously agreed that subscriptions should be received only from the firms of the trade.

It was unanimously agreed that at least twenty ticket of admission to the hall grounds should be

given to each firm for distribution at their discretion.

On motion, meeting adjourned to meet at same place Monday evening, July 2, at 8 o'clock.

M. O. RAIGUEL, Secretary.

GIBSON'S CHRISTMAS LINE.

John Gibson's line of Christmas cards and satin novelties exceeds all previous efforts of the house. The designs are new and original, and embrace a large variety of unique and exquisite goods. They are fringed and otherwise embellished, the fringe being of new tints and styles. All of the goods are richly perfumed. The card stock consists of one hundred and fifty designs, most of which have fancy backs. The satin and other special novelties comprise forty designs, all of which, without exception, are of a high order of merit. They come in leatherette mats and are embellished with silken cords, tassels, bells, and balls, and all of them can be used as bannerets. Among the most notable of the satin goods are the following named:

No. B 1 is of shield shape with a square centre-piece of satin on which appears a very natural looking rose; a curtain of red satin to which is attached miniature white fringe hangs from the top. No. A 1 is a double card showing four designs, the front one being a satin lithograph picture; the second page having a small envelope attached and containing a card which is intended for the name of the donor, the other designs showing respectively flowers and a landscape. A 2, A 3 and A 4 are somewhat similar to A 1. Nos. 7 and 8 M are 13 x 15 inches in size, and each consists of a leatherette mat about one and one-half inches in width, surrounding a satin lithograph. These cards are illuminated by roses of different colors and Japan lilies. They would make very handsome ornaments.

A series having beveled-edged, mats is very unique and rich. It comprises Nos. 1 M, 5 M, and 9 M. These also contain the illuminated satin centre-piece, and are embellished with great taste. The designs include roses, tulips and dogs' heads. No. 3 M shows butterflies, orioles, parrots. The designs of No. 4 M represent ideal heads. No. 2 M, is illuminated with floral wreaths, tastefully arranged. No. 6 M illustrates a garland of wild and garden flowers.

Among other specialties are the artistic prize cards, which this house controls. They include twelve designs by prominent artists. The cards are large, richly finished, and show artistic work of no mean order. Special attention is invited to Nos. 11 and 12 M of this series.

Among the numerous assortment of the general lines of cards are some which are novel, original and very striking. No. 1,054 shows in three designs the national flowers of Great Britain and Ireland, viz, the rose, shamrock and thistle. No. 1,087 comes in twelve designs of flowers and landscapes, elaborately finished. No. 1,059 shows a series of ideal heads. No. 1,061 illustrates busts of young and handsome girls. Nos. 1,062 and 1,092 are attractive rose series, on which the illuminations are such as to resemble hand paintings. No. 1,050 is an exquisite lily card. No. 1,046 comes in four designs, each of which represents swallows and landscapes. No. 1,086 illustrates in three designs the lion, tiger and leopard in their lairs. No. 1,079 shows six designs of ferns. No. 1,055 comes in two designs of palette decoration, with roses and other flowers. Nos. 1,095 and 1,098 are frosted cards, showing appropriate Christmas landscape designs. The frosting of these goods is performed with much taste. It is only applied to the branches of the trees, and its effect is both pleasing and rich. The other designs of the line are very attractive, and there is every probability of the whole meeting with an extensive sale.

enue. It is undoubtedly the handsomest bookstore in Chicago, beautifully fitted up and lighted, having windows on two streets, which is very necessary in a bookstore. If the building had been put up expressly for them it could not be made more suitable.

The National Exposition of Railway Appliances is now a thing of the past, and all honor is due to its promoters, for it has been an exhibition that Chicago may well be proud of. Nothing of this sort has ever been attempted in this country before. Of course, there has been the usual number of kickers, among whom are some exhibitors whose displays were not in positions to suit them. One or two Chicago daily papers, which did not get enough money out of the concern for advertising and puffs, condemn the whole thing and rake the management from stem to stern. O. T. O. M.

TORONTO CHAT.

(FROM OUR REGULAR CORRESPONDENT.)

TORONTO, Ont., June 29, 1883.

I have recuperated to some extent from my severe efforts in your behalf in April and May, and must again, I suppose, let my voice be heard. It has not, as you will observe as we go on, reached its wonted clearness, and all that—in fact, it is a little shaky still. However, we must make the best of it under the circumstances. One thing that set me up a good deal was reading the report of the Lockwood Annual Dinner. The speeches were happy and to the point. And why not, with such a *menu*? I suppose a United Stateser's "intellect" is something after the fashion of a Britisher's or a Canuck's; it is to be reached through his stomach, and if the bill-of-fare is tip-top, his thoughts rise to the occasion, and when the time comes he goes off "pop." And then things are so very much nicer to the taste when they are presented in a language the common herd do not understand. An Irishman who had lived on potatoes and salt half his life would certainly open his eyes when his wishes for "pommes de terre" discovered itself as the tuber on which his life and development had depended, and take this:

Bouchées à la Reine.

ENTREES.

Agneau de Printemps rôti, Sauce à la Menthe.

Petits Pois Verts.

Pommes de Terre, à la Duchesse.

Ris de Veau, à la Périgord.

Of course it is understood that all the Lockwood staff are conversant with all sorts of languages, but suppose an ignorant Canadian, like myself, should have been there, with this artistic *menu* in front of my plate, what would I have done? Made a guy of myself, sure! I could never have made the above out without the aid of a dictionary; and then to think after all that it only means spring lamb, mint sauce, green peas, &c. I know this is the style, but I protest against it. It is affected nonsense. The English language is broad and expressive. Its progenitors, as well as its descendants on this side of the Atlantic—no small crowd!—speak it. It is the progressive force of the world, in the people who speak it, and, therefore, it should be stood by. Now, suppose we give a specimen of what we mean, and which would be intelligible to the ordinary American (which means Canucks, too): Roast lamb with peppermint "sass," green peas, baked taters, and roasted veal. But on extraordinary occasions, when the thing is to be done up in tip-top style, and a *menu* really *recherché*—this is French—is wanted. Why not strike a new line, and give the substantial and condi-

ments from a scientific point of view? This would familiarize one with botanical and zoological terms, and a person might soon learn to get at the real inwardness of a modern crack *menu*. You catch our idea, which is sufficient, and then I leave it for you to ponder over.

In the way of business, there is really nothing at this moment new or interesting to be said. We are like "old John Brown, &c., moving on;" but a better illustration, with one exception—because we are moving very much faster—is the glacier, and it is only just a matter of time when we shall push you into—the—the, well, South Arctic.

There are a large number of travelers about just now, and if they could spread themselves around a little it would be nice. I went into a place yesterday and there were only six waiting to see the principal; this sort of thing becomes monotonous when it is kept up, and it is; and while buyers in most respects are courteous, one can see that these interruptions are a matter of real grievance, because while two out of three go out as they come, yet there is the interruption and the time consumed.

Those who can do so are in anticipation of an outing, and some are away already. Richard Brown, of Brown Brothers, sailed on Monday for England via New York.

We have been of late getting floods of rain, not on dry ground, and it is feared that much damage has been done to crops on low lands. The fruit prospects are excellent.

Confound that *menu* of yours! It haunts me like what's his name's ghost in Mr. Shakespeare's writings. Only fancy an unsophisticated individual like myself faced with this which I repeat: "Agneau de Printemps rôti, Sauce à la Menthe; Petits Pois Verts; Pommes de Terre, à la Duchesse; Ris de Veau, à la Périgord." Oh, dear, dear, I am going to conclude now, and I dare say you may think I had better have done that some time ago. But I am going to say this, and you can do with the whole thing as you will, most undoubtedly, please. You are overworked, run down. I have hinted before that this is the place where you can set yourself up. Fresh air, fine scenery, and I am glad to say not invaded yet by fashion and all its belongings—places where you can have any amount of boating, fishing, &c., in places that would charm any man who loves nature with delightful surroundings, where he can stretch himself under the shade of pine-wood trees and listen to the soft murmuring of the wind as it plays with the leaves and the soothing buzz of the *muskeeter*. No swallow-tail coats, no cravats, no nonsense—in fact, healthy, rational enjoyment. I think it was St. Paul—and I do not speak with any irreverence—said something about a man in Macedonia, wherever that is, coming over to help him. Well, now, come over and see if there are not enjoyments to be had on this side the line that are new and worth looking after. C. H.

GLASS PAINT FOR FLOORS.

Water-glass is now being made use of in the production of a paint which, in addition to its beauty and durability, is also advantageous as a means of protection against the action of fire. As a floor paint it is found especially valuable. The surface having been well cleaned, any crevices or cracks between the boards are next luted with a thick mixture of water-glass and pulverized chalk or gypsum; then, by means of a stiff brush, a coating of water-glass, of syrup-like consistency, is spread over the floor, and to this succeeds a second coating of the same, mixed with the desired color—the latter a mineral color,

as the alkalies of the water-glass commonly decompose vegetable colors. This coating having become dry, other layers of the water-glass are given, until the floor acquires a fine, lustrous appearance. In order to insure a polished brightness, the surface is ground off a little, oiled and thoroughly dried. The water-glass is not worn away either by heat or by continued use.

GLASS MOSAIC.

A recent writer says, with regard to Italy, glass mosaic was employed everywhere, almost to the exclusion—sometimes altogether to the exclusion—of other forms of decoration in the interiors of all the important early Christian churches in Italy. Those of Ravenna and Rome are covered with it, and in the tenth century even the whole of the interior of St. Mark's, Venice, from about fifteen feet or twenty feet above the floor, is literally sheathed with it as if with a tight skin. The ground-color of these mosaics is sometimes a dark rich blue, as in the interesting little building called Mausoleum of Galla Placidia, at Ravenna, but more usually it is golden. The tesserae vary in size from that of a fingernail, or larger, to almost microscopic minuteness, and no particular care is taken about their exact form. They are always arranged in rows or lines following the contours of the objects represented, and the features, hands and other important parts are drawn with the smaller pieces, and the groundwork and flat surfaces with the larger ones. The drawing is stiff and conventional—to put it in polite language—but, on the whole, pleasing and perhaps more decorative in character than the highly-finished productions of a later age. The color is magnificent in the extreme. I could never like the system adopted of running the mosaics round the arrises of arches and piers. It altogether confuses the line of the architecture; and through some say there is much poetry in the mystery that results, it nevertheless seems to me to offend against true decorative principles. Besides, I do not see that mystery does necessarily mean poetry; there is plenty of the former, but very little of the latter, in a London fog. I should much like to try the effect of a marble molding on the arrises the first time a client gives me an order for a mosaic-covered interior. The mosaics with which the west fronts of Siena and Orvieto cathedrals are covered, and most of those in the west front of St. Mark's, are of late date, gorgeous in color, unconventional in treatment, and scarcely, I think, worthy of the admiration often expressed for them. I might say much about the painted and fresco decorations, both of early date, at Pompeii and Rome, and the later ones at Perugia, Pisa, Florence, Assisi, Padua, and elsewhere; but they afford more than sufficient matter for a paper by themselves, and I leave them with the hope that someone will, before long, come forward with an essay on the subject.—*Pottery Gazette*.

At a recent sale in Leipzig, autographs of the persons named brought the following prices: Mary Queen of Scots, 323 marks; Marie Antoinette, 461 marks; Peter the Great, 112 marks; Wallenstein, 108 marks; George Washington, 115 marks; Thorwaldsen, 90 marks; Gluck, 200 marks; Mozart, 330 marks; Haydn, 81 marks; Bach, 175 marks; Beethoven, 335 marks.

Among the visiting members of the trade to the city during the week were Charles Blackwell, of George McDowell & Co., Philadelphia; Mr. Wrght, of Averill, Russell & Carpenter, St. Paul, Minn.

TO THE TRADE.

GENTLEMEN:—Annually, since 1867, we have offered our New Samples of **CHRISTMAS CARDS**, and yearly have we been encouraged to renewed efforts.

Our permanent staff in the Designing Rooms has been steadily increasing, and every issue of New Patterns is greater in number than that of the previous year.

Competitions in design among unskilled amateurs, and lavish advertising of cards produced from their drawings, have only resulted in

MARCUS WARD'S CARDS

BEING MORE IN DEMAND THAN EVER.

Again we have to announce the completion of our **DESIGNS** for the **NEW SEASON**, all printed at OUR OWN WORKS. We think our artists have surpassed themselves in novelty and beauty of design. The quality of our work is well-known, and the variety and value leave nothing to be desired.  Sample-Books now in our Travelers' hands.

Yours respectfully,

MARCUS WARD & CO.,

LONDON AND BELFAST.

Striking Head Lines

Are used to call attention to the fact that this is an advertisement of the CHICAGO, MILWAUKEE & ST. PAUL RAILWAY.

Its EIGHT Trunk Lines Traverse the best portions of NORTHERN ILLINOIS, WISCONSIN, MINNESOTA, DAKOTA and IOWA.

Located directly on its lines are the cities of CHICAGO, MILWAUKEE, LACROSSE, WINONA, ST. PAUL, MINNEAPOLIS, MADISON, PRAIRIE DU CHIEN, MASON CITY, SIOUX CITY, YANETON, ALBERT LEA, ABERDEEN, DUBUQUE, ROCK ISLAND, CEDAR RAPIDS, and COUNCIL BLUFFS, as well as innumerable other principal business centres and favorite resorts; and passengers going West, North, South or East are able to use the CHICAGO, MILWAUKEE & ST. PAUL RAILWAY to the best advantage.

Ticket offices everywhere are supplied with Maps and Time Tables which detail the merits of the line, and agents stand ready to furnish information, and sell tickets at cheapest rates over the CHICAGO, MILWAUKEE & ST. PAUL RAILWAY.

S. S. MERRILL, General Manager

J. T. CLARK, General Superintendent

BUFFORDS' CHRISTMAS CARD LINE.

The line of Christmas cards shown by J. H. Bufford's Sons, is of the richest and most elaborate character, and it may be said that the samples contain novelties in which the taste and judgment that has characterized this firm is shown. Particular attention has been paid to the fringing which is said to be an improvement upon the exquisite embellishments of last season. The whole line is very presentable.

No. 1498K has four designs, each of which is embossed and shows a little boy in continental costume carrying an envelope sealed with wax on his shoulder. No. 832 comes in six floral designs, three of which illustrate roses on the branch, and the other three, lilies of the valley, forget-me-nots and bluebells. No. 220H is in two designs, one of which represents sunset and the other the moon rising.

The ground color of each is of gold with a sky-colored centre piece. One shows a cupid in the air striving to catch birds disporting in the rays of the setting sun; the other shows the full moon above the horizon and a sleeping cupid floating on the air, bats and stars being visible. No. 5884D is also in two designs, the ground color being buff; a rectangular centre surrounded by a gold border contains bunches of pansies.

The designs of 5892D, illustrate sprays of roses and tiger lilies. Another beautiful floral series is illuminated with geraniums, tea roses and pansies. A very striking series is represented in No. 164K. It consists of four designs, two showing pond lilies, and the other two pinks and roses. No. 252M illustrates four embossed designs of amoretts in comic attitudes, surrounded with a medley of miniature flowers. The designs of 235M are pleasing in effect and are elaborately finished, illustrating landscapes after a snow-storm. No. 868M is a richly embossed floral series, with roses and ferns. No. 840M is something to please juveniles. Each design illustrates an ideal child's head appearing above the edge of a wicker-work basket. A unique card comes in the shape of an oyster, the shells being connected; marine views appear on each part.

Each of the designs of No. 773J represent a child at play on the beach. No. 835M is a novel and very unique series. The designs are embossed and show either birds or dogs peeping out of a paper cone filled with flowers. No. 202M illustrates four designs of fancy pocketbooks decorated with embossed flowers. No. 5765D is a Santa Claus series. No. 6510D is very novel and rich; each design shows a young lady within a window curtain, and child outside in the act of tearing the curtain down. As the curtain and figure of child are in relief the effect is striking. No. 163K has group of young girls engaged in favorite pastimes. No. 5862D shows groups of children with a pet dog looking out of a window surrounded with evergreens. In two of the designs falling snow is seen. No. 1383K shows young ladies in flowery arbors. No. 166K and 1494K are children's series and are rich in coloring.

An easel series with a gold oval centre, adorned with flowers and butterflies is given in 6536D. No. 719J has designs of little girls fondling favorite animals. No. 777J comes in four designs, each of which has a rich gold ground with centre piece showing a winter scene and surrounded with holy and ivy. No. 530J is a ceramic series, the designs representing vases of various descriptions filled with flowers. Nos. 77J and 774J show bird's nests filled with eggs. No. 119K comes in four designs, all of which are very rich, particularly the bordering and letter-

ing, the latter being in raised gold. Each design represents a child carrying a flower-pot filled with floral selections. No. 195J shows respectively, geraniums, bluebells and wax-balls. 847M illustrates four kinds of roses. No. 204J is a pansy series. No. 5904D comes in four designs, each of which is 10 x 7 inches in size. One is decorated with ivy, forget-me-nots and three different kinds of roses, and the other with dahlias and autumn leaves. No. 5918D has wild-roses, forget-me-nots, violets, daisies and strawberry leaves. No. 5948D comes in four designs and shows landscapes and bunches of daisies and forget-me-nots. No. 6518D is an embossed series of two designs of daisies and roses. No. 767J is in two designs, each of which is on a silver ground and has rich landscapes in the centre.

Last, but not least, is the Christmas dove, which is a beautiful representation of that favorite bird. It is printed in sixteen colors, and appears on a ground which varies from the bright red of sunset to the dark blue of night. The card is about 8x10 inches in size, and the picture of the bird itself, with partially outspread wings, nearly occupies the whole card. This card is embossed, and is one of the best efforts ever made by the house.

SCOTCH CASTLES AND HOUSES.

At the meeting of the Edinburgh Architectural Association, Mr. MacGibbon delivered a lecture entitled "Scotch Castles and Houses." The lecturer began by drawing attention to how little had been done for the history of domestic as compared with ecclesiastical art, and proposed to show that the former might be divided into distinct periods and styles as well as the latter. A short introductory account was then given of the styles of domestic architecture which had prevailed in France and England up to the seventeenth century. It was pointed out that in

Scotland there are no Norman castles or domestic buildings, although churches in the Norman style are pretty numerous. The early Scotch castles of the eleventh and twelfth centuries (of which a list was given) have all disappeared. They seem to have been chiefly constructed of wood, and defended with palisaded earthen mounds and ditches. The oldest existing Scotch castles are those of the thirteenth century, consisting of a great wall of enceinte, strengthened with towers at intervals, one of which, larger than the others, is called the Donjon. Examples of these at Bothwell, Kildrummy, Dirleton, Yester, Hailes, &c., were minutely described and illustrated, with plans, sketches, and photographs. Drawings of the Manor House of Tullyallen, belonging to this period, were also shown and explained. The war of independence produced a great change in Scotch architecture. Owing to the poverty of the land, large and imposing castles like the above ceased to be built. The nobles had to content themselves with small towers, similar in general form to the twelfth century Norman towers of England. Examples of these were shown in Lochleven, Alloa, Clackmannan, Preston, and in Borthwick, the finest of all these keep towers. These keeps were subsequently often enlarged as the country became more settled, so as to make them into castles surrounding a courtyard. Some fine instances were brought forward from Craigmillar, Castle Campbell, Crichton, Kilchurn, &c., about the same period (beginning of the fifteenth century). Some castles were also designed and built on the plan of ranges of buildings surrounding a courtyard. Of these, Caerlaverock and Dirleton were rebuilt on the foundations of the old thirteenth century castles, and Doune seems to have been an entirely new design. Tantallon is also a very fine specimen of this class, and is further interesting from the traces it exhibits of early attempts to construct castles and raise outer earthworks so as to resist artillery.—*Building and Engineering Times.*

UNADULTERATED AND THICK
FOR THE WEIGHT.

The accompanying cut is a Fac-simile of
Water-mark in Clover Leaf Linen.

TWO GRADES
EXCELLENT LINENS.
"TUNXIS MILLS,"
NOLIA MILLS, AND OTHER
FOLDED PAPERS.

ONE MILL RUNS CONSTANTLY ON EXTRA MACHINE-FINISHED BOOK PAPERS.

THE ATTENTION OF THE TRADE IS CALLED
— TO OUR —

NEW CYLINDER BOTTLES,

In two sizes—3 and 1½ oz.

The accompanying Cut represents the latter, actual size.

OUR LEADING INKS are all bottled in them except French,
Extra Copying and Carmine. We also
use the same style with wide, trumpet mouth, in 4 oz., for Carter's Mucilage and
Arabin, the latter a new product, from which all waste matter has been removed,
so that every single particle will stick.

CARTER, DINSMORE & CO., BOSTON and NEW YORK

BYRON WESTON,

DALTON, MASS., U. S. A.,

HAS BEEN AWARDED THE

GRAND PRIZE GOLD MEDAL

AND RECOMMENDED THE

Medal of Honor and Perfection

At PARIS, 1878,

This being the HIGHEST and ONLY AWARD given for

LINEN RECORD and LEDGER PAPER

Also, the only Gold Medal given for Ledger Paper at the Adelaide, Australia, Exhibition, 1881.

—A SPECIALTY.—

THIS Paper has received THE HIGHEST PREMIUM over all
others from the Cincinnati Industrial Exhibition, Massachusetts
Charitable Mechanics' Association, Franklin Institute of Philadelphia,
Louisville Exposition, Medal and diploma from United States Centennial
Commission, Medal of Progress American Institute, 1877, and Medal of
Improvement and Progress, Boston, 1878. Its

PRINCIPAL ADVANTAGES

are as follows:—1. It contains more LINEN than any other Ledger
Paper, has a longer fibre, and is, consequently, tougher. 2. Having a
harder and better body, it frays less in erasure, so that by simply using
the rubber after the eraser, the ink is prevented from spreading. 3. It is
more uniform in Weight Color and Finish. 4. It never cockles if properly
bound. 5. Its chemical action upon ink is such that it both writes and rules
up better. For proof of the foregoing, refer to a large number of Sta-
tioners, Bookbinders, Bookkeepers, and Recorders, who have given it,
after a severe test, the preference over all others. This paper is Double
Sized, and will stand any climate or the most acid of fluid inks.

Send for sample sheet, ERASE and REWRITE FOUR TIMES on same spot,
Each sheet is water-marked with name and date.

The American Stationer

A JOURNAL DEVOTED TO THE INTERESTS OF THE STATIONERY & FANCY GOODS TRADES

"The Stationer"—Every Thursday—\$2.00 Per Annum.

VOL. XIV.---NO. 2.

NEW YORK, JULY 12, 1883.

WHOLE NO. 420.

Correspondence.

CINCINNATI CLIPPINGS.

[FROM OUR REGULAR CORRESPONDENT.]

CINCINNATI, July 9, 1883.

Here we are again with an elemental inconsistency to contend against. Weather we have in July cold enough this morning for a warm, early November Indian summer, and we have it, too, right after a hot spell. No such scorch as you have had at Long Branch and Coney Island and up in Maine and down in Philadelphia, but a comfortable, rational, seasonable summer heat—not the best for trade, but not too bad for it—in short, seasonable, normal summer.

Mr. Sheppard, of A. H. Pounsford & Co., an expert window decorator, will be enjoying himself in the East when this letter goes to print—perhaps peeping into some show-window or "taking in" some case or "taking" general interior arrangement in a New York or Boston model stationery establishment. It is not bad advice to stationers in the East to get all the information they can about "window fixing" from this young expert.

John Holland is full of gold pen work now—never was so full—never more fastidious about the quality of the work that his operatives turn out and never so fastidious about what he permits to go out to customers.

Charles Stewart is full of spirits as he is of good humor and of business, and for the former two he has constitutional immense capacity, and by hook or crook he seems to have managed to get his hands full of the latter.

H. W. Derby is not complaining of the results of his enterprise in selling the Harper publications, as the agent of that house and retail stationers in this vicinity are rejoicing over the advantage it gives them in the matter of prices and promptness in filling orders and delivering goods.

Archery goods, which Robert Clarke & Co. as well as A. H. Pounsford & Co. sell, ought to get a lift from the archery tournament—the National one—which will be held here this week. The good from that to them should be in the way of direct sales and indirect advantage from stimulating interest in archery in this locality, which doesn't seem to be as great as it was three or four years ago.

An event which is absorbing and universal in the interest it excites, is the funeral of Archbishop John B. Purcell, of the Roman Catholic Church, here on Wednesday of this week. It

will be the most august funeral that ever took place here. The body, lying in state since Saturday, has been viewed by tens of thousands daily. Despite the cloud of misfortune and grief that overshadowed the last years of the aged prelate's life, in the shape of a gigantic financial failure, a most profound respect for his memory and a general confidence in the integrity of his intentions prevails in this community among all classes who know anything of the personal character of the man and of the history of his long career here.

Here to-day like a thunder-clap comes news from Chicago of a drop of a dollar a barrel in pork. The closing of the vise when McGeoch broke pinched only small men's fingers; but this time the heavy operators get a squeeze here in Cincinnati. They thought when the McGeoch drop came the matter had reached bottom and then was the time to buy; so they bought and now they flounder. The losers can bear their losses in private if they choose; but while they are not large enough to bring ruin they are too large to make merry over.

The sale of type, presses and printing materials here has been unusually bulky here the last three or four months. Designers and engravers for commercial work have been busy. It is queer to watch the run of this class of mercantile printing and pictorial advertising. The furniture manufacturers care for only the plainest and cheapest kind of engraving because, they say, the styles in furniture are so often changing that it would be a dead loss to them to get fine engraving. Then there are lines of business that use the photograph for pictorial advertising. The manufacturers of hearth tile find this method preferable.

Lithography in colors is used by showmen. For labels in colors, zinc plate is extensively used. Charles W. Morris is doing an extensive business in this line. Better engraving in monochrome is coming into use for label work, and there are indications of a growing demand for the finer engravings and better material for colored prints.

PRINCE WILLIAM.

TRADE-MARKS IN FOREIGN COUNTRIES.

By JAMES A. WHITNEY, COUNSELOR-AT-LAW.

[WRITTEN FOR THE STATIONER.

V.

SPAIN.

In Spain trade-marks are regulated by the law of November, 1850. As concerns punishments for infringements, these are provided for by article 217 of the Spanish penal code.

Foreigners have in many cases their rights

guaranteed under treaties with other powers, notably so in the case of France, which last-named country has apparently given greater attention to the legal protection in other countries of the trade-marks of her citizens than has been the case with most nations; nevertheless, in August, 1873, a Spanish ministerial decree made known that the inhabitants of a country where treaties of reciprocity do not exist are subject to ordinary legislation; therefore, any person of any country can obtain the guaranty of a trade-mark in Spain.

The demand for registry should be presented to the governor of the province in which the applicant is domiciled. The application should be accompanied by a detailed specification in which is clearly specified the kind of stamp or seal adopted and the matter on which it is to be applied, and also the name of the proprietor.

A unique provision is made in the Spanish law for preserving the impression of the mark as a secret, the object of which I have not been able to learn. In such cases the applicant expresses the desire for secrecy in his demand for registry and remits his application folded and sealed, and this is only opened in the event of litigation.

The governor of the province sends to the applicant a certificate of the deposit of the application. The applicant then sends the certificate to the Minister of Commerce and Public Works, together with the other documents presented. After a preliminary examination made by the Director of the Conservatory of Arts in order to ascertain if the mark has been already employed for products of the same class, the applicant receives a certified title exemplifying his rights of property subject to the reservation that the legal fee is to be paid. The applications are published in the *Official Gazette*, and within a certain limited time opposition may be entered to the registration.

Manufacturers can adopt any mark that they choose provided that it does not comprise the royal arms or any Spanish insignia or decoration, unless the applicant has previously obtained lawful authorization to do so. Of course no mark previously registered for the same class of objects can be registered to a second applicant.

No limit is assigned to the duration of the privilege conferred by the certificate.

There is no common-law protection to trade-marks in Spain, and consequently an infringer can only be prosecuted by a party who has duly registered his trade-mark. The injured party can invoke the penal law and may also recover damages with costs.

In Spain, as in most other European countries,

the transfer of a trade-mark requires a new registration.

PORTUGAL.

In Portugal, property in trade-marks is regulated by the penal code.

By a treaty with France the subjects of each of the two countries enjoy the same protection as citizens of the other. Foreigners, as well as citizens, can secure trade-marks in Portugal. The former file their applications with the clerk of the Tribunal of Commerce at Lisbon. Under the Portuguese law trade-marks are reputed to comprise all signs designed to distinguish the products of a manufacturer or objects of commerce, such as names under a distinctive form, titles or denominations, emblems, seals or stamps, vignettes, and letters. The counterfeiting of a trade-mark, the using of a counterfeit mark, or the sale or putting on sale of products bearing a counterfeit mark, incurs a fine of from twelve dollars and fifty cents to seven hundred and fifty dollars. The imitation of marks, in order to deceive purchasers, and the use of such marks, is punished by a fine of from twelve dollars and fifty cents to one hundred and twenty-five dollars. In addition to these fines the culprit can be condemned to three months' imprisonment, and to the payment of actual damages to the parties injured.

RUSSIA.

In Russia trade-marks may be registered only by subjects and by foreigners belonging to a nation having a treaty of reciprocity with Russia. Such a treaty exists with the United States. It is comprised in the additional article of 1868 to the treaty of 1832. Under this the marks of citizens of the United States must be lodged in the Department of Manufactures and Inland Commerce at St. Petersburg. Fac-similes of the marks, specifications, legalized power of attorney, &c., are required. Any distinctive marks or emblems, vignettes, imprints, &c., are susceptible of registration. If the mark is identical or nearly like another, registry will be refused.

The period of the privilege is unlimited to Russian subjects, but in the case of foreigners the duration is limited to the period of the treaties of commerce or reciprocity under which they are granted.

Infringements are punished under the penal code, and also furnish the basis for actions for damages, which are brought before the tribunals and follow the general course of the Russian laws in cases of damage to property.

JAPANESE CURIOS.

The trade in Japanese goods has led to the establishment of several Japanese houses in this country, and New York notably has several, presided over by veritable natives of the remote Empire. The head of one of these houses, Heromich Shugio, who has just returned from Japan after a quest for goods for this market, has been seen by a reporter, and the following *résumé* of the interview is of interest:

"I have been absent over six months," said Mr. Shugio. "It was necessary for me to see what our people at home were doing and to replenish our stock. I have been quite successful, but you see it was a question of time. It is by no means so easy to get together a stock of curios as it was twenty years ago, when the house of every man of wealth was filled with them. Now, collecting has become a regular business in Japan as well as elsewhere, and our older articles have, to a large extent, been taken away to grace the cabinets of Europeans. We produce, however, much that is new and handsome, and largely as we have exported since

1855, you will find, unless you are a connoisseur, that most of these objects are unfamiliar to your eyes." So saying, he led the reporter to the second floor, where the principal art collection is to be found. "This, you will see," continued the merchant, "is a collection of lacquered boxes, and other ware. The basis on which the varnish is placed is wood, and the lacquer is applied in successive layers until it is as smooth as glass, and perfectly even and true in color. That is one of the arts in which Japan excels the world. There is probably something in the trees from which the varnish is originally obtained—trees that are not found elsewhere on the globe; something in the wonderful patience by which a single article is on hand for months and something in the hereditary skill of the artisans. The essential feature of the goods from Japan is that they are hand-made. Time counts for little, and there is enough demand for each article, so that the workman can learn to do his part perfectly." Here he showed trays, boxes and servers of lacquered ware with deep gilding, and adapted for fan boxes, perfume boxes and many other purposes. The joints were perfect, the blackness of the lacquer perfectly even. Near them stood a tea service of bronze, inlaid with other substances and partly in relief.

"We make many articles of bronze," he said, "and some of them very difficult. A less proportion of tin is used than in European foundries. Some of the articles we make are very large. Here, for instance, is a bronze vase, designed for ornament alone, which took three years of time to be wrought. It is modern, and was made in our establishment in Tokio. It is valued at \$4,000." The vase was covered completely with floral and animal designs, beaten up from the inside, and was truly a beautiful piece of work. Yet, large as it was, it did not approach the size of another, which stood near the door, and rose higher than a man. In one case was a collection of swords and daggers, all short, and near by were ornamental belts for sashes. Inside of these belts are passed gigantic buttons, highly carved and decorated, which serve to support medicine boxes, carried by physicians, and tobacco pouches. One case is filled with ornaments of gold and crystal, some being of very great size. They are of clear white, grayish white, and other colors. Here is also a vase of crystal. Among the objects which give an uninitiated observer a better idea of the art of Japan than anything else is a carved figure of a deified knight, afterward lacquered and gilded. Every portion is completed with the most elaborate exactness. Among other things is a flower vase, of which the foundation is a section of bamboo, eight inches across and two and a-half feet long. There are cabinets of teak, a deep black wood, which afford excellent opportunities for the display of articles of vertu. A part of a tree is represented with little devils swinging on the branches, each of the demons being carved out of ivory and being scarcely more than an inch in length. The Japanese, indeed, seem to take as kindly as the architects of the middle ages to the horrible and grotesque in sculpture and painting. A collection of sword hilts next attracts the attention, and there is also a reproduction of a very famous piece of work done by an artist named To-un. Curtains for ornamental uses and banners bearing characters from Japanese mythology are also numerous.

"We are now ready for our summer and fall trade," said Mr. Shugio. "You would be surprised if you could know how much we contribute to the adornment of summer homes. Here

are screens for the fire-places, which look more like fans to your eyes, and here are real fans, but of large size, to be hung on the walls. Everything that is produced in Japan we sell, but, of course, we do not keep a stock of those things that are not called for. We have an extensive demand for fans in the summer season, and for porcelain and pottery ware at all times. Then we keep both of the most expensive and of the cheapest grades, and it is in these goods that we do the largest wholesale trade. We cannot place our works of art on view in other places, nor would a dealer be justified, in most of them, in purchasing expensive articles in anticipation of calls. But in cups and saucers, teapots, sugar bowls, and all the service of the table, we supply many dealers. There are also many things which merchants can keep on hand, and which are sure to attract attention from their oddity. The trade of Japan is increasing with this country year by year."

"Where is your principal place of business?" asked the reporter.

"In Tokio, Japan. There we have our shops, and there we gather whatever may be brought to us from other portions of the country. We have also warehouses in Paris and Vienna. The stock of Japanese curiosities is getting smaller in our country, and we have increasing difficulty in getting suitable additions to our stock. We began business in 1877, and find that we now have to pay double for articles to what we then did. We duplicate many of the older and more valuable works, and also devote much time to the wants of those who cannot afford to have real works of art. Many of our summer goods, such as bamboo screens and scrolls, wall pockets and the decorative fans, come within reach of every purse. Labor is continually growing higher with us, as it is in Europe."

CARVING IVORY.

All the curiously carved handles which are so fashionable, and the quainter the more sought after, are shaped upon a series of rapidly revolving wheels ranging from an eighth to three inches in diameter, and which are a cross between a file and a saw upon their cutting surface. Ivory and bone are carved in precisely the same manner, the only difference in the handling of the two being that bone has to be boiled a long while to free it from animal matter before it goes to the carver, while ivory is clean and pure from the start.

When it is desired to produce any given object in bone or ivory, an umbrella handle with a couched tiger upon it, for instance, the carver takes a piece of the material of suitable size, and presses it against one of the wheels described above. At the point of contact it cuts with amazing rapidity. Soon the shapeless block begins to assume the rough outlines of the object intended. The lathe is then stopped, which requires but an instant, and another, probably a smaller wheel, is substituted. In this way a dozen wheels may be used before the final finish is given with a delicate disk, a little larger than a pin's head; but when the work leaves the deft fingers of the skillful worker a perfect miniature of the royal native of the jungle is seen. The only remaining thing to be done is polishing, which is accomplished by means of canvas belts with pumice upon them, and, finally, by Canton flannel belts or wheels.

Many people suppose that billiard balls are turned by means of some exquisitely adjusted machinery, in order to secure their spherical perfection. The exquisite machinery is the eye and hand of the artisan. The writer saw a gray-haired workman turn several billiard balls, and the only tool he used was an ordinary turner's chisel. His eye was his gauge.—*Philadelphia Press*.

THE PARSONS PAPER COMPANY,

— HOLYOKE, MASS., —

In addition to their already extensive establishments at Holyoke (which rank among the largest mills in this country), have recently built a separate mill, specially constructed and equipped for the production of the Best Grades of Linen Papers, and are now manufacturing all the various sizes and weights of BOND, PARCHMENT, BANK-NOTE, AND LEDGER PAPERS. They have already demonstrated their ability to produce of these papers a quality EQUAL TO THE BEST ESTABLISHED BRANDS IN THE MARKET.

Having great strength of fibre (an essential requisite in all Legal, Government and Commercial Papers), they are recommended for use in Bonds, Deeds, Certificates, County and State Records, etc. They are thoroughly sized to stand writing upon with fluid inks, and will permit of repeated erasures and re-writing thereon, when required. Great care is exercised to produce uniformity of color, strength and finish, and to do this, they have the latest improved machinery, specially adapted to the manufacture of Linen Papers.

They would call the attention of the Trade to the following brands, which are their trade-marks, viz.: In all Bond, Bank Folio, and Parchment appears the water-mark

"PARSONS PAPER COMPANY, HOLYOKE, MASS."

The Ledger Papers, of which they manufacture two Brands, are water-marked

"PARSONS LINEN LEDGER."

"SCOTCH LINEN LEDGER."

It is the intention of the Company to maintain the quality of these brands equal to any in the market.

Extra Fine Papers

Manufactured by

Z. CRANE, JR., & BRO.,

DALTON, MASS., U.S.A.

These Goods, which are acknowledged to equal the finest foreign manufactures, are presented in the following styles and qualities:

SUPERFINE QUALITY.

1. a handsome Light Blue Boxes containing one-quarter of a ream of Note Paper each, and bearing in blue letters description of contents.

2. separate Boxes of uniform size, are one-eighth of a thousand Envelopes corresponding in tint and quality to the paper.

EXTRA SUPERFINE QUALITY.

In attractive Lavender Colored Boxes containing one-quarter ream of Extra Fine Paper each, with contents printed in red. Corresponding to this, in like Boxes, are Envelopes to match.

All this Stationery may be relied on to be according to representation. It is suited to the tastes of the most select trade.

In addition to the above lines, our other Specialties are put up with care, in attractive and substantial form. Goods can be seen at the Mill, or at our New York General Agency, GEO. B. HURD & CO., 79 Beekman Street.

1883-4.

RAPHAEL TUCK & SONS'

Artistic Xmas and New Year Cards.

PRICE LIST NOW READY.

RELIEFS (SCRAP PICTURES).

The constant growing demand for Reliefs has impressed upon us the necessity of an improvement of the present way dealers are obliged to keep their stock, and we are pleased to say that we are now able to offer the trade a complete solution to the matter in the form of a

— RELIEF CABINET, —

of which the cut herewith given is an exact illustration. This Cabinet will hold 5,000 to 6,000 Reliefs (according to the sizes desired), and will be presented to every retailer who purchases that number of sheets, amounting to at least \$100 net.

The assortment may be made up of one hundred each of fifty kinds, or fifty each of one hundred kinds. This Cabinet is a solidly built, durable piece of work, in black walnut, and an ornament to any store.

"LANGUAGE OF FLOWERS." — A beautiful packet of twelve sheets of the most popular flowers mounted, with the sentiment of each printed below.

NEW PATENTS.

No. 277,395. Feed Gauge for Printing Presses.—Theodore H. Winchester, New Haven, Conn.

No. 277,411. Calendar.—John Cussons, Glen Allen, Va.

1. The combination, with a calendar having a stiff back of card-board or other material, of a strip arranged longitudinally at the rear side thereof and slotted to form a tongue within its body, and a free foot-piece which is joined to the body of the strip by strap-like portions, the upper end of the strip and its tongue being connected with the stiff back. 2. In combination with a calendar composed of a stiff back, carrying dials which indicate the days of the week and month through openings, the combined dial-confining strip, and calendar-sustaining brace or prop having its body portion slitted to form a tongue between its edges.

No. 277,412. Method of Engraving.—John Earle, Darby, Pa.

1. A method of determining the spacing lines of letters for engraving the same with a machine, consisting in successively placing tracings of all the letters of the alphabet in such relation to a selected gauge-space bounded by letters or lines that the space between the trial-letter and said lines or letters bounding the gauge-space will appear to a skilled eye to be equal to the gauge-space, then marking the tracings at the front or back of the letter with a line, mark or dot corresponding with a fixed point or line having a predetermined relation to the letters or lines bounding the gauge-space, and finally transferring the spacing lines from the tracings to the engraved pattern-plate. 2. An engraved pattern-plate in which each pattern-letter is provided with spacing lines, marks, or dots so arranged in relation to each letter that by merging the spacing-line of any pattern-letter with the spacing-line of the letter last engraved, the letters will be accurately spaced to form words and sentences.

No. 277,456. Bookbinding.—Timothy J. Cagney, New York, N. Y., assignor to Sheldon & Co., same place.

A permanently-bound book, the leaves or signatures of which are held together by means of binding wires or rivets, which pass through the leaves or signatures, and flat strips of metal, to which strips they are secured by swaging, the binding-rivets and metal strips being enveloped and concealed by the backing of the outer cover.

No. 277,496. Toy Gun.—Herman P. Marks, New York, N. Y., assignor to Stirn & Lyon, same place.

No. 277,500. Gage-Pin for Printing-Presses.—Edward L. Megill, Brooklyn, N. Y.

No. 277,549. Sheet-Delivery Apparatus.—Luther C. Crowell, Brooklyn, assignor to R. Hoe & Co., New York, N. Y.

The combination, with a series of pathways provided with tapes for advancing the sheets therein, of means for directing the sheets alternately into different pathways and means for causing the tapes of the different pathways to move at different speeds.

No. 277,642. Folding Machine.—Luther C. Crowell, Brooklyn, assignor to R. Hoe & Co., New York, N. Y.

The combination, with a pair of folding-jaws, arranged to grasp the sheet upon its longitudinal fold-line, of means for doubling the sheet

into the jaws, and means for giving the jaws longitudinal movement.

No. 277,550. Air-Cushioning Apparatus for Printing Machines.—Luther C. Crowell, Brooklyn, assignor to R. Hoe & Co., New York, N. Y.

An air-cushioning apparatus provided with an escape-passage controlled by a valve, and means for moving the valve to cover the opening at each reciprocation of the apparatus, and means for allowing the valve to open unless the apparatus has attained a certain speed.

No. 277,572. Ornamentation of Walls, Paper, Textile Fabrics, Glassware and other articles.—Charles Juncker, Paris, France. Patented in France November 4, 1890, No. 139,472.

The method of ornamenting the surface of walls, cloth fabric, glassware and other articles, by applying thereto natural objects—such as leaves, ferns, flowers, and the like—or manufactured objects—such as lace and other open-work fabric—or both, and securing the same in place by and between thin sheets of gutta-percha or like substance.

No. 277,581. Toy.—William Leggett, New York, N. Y.

No. 277,582. Ink Fountain.—Charles A. Lieb, New York, N. Y.

No. 277,593. Manufacture of Articles from Paper.—William McMahon, Rahway, N. J.

A method of water-proofing paper articles, consisting in incorporating the water-proofing material or composition in and with the pulp prior to its formation into the finished article.

No. 277,594. Manufacture of Paper Articles.—William McMahon, Rahway, N. J.

The invention consists in making combs and other toilet articles by molding them from paper-pulp combined with water-proofing material and subjected to high pressure.

No. 277,621. Bronzing Machine.—Henry R. Sillman, Brooklyn, N. Y.

No. 277,627. Adding Machine.—Albert Stettner, Jr., Berlin, Germany.

No. 277,693. Frame for Drying Substances in Sheets.—Jarvis B. Edson, North Adams, Mass.

1. In an apparatus for drying sheets of paper, gelatine, zylonite and other materials, and in combination therewith, two or more frames, between which the sheets are held at their edges, the frames having at their inner opposite edges slits or chamfers for the passage of air alternately. 2. In an apparatus for drying sheets of paper, gelatine, zylonite and other materials, and in combination with a series or pile of frames for holding the sheets to be dried at their edges, an air-flue under the bottom of the pile, and passages or slits in the inner opposite edges of the frame for conducting air to and fro across the sheets. 3. The combination of a series or pile of frames for holding sheets to be dried, clamped between plates by binding screws, and with holes in the bottom and top plates to allow the passage of the drying agent to and fro over the sheets.

No. 277,707. Manufacture of Lead-Pencils.—Paul E. Gonon, New York, N. Y.

A lead-pencil constructed with a marking-core having two or more colors arranged in parallel strips throughout the entire length of the pencil; also, a machine for making pencils, constructed with a device for pressing the core for the pencils, combined with devices for pressing the coating of plastic or semi-fluid substance around the core, and of devices for pressing a stamp into the freshly-made pencil.

No. 277,712. Paper Lantern.—John E. Grumbach, Jersey City, N. J.

No. 277,722. Album Clasp.—Theodore M. Hass, New York, N. Y.

No. 277,730. Lithographic Process.—August Hoen, Baltimore, Md.

1. The process of preparing a stone or plate for lithocautic engraving, consisting in stopping out or filling in with ink, at regular intervals of space, the lines drawn on an etching-ground, thereby producing a series of dotted lines in place of those which were previously solid or continuous. 2. The process of lithocautic engraving hereinbefore described, which consists in drawing parallel lines upon an asphaltum or other suitable etching-ground, next applying a sheet or stamp suitably ruled with lines and covered with transfer ink to the ruled lithographic surface or ground thus formed, the lines of the two surfaces thus brought in contact crossing each other at a suitable angle, whereby the ink from said sheet or stamp is transferred to the lines of the etching-ground, so as to produce a series of lines composed of alternating white and black dots, then etching the white or uncovered portion in the usual way.

No. 277,737. Photographic Plate Holder.—Francis W. Jackson, East Orange, N. J.

L. PRANG & CO.'S

Christmas and New Year Cards.

WE beg to express our thanks to our patrons and friends for the kind and flattering appreciation of our past efforts, and feel a pardonable pride at the very emphatic endorsement which our Cards have received from the American, English, German and Australian press. With one accord these exponents of public taste have given our Cards the first rank over all similar productions in the market. We are bound to maintain this superiority; and we have, as heretofore, spared no expense to create, with the aid of our enlarged experience, a Series of Novelties for the Christmas Season, which, we have no doubt, will meet the expectations of the Trade. We have been singularly fortunate in procuring the assistance of, we may say, **REPRESENTATIVE AMERICAN TALENT** in the preparation of designs, and besides have secured the coöperation of some of the most **EMINENT EUROPEAN ARTISTS**.

OUR LINE IS NOW COMPLETED, and our agents are on the road to call on our patrons and friends. An inspection of the Sample Books will convince them that in regard to **ORIGINALITY AND VARIETY OF DESIGN, EXCELLENCE AND RICHNESS IN EXECUTION**, it far exceeds our last year's efforts. To give an idea of the high artistic order of the line, we would say that it comprises:

FIGURE DESIGNS by Miss DORA WHEELER, Miss ROSINA EMMET, Miss L. B. HUMPHREY, Miss L. B. COMINS, ELIHU VEDDER, WALTER SATTERLEE, A. F. BROOKS, and others.

LANDSCAPE DESIGNS by W. HAMILTON GIBSON, THOMAS MORAN, F. L. SMITH, and others.

ANIMAL DESIGNS by B. E. BENSELL and HARRY BEARD.

FLOWER AND BIRD DESIGNS by Miss FIDELIA BRIDGES, Mrs. O. E. WHITNEY, JEAN ROBIE, of Brussels; H. GIACOMELLI, of Paris, and others.

THE LITERARY MATTER in connection with our designs has been carefully attended to—among others, by Mrs. CELIA THAXTER, Mrs. EMILY SHAW FORMAN and JOAQUIN MILLER.

OUR REGULAR LINE of Christmas and New Year Cards will comprise plain cards, fringed cards, and double fringed cards, varying in price from 30 cents to \$60, per set of 12.

PROTECTORS are furnished with all fringed cards, and also **ENVELOPES** for all series costing \$1.80 per set and more.

Besides our **REGULAR LINE**, we would call special attention to the following

NOVELTIES AND SPECIALTIES:

ALADDIN'S LAMP. This is one of the most elaborate and elegant Christmas Gift Cards we have ever offered to the trade. It is a large folding card, heavily fringed, and provided with a leatherette protector. The front outside page is a design of peacock feathers on satin; the left inside page contains a poem specially written for this gift by JOAQUIN MILLER, also on satin, and surrounded by a delicate border of Oriental design; the right inside page presents Aladdin bearing his lamp, after a painting by the eminent American artist, ELIHU VEDDER; and to complete the whole, the back is embellished with a most unique, artistic design of high order.

RUSKIN CALENDAR FOR 1884. At the solicitation of some of our business friends, we have this year decided to bring out a Calendar, and are happy to be able to announce that we shall issue **A CALENDAR FROM JOHN RUSKIN, FOR 1884**. This consists of an artistic mount with a block calendar, having suitable selections from JOHN RUSKIN's works for each day of

the year. The selections have been made by a lady well-known for her cultivated taste and judgment. The mount has been designed by a well-known Boston artist, and, coming from her thought and tasteful skill, the form and decoration will be a fitting accompaniment to the words within. This Calendar will be a source of pleasure to all who love and appreciate RUSKIN, that they may have every morning a jewel from the treasure of his noble and earnest thought.

"THE CHRISTMAS SHEAF." A folding card, with inside pages, in color, stamped out in the shape of a sheaf of wheat. Tied with silk cord and tassels.

"THE CHRISTMAS BOOK." A surprisingly natural representation of an open book, with floral designs by Mrs. FISHER, and original poems by JOAQUIN MILLER.

CHRISTMAS ART PRINTS ON SATIN.

The great success attending our efforts in this line has induced us to bring out a number of new Series, consisting of Flowers, Landscapes and Figure Designs. These are elegantly finished in several styles, in fringed tinted mats, with cord and tassels; on mounts, with silk fringe and cord; in book form, richly fringed and with leatherette protectors, and on rich Plush mounts. Prices vary from \$1.50 to \$3.50 each.

We have made large additions to our **BIRTHDAY** line, comprising Plain Cards, Fringed and Double Fringed Cards and Art Prints on Satin. Numerous Series at popular prices have been added to our list of **SCRIPTURE TEXT CARDS**. New **FLOWER PIECES** in Mats, &c. **THANKSGIVING CARDS**.—Our line will also be shown now.

Descriptive Price Lists of our **CHRISTMAS** and **NEW YEAR CARDS** are now ready, and will be sent on application.

STEAM PRINTING WORKS, AMSTERDAM.

When People are Traveling Comfort and Safety are the

TWO PRINCIPAL OBJECTS IN LIFE!

COMFORT!

"The Erie is by far the smoothest road I ever traveled on, either in this country or in Europe; and I consider it the perfection of railroad traveling. With the clean, light and airy coaches, polite attendance, freedom from dust, noise and jar, we reached Chicago hardly realizing what a long journey we had performed. And then such a breakfast as we had the morning after leaving New York, at Hornellsville, is certainly deserving 'honorable mention.' Such a table as they have there, with a full half an hour to enjoy it, is enough of itself to attract passengers."—*Ex. U. S. Minister, E. B. Washburne.*

SAFETY!

"5,491,441 Passengers were carried over the Erie Railway in 1881. Of this vast number, only two were killed—one by falling from the platform of a car on which he insisted on standing, and the other in jumping from a train while in motion."—*New York State Engineer's Report for 1881.*

No better evidence than the above need be wanted that both of these objects are secured to the traveler who purchases his ticket over the

GLUCINUM PENS.

NOTICE TO THE TRADE.—We call attention to our circular letter, dated June 10 1883, which has been directed to our patrons and principal stationers in this country, containing some very important information to consumers of our celebrated Glucinum Pens. We confidently claim that they are the best series of writing pens ever placed before the public. The demand for them is constantly increasing on account of the uniformity, smoothness of points, and durability over all other steel pens. This

Trade-Mark and the word Glucinum are copyrighted and registered at the Patent Office, at Washington, D. C., United States of America, and every box has a fac-simile of our signature, so beware of unscrupulous parties misrepresenting us.

Trade Gossip.

All new goods and designs which are not, strictly speaking, "Novelties" will be noticed under this head. The trade are requested to forward descriptions with samples in order to secure proper notice.

H. H. Greene, publisher of the *Tribune*, Yreka, Cal., has sold out.

Cobler & Co., publishers, Tucson, Ariz., have dissolved partnership.

F. S. Stoddard, stencil manufacturer, Louisville, Ky., has been attached.

Caldwell & Smith, job printers, Birmingham, Ala., have dissolved partnership.

Edward D. Boles, fancy goods dealer, Buffalo, N. Y., has made an assignment.

Smith & Smith, printers, Columbus, Ga., have been closed out by the sheriff.

Charles A. Burnham, bookseller, stationer and paper-hanger, Norwich, Conn., is dead.

Butler & Armstrong, publishers, West Union, Ia., have failed and gone out of business.

Marx & Berlinsky, picture frame dealers, New York city, have dissolved partnership.

Wood & Fagan, publishers, Oakland, Cal., have instituted a suit to dissolve partnership.

A. M. West & Co., booksellers and stationers, Ada, Ohio, have sold out to Wagner Brothers.

John Moore, bookseller and stationer, Ann Arbor, Mich., has sold out to George Osius & Co.

S. McIlvaine, paper manufacturer, Portage La Prairie, Man., has made an assignment in trust.

Wm. H. B. Currier, publisher of the *Villager*, Amesbury, Mass., has sold out to J. M. & J. J. Potter.

Chas. H. Wright, traveling representative for Phil. Hake, has returned from a trip to the South.

Ward & Abercrombie, job printers, Lawrence, Mass., have dissolved partnership. James Ward, Jr., succeeds.

Isaac P. Spinner, wholesale paper dealer, Denver, Col., has sold out to the Charles Stewart Paper Company, of Cincinnati.

The St. Catharines Pulp and Paper Company, St. Catharines, Ont., is in the hands of the sheriff, by virtue of a chattel mortgage.

The Esterbrook Steel Pen Company has brought out a new pen called the "Probate;" it is a large engrossing pen with long nibs and a fine flexible point, and is constructed so as to contain a large quantity of ink.

W. H. Cadwell, recently manager of the Brett Lithographing Company, has formed a connection with M. F. Tobin in the capacity of traveling salesman for the far West. Mr. Cadwell's long experience as a lithographer will enable him to give many new ideas to the trade. Among other business centres he will canvass extensively Chicago, St. Louis, Omaha and Milwaukee.

M. J. Anderson has completed his new lines for the coming season, and he is ready to supply the jobbing trade with samples of his specialties and new quotations of prices. Among the specialties of the house are school reward cards, blank notes, drafts, receipts, &c., gum labels and law seals, marriage certificates, gold bevel visiting cards, all styles, shipping and merchandise tags, &c.

Murphy & McCarthy, publishers, Boston, reported failed, have, according to statements presented to a meeting of creditors, liabilities of \$15,000, of which \$6,540 are bills payable, \$7,820 accommodation paper, and \$670 miscellaneous. The nominal assets are \$18,663, of which \$1,920 is stock; \$1,000, sheets; \$5,000, plates; \$4,000, outstanding leases; \$220, ledger accounts; \$323, bills receivable in the Boston office. In the Hartford office there is \$1,700 in stock, \$3,000 outstanding bills, and in the Providence office there is \$500 in stock, and \$1,000 in outstanding bills. No offer was made, and affairs were placed in the hands of an investigating committee of three.

The Palmer Art Company is making great preparations for the fall trade. The firm's warerooms in Bond street are artistically fitted up and its beautiful lines will be placed on exhibition there in a few days. The factory at Stonington is run night and day, and the best skilled labor is there at work. The goods at present turned out are of the richest description and of such a quality that they will sell on sight, particularly this season, when the run is principally on A1 novelties.

W. H. Seers, of the Acme Stationery & Paper Company, is now canvassing Western New York, whence he will go to Canada and the New England States, successively. L. S. Otis, also representing this firm, left yesterday for a trip to the West and Northwest with a full line of the firm's new goods. It is to be hoped that these gentlemen will meet with their usual success.

The firm of Knight & Howland, engravers, printers and stationers, 45 and 47 William street, New Bedford, Mass., has dissolved partnership, Paul Howland, Jr., succeeding.

Skeen & Stuart, wholesale and retail stationers, Chicago, Ill., have been succeeded by the Skeen & Stuart Stationery Company, incorporated.

Pelletier & Kelby, toy manufacturers, New Orleans, La., have been burned out. Loss is estimated at \$7,000; insurance, \$5,300.

Daniel P. Cole, printer, Springfield, Mass., has admitted Louis H. Orr to partnership, under the style of Louis H. Orr & Co.

Sues & Spurrier, wholesale and retail toy dealers, Louisville, Ky., have dissolved partnership. Julius Sues succeeds.

Swan & Barrett, booksellers and stationers, Portland, Me., have admitted George H. Richardson to partnership.

J. W. Weekes & Co., printers, New York city, have dissolved partnership. Weekes & Melville continue.

Walter & Minnig, publishers of the *Beobachter*, New Philadelphia, Ohio, have dissolved partnership.

Burlin & Skiff, stationers, Jamestown, N. Y., have been succeeded by the Burlin News Company.

George W. Blatterman, bookseller and stationer, Denver, Col., has made an assignment.

Sprecher & Babb, paper hangers, &c., Reading, Pa., have been closed out by the sheriff.

Philip Isaacs, fancy goods dealer, Hartford, Conn., has made an assignment.

William M. Holmes, publisher, Chester, Ill., has sold out to F. R. McAfee.

A. Coons, stationer, Bakersfield, Cal., has applied for relief in insolvency.

E. W. Echols, publisher, Stoneboro, Pa., has been sold out by the sheriff.

J. B. Lippincott & Co.'s July "Monthly Bulletin of New Publications" is out.

F. M. Downer, bookseller and stationer, Longmont, Col., has purchased the Eaton bankrupt stock.

Spinks & Maier, paper box manufacturers, Atlanta, Ga., have dissolved partnership. W. R. Spinks succeeds.

Milton, Bradley & Co., Springfield, Mass., have got out a new catalogue of Kindergarten and primary supplies. The trade ought to have it.

The loss by the burning of the Hurlbut Paper Mill, at South Lee, Mass., last week, is put at \$75,000, with insurance of \$65,000. The cause of the fire is unknown.

THE STATIONER holds a gold medal and diploma, awarded to Galt & Hoy, map manufacturers. Will they please send for them, identifying their claim thereto?

Thomas P. Murray, dealer in fancy goods, Fall River, Mass., recently reported failed, has liabilities of about \$12,000; nominal assets, \$5,000; actual assets, \$3,500.

J. H. Bufford's Sons have just brought out some rich novelties in shape goods. Among them is one which represents two kittens in a basket. It is bright and pretty, and will no doubt make a good hit.

At Massillon, Ohio, July 4, at nine o'clock at night, a fire started in the engine room of the Massillon Paper Company's Mill. Before the fire department could do duty the flames were beyond control. As near as can be ascertained, the insurance, all in mutual companies, will aggregate \$10,000. The total loss, as near as can be estimated, is \$25,000.

Dreka, 1121 Chestnut street, Philadelphia, has just out a new papeterie styled "Base-ball after Shakespeare." There are twelve different illustrations and quotations in each box. This is a taking novelty; the quotations are apt and the illustrations "quite, too-too" striking. He also gets up dinner cards in the same style. The sheets and cards are printed from engraved steel plates and the coloring is done by hand. They are just completed for the trade. The stationers and paper trade who are addicted to base-ball will find these very apropos.

Among the visiting members of the trade to the city during the week were: A. L. Bancroft, of A. L. Bancroft & Co., San Francisco; Mr. Wright, of Clinton, Conn.; Judge Inglis, Pater-son, N. J.; Herman Knost, of Knost Brothers & Co., Cincinnati; Mr. Feigenbaum, of Feigenbaum & Co., San Francisco; S. A. Maxwell, Chicago, Ill.; W. W. Riley, Portsmouth, Ohio; both members of the firm of Clarke & Courts, Galveston, Tex.; Mr. O'Toole, of P. H. Carroll & Co., Cleveland, Ohio; A. Carlisle, of A. Carlisle & Co., San Francisco, Cal.

The growing demand for a fine-graded paper, adapted to stationers' and printers' use, has resulted in the production by the Powers Paper Company, Springfield, Mass., of the "Brunswick" brand, which is made from extra super-fine strictly No. 1 linen stock, loft-dried, white-wove, and carried in both flat and folded sizes, all weights, together with envelopes, from seventy-pound stock, all sizes; also, half-sheet sizes, as note, letter and billheads; also, in ledger finish, for blank book makers. For strength, color and finish the company guarantees it equal to any paper in the market. Great care will be taken to keep this brand fully up to standard, and the trade, it is said, can rely upon its being fully equal to sample at all times. It is carried

in stock in New York by J. L. St. John, agent, at 62 and 64 Duane street.

Richard Crampton, of Rock Island, Ill., has been in Philadelphia this week.

Selchow & Righter have just issued a reduced price list of playing cards, which the trade are invited to send for.

James G. Hyde, 12 Frankfort street, has got out several new and attractive numbers in chromo and advertising cards.

R. Jellyman & Co., paper box manufacturers, Montreal, Canada, have made an assignment. Their liabilities are \$30,000; assets small.

The July number of "Our Little Ones" is to hand. Always bright and interesting; this magazine for children deserves its success.

The Government contracts for stationery, as printed, called for "Davids'" inks. It should have read that the awards were made to J. B. Davids' & Co.'s inks.

Clement & Stockwell have issued a new price list on Whiting's colored paper and bristols. They carry a full line in regular sizes and weights, of all colors, including the new cherry color.

James A. Thomas, New York, is doing a large business in Leon Isaacs & Co.'s Glucenum pens, which are said to be among the best in this market. Since the beginning of the year his orders have more than doubled.

Schedules in the assignment for the benefit of creditors of William Cockroft, Jr., a manufacturer of base-balls, at No. 81 Murray street, to James O'Neil, filed on July 5, state: Liabilities, \$8,994.58; nominal assets, \$3,529.20, and actual assets, \$2,514.02.

The Coughlin elastic blotter is one of those very convenient desk arrangements which will find ready access to the desk. It is a metal form holding several blotting pads, which are removable in turn when soiled by simply springing the holder and releasing the clasp. A similar device is prepared as a blackboard eraser. These articles are made by the Coughlin Elastic Blotter Company, Lowell, Mass.

An excursion of the employes of Langfeld, Turner & Andrews to Atlantic City will take place on July 16. The Philadelphia leather goods trade generally give an excursion as a body, but will not do so this summer. Langfeld, Turner & Andrews' employes determined that they would keep up the recreation, and decided to take the day mentioned, and, accompanied by their families, have a pleasant time.

Murphy & McCarthy, publishers, Boston, Mass., owe \$15,030, of which \$6,540 is bills payable; \$7,820 accommodation paper, and \$670 other debts. The assets aggregate \$18,663, consisting of stock \$1,920; sheets \$1,000; plates and woodcuts \$5,000; outstanding leases \$4,000; ledger accounts, \$220; bills receivable \$323; Hartford office, stock \$1,700; outstanding bills \$3,000; Providence office, stock \$500; outstanding bills \$1,000.

The Family Bibles recently issued by the National Publishing Company, Philadelphia, in fine morocco and levant bindings, are works of art, surpassed by none and equaled by few binding establishments in the United States. This company is fast securing a wide-spread reputation among the trade for artistic and beautiful workmanship, at low prices.

Dawson Brothers, booksellers and stationers, Montreal, have removed their chief place of business to No. 233 St. James street. Their manufactory is still at the corner of Craig and St. Francois Xavier streets, and their branch store is, as before, at No. 1336 St. Catherine street.

Henry Levy & Son are beginning to show a nice display of imported holiday goods, to which each week brings additions. Their new show-rooms for goods of their own make, exhibit articles of exquisite taste and general utility and is well worthy of inspection.

A notable instance of the enormous advance in high-class New York store property is the fact that the building which G. W. Carleton & Co. have taken for their publishing business, originally cost the owner the sum of \$16,000, and now rents annually for \$15,000. A pretty satisfactory investment.

The Tension Envelope Company, Elizabeth, N. J., has a new idea applied to envelopes for mailing fourth-class matter. Samples will be sent on application.

THE END OF THE STAMP TAX.

Not only did the new tariff go into effect on July 1, but the maker of bank checks will no longer be required to put a two-cent stamp upon each piece of paper of that description. Patent medicines, cosmetics, matches and playing cards, which have been adorned with a revenue stamp since the war, are now as free from revenue tax as any other commodity. Liquor and tobacco are the only commodities that will hereafter be compelled to use the revenue stamp. Business men have become so accustomed to the use of stamps upon bank checks that it does not now seem a great inconvenience to use them, still it is one of the many little burdens which the government was compelled to place upon the business of the country in a season of great peril, which can now be done away with. The abolition of the match tax will make it possible for persons with a small capital to engage in a business which the peculiar provisions of the law affecting the sale of stamps makes it impossible for them to pursue with a limited capital.

Dr. Gehring, of Landsbut, has invented a process by which ordinary iron may be rendered highly ornamental. The invention of obtaining aluminum very cheaply led Dr. Gehring to coat iron with aluminum, in the same way as iron plates are now tinned, and converted into tin plates. The inventor states that his process is inexpensive. He uses a Bunsen burner with a blast or a muffle, and is thus able to manufacture various objects of the durable metal for daily use, the coating of aluminum giving them a silver-white lustre. He also produces a gold lustre or any other color, and even an enamel coating, all of which substances are said to adhere very firmly to aluminum. Aluminum, like tin, does not oxidize under normal conditions, and even stands the heat of an ordinary fire, while it is much more lustrous than tin.

BASE-BALL.

PHILADELPHIA V. BALTIMORE.

The Baltimore Paper Trade Base-Ball Club went to Philadelphia, on Saturday last, and engaged the Philadelphia Paper Trade Base-Ball Club in a game at the close of which they were able to repeat the *veni, vidi, vici* of Cæsar.

Reaching the city at 3 P. M. the members of the visiting club were taken to the West Philadelphia Atlantic Association Grounds, at Elm and Belmont avenues. The Baltimores won the toss and scored five runs before they were retired. Then they put out the Philadelphias with two runs and went in for nine more for themselves. The next inning they made eighteen, the Philadelphias scoring the same figure all the while, and then they dropped to two, while the home nine made seven. The fifth inning finished the game, with four for the Baltimore men and five for the Philadelphias—a total of 38 to 18 in favor of the visitors.

After congratulations from the vanquished, the party were taken to the Hotel Lafayette, and then to Finelli's, where for several hours good things were said and the most genial of banquet speeches made. There was no regular programme, but each of the Baltimore gentlemen was expected to express his views on some subject, and succeeded in doing so admirably. Edwin J. Howlett was chairman and toast master, and among the speakers who responded to his calls were J. G. Ditman, A. M. Bosse, Chas. E. Howlett and J. L. Weatherly.

On Sunday morning the guests were taken for a drive through the Park and a visit to Strawberry Mansion. Dinner was had at Sands', and the afternoon was spent in the pleasant shadows of the Wissahickon Hills. The visiting party comprised the following gentlemen: Thomas H. Tolson, J. D. Hannwald, H. B. Gilpin, W. B. Dillon, James Meikle, Matt. C. Fenton, J. Cushing Bailey, David A. Wall, Cowles E. Bird, Forney Reese, Charles E. Tucker, P. A. Kelly, Charles Sweet, Frank F. Schafer.

WILLIAM STREET V. NEW YORK PAPER TRADE.

On Saturday, the 7th inst., a very fine game of base-ball was played at Marion, N. J., between the William Street Base-Ball Club, representing the stationery trade of this city, and the New York Paper Trade Base-Ball Club, composed of gentlemen in the wholesale paper business.

The excitement had been running very high for some time, when it was known that these two clubs was to contend for base-ball honors, as the New York Base-Ball Club was considered invincible by its friends on account of not having lost a game this season. But, as the result showed, it was to meet with its first defeat from ball-players composing the William Street Base-Ball Club, who, by the way, have come off victorious in every one of the six games they have played this season. Below is the score:

The William Street Base-Ball Club will play a match next Saturday at 3 P. M., at the Elysian Fields, Hoboken, with the employes of Thomas Nelson's Sons. It will be pleased to accept challenges from any other club, either in the stationery or other trades. The secretary is Benjamin Howe, with J. D. Whitmore & Co.; the captain is R. H. Clarke with Samuel Raynor & Co.

THE STATIONER.

DEVOTED TO THE INTERESTS OF THE

Stationery and Fancy Goods Trades.

WEEKLY--\$2.00 PER ANNUM.

Single Copies - - - 10 Cents.

NEW YORK, THURSDAY, JULY 12, 1883.

Advertisements cannot be received for insertion in the current week later than 12 m. on Wednesday. The charge for advertising is 25 cents a line, each insertion. Special terms for standing and displayed advertisements to be had on application.

This journal aims to be a medium of information for and a representative of the interests of every one connected with the stationery and fancy goods trades. It contains a full and trustworthy survey of the market for stationery in this country, in all cases giving the actual prices at which goods can be bought of Importers and jobbers in this city, together with a detailed account of novelties in the trade, patents relating to stationery, and current items of interest. A review of foreign markets and accounts of movements abroad will also be furnished, and no pains will be spared to make THE STATIONER a thorough and complete exponent of the trade.

Subscription and postage for Great Britain, per annum..... 12s.

Any information our readers may wish to obtain shall be cheerfully given, and prompt replies will be made to all inquiries addressed to us on any subjects of interest to the trade.

Communications on all trade matters are earnestly solicited. Address

HOWARD LOCKWOOD, Pres. and Treas.

Subscribers to THE STATIONER can be supplied with the best cloth binder in the market. Deliverable at the publication office. Price, fifty cents.

Readers of this paper who avail themselves of the information obtained from its columns, by advertisement or otherwise, are requested to notify their correspondents of the source of their information.

FAIR business prospects are reported this week, and the trade outlook is seemingly quite satisfactory. The exercise of discretion is having a very steadying effect on commerce and cannot but result favorably.

OUR attention has been called to the publication, in a July issue of a monthly contemporary, of what purports to be the text of an agreement between Howard Lockwood and Joseph Parker, father and son. We desire to state that the publication in the monthly journal referred to is a false, fraudulent and garbled statement, and that it is *not* a true copy of that signed by the parties whose names are attached thereto. We do not know from what source our contemporary received its information, but inasmuch as its next issue will not appear until August, we tender the use of our columns to its publishers for the purpose of presenting explanations of the improper publication referred to.

AS an event of more than ordinary importance, we call the attention of our readers to the fair of the New England Manufacturers and Mechanics' Institute which will open at Boston ere long. Our readers, doubtless, well understand our views on the subject of such exhibitions, but we may say that we are as much impressed as ever with their value and importance and urge upon all who can afford time and means for the preparation, the desirability of lending their assistance in increasing the extent and variety of the exhibits. There is certainly no means of creating a healthy trade stimulus which excels the great fairs or exhibitions which bring together the different elements of manufacture and commerce and impress upon the public mind their special value or importance.

WITH some people consistency only lies in the form of expression—a mere matter of words. This remark is excited by the fact that in order to protect the stock-raisers of Great Britain, the British Government has inhibited the importation of American live cattle, ostensibly because they are subject to the "foot and mouth disease." At the same time, cattle coming from Canada, an English dependency, are not subject to this prohibition, and are presumably free from disease. It is also stated on good authority that this disorder is scarcely known in this country, and when it is further ascertained that by far the greater proportion of live cattle exported from Canadian ports come from the United States and are of the same class as those which will not be received in England, if coming from New York, the official diagnosis becomes somewhat funny, and only helps to confirm the statement with which we started out. There is no question that England is pulling a strong oar on the protection side of political economy, but at the same time she is trying to disguise the stroke and make it appear like the free-trade style which she has adopted as peculiarly her own. All sorts of expressions,

forms of language and efforts of diplomacy are being used to conceal the fact and to weaken its significance, but like all other insincerities, it will stick out somewhere, and cannot fail of recognition.

ANSWERS TO CORRESPONDENTS.

A. M. wants to know where to get a machine for putting enamel or color on cardboard or paper.

Ans.—There is a machine in Philadelphia, but it is controlled by those who use it and cannot be had. We believe that the Holyoke Machine Company makes a machine of the kind.

MORTGAGES, ETC.

OBITUARY.

JOSEPH RECKENDORFER.

Joseph Reckendorfer, president of the Eagle Pencil Company, of this city, died suddenly, on Saturday, at his country seat, Long Branch, N. J. He was taken ill on the Tuesday preceding with what seemed to be blood poisoning. The disease developed into erysipelas and resulted fatally in a few hours. Mr. Reckendorfer, who was forty-six years of age, was a native of Furth, Bavaria, and came to this country when a young man. He established himself in a small way in the manufacture of lead-pencils. From this small beginning came the Eagle Pencil Company, one of the largest corporations in its line in the world. Mr. Reckendorfer was the first man to successfully compete with foreign pencil manufacturers, and he was also the first to use American cedar in the manufacture of pencils. He was the owner of extensive cedar forests in Florida, from which the wood used in the manufacture of the Eagle pencils was obtained. He was the inventor and patentee of the automatic pencil, and also of the copying pencil. Mr. Reckendorfer was as well known socially as he was in mercantile life. He was a trustee of the Stationers' Board of Trade, a director of the Harmonic Society and of the Home for Aged and Infirm. He was also a member of the German Society of the City of New York, and of

a number of social and charitable organizations. He was philanthropic and charitable to a great degree. Mr. Reckendorfer was a close student, and was a thoroughly accomplished man. He leaves a widow and three children.

BOOKSELLERS AND STATIONERS' PROVIDENT ASSOCIATION.

The fourth annual meeting of the Booksellers and Stationers' Provident Association, of the United States, lately held, disclosed the fact that not one death had occurred during the past year.

The purposes of this organization are praiseworthy. They are to encourage kindly feeling and promote acquaintance among the members of the book and stationery trade of the country, and provide for mutual protection and benefit. On the death of a member his family or legal representatives are paid a fund secured by assessment upon the members. The membership roll is quite large, yet there are many in the trade whom it would advantage to be connected with the organization and who are not of it. Booksellers and stationers in whatever part of the country located, are invited to apply to W. D. Myers, secretary, 194 Broadway, or P. O. box 560, New York, for the necessary forms for admission to membership.

The board of officers in the association is not as representative of the stationery interest independently as it should be, but this is an omission which can be and doubtless will be rectified when its importance is insisted upon.

The Rubennick process for metallizing wood consists in first immersing it in a bath of caustic alkaline lye, in which it is allowed to remain for two or three days, according to the degree of permeability of the wood, at a temperature of 167° to 194° Fahr. From this bath the wood passes to another of hydro-sulphate of calcium, to which is added, after twenty-four or thirty-six hours, a concentrated solution of sulphur. Here it remains for about forty-eight hours at a temperature of 95° to 123° Fahr., and lastly, for from thirty to fifty hours, the wood is immersed in a solution of acetate of lead at the same temperature. The timber, thus pickled, is allowed to dry, when it is said to be susceptible, after burnishing, of a high polish, and even a metallic lustre, which is more brilliant if the surfaces of the wood have been previously rubbed with lead, tin or zinc plates, and then polished with a glass or porcelain burnisher. Treated in this way, the wood may assume the appearance of a metallic mirror, being at the same time hard and very strong.—*Iron.*

Market Review.

OFFICE OF THE AMERICAN STATIONER, }
WEDNESDAY, July 11, 1883.

THE MONEY MARKET.—Financial affairs continue serene. The heavy semi-annual disbursements have increased the supply of loanable funds and prime business paper is readily negotiated at 4@5 per cent., while loans on pledge of stock collateral are put out at 1½@3 per cent. The feeling of lethargy in the stock market has had no parallel in many years. Something of this, of course, is due to the absence of many of the regular operators of the street, but the chief cause is the lack of confidence in the stability of values, which keeps outside investors away from the market. But if business is exceedingly dull, prices fluctuate within narrow limits. Railroad bonds were active and weak. Government bonds were ¼ lower for the 3s and ½ lower for the 4s. The market for sterling was dull, but has had an undertone of strength owing more to purchase by bankers than to a mercantile demand.

THE PAPER MARKET.—Although the uncertainty as to what would be the effect of the new tariff upon prices has had something to do with the dull state of general trade for some time past, it is expected that there will be some increase in many lines of goods, now that the change in duties has been made. At all events, there is a better feeling in business circles, although this is the dull season of the year. There were fewer business failures in the second quarter of the year, compared with the first quarter. The heat during the past week has been some interruption to business, but some of our city dealers have taken some very good sized orders to be placed at the mills for goods to be made up for delivery in the fall. We hear of a prominent manilla paper manufacturer, who, owing to a pressure of orders and short water, has advanced his price on No. 2 from 6 to 6¼c., and from 6½ to 6¾c. for heavy and light weights, respectively. An order was closed within the past week by a city publishing house, through the selling agent of a Pennsylvania concern, for 80,000 reams of a fair quality of print paper, 39x 42 inches, 40 pounds to the ream, or about 1,600 tons, at a price reported at 5¼ to 5½c., but believed to be 5¾c. This paper is to be delivered inside of a year. We also hear of a contract entered into to supply two Philadelphia daily papers with 37 tons per month of a fair quality of news at 6c., less 1 per cent. for cash.

THE STATIONERY MARKET.—The condition of trade during the past week has been more satisfactory than at any period since the close of the Christmas holidays. Orders both personal and by mail have been coming in rather briskly, and movement in trade is beginning to again become conspicuous. Some houses, however, are receiving most of their orders from travelers, while others have sold largely to merchants who have been summering in the vicinity of this city for several weeks past. Notwithstanding this revival of trade, prices in many instances are greatly complained of as being for certain goods brought down to an almost unremunerative level. Under these circumstances manufacturers find it absolutely necessary to pay strict attention to the introduction of every practical improvement, the result of which is that richer novelties are now being offered than at any prior season, and at the same time it is noticed with satisfaction that some buyers, to a certain extent, are gradually forsaking the cheap and consequently more inferior goods, and preferring to purchase the more expensive articles. Still, the demand is tolerably good for general lines, and as the season advances it is expected that many lines now only in limited demand will be eagerly sought after. Some of the fancy goods houses have not yet opened up their stock for exhibition, but they report a fair trade from sample orders. In fancy stationery trade is said to be excellent, while in general staple stationery it is good. In domestic steel pens business is reported active, while in imported pens it is rapidly improving. In fancy leather goods trade is said to be picking up considerably. The blank-book manufacturers are doing a steady trade, and expect that it will be very active in a few weeks. A great many novelties have been offered during the week.

THOS. DE LA RUE & CO.'S

Christmas and New Year Cards

FOR THE SEASON 1883-4.

Now ready, Pattern Books of the above Fine Art Publications, containing a rich profusion of choice and elegant patterns, Chromo-Lithographed in the highest style of Art, after original designs by eminent Artists. *N. B.*—Shown by Leading Jobbers in the States.

EMBROIDERY SERIES.—**CHROMO-LITHOGRAPHED ON THE FINEST WHITE SATIN.** These Satin Chromos, which have now for many years enjoyed a high reputation, this year surpass all previous productions in the same line. The large Satin, No. 646, "BIRDS AND FLOWERS," is a veritable work of art, and would form an excellent centre-piece in the most costly embroidery. In the case of the smaller Satin pictures, the prices have been reduced with the view of extending their use by ladies for every purpose of ornamental needle-work.

THE ANTI-STYLOGRAPH.

(Hearson's Patent, U. S. A., January 10, 1882.)

A SELF-FEEDING RESERVOIR PENHOLDER, FITTED WITH A NON-CORRODIBLE NIBBED PEN.

Pocket Size (4¼ in. long), \$1.00 Retail; Desk Size (6 in. long), \$1.50 Retail.

THE ANTI-STYLOGRAPH is a Pen which requires no dipping, but is ready for instant use without adjustment, and may be carried in the pocket with perfect safety. It writes with a nibbed pen, renewable at pleasure, with fine, medium or broad point, to suit all writers. It is easily refilled, and holds sufficient ink for several days' use. Any ink may be used.

N. B.—It is not a Stylograph or point-writer, but a true Pen, and preserves all the usual characteristics of the handwriting; it may, therefore, be used for short-hand and signatures.

Pens for Refilling, with Fine, Medium or Broad Points, 40 cents per Box, Retail.

FITTED WITH IRIIDIUM-POINTED PALLADIUM PEN. Pocket Size, \$2.50 Retail; Desk Size, \$3.00 Retail.

The Palladium Pen is as flexible as Steel and as durable as Gold; and, like the latter, is specially adapted for use with acid copying inks.

Wholesale Agents for the sale of the Anti-Stylograph in America, to whom the Trade are respectfully referred for particulars as to price, &c.:

MESSRS. WATSON & PARK, NEW YORK.—For Maryland, Massachusetts, Maine, New Jersey, New Hampshire, New York, Pennsylvania, and Vermont.

A Revolution in Stylographic Pens.
The Latest Improvement.

THE KERNER.

\$1.

It is constructed on strictly scientific principles, and being devoid of the complications which exist in old styles is less liable to get out of order. It has no springs to be affected by the action of the ink. The needle is rigidly fixed to a FLEXIBLE air tube extending entirely through the barrel, which when writing is constantly vibrating throughout the entire length of the barrel agitating the ink and causing a perfect flow to the point. It is unequaled by any writing instrument of the kind ever offered for public favor, and gives entire satisfaction to all who use them. It is constructed of the best material throughout, and the point is of platinum alloyed with iridium. Prices: No. 1, Plain, \$1; No. 2, Engraved, \$1.25; No. 3, Gold Mounted, \$1.50; No. 4, Entire Gold Cap, \$3; No. 5, Mottled Ruling Pen, \$1.50. Send for Circulars.

BOOK SIGNATURES.

A modern book is made up of a certain number of sheets of paper, each of which is folded to form leaves. There may, for instance, be eight pages of matter printed on one side of the sheet, and eight pages printed on the other side. This sheet will be folded so as to form eight leaves, and it is hence called a sheet of octavo. It contains, of course, sixteen pages. So a sheet of duodecimo, or 12mo., forms twelve leaves or twenty-four pages.

The ancient printers, or, at least, those of the fifteenth century, had only very small presses, and two folio pages, little larger than two pages of foolscap, was the largest surface they could print. It is probable also that the system of laying down pages, or "imposing" them, that we now have, was not then known. Their mode of procedure was as follows:

They took a certain number of sheets of paper, three, four, five or more, and folded them in the middle, the quantity forming a section. Three sheets thus folded or "quired" is called a ternion; four sheets a quaternion, and so on. Hence, the first sheet would contain the first two pages of the ternion and the last two pages; that is, pages one and two, and eleven and twelve. The second sheet lying inside the first, would contain pages three and four, and nine and ten; the third sheet having pages five and six, and seven and eight. If the reader will take three slips of paper and fold them in the same manner, marking the numbers of the pages, the process will be easily understood.

It is obvious that when a system of this kind was adopted, there was a danger lest the loose sheets should become disarranged, and not follow in their proper order. To obviate such an accident, there was written at the bottom of the first page of each leaf, a Roman numeral, as j, ij, iij (1, 2, 3), and so on. This plan was originally adopted by the scribes, and the printers merely imitated it. When the numbers followed in due order, it was evident that the sheets were properly quired together.

But a book being made up of a number of quires, there was a danger lest the quires themselves should become disarranged. To prevent this, there was written at the foot of each page a letter of the alphabet. The first sheet would bear the letter A; the second, B, and so on. When these two indications were present, the binder could never be in doubt as to the order of the different sheets. The first page of the book was marked A j; the third page, A ij; the fifth page, A iij, and so forth. The next quire presented the letters B j, B ij, B iij, and so on.

These indications at the feet of the pages are known as signatures. When a page bears one of them it is said to be "signed," and where there is no mark of the kind it is said to be "unsigned." In the earliest books, the signatures were written with a pen, and the fact that many copies that have been preserved do not now bear signatures, is owing to the fact that they were written so close to the margin that they have been cut off since.—*Ex.*

At a recent meeting of the Society of Physical and Natural Sciences, Karlsruhe, M. Bissinger made a communication on the magnetism of bars of steel and iron when broken on the machine serving to test them. The phenomenon is not due to elongation of the bar, but to the actual breakage, and both parts are converted into two magnets of sensibly equal power. The shock and trembling of the metal on breaking is probably the cause of magnetization. Ac-

According to Professor Hughes' recent experiments in the testing machine, the bars are placed vertically, and the south pole is formed at their upper part. The different iron objects near the machine at the moment of rupture and vibration are also magnetized, but to a less degree.

COMMON-SENSE BINDER.

Send for Price List.

The MOST COMPLETE AND PERFECT DEVICE ever offered the public for filing and binding Pamphlets, Periodicals, Magazines, Sheet Music, and loose Papers of every description.

The BINDING DEVICE is composed of steel strips or stubs, between which the papers are held firmly—as in a vice—by means of two or more Steel Fasteners, which cannot stretch and allow the papers to work loose, or the book to sag from the cover.

And Students' Note Books,

BALTIMORE, MD.

RENDERING MANUSCRIPTS INCOMBUSTIBLE.

This is a French process of rendering unflammable and incombustible printed matter and manuscripts of all sorts or descriptions and also paper hangings, stage scenery, molded and modeled objects of an ornamental or decorative character, in relief or otherwise, and, in short, all objects to the manufacture of which the products of the process can be applied.

It consists in the composition of an ink and of a pulp for the manufacture, among other applications, of a paper, rendering unflammable and incombustible all writings, printed matter, engravings, or drawings. Molded and modeled work, as well as ornaments or decorations in relief, in the production of which these elements enter, are likewise rendered unflammable and incombustible, and even indelible and unalterable, by the action of acids, or by a temperature of 1,000 degrees to 1,200 degrees centigrade, to which the documents or other objects may be exposed, the ink remaining always transparent and unalterable. The pulp of which these different objects are made, and which constitutes an important feature of the invention, is prepared of a composition into which enters asbestos fibre, or any other fibrous mineral having similar properties.

To manufacture unflammable and incombustible paper, first grind about five hundred kilogs. of raw asbestos fibre, and afterward card it, taking the finest qualities for the purpose according as it is wished to produce a paper of good quality. The waste fibre is saved and put on one side for the manufacture of card-board or other inferior products. The mineral fibre of good quality, after being ground and carded, is placed in a vat and moistened with water. In order to form a bath suitable for the purification and bleaching of the pulp, the vat is first filled with asbestos fibre, and upon the pulp thus moistened about five kilogs. of chloride of sodium or of potassium for each one hundred of pulp to be bleached or purified are poured. Chloride of lime and hydrochloric acid may also be employed with advantage. To purify and bleach the pulp it is afterward washed and ground by ordinary means. At the time of manufacture add mica, pulverized or reduced to fine powder, in the proportion of eight or ten kilogs. for each one hundred of pulp. Four to five kilogs. of ordinary paper pulp may also be added. If the first operation is not sufficient for complete purification, it should be repeated a second time. For the manufacture of card-board or paper of inferior quality substitute for the mica the same proportion of ochreous clay or artificial ultramarine, according to the color it is desired to impart to the substance of the paper or card-board. The pulps thus prepared receive a first sizing of gelatine and a second fire-proofing composition of sixty parts of any silicate whatever, and forty parts of distilled or plain water.

The manufacture of the paper is conducted in the ordinary way of making laid or water-mark paper, either by hand or machine.

The colored paper or card-board treated as described by this preparation or sizing is said to be unalterable either by acids or by the action of fire, the color remaining always transparent and indelible.

The mode of manufacture is similar in the case of paper hangings, fancy papers and others to be used for decorative purposes, for stage-scenery, hangings and other purposes. The papers, after being manufactured as above described, are ornamented by the application of

incombustible ink. This ink may be made of any color, and is always unalterable.

For the manufacture of paper-hangings the waste mineral fibres, or those of second quality, are employed. If it is desired to color the mass of pulp add a quantity of ochrous clay, which should not, however, exceed fifteen kilogs. to one hundred of fibrous pulp, as a greater proportion would prejudice the suppleness of the paper, so that when exposed to a high temperature it is liable to become brittle. The paper-hangings are printed or otherwise decorated by means of an incombustible ink or color.

The hangings and decorations made according to this process are said to not only have the great advantage of being unflammable and incombustible, but the further one of circumscribing the area of a fire, while the printed characters, decorations or painting preserve their transparency and color.

This incombustible pulp or composition may also be applied to the production of ornaments in relief of all kinds, and particularly on ceramic and crystal ware, for the indefinite preservation between two thicknesses of glass or other material of documents, portraits, engravings and printed matter of an important nature, such as the inscriptions intended to be embedded in the earth or placed beneath the foundation stones of edifices and monuments, and which, colored by means of this ink, will be rendered quite indestructible, the composition or pulp being capable of supporting the heat at which the objects are fired or burned, whether inclosed between crystals, where it is placed in the fused state, or in relief. It is even capable of supporting metalization.

For the relief ornamentation of ceramic, crys-

tal or other ware susceptible of being fired again at a high temperature, or of being metallized with another metal, the pulp or composition is prepared and composed as follows: Asbestos or other similar mineral fibre, eighty parts; white or ochrous clay, compounded according, eight parts; silicate of soda or potash, six parts; plain or distilled water five parts; glycerine, one part. This same composition serves for molding frames, medallions, tablets, for modeling ornaments in relief, for the internal decoration of houses, theatres and other structures, and which are desired to be unflammable and incombustible. It is only necessary to take a quantity of the pulp sufficient for making the desired objects and render it as homogeneous as possible, whereby any desired moldings, coatings and decorations may be made of this pulp, which may be worked as a perfectly plastic material, and remains perfectly unflammable and incombustible, and if the pulp is colored by means of this process the transparency of the colors is said to resist all temperatures.

Following are the different formulas for the preparation of the pulp:

1. For pulp for white paper or cardboard of high quality for manuscripts, deeds, printed matter or engravings to be unflammable and incombustible at a very high temperature, take, first, asbestos fibre or other mineral fibre having the same properties, purified and bleached, as explained, 460 kilogs.; second, mica of good quality, finely pulverized, 30 kilogs.; third, vegetable pulp of good quality, 10 kilogs.; total, 500 kilogs.

2. For second-quality paper stuff take, first, waste fibres from the preparation of those used in preceding formula, or fibres of inferior qual-

ity, 500 kilogs.; second, a white clay or pulverized silica, 40 kilogs.; third, ordinary vegetable pulp, 10 kilogs.; total, 550 kilogs.

If it is desired to obtain paper stuff colored throughout the mass, substitute for the white clay or silica natural ochery clay or ultramarine (artificial).

The fireproof sizing of the pulp is effected as follows: To size 100 kilogs. of pulp first size with gelatine or other sizing as for ordinary vegetable pulps, and then size a second time with any silicate whatever and water. The sizing may be also done at one operation as follows: To size 100 kilogs. of pulp dissolve, in the usual way, 4 kilogs. of gelatine or other sizing; add to the gelatine, kept liquid by heat, 6 kilogs. of soda or potash.

Generally speaking, the invention consists, essentially, in different applications of the pulp, whose composition comprises the treatment of asbestos fibres, or other mineral fibres having similar properties, purified by chloride of sodium, potassium or lime, and by hydrochloric acid, combined, according to requirements, with mica, silica, natural clays, and with gelatine, glycerine, silicates, oil, paraffine, resin, and paste.

The fire-proof sizing above described may also, according to circumstances, be replaced by another fireproofing treatment, which consists in producing upon the pulp the same effects as the silicates, to a certain extent, by immersing the paper made as above described, rapidly in a bath of sulphuric acid, formed of two parts, by weight, of priming acid and one part of water, and afterward washing.

A thing is not necessarily false because you do not happen to believe it.

TO THE TRADE.

GENTLEMEN:—Annually, since 1867, we have offered our New Samples of **CHRISTMAS CARDS**, and yearly have we been encouraged to renewed efforts.

Our permanent staff in the Designing Rooms has been steadily increasing, and every issue of New Patterns is greater in number than that of the previous year.

Competitions in design among unskilled amateurs, and lavish advertising of cards produced from their drawings, have only resulted in

MARCUS WARD'S CARDS

BEING MORE IN DEMAND THAN EVER.

Again we have to announce the completion of our **DESIGNS** for the **NEW SEASON**, all printed at OUR OWN WORKS. We think our artists have surpassed themselves in novelty and beauty of design. The quality of our work is well-known, and the variety and value leave nothing to be desired. Sample-Books now in our 'Travelers' hands.

Yours respectfully,

MARCUS WARD & CO.,

LONDON AND BELFAST.

ELECTRICAL TYPE-WRITER.

This is a machine for setting movable type and printing from the same, and also for delivering the type to a distributing galley ready for redistribution to the font after they shall have been used to print from.

The nature of the invention consists in constructing a machine in which each particular letter or character used is placed upon a pair of ways or slides, between which the type are held by means of heads or projections formed on the tops of the types, so as to allow the types to slide along on and between the ways, a spring-follower being arranged to push the type compactly up together and off of the opposite ends of the ways as rapidly as a toothed wheel which is arranged to engage the type at the delivery end of the ways will permit. The toothed wheel is operated by an electro-magnet, and the mechanism connected therewith is so arranged as to cause the movement off of the before-mentioned type-ways of only one type at a time, which will pass type, end down, through a delivery-tube, at the bottom end of which it will be set in a galley in proper form for printing any desired word or sentence, a number of the before-mentioned type-ways and sets of type being provided, so as to have the machine contain all the letters and characters required to print any required composition. From the forming galley the types will slide into a pair of printing-ways, where they will successively move between two sets of movable platens, by the operation of the first of which the type will be inked, and by the operation of the second the type will print the desired characters or words on a slip of paper passed between them. Both of the sets of platens will be operated at the proper time by suitable electrical mechanism. After the type shall have been printed from, they will be pushed off of the ends of the printing-ways into a receiver called a "distributing galley," from which the type may be returned to their original places on the first-named ways or fonts. The mechanism of this machine is such that it can be used for long distance telegraphy or for office use as a simple type-writer.

Some of the best colored inks for printing can be mixed in the printing room as paint is mixed, varnish being used as the medium. Red and black make brown; black and yellow make olive.—*The Art Age.*

CROWN BRAND.

Stamping Inks, Mucilage, &c.,
184 WILLIAM STREET, NEW YORK.

FOR SALE—BOOKS, STATIONERY, WALL Paper and Fixtures; the best of locations, in one of the richest, steady-growing cities of now 65,000 inhabitants in the West; stand at the same place for twenty years. Address G., care American Stationer.

WANTED—AN ACTIVE PARTNER, WITH A small capital, in a well-established Stationery, Blank Book and Printing business, in a manufacturing city in Eastern Massachusetts. Only those who thoroughly understand the Blank Book or Printing business, and can successfully solicit trade, need apply. Address C. H. S., office of American Stationer.

ONE MILL RUNS CONSTANTLY ON EXTRA MACHINE-FINISHED BOOK PAPERS.

THE ATTENTION OF THE TRADE IS CALLED
—TO OUR—

NEW CYLINDER BOTTLES,

In two sizes—3 and 1½ oz.

The accompanying Cut represents the latter, actual size.

OUR LEADING INKS are all bottled in them except French, Extra Copying and Carmine. We also use the same style with wide, trumpet mouth, in 4 oz., for Carter's Mucilage and Arabin, the latter a new product, from which all waste matter has been removed, so that every single particle will stick.

CARTER, DINSMORE & CO., BOSTON and NEW YORK

BYRON WESTON,

DALTON, MASS., U. S. A.,

HAS BEEN AWARDED THE

GRAND PRIZE GOLD MEDAL

AND RECOMMENDED THE

Medal of Honor and Perfection
At PARIS, 1878,

This being the HIGHEST and ONLY AWARD given for

LINEN RECORD & LEDGER PAPER

Also, the only Gold Medal given for Ledger Paper at the Adelaide, Australia, Exhibition, 1881.

—A SPECIALTY.—

THIS Paper has received THE HIGHEST PREMIUM over all others from the Cincinnati Industrial Exhibition, Massachusetts Charitable Mechanics' Association, Franklin Institute of Philadelphia, Louisville Exposition, Medal and diploma from United States Centennial Commission, Medal of Progress American Institute, 1877, and Medal of Improvement and Progress, Boston, 1878. Its

PRINCIPAL ADVANTAGES

are as follows:—1. It contains more LINEN than any other Ledger Paper, has a longer fibre, and is, consequently, tougher. 2. Having a harder and better body, it frays less in erasure, so that by simply using the rubber after the eraser, the ink is prevented from spreading. 3. It is more uniform in Weight Color and Finish. 4. It never cockles if properly bound. 5. Its chemical action upon ink is such that it both writes and rules up better. For proof of the foregoing, refer to a large number of Stationers, Bookbinders, Bookkeepers, and Recorders, who have given it, after a severe test, the preference over all others. This paper is Double Sized, and will stand any climate or the most acid of fluid inks.

Send for sample sheet, ERASE and REWRITE FOUR TIMES on same spot,
Each sheet is water-marked with name and date.

WHOLE NO. 421.

SOME PHASES OF JAPANESE ART.

EVEN before the American Navy, in 1853-1854, opened Japan to foreign intercourse, specimens of Japanese art had excited curiosity and admiration both in Europe and in this country. Most of these had left the Japanese Empire through the Port of Decima (adjoining Nagasaki), where Hollanders had always been allowed a limited traffic under rigorous and even degrading conditions.

During the past two or three decades, however, the markets of the world have been glutted with Japanese fancy goods, and the production of these has been stimulated into a large and growing industry, embracing within its limits bronze, porcelain and silken works of art, and so down the gamut to cheap, gaudy fans.

The older specimens of these articles justly rank higher than the newer creations, however pretentious, for although the original type remains, there is an indefinable grace and a distinctness of style about the older work which seems to have been marred in objects made within sound of steam engines, newspapers, and other civilizing agents. It is but fair to say that the inspiration of good European models has sensibly benefited the later Japanese *cloisonné* ware and some of the finer porcelain.

The origin of Japanese art is pure imitation of the simpler forms of nature, aided later by such departures as were incidental to the grotesque ideas lurking in the versatile, impulsive and quick fancy of such an imaginative and happy race. The literature of Japan and all the culture growing out of it is due to China—in its art Japan is strictly original.

Unlike European art that of Japan was never chilled and distorted by the gloom and horrors of a religion which, while professing to advance it, virtually restricted delineation to the direct effects upon the human face and form of the joys of eternal bliss or the pains of everlasting suffering. Japanese art is joyous, spontaneous and natural, or else weird, satirical and grotesque. To the naturalness of what we call the Greek is added the conscientiousness of the pre-Raphaelite schools. As elsewhere, the influence of the religious ethics of the nation made itself felt.

The religions of Japan were two. The Sinto, peculiar to the country—a wild form of moralities mixed with hero worship and of which the Mikado was Pope—and the Buddhist, or rather that form of Buddhism which came from India through Thibet and China, and became localized with certain changes. The Sinto was a lightly-carried, easy-going religion, almost childish in its simplicity. The localized Buddhism was remarkably free from the asceticism of Buddhism elsewhere.

Temples were, and yet are, made most pleasing to the artist mind. The situation chosen varies from the low, rocky sea coast to the wooded summit of the high mountain, but is always picturesque, always attractive. Large trees (usually conifers) with broad, shading branches overhang massive low roofs, heavy wooden pillars support broad verandas of

polished wood, and such light as penetrates the thick foliage outside is dimmed and obscure in the broad cool interior of the building.

The silence in these holy places is deep, but not oppressive, full of calm and peace as the *religio loci* of every place of worship should make it. No noisy gossipers, no rattle of vehicles disturb the ear—only the twittering of the birds outside, the drone of the locust, and the low tones of the officiating priest are heard, excepting when the inner bell tinkles or the outer bell (hung apart from the temple) gives

The leading illustration represents one of a pair of candlesticks of a "temple set," now owned in New York city.

The material is a rich brown bronze of very smooth and soft polish. The figures are grotesque, although true to nature. A stork, the emblem of longevity, stands upon two tortoises, and bears in his beak a spray of lotus. From the centre of the highest lotus projects the pin or spike which holds the candle. Candles are made always with wicks of spirally-rolled paper, and the spike of the candlestick is thus inserted in the hollow core of the wick.

out its long, solemn notes when services are beginning or ending.

Here and there within the temples are found wonderful stretches of coloring on the wooden walls. The patterns are small and recurring, the colors most daring combinations of greens, reds, browns and blacks, yet harmonizing or contrasting so as never to violate the canons of good taste. Some of these patterns have been reproduced quite successfully in our own later church decorative art.

The glory of the temple ornamentation is, however, in its bronzes. Colors may fade, wood-work may decay, but the bronze ornaments are fadeless and often priceless. Even the massive outer bells are of bronze, frequently containing large percentages of gold and silver, while the lesser bronze pieces used upon and about the altar are not infrequently elaborated with figures of solid precious metals. What foreigners in Japan have learned to call "a temple set" always comprises five pieces, viz.: two candlesticks, two vases and an incense burner as centre-piece.

The lotus flower and sprays symbolize peace, rest and comfort; the stork, as already said, hale old age. The tortoise, generally represented as a supporter of other figures (in accordance with legends which passed from our earliest common ancestry both into Western Europe and into Eastern Asia) is the image of rest, solidity and strength. Thus the poetry of this figure to the Japanese mind is that an honored old age, resting on the firm foundation of good deeds, bears peace and comfort, and supports the light which sheds its rays upon the altar. This poetic feeling which permeates everything in Japan, however trite and simple, at first astounds one fresh from the busy practical realism of life in our own civilized nineteenth century.

The second engraving represents the incense burner or censer. Of like material with the candlesticks and vases, it is more highly elaborated than the former. The chiselling (done after the casting was made) is in the candlesticks confined principally to the feathers of the stork and the scales of the tortoises, but in the censer the chisel has been exquisitely

used on all of the irregular surfaces. Close examination of this piece shows the most patient and elaborate attention to every detail, however minute. The tiny claws, teeth, manes and eyes of the dragons contending for the sphere are worked as carefully as if all of the examination was expected to centre there. Even this, however, is surpassed by the basso-relievo carving of the medallions on the sides of the vessel.

The medallion presented full face in the engraving repre-

the highest grade, and the ornamentation is in good keeping. The sunken medallion spaces are exquisite in their contour, and the dainty grace of the raised work near the base comes as near to the line of aimless elaboration as the Japanese artist ever allows himself to go. The pattern of the swell of these vases is identical with that of the censer, even to the dragon-head handles, but the delineations within the medallion spaces vary with every panel.

These pieces are all very old, and were doubtless in actual

sents a dragon surrounded by flames—the hideous reptile personifying here an evil spirit. The projecting handles on the side of the vase are somewhat similar to the Roman *rostra* in general appearance, but are really supported dragon heads.

The dragon-covered lid of this censer is perforated to allow the incense smoke to escape from the interior of the vase.

The next and third figure represents one of the two vases of the set. In this engraving the carving is very clearly brought out, and the beauty of the work is well developed. In mere grace of outline the designer of this vase—dead perhaps centuries ago—surely had had nothing to learn from the Etruscans. The classic purity of the model is of

service in some temple long before the silent worshipers knew what the face of a European was like.

The last illustration, a household piece, is more modern, but still an antique. It represents a porcelain fire-bowl with the usual small tea-pot set on top. Lighted charcoal is placed within the bowl by the aperture seen in front, and the heat arising through the perforated top warms the tea-pot. The ware is *Satsuma*, so called from the province in the south of Japan where these specimens are made. The colors are yellowish drab background and red tracery. The surface is intersected with tiny cracks which extend only through the glazing. This “crackling,” as it is called, was no doubt the result originally of imperfect or crude systems of baking, but having become a distinctive mark of the Sat-

suma product, it is now most carefully and skillfully made uniform by the use of cooling blasts. Unless uniform the piece has little value.

This peculiarity of Japanese art—pretending a lack of finish—is one of its oddest features. It is most observable in the tracings of characters and figures on silk or paper. The brush seems to have suddenly lost its ink, and a jet-black stroke becomes a mere tracing of faint hair marks. This apparent fault arising from carelessness is usually the

DECORATING METAL ARTICLES.

DECORATION of metal articles by means of an electro-deposition of some other metal, reproducing over the surface Arabesques or other subjects, has been recently perfected with very satisfactory results. Suitable subjects for the decoration of such articles as may have been selected are cut from a thin sheet of some pliable metal, and the stencil thus obtained is used as in painting. The surface of the articles to be decorated must have been thoroughly var-

work of hours, each hair mark being carefully wrought not to counterfeit the effect of a reckless dash.

Setting aside the question of Japanese models, their success in art is the result of a toilsome patience which is never wearied. An artist even of low degree will spend hours on details to which our best artists would begrudge minutes, but *finis coronat opus*, and when the subject leaves the worker's hand no minutiae have been neglected, and criticism can only affect the conception, not the execution. In none of their work is this more clearly shown than in bronzes, and owing to their indestructibility these must ultimately be the only specimens the world will hold of an art without a rival in finish, without a peer in distinctive originality.

HOFFMAN ATKINSON.

nished and dried, the stencil then laid over it, and with a small hard brush and some convenient liquid the surface exposed through the stencils is carefully cleaned of the varnish, leaving bare the metal beneath. After the stencil is removed, the article is then ready for the regular electro-metallurgic treatment.

For libraries and dining-rooms screens are made of embossed leather. The ornamentation is leather fringe, studded with fancy brass-headed nails. The most delicate and expensive screens for the drawing-room and *boudoir* are composed entirely of feathers. Some, which are remarkable for simplicity and elegance, are made of Japanese mats on a framework of ash.

ART WORKS IN SILVER.

OF all the arts, that of the worker in the precious metals is the one which can be traced, with certainty, the farthest back in the history of human intelligence. When man first determined that one substance was more precious than others, he began to work upon it as on a labor of love, and devoted his efforts to the embellishment of temples and shrines and the adornment of his own person. Gold naturally received the highest favor, but silver, supposed to represent as well a celestial order, and having in its delicacy and purity when worked into fanciful forms almost an equal attraction with gold, was not neglected, and the artificer in one metal was an adept in the other, the goldsmith and silversmith being congenital terms. Jacquemart tells us that all written records unite in proving this and the Scriptures and most ancient narratives of the farthest East demonstrate it. In museums which contain specimens of art-work created in times of which we have scarcely more than tradition, there is authentic testimony to the sentiment of luxury inherent in all of the peoples of the earth.

In the gold and silver smith's art, as in others, the ancients were pre-eminent and the art itself was held in such esteem that, in many instances, encomiums passed on its masterpieces have survived the works themselves. The trade of the worker in precious metals was a school which produced masters. Lysippus had hammered the metals before he became a sculptor; Alexander, third son of Perseus, King of Macedon, did not think it derogatory to make chasings in gold and silver. The large votive vase in the temple of Minerva has immortalized the name of Aristotle of Cliton. Calamis, although a sculptor, embellished with bas-reliefs the silver vases which in the days of Nero were, at Rome and among the Gauls, articles of luxury for the rich and subjects of emulation for artists.

The ancients assigned the first place to the work of the hammer, and this is why the greater number of artists were designated as *celatores* or chasers. These chasers made their vases of a thin layer of metal, repoussé and chased, a movable,

smooth vessel being fitted internally to enable the exterior shape to stand service and to protect the work of art from injury and the effects of frequent use. Of course, works of this character were made only for the rich and

not for every-day exigencies, the poorer classes being compelled to resort to the cheaper and commoner forms of baked clay and pottery. The most elegant specimens of the silversmith's art are still reserved for those whose wealth commands almost everything that their fancy suggests and many notable examples of artistic work are produced in response to such requirements.

But the realm of art is no longer closed to people of moderate means, and art works in silver are more widely distributed and more largely sought than in the days of the ancients. The reproduction of elegant designs in silver is attended with less expense by the aid of machinery and mechanical devices which reduce the labor and cost of manufacture, and these designs are further carried out in still cheaper forms by electroplating upon a base of commoner and harder metal. Many instances might be afforded of the most costly productions of the silversmith of the present day, but as the greater demand is for those articles which add grace and refinement to the surroundings of every-day life, and which can be attained by those whose means will not admit of the gratification of expensive tastes, it is sufficient to present the accompanying illustrations of toilet accessories in combinations of glass, porcelain and silver which demonstrate that beautiful things are not for the rich alone, and that art work in silver, while retaining its distinctive characteristics, is more significant in its influence upon the habits and culture of the people.

For these illustrations THE STATIONER is indebted to Simpson, Hall, Miller & Co., the well-known silversmiths of Wallingford, Conn. —:o:—

SCREENS with a framework of open-work brass, and with panels of dark crimson plush worked with birds or other appropriate designs, are beautiful. An excellent effect may be had by inserting in the centre of each panel a piece of heavy cretonne of tapestry pattern, and bordered top and bottom with plush.

—:o:—

PAINTING on zinc is made easier by employing a mordant composed of one quart of chloride of copper, one of nitrate of copper and one of sal ammonia, dissolved in sixty-four parts of water, and to this mixture is added one part of commercial hydrochloric acid. This is brushed over the plate of zinc, and after twelve or twenty-four hours it dries a dullish gray. Upon this surface the colors will adhere perfectly.

Heliotrope is the fashionable flower.

FASHIONS IN STATIONERY.

IN the long ago, when, with infinite patience and long, protracted toil, handwork was the only means of producing ornament, and the varying demands of public taste were kept within confined limits in the use of writing materials, the modern stationer, with his fanciful changes and quick responses to the demands of fashion, would have ranked as a sorcerer. There seems to be no question that in ancient times the scribes had a "corner" on the stationery market, and the producers of illuminated manuscripts in the middle ages were completely monarchs in respect to their art. One can readily imagine what a wail of woe would have arisen in those days

FIG. 1.

had there been suddenly thrust upon the public the multitude of designs, embossed, lithographed or otherwise printed and colored, which now appear in regular order and with unending profusion. Thus, the world changes and art and fashion change with it, and each succeeding generation witnesses scenes of transformation more varied than before.

But the past is gone, and dealing with the present it becomes a duty to present a review of things to be and not those that have been, and consider the living and not the recondite.

The public, and first of all the stationery

FIG. 2.

trade, through whom they derive their supplies, are of course interested to know what are or will be the prevailing fashions in cards, envelopes and paper, the tints, devices and other little bits of fancy which serve to create a diversion from older styles, and excite the desire for possession.

In note papers the hand-made, cream-tinted, plain ragged-edge, with square fold and without any water-mark, is the style most affected by the élite. The next in popularity are the smooth plated papers in pure white cream and silver gray and rough-laid papers in the same tints, the same papers

illuminated with crests, &c. The sizes used are octavo, commercial and royal, the envelopes in all cases being square.

Correspondence cards come in the same colors as the papers, and with ragged or smooth edges.

Wedding notes and invitations are of heavy, ivory white note-paper, and are printed in script of Old English style from copper-plate. There is also a new style, which consists of two hammered silver

FIG. 3.

bands, each about an inch wide, running across the top and bottom of the sheet, respectively. Other new styles in this line consist of orange blossoms on a silver card-board and a folding card with a satin panel on each flap. Beadings are also much used on wedding goods.

Designs on menu cards are chiefly pleasant

FIG. 4.

caricatures of the guests and are specially ordered, and these cost from one to twenty dollars each.

Visiting cards are plain, those used by gentlemen being small in size, misses larger, mesdames larger again, and the gentleman and lady's combined still larger.

For people who want something different a new idea, called the "Æsthetic bevel" card, has been introduced. The card is edged with all of the fashionable shades in small

FIG. 5.

spaces, about one-twelfth of an inch in length, and these are sandwiched with similar gold spaces. Illuminated visiting cards are intended for the mining districts and remote rural sections where they are in great demand. As to shape they are round, square, or with a

turned-down corner, the square form being mostly preferred.

New Year calling cards are designed for one person or for parties of two to six persons. Some of these are in satin, showing miniature envelopes containing a card with the writer's name.

In mourning goods white plated paper is used with borders varying in size from No. 1 to 5.

In illuminated papeteries bronze and gold embossed designs are very popular. One of the latest novelties in the papeterie line consists of a sheet of small size letter-paper, which is intended to be folded in letter form and used without an envelope, the fastening to be made by sealing wax, a stick of which

FIG. 6.

is contained in each box. For papeteries intended for tourists or travelers, the sheets are stamped "Tramp," "En route."

Some illustrations are given of designs for ornamenting note-papers and menus. The engravings are made from samples supplied by J. D. Whitmore & Co., Ph. Hake and Hard & Parsons. Figures 1 and 2 are taken from correspondence cards which have quite a range of delicately colored and embossed representations of sprays of flowers of various kinds. Figs. 3, 4, 5, 6, 7 are illustrations taken from menu cards, which also include a greater variety of designs of an appropriate character. These are all embossed in natural and

FIG. 7.

appropriate colors. The designs illustrated in Figs. 8 to 20 inclusive, are taken from papeteries. Some of these are embossed, and show a delicacy of coloring and treatment which make them very attractive. Generally the flowers and foliage are in natural colors, but as in the case of ferns, they are sometimes printed in different colors of bronze. A green bronze is a very striking color, as is also a true copper bronze, which is utilized very effectively. Of course, in these, as in all of the other designs, only a few selections can be made for illustration,

the variety being very great. In the representations of flowers the natural colors are given.

Orders of dance are gotten up with designs more to suit special occasions than usual, and particular clubs now seek such

FIG. 8.

as contain illuminations that either refer directly or partially to the object for which the club is organized. For instance, if the

FIG. 9.

order is for a boating club, the designs are expected to be of a boating character.

For business circulars there has been in-

FIG. 10.

troduced a folder, which comes with a flap in imitation of alligator, and another which comes with a flap in imitation of a sealed envelope, and containing a slit which keeps it shut, and thereby admits it to the mails

FIG. 11.

for one cent as an unsealed communication.

A new design of pencil has a magic movement, and is in the form of a screw. It can be used either as a bar or charm for a watch-chain or as a pocket lead-pencil. It comes in gold and nickel.

FIG. 12.

FIG. 13.

FIG. 14.

FIG. 15.

FIG. 16.

A new form of celluloid combination pencil and penholder, with gold mountings, is also new.

A novelty in paper-weights includes a pen-

FIG. 17.

wiper or bristle cup, all combining to form a shape resembling a hog, which is finely modeled. The bristles conform to the shape of the back. The combination is very neat,

FIG. 18.

and comes in polished brass and oxidized silver.

These are a few of the suggestions for the coming seasons. Others may be expected, and the readers of THE STATIONER will find in other columns and in future issues

FIG. 19.

full descriptions of everything fresh and varied that may appear in the market.

An elegant work-basket is mounted on legs tipped with brass or other bright metal. The

FIG. 20.

basket is lined with shirred or corded old-gold satin, claret-colored plush covering the bottom, with appliques of Ottoman embroidery. Plush of the same color, edged with old-gold satin and adorned with appliques, forms the draperies and the pockets; finished with cords and tassels of gold and deep red chenille.

ELECTROTYPE-ROLLERS FOR IMITATING LEATHER AND OTHER MATERIALS.

EFFORTS have been made heretofore to produce, by means of the deposition of copper upon molds of wax and other substances, electrotypes of cylindrical form, the outer surfaces of which should be unbroken and seamless, and contain an exact copy or design of the material or mold on which the deposit was made. Flat electrotype plates have been made by deposition upon leather and bent around a shaft or bar of metal, the joint being soldered and the whole soldered or cemented to the shaft or bar. Such method is objectionable for these reasons: First, that it is found impossible to make an accurate joint, and one that will stand the pressure necessary for embossing purposes; second, it has been found difficult, if not impossible, by such method, to obtain a roller perfectly cylindrical in form. Again, attempts have been made to accomplish the object sought by using a mold of iron or other substance, the inner surface of which is circular in form and perfectly smooth, and which is made in two parts, the joints being at each side and running from one end to the other of the mold; the two parts of the mold being separated, each was lined with leather (when the object to be imitated was leather), and the leather cut along the edge of the mold, so as to fit and completely cover the interior of the mold when its two parts were joined, the grained surface of the leather being exposed to galvanic action in an electrolyte composed of a solution of sulphate of copper, acid and water. This method is also objectionable for these reasons: First, because no skin of leather is of uniform thickness, and if a cylindrical mold such as described, be lined with it the deposit will take the form of the cavity formed by the leather, and not of the cylindrical mold, and will present an uneven surface, corresponding to the variations in the thickness of leather in its different parts; second, in lining such cylindrical mold it is necessary to cause the back or ungrained part of the leather to adhere to the mold by means of heated wax, pitch, cement, or similar substance, and it is impossible to obtain a perfectly even coating of the interior of the mold of sufficient thickness to secure the adhesion of the leather, so that the unevenness of such adhesive coating is reproduced on the surface of the deposited roller when completed; third, should the adhesive substance fail to secure the leather to all parts of the interior of the mold, such portions as are not fastened will swell and warp in the solution and the effects be reproduced in the deposits, the roller will not be truly round, and by reason of the unevenness of the surface a perfect impression of what was intended to be reproduced cannot be obtained, the face of the material will show in some parts a bold and vigorous impression,

while in other parts a slight impression, or none whatever will be seen.

The object of a new invention is to produce a tubular electrotyped roller for the purpose specified, which shall be of copper or other metal, the salts of which may be decomposed by galvanic action, which shall be solid in all its parts, perfectly round, and possessing none of the imperfections noted above. In order to produce such a roller, the surface of the leather or other material upon which it is desired to make the deposit is prepared so that it will resist the action of the acid in the solution. For this purpose the leather may be coated, or, if necessary, saturated with a mixture of wax and turpentine; but any other suitable materials may be employed. The surface is metallized as in ordinary electrotyping, so that it may more quickly receive the deposit. The leather is then cut to the proper size and shape and wound spirally around a roller of iron or other substance of the desired size, which has been turned in a lathe to perfect accuracy, and the surface of which is perfectly smooth, the grained surface of the leather or other material being in contact with the surface of the roller.

The leather is bound in place by means of a strip of coarse netting or other material having open meshes. A stiffening substance of paraffine, gutta-percha, or other equivalent material is then applied to the outside of the leather or other material by means of a brush, or by causing it to revolve in a trough containing the stiffening substance in solution or in a melted state until a coating is obtained of sufficient thickness to prevent alteration of its form or shape. After such coating is thoroughly dried or cooled, the metal or internal roller is withdrawn, leaving the leather or other material so incased in one piece without joints, the interior of which corresponds accurately in size and form to the surface of the roller upon which it was formed.

In the tube so formed a metallic electrode of spiral or corrugated form is suspended for the purpose of securing greater surface for the action of the electrolyte. The reasons for using an electrode of the form suggested are as follows: First, the surface of a positive electrode should be not less than that of the material receiving the deposit, otherwise the deposit is not likely to be good, more care is required, and the electrolyte becomes weaker; second, by the use of an electrode such as described, the surface thereof may be made to correspond as nearly as possible in area to the surface of the material receiving the deposit, while occupying a comparatively small space and subject to the action of the electrolyte on all its parts.

The electrode having been inserted in the tube, the whole is placed in a decomposition tank containing the electrotype, the proper connections being made with a galvanic battery or dynamo-electro machine, by the action of which the metal in solution is de-

posited upon the leather or other material to any required thickness, after which the whole is removed from the solution, the leather or other material detached, and the newly-formed electrotyped roller, the outer surface of which is perfectly round, is placed in a lathe, the inside bored out smooth, and the tube made of an even or uniform thickness is then driven on a metallic shaft, which is turned to fit tightly. The tubular roller may be keyed on the shaft if necessary.

ORNAMENTATION OF PAPER, &c.

A NEW process of ornamentation has for its object to ornament walls, textile fabrics, paper, leather, glassware and other articles with natural objects—such as leaves, flowers, ferns, and the like—and also with objects of art, such as lace or other open work fabric and the like.

It consists in a method of applying the decorations or ornaments in the metallization of the same, or covering them with metal, and in the new articles produced. The flowers, leaves, ferns or other decorations are secured to the surface to which they are to be applied, and are covered with a thin sheet of gutta-percha or other suitable plastic and adhesive material, made to conform to all the elevations and depressions in the objects.

The following is the mode of proceeding adopted. The decorations are first prepared by dipping in a solution of gutta-percha. Then the article to be ornamented (of wood, earthenware, cloth, glass or other material) is covered with a thin sheet of gutta-percha, which is made to adhere by means of moist heat or steam (obtained by applying a hot iron upon a wet cloth). The decorations (one or more) are then placed as the taste of the decorator may suggest, and they are covered with a thin sheet of gutta-percha, and this is made to conform to all irregularities, raised or sunken surfaces in the decoration, and to adhere by means of moist heat, as in applying the first sheet. The decorations are thus fixed to the article to be ornamented, and appear as if sculptured in relief. They may be bronzed, gilded, varnished, painted or treated by other suitable means to give the desired effects.

Before being colored by varnishing or bronzing, the plants, leaves, ferns and other objects may be metallized or covered with metal. For large objects preference is given to tin or lead. For small objects or objects that have to be given a solidity corresponding to the material to which they are applied, copper is preferred. The metallization by tin or lead is effected by means of foil, which is covered with gutta-percha, and which, being applied with heat and pressure, conform to the elevations and depressions. The best results are obtained in this way, since the metallized objects are better adapted to bronzing and coloring. For coating with copper, resort is had to galvano-plating, whereby a plating more or less thick is given.

HARD & PARSONS,

126 & 128 DUANE STREET,
New York.

MANUFACTURERS OF
Artistic Stationery

IN FINE NOTE PAPERS OF EVERY DESCRIPTION.

Our New Papers, Manufactured Expressly for the Elite, are: Hard & Parsons' New York Linen and New York Elite Bond.

These Papers are very rich and aristocratic in appearance, each having a handsome Water-Mark.

SOMETHING ABOUT BIBLES.

THE first printed Bible was the work of Gutenberg, and it was the Latin version. The facility with which copies were made led superstitious minds to ascribe the reproduction to sorcery, and it was necessary to disclose the secret to disprove the charge. Since then editions have followed in various tongues, and with the perfection in printing, they have come in such rapid succession that it is difficult to follow them. The arts of the paper maker, type-founder, printer and bookbinder successively lend their aid in the embellishment of the text-book of Christian belief, and the skill of the engraver is also called in to embellish its pages.

The first production of the Bible from metal types was an arduous work. The types were all cut by hand, and only those who know how necessary it is to have enough "letter" to set up a number of pages to print at one time can realize the labor involved in preparing the first printed edition of the Bible, when the types were cut, not cast.

Bindings are important features of the Bible to-day. Wooden covers, with metal mountings, were anciently used, but now the embellishments, whether in richly carved wood and ivory or in heavy, elegantly tooled and embossed leather, are of the most ornate character. Of

course, as we all know, simpler styles of binding are employed, either to meet the demands of the poor or to avoid extravagant expenditure in the preparation of bibles for class use or gratuitous distribution; but there are few families in which the Bible is recognized as the "book of books" where the "Family Bible" is not specially remarkable for its size and elegance of print and binding. The engravings (supplied by the National Publishing Company and by A. J.

Holman, both of Philadelphia) illustrate this last remark.

The Lenox Library, New York, has a collection of several thousand editions of bibles in all languages. The most valuable and interesting specimens is the Gutenberg or "Mazarine" Bible, printed at Metz, by

excellent condition, but with the map missing. The Lenox copy comes next to it. Of the two editions of John Eliot's Indian Bible the Lenox Library has five copies, which comprise all the different varieties.

Here, too, is the only copy known of the first edition of King James' version—a 12mo

volume that has had almost countless reproductions. The curious visitor may also inspect the various bibles which, on account of some freak of typography, have been sought by collectors. In the so-called "Vinegar" Bible, for instance, the running title of the parable of the vineyard at the twentieth chapter of St. Luke is printed the "Parable of the Vinegar." In the "Breeches Bible" the word "breeches"

is substituted for "aprons" in Genesis iii., 7. And in the "Wicked Bible," the word "not" is omitted from the seventh commandment. The English copy of this Bible in the library was printed in London

in 1631. The impression of one thousand copies was, as far as possible, suppressed, and a heavy fine was imposed on the printers. Singularly enough, just one hundred years later, the same error was made in a German version printed at Halle in 1731, a copy of which is in the library.

—:o:—

Window shades are preferable if colored a delicate stone, amber, pearl or cream. These

shades are quite as cheerful and much more durable than white. The shades should be hung close to the window-pane on self-adjustable rollers, and ornamented with a small metallic handle for raising and lowering. Tassels are no longer used. Occasionally two large beads covered with twist are placed on the curtain stick eight inches apart.

Metal picture frames are "quite too utter."

twenty-one copies on paper known to be in existence. Two of the latter are in this country—the Lenox copy and the Brinley copy, which has seventeen missing leaves supplied in fac-simile. The Lenox Library has also a fine copy of Coverdale's Bible, the first complete edition of the Scriptures in English. It was printed at Antwerp in 1535. No perfect copy of the Coverdale Bible has come down to this time. The Earl of Leicester's Library in England has one in

In handsome Light Blue Boxes containing one-quarter of a ream of Note Paper each, and bearing in blue letters description of contents.
In separate Boxes of uniform size, are one-eighth of a thousand Envelopes corresponding in tint and quality to the paper.

EXTRA SUPERFINE QUALITY.

In attractive Lavender Colored Boxes containing one-quarter ream of Extra Fine Paper each, with contents printed in red. Corresponding to this, in like Boxes, are Envelopes to match.
All this Stationery may be relied on to be according to representation
It is suited to the tastes of the most select trade.

In addition to the above lines, our other Specialties are put up with care, in attractive and substantial form. Goods can be seen at the Mill, or at our New York General Agency, GEO. B. HURD & CO., 79 Beekman Street.

CERAMIC DECORATION.

R. LESSING remarks that the expensive character of the appliances necessary for the initiatory steps in the art of ceramic painting makes it a special favorite of young ladies with an artistic turn of mind, while young men with similar tastes usually choose a more solid class of work to which to devote themselves, and in most cases have arrived at a respectable grade of proficiency within a period at the end of which ladies have not made similar progress. He advises students of flower painting to examine for themselves the works of this class executed during the eighteenth century, and remarks that the flowers in a bordering must not form a thick mass, but must be so arranged that the white porcelain ground can be seen at frequent intervals. Thus the flowers may be bright and variegated, but also be half transparent, and spread with ease over the surface without stiffness. At the same time they must be so disposed as not to produce an uneven effect. He considers that the elegant crystalline substance of porcelain is the principal matter to be observed, and that while it may be heightened up by judicious ornamentation, it must not be split up by decoration of a solid or geometrical character. Thus the composition of a simple border or centre for porcelain intended for every-day use is more difficult than might be imagined.

With majolica he considers that the question is still more difficult, inasmuch as there is no direct tradition on the subject, coming down to our times from the flourishing periods of art. Learning to paint on majolica is not in itself difficult, but it is founded

on quite different principles from those which are applicable to porcelain painting. On the latter substance all colors can be used, and their application is quite as easy as on canvas or paper, a certain amount of practice enabling the painter to know how they will look after burning. He remarks that whether white or yellowish-red majolica is used, there has in any case to be a layer of white chalk applied as a foundation for painting on. The glazing substance has then to be applied before burning. Another form of process is the application of the glazing substance as a first step. This mass forms a porous founda-

tion, analogous to the chalk ground already referred to. On this paint is applied, and the burning completes the process. In majolica painting there must be absolute certainty on the part of the artist, as every stroke penetrates the coating, and cannot be effaced unless the whole of that substance be removed. The majolica painter has only a limited pallet, although modern chemistry has done much to extend its scope. He alludes to the older models of this class of painting as ex-

hibiting slight irregularities in the arrangement of foliage, &c., which, if rightly appreciated, constitute a feature of their excellence. He finally advises the student of majolica painting to study carefully the old models, but to try to compose his own designs independently.

In deference to the requirements of fashion pottery is now sold in the condition ready for putting on the ornamentation, and the amateur, good, bad or indifferent as he or she may be as an artist, has the chance, easily afforded, of making or "spoiling" a mug. The cuts (for which THE STATIONER is indebted to Janentzky & Co.) illustrate forms intended to be adapted in imitation of the Barbotine or Limoges style of decoration. The ware comes in the biscuit state, *i. e.*, it has been fired only once and is without glaze. There are, of course, instructions and specifications of color and their manipulation which it is necessary to acquire before attempting to carry out the decoration suggested.

KITCHEN DECORATION.

THERE is an ideal kitchen perched in an eyrie-like nook in one of the new and lofty apartment houses of this city. It is a small room, as the subdivisions of an apartment house are made with the strictest economy of space, but everything is at hand. Not only is the arrangement convenient, but it is pleasant to the eye, and it is not a strain on the word to call it artistic.

First, the floor is laid in mosaic, and a marble mosaic. The pieces are small, and set in a composition, the tone being light

brown. This is bordered by a narrow but distinct design in which white and blue are prominent colors. The side walls are paneled up at least five feet and a half with white enameled tiles, whose glistening polished beauty is at first more suggestive than their real object, cleanliness. In one corner is a sink with a marble slab at the back, in which are the silver-plated faucets. Another ornament is a cast-iron frame, not devoid of grace, in which are placed the white porcelain wash-tubs. The wall space above is divided into irregular compartments and shelves and is as interesting in its way as a Japanese cabinet. The wood is ash, the supports neatly turned, but without any attempt at ornament to collect the possible, although it does not seem probable, dust of this dainty kitchen. Some of these shelves are inclosed by glass doors, others are open and all have in view some special end. In addition to these, against the wall, inclosed cup-boards of ash reach the floor, with their various subdivisions, including stow-away places, and drawers. * * *

All of the best modern kitchens are now tiled. In one of the handsome show places up-town the kitchen is paneled in Minton tiles, blue and white, and the floor is in blue and white mosaic. Such a kitchen requires no more daily cleaning than the use of the hose in the evening, and in morning the cook begins labor among bright and shining surroundings.

The blue and white tiled kitchen to which I allude is even esthetic, but its usefulness is by no means impaired by it. The upper panes of the large windows are filled with plain colored glass in which blue predominates. The kitchen porcelain is blue and white, and is placed on the dressers with as much care as the mistress displays upstairs on her dining-room mantel, and in her cabi-

nets, where her Sèvres and Capo di Monte is enshrined. This arrangement, and this selection of kitchen ware is not a question of money, but of thoughtfulness and taste.—*Mary Gay Humphreys in the Decorator.*

A metal substitute for encaustic tiling is either etched or in bas-relief, and the subjects are from floral, fern and anemone growths. The outlines being sharp and distinct, and the subjects faithfully reproduced, or artistically conventionalized. The contact of burnished and dead finish surfaces has a beautiful effect and the silvering which is occasionally resorted to is an additional charm.

on quite different principles from those which are applicable to porcelain painting. On the latter substance all colors can be used, and their application is quite as easy as on canvas or paper, a certain amount of practice enabling the painter to know how they will look after burning. He remarks that whether white or yellowish-red majolica is used, there has in any case to be a layer of white chalk applied as a foundation for painting on. The glazing substance has then to be applied before burning. Another form of process is the application of the glazing substance as a first step. This mass forms a porous founda-

SEASON 1883-1884.

SEASON 1883-1884.

L. PRANG & CO.'S

Christmas and New Year Cards.

WE beg to express our thanks to our patrons and friends for the kind and flattering appreciation of our past efforts, and feel a pardonable pride at the very emphatic endorsement which our Cards have received from the American, English, German and Australian press. With one accord these exponents of public taste have given our Cards the first rank over all similar productions in the market. We are bound to maintain this superiority; and we have, as heretofore, spared no expense to create, with the aid of our enlarged experience, a Series of Novelties for the Christmas Season, which, we have no doubt, will meet the expectations of the Trade. We have been singularly fortunate in procuring the assistance of, we may say, **REPRESENTATIVE AMERICAN TALENT** in the preparation of designs, and besides have secured the coöperation of some of the most **EMINENT EUROPEAN ARTISTS**.

OUR LINE IS NOW COMPLETED, and our agents are on the road to call on our patrons and friends. An inspection of the Sample Books will convince them that in regard to **ORIGINALITY AND VARIETY OF DESIGN, EXCELLENCE AND RICHNESS IN EXECUTION**, it far exceeds our last year's efforts. To give an idea of the high artistic order of the line, we would say that it comprises:

FIGURE DESIGNS by Miss DORA WHEELER, Miss ROSINA EMMET, Miss L. B. HUMPHREY, Miss L. B. COMINS, ELIHU VEDDER, WALTER SATTERLEE, A. F. BROOKS, and others.

LANDSCAPE DESIGNS by W. HAMILTON GIBSON, THOMAS MORAN, F. L. SMITH, and others.

ANIMAL DESIGNS by B. E. BENSELL and HARRY BEARD.

FLOWER AND BIRD DESIGNS by Miss FIDELIA BRIDGES, Mrs. O. E. WHITNEY, JEAN ROBIE, of Brussels; H. GIACOMELLI, of Paris, and others.

THE LITERARY MATTER in connection with our designs has been carefully attended to—among others, by Mrs. CELIA THAXTER, Mrs. EMILY SHAW FORMAN and JOAQUIN MILLER.

OUR REGULAR LINE of Christmas and New Year Cards will comprise plain cards, fringed cards, and double fringed cards, varying in price from 30 cents to \$60, per set of 12.

PROTECTORS are furnished with all fringed cards, and also **ENVELOPES** for all series costing \$1.80 per set and more.

Besides our **REGULAR LINE**, we would call special attention to the following

NOVELTIES AND SPECIALTIES:

ALADDIN'S LAMP. This is one of the most elaborate and elegant Christmas Gift Cards we have ever offered to the trade. It is a large folding card, heavily fringed, and provided with a leatherette protector. The front outside page is a design of peacock feathers on satin; the left inside page contains a poem specially written for this gift by JOAQUIN MILLER, also on satin, and surrounded by a delicate border of Oriental design; the right inside page presents Aladdin bearing his lamp, after a painting by the eminent American artist, ELIHU VEDDER; and to complete the whole, the back is embellished with a most unique, artistic design of high order.

RUSKIN CALENDAR FOR 1884. At the solicitation of some of our business friends, we have this year decided to bring out a Calendar, and are happy to be able to announce that we shall issue **A CALENDAR FROM JOHN RUSKIN, FOR 1884.** This consists of an artistic mount with a block calendar, having suitable selections from JOHN RUSKIN's works for each day of

the year. The selections have been made by a lady well-known for her cultivated taste and judgment. The mount has been designed by a well-known Boston artist, and, coming from her thought and tasteful skill, the form and decoration will be a fitting accompaniment to the words within. This Calendar will be a source of pleasure to all who love and appreciate RUSKIN, that they may have every morning a jewel from the treasure of his noble and earnest thought.

"THE CHRISTMAS SHEAF." A folding card, with inside pages, in color, stamped out in the shape of a sheaf of wheat. Tied with silk cord and tassels.

"THE CHRISTMAS BOOK." A surprisingly natural representation of an open book, with floral designs by Mrs. FISHER, and original poems by JOAQUIN MILLER.

CHRISTMAS ART PRINTS ON SATIN.

The great success attending our efforts in this line has induced us to bring out a number of new Series, consisting of Flowers, Landscapes and Figure Designs. These are elegantly finished in several styles, in fringed tinted mats, with cord and tassels; on mounts, with silk fringe and cord; in book form, richly fringed and with leatherette protectors, and on rich Plush mounts. Prices vary from \$1.50 to \$3.50 each.

We have made large additions to our **BIRTHDAY** line, comprising Plain Cards, Fringed and Double Fringed Cards and Art Prints on Satin. Numerous Series at popular prices have been added to our list of **SCRIPTURE TEXT CARDS**. New **FLOWER PIECES** in Mats, &c. **THANKSGIVING CARDS**,—Our line will also be shown now.

Descriptive Price Lists of our **CHRISTMAS** and **NEW YEAR CARDS** are now ready, and will be sent on application.

SCROLL SAWING.

THE scroll saw has been an important instrument in the development of artistic aspirations. The child and the adult have been equally attracted by the facility with which it brings out forms of utility or ornament, and both have found an unending round of amusement in operating it.

Scroll sawing is styled a beautiful and fascinating art, and this judgment seems to be sustained when it is considered to what an extent it has been adopted by those who do not employ it to earn a living but make it a pastime, cultivating at the same time a mechanical taste and an artistic inspiration.

Fancy woods are most used, but brass or

tile of alcohol, and fill it about one-quarter full of bleached shellac in small pieces. After standing several hours this will be dissolved and ready for use. Apply the finish to the wood with a fine sponge or cotton. It dries so very quickly that several coats can be ap-

plied in a few moments. Varnish is frequently used, but it does not give the wood as pretty an appearance as oil or shellac. If used, it must be applied lightly and evenly.

with vine and fine tracery. Few articles made with scroll saws are more ornamental than silhouettes. Many designs can be found in books for children. They should be cut from material 1-16th of an inch thick, or from veneers. Black and white are favorite colors—ebony and white holly. It requires a tough wood, and the finest and best saws should be used. When veneers are used they should be placed between two pieces of a sixteenth of an inch in thickness each and fastened firmly. Silhouettes are used in various ways by overlaying on polished wood or paper placed on a board for a background. With a treadle machine decorations can be made for a wall or a nice border. To do this, paste a very dark strip around for the border, then procure white

FIRE SCREEN.

CATHEDRAL CLOCK CASE.

EASTLAKE STAND.

other thin and soft metal is sometimes worked. The wood is usually of a thickness of $\frac{1}{8}$ to $\frac{3}{16}$ of an inch. Two or three thicknesses are sawed at one time by fastening together with brads.

There are several ways of applying the designs to the wood. The simplest way is to paste the pattern directly on the wood, but only on the parts that fall out after it is sawed, as in this way the part you wish to use is not soiled.

In smoothing off work a small, half-round file is used to file the corners true and straighten edges. The work is then rubbed carefully with sand-paper. The upper edges will be found ragged, but the sand-paper will make them smooth. When a number of thicknesses are sawed this is obviated. In putting work together small brads or screws can be used. If the article is quite small, glue alone is sufficient. In case the article is intended to carry some weight screws are employed. For oiling, boiling linseed oil is applied to the wood, and when it is all absorbed the work is rubbed over with a stiff brush or soft paper.

To make a shellac finish, take half pint bot-

There are several kinds, varying in color, which must be used according to the color of the wood.

Inlaying is the most beautiful part of scroll

WALL POCKET.

sawing, and it involves delicacy of judgment and operation. When the amateur has become master of his saw, so he can saw delicate and intricate work, he should do overlaid work, as this is very neat and a change. Ordinary flat picture frames can be overlaid

holly veneer and saw out a variety of patterns—one half dozen or more can be sawed at one time. Glue them on a dark border, each equal distance apart. To saw a perfect likeness of a person, place a piece of paper on the wall, with a strong light throw shadow on the paper, and with a pencil trace the features and with the pantograph reduce to any size desired. With a little practice, excellent work can be done.

With the turning lathe, the amateur can make with a very little practice many beautiful and useful articles, and in connection with the scroll saw, the lathe will be found very handy and useful in finishing some of the ornamental designs.

For the accompanying illustrations THE STATIONER is indebted to the Seneca Manufacturing Company.

Stained-glass windows can now be made at home by attaching to the plain window, in artistic combinations, the clippings and waste from the bench of the glass cutter. There is a little wheel sold for something less than a dollar which will cut the glass, and with this the amateur can shape the piece to suit himself.

Trade Novelties.

[We will be glad to receive samples of all novelties issued in the trade, and will notice all such which possess merit free of charge. It is desirable to accompany descriptions with cuts whenever possible.]

TODD'S BUSINESS PENCIL.

The engraving herewith illustrates another new pencil which has characteristics of convenience that, it is thought, will commend it to everyone who sees it. The propel and repel action is very good, and the whole thing is of that practical character which attracts notice. The mountings are of the best quality rolled gold-plate, and the tube is of hard rubber. It is said that one hundred and thirty dozen pencils of this pattern have been put out within the last thirty days. The price is low. Edward Todd & Co., 44 East Fourteenth street, New York, are the manufacturers.

TODD'S BUSINESS PENCIL.

strong rope paper and is waterproof. It can be used as an ordinary tag if desired. The application of this combined tag and envelope will be seen from the illustrations. In one instance it is shown closed and attached to the

DAVIDSON PATENT PENCIL.

There are patents for pencils in profusion, but notwithstanding this, about every week some new "wrinkle" in pencils is patented, and it really does happen that something new and interesting is evolved. This is shown in the Davidson patent pencil herewith illustrated in its open and closed forms. An erasive tip is attached to the pencil, and this tip cannot wear down so short as to become immovable. When not in use, the pencil can be closed so as to protect the erasive and lead points. When using the erasive end the pencil can be

COMBINATION TAG AND ENVELOPE.

locked so as to prevent the eraser from being forced back into the shield. The peculiar shape of this pencil is said to make it very easy to hold in the fingers when in use. The pencil is made by the Davidson Rubber Company, Boston, Mass.

COMBINATION TAG AND ENVELOPE.

The engravings illustrate a new idea which it is expected will commend itself to shippers of merchandise. The annoyance experienced by business men in large produce centres in having the marks on goods consigned by them inspected by rival dealers and valuable trade secrets thus obtained without their consent, has led Joseph T. Dunham, of the firm of Dunham & Schofield, fish dealers, of West Washington Market, New York, to devise this combination tag and envelope which is said to overcome the difficulty. It prevents an unscrupulous competitor from get-

son, Mile End, County of Middlesex, England. Patented in Germany March 4, 1882, No. 19,249; in Belgium March 7, 1882, No. 57,274; in France March 8, 1882, No. 135,745; in England March 18, 1882, No. 1,322; in Austria April 24, 1882, and in Canada April 25, 1882, No. 30,928.

The method of transferring printed designs from paper or other suitable material to sheets of metal, consisting in the following steps: first, coating the paper with a solution to enable the paper to take varnish evenly and without blisters; then coating the paper on one side with ordinary varnish and drying the same; then applying the paper to a lithographic stone and printing the required design on it; then coating the paper with a suitable tinted varnish; then placing the paper upon the metal sheet, which is deposited in an ordinary lithographic press, the bed of which is heated sufficiently to allow the two sheets to adhere, and finally removing the paper from the metal sheet.

A toy consisting of a series of miniature whole and half blocks having the proportions of ordinary building-blocks, and provided with dowel-pins and holes to receive the same.

TRADE-MARKS IN FOREIGN COUNTRIES.

BY JAMES A. WHITNEY, COUNSELOR-AT-LAW.

[WRITTEN FOR THE STATIONER.

VI.

BELGIUM.

The trade-mark law of Belgium is based upon the French law of July 28, 1824, and in fact, in some respects, almost exactly reproduces its language.

A convention with France in May, 1861, supplemented by an act passed in 1874, provides, in substance, that all of the marks susceptible of registry in France may be deposited with equal validity in Belgium. The rights of foreigners to trade-mark rest upon the same basis as those of native Belgians, and without the necessity of any treaty of reciprocity. Nevertheless, Belgium has several treaties on this subject with other countries. For the reason above-mentioned it appears that any trade-mark previously lawfully registered in France can be registered in Belgium. Aside from this, full protection to American trade marks in Belgium is provided by the additional article of 1869 to the treaty of 1858 between the United States and that country.

In order to secure exclusive right to a trade-mark in Belgium, it is necessary to simultaneously deposit two applications, one with the clerk of the tribunal of commerce and the other with the *Conseil des prud'hommes*. The applicant should furnish to each two examples of the mark, a description on stamped paper, and a power of attorney, &c., if the deposit is made through an agent. For foreigners the deposit of papers should be made at Brussels. Strictly speaking, it is not necessary that the trade-mark should be previously registered in the country of the applicant.

Under the Belgian law, all signs and emblems constitute a mark. Symbols, ensigns and names of dealers are protected by the principles of the common law. Certain special laws have been enacted relative to barrels, cloths, fine hardware, etc.

A trade-mark is defined in Belgium as constituting a property, the property of which belong to the person lawfully adopting it, and which gives him the right to prosecute infringers. The duration of the privilege may be without limit or may be temporary, according as the deposit is made for, a number of years or in perpetuity. Nevertheless, so far as concerns foreigners, the duration of the privilege cannot exceed that fixed in the country of the origin of the trade-mark in favor of its own citizens. If the trade-mark has been abandoned to the public, or in other words belongs to the public domain, in the country of its origin, it cannot be made the object of a lawful privilege in Belgium.

Actions for infringements are tried before the civil tribunals. Trade-marks are transferred by the same forms which regulate the transmission of property in general. Nevertheless, each transfer should be registered, and thereby made known to the proper lawful authorities with whom the original deposits have been made.

HOLLAND.

Holland has no special trade-mark law, but trade-marks are guaranteed by the Belgian laws in existence before the separation of Belgium from Holland. That is to say, by the law of 1803, which provides substantially as follows:

The counterfeiting of special marks that any manufacturer or artisan has exclusive right to apply to the objects of his fabrication is subject to a claim for damages against the infringer, and also to the same punishment pronounced by

other laws against falsehood in private communications. No action can be maintained if the mark has not first been made known in a legal manner by a deposit of a fac-simile with the clerk of the Tribunal of Commerce in the locality where the greater portion of the manufacture (by the lawful owner of the trade-mark) is carried on. The penal code also prescribes penalties against counterfeiting and the use of falsified trade-marks.

Holland has treaties with various countries which permit the registration of foreign trade-marks.

SWEDEN AND NORWAY.

In Sweden and Norway trade-marks are protected by a penal law, enacted in February 1864, which provides that infringements of trade-marks be punished by fine and imprisonment. These countries have treaties with certain others concerning trade-marks, which place the citizens of each upon the same basis as those of the other, but there are certain saving clauses which, as in the treaty with France, except certain classes of trade-marks from the operation of conventions.

SWITZERLAND.

In Switzerland, trade-marks are not protected by any special law, but French trade-marks are particularly protected in consequence of a treaty of commerce concluded between France and Switzerland in 1864. It would appear, therefore, that a trade-mark lawfully registered in France can be protected in Switzerland. The formalities are a deposit or application with the Bureau of the Federal Department of the Interior at Berne. The applicant must deposit two duplicates of the mark together with a specification. A regularly executed power of attorney is, of course, necessary, unless the applicant himself be upon the spot.

Any mark susceptible of being legally registered in France can be protected in Switzerland. The term of registration is fifteen years, but any mark can be registered for another term. The convention just before mentioned applies the provisions of the French law of 1857 to the punishment of infringers.

DENMARK.

In Denmark the law is applicable alike to subjects and foreigners. Infringers are punished with imprisonment of from ten to thirty days, or to "corectionel" labor during four years according to the importance of the offense.

IMITATION STAINED GLASS.

The object of this invention is to provide a substitute for stained glass which will be comparatively inexpensive in manufacture. It consists in imitation stained glass made with a glass plate having imitation leads applied to one side, and the surface of the glass between the imitation leads coated with transparent colored varnish or lacquer. The imitation leads and the varnish or lacquer may be covered by a second glass plate of the same shape and size as the first plate, whereby the imitation leads and the varnish or lacquer will be protected from the weather.

The design is first made on paper to represent the leads of ordinary stained glass plates. A plate of plain glass is then placed upon the design, and a small stream of a melted mixture, colored to represent the leads of an ordinary stained glass plate, is poured on the surface of the glass directly over the lines of the design. This mixture, when poured upon the surface of the glass, quickly cools and hardens, and produces upon the glass a representation of the de-

sign resembling the leads of a stained glass plate from which the pieces of stained glass have been removed. The mixture found best adapted for this purpose is composed of forty-five parts of cement, forty-five parts of sealing-wax, and ten parts of beeswax, together with a small quantity of stearic acid. These ingredients and a suitable quantity of coloring matter to give the desired color to the mixture, are melted in a vessel or instrument of suitable form to allow the melted mixture to be slowly and regularly poured or discharged therefrom. Various other mixtures can be used for this purpose; but care should be taken to use a mixture that will be affected as little as practicable by the ordinary changes of the weather. After the mixture has become sufficiently hard, pour or flow upon the surface of the glass plate and between the lines of imitation leads, transparent varnishes or lacquers, of the colors which it is desired to have in the completed plates, so as to produce such a combination of colors as is seen in the ordinary stained glass plate. With this construction the imitation leads prevent the varnishes or lacquers of the different colors from uniting with each other.

In applying the varnishes or lacquers to the glass plate, care should be taken that the plate is not clouded; and for this reason it is better not to apply or touch the varnishes or lacquers with a brush, but to leave the varnishes or lacquers in thin coatings or layers, such as can be produced by flowing them over the surface of the glass.

Suitable colored varnishes and lacquers are found in the market, and from these and from others similarly prepared and colored to any desired shade the desired colors or shades of color can be produced upon the glass. Any transparent varnish or similar substance that will not be affected by the weather can be used.

After the varnish has dried sufficiently, if the glass plate thus prepared is held toward the light, it will be found to have the appearance of an ordinary stained glass plate. The imitation stained glass plates thus prepared can be set in frames, and can be placed in position with either side exposed to the outer air; but it is preferred to arrange them with the smooth sides of the plates outward.

As an additional protection against the effect of the weather and the varying temperature of the atmosphere upon the mixture of which the lines are formed, and upon the varnishes or lacquers which are used in producing the colors, and also for the purpose of obtaining additional lustre, there is sometimes placed upon the plate of glass prepared as hereinbefore described a second plate of glass, of the same shape and size as the first plate, and resting upon the imitation leads, so that the two plates may be as close together as possible. The two plates are then fastened together at their edges with cement, plaster-of-paris, or other suitable means, and the plates can then be inserted in a frame.

The combined plate thus formed has a hard smooth surface upon both sides, and has the appearance of a plate of stained glass, and can be used for windows and the various other purposes for which stained glass is used.

A white or tinted satin fan, hand painted, is a lovely gift. On the side paint a bit of Ipomea climber; the flowers are marvelously beautiful, the form is graceful and the foliage is very fine. Heartsease and petunias form a lovely floral design for a white satin fan. Pampas grass, the long plumes wrought in silver thread, gives a rich fan embroidered decoration.

BLACKHALL'S PATENT IMPROVED MACHINERY

FOR THE MANUFACTURING STATIONERY TRADE.

BLACKHALL'S

— PATENT POWER —

PERFORATING MACHINE

IS NOW IN USE IN MOST OF THE LEADING HOUSES IN THE TRADE.

Its great rapidity for straight or stubbed work can be judged from the fact that a ream of Medium, with five lines of Perforating, can be finished in 7 minutes! It makes a clean, round hole, and will cut from Tissue-Paper to Card-Board.

THIS MACHINE HAS MET WITH THE APPROVAL OF ALL WHO HAVE USED IT.

TRADE OPINIONS.

"We could not keep house without it."—GEO. D. BARNARD, St. Louis.

"After two years' constant use, on all classes of work, we have had to replace but three pins. To-day it is in perfect order."—LEVISON & BLYTHE, St. Louis.

"By using your machine our perforated work costs almost nothing when considered by the ream."—BOORUM & PEASE, New York.

"We recommend it to the trade. Just the machine long-looked for."—SHORT & JORMAN, Cleveland, Ohio.

"Your Rotary works very satisfactorily."—WESTERN BANK NOTE Co., Chicago, Ill.

"After four years' use, on all classes of work, we consider it as good as when we got it. It is the best machine we ever saw."—BROWN BROS., Toronto, Ont.

"Your Round Hole Perforator cannot fail to meet the wants of the trade. We recommend it as a first-class machine."—STEPHEN GREENE, Philadelphia.

"We are gratified far beyond our expectations. We could not be better satisfied. Your Perforator is a beautiful piece of mechanism."—WM. A. JOHNSTON & Co., Pittsburgh, Pa.

"We fully endorse everything said in their praise by other firms. They very soon repay themselves."—WATERLOO & SONS (Limited), London.

The foregoing are a few of many Testimonials of similar import.

Blackhall's Patent Improved Machinery for the Mfg. Stationery Trade.

Blackhall's RULING Attachment.

Can be applied to any sort of Striker, and will give twice the usual results for same labor, saving from fifty to seventy-five per cent.

OPINIONS.

HUGH R. HILDRETH PRINTING Co., St. Louis, on Hickok's Striker.—"It has saved us time and money; we have every reason to be satisfied."

BEATTY & STEVENSON, New York, on Gouptill's Striker.—"Easily adjusted; perfect accuracy; indispensable; send us another."

BROWN BROTHERS, Toronto, Canada, on Hickok's Striker.—"One machine, with attachment, does work of two without it."

GEO. D. BARNARD, St. Louis, on Collins' Striker.—"It does all you claim; it effects a saving of one hundred per cent."

The foregoing are a few of many Letters of similar import.

THE LEGEND OF THE WOODEN TYPES.

During a visit last year to the Bodleian Library, Oxford, our attention was directed to some wooden types, apparently ancient, which are there exhibited. Attached to them is a descriptive notice to the following effect:

These wooden types, whatever was the purpose for which they were made, refer to the short and obscure period in the history of the art of printing, which is occupied by the transition from solid blocks to separate letters. The genuine wooden types, and the manner in which the inventors made them, are mentioned, with references, in the "Histoire de l'Imprimerie," published at the Hague in 1740 by Prosper Marchand without his name.

Angelo Rocca, afterward Bishop of Zagaste, in *partibus*, describes in his "Bibliotheca Apostolica Vaticana," published at Rome, 1591, the way in which the first types like these were held together—"filo in litterarum foramen immisso connectebatur." He says that he saw them at Venice, but does not say of what material they were made. The passage is at page 350 of the "Opera Omnia" of the bishop (Rome, 1719).

But Gotthelf Gischer, in his "Essai sur les Monumens Typographiques de Jean Gutenberg, Mayençais, inventeur de l'Imprimerie," printed at Mayence, l'an 10 [that is, between September 22, 1801, and September 22, 1802], says, with references, "Birken et Servarius parlent de ces caractères de bois, de plomb, et d'étain, percés au milieu pour les joindre avec un fil. . . . Les ouvriers de cette profession avaient même dans cette ville une coutume, qui était une espèce d'hommage rendu à la mémoire des inventeurs de leur art. Celui d'entre eux nouvellement agréé et admis ouvrier recevait, en témoignage de ses talens, une de ces lettres de bois. Alef, imprimeur à Mayence, conservait encore quelques uns dont il a même parlé à mon collègue, le citoyen Bodmann l'imprimé d'une de ses servantes privée la postérité de ces monumens respectables."

We are indebted to Mr. Madan for this transcription of the notice.

The Oxford wooden types comprise nineteen lines, of the face called Gothic, or text-letter. They evidently form the beginning of an intended reprint of the book of Genesis. The text commences as follows: "Incipit liber bresith quem | nos genesim dicimus | In principio creavit Deus |"

The legend or tradition that the first types of the original inventor of printing were cut out of wood is very old, and it is perhaps only within the present century that it has been completely refuted. It has now, however, been entirely abandoned by paleotypographical authorities, and we think the conservators of the Bodleian Library should discontinue to sanction the promulgation of an exploded error by the exhibition of a notice paper such as that above translated. In saying this, we do not forget how difficult it is to disabuse the mind of a theory once entertained, or to dissipate a myth when it has once received general accordance. There are, however, many books, and even encyclopædias, which still give currency to the wooden-type legend, and it may, therefore, be desirable to devote a little attention to the subject with the hope of finally dismissing it from future compilations that shall pretend to historical accuracy.

Let us trace the origin of the legend, and then show how it is opposed to ascertained facts. It first saw the light in the year 1588, being originally contained in the work called "Batavia," written by Hadrian Junius (Adrien de Jonghe). It is a general description of Holland, and is of great bibliographical interest, for in this book was given the first circumstantial account of alleged Dutch invention of printing. This book

was in fact the first ascription to Koster of the honor of having invented the art. It was stated that Koster was strolling in the wood near Haarlem, and, as an experiment, fashioned the bark of a beech-tree into the form of letters. The letters so made he impressed on a leaf of paper; and the success of the essay was such, that he aspired to greater things. He invented a thick and viscid ink, and then made engravings to form pages of books, which he printed in the manner of the Block-books. The latter, as is well known, were printed in a water-color ink or distemper. The Haarlem legend of the invention had been propounded long before the time of Junius, but he repeated it, with variations, to reconcile the obvious contradictions of his predecessors. He found it necessary to assume that Koster, after he had discovered the feasibility of printing whole pages from wooden blocks, cut up the pages to form separate letters which would be interchangeable and form movable type. After this, it was stated, Koster conceived the idea of using metal types, and with such characters printed the "Speculum Salutis." The legend, of which the preceding is an outline, has been handed down to the present day.

Having referred to the origin of the myth, we may now show how unworthy it is of credence. The refutation of the theory of Junius as to the evolution of the invention rests on several bases, some of which can perhaps be challenged. That, for instance, the "Speculum" was printed from metal types, not from wooden ones, is almost certain, after the minute examination it has received at the hands of experts. The peculiarities of a metal surface are exhibited in several places. By whom the "Speculum" and other alleged Kosterian *incunabula* were actually produced will probably always remain a disputed question. But there is one all-sufficient reason for withholding credence from the assumptions of Junius as to the successive stages of the invention—first the entire engraved pages of wood, then the dis severed pieces forming movable types, lastly the metal characters. That refutation rests on the absolute impossibility, physical and mechanical, of cutting practicable wooden letters of such dimensions as would render them fit for the production of a book. The size of the characters in the "Speculum" and other fifteenth century books is between English and two-line brevier. The lines, it is most important to observe, are close together; they are not leaded or spaced out. No skill on the part of a letter-cutter, no perfection of tools would have been sufficient to produce types of wood that could have been put together with the closeness and regularity shown in the "Speculum," and the earliest products of the printing press.

Several authors, desirous of maintaining the Kosterian theory, have caused words, or at least a few letters, to be cut on wood, and after dividing them have had them composed and printed, as an evidence of the possibility of printing a book in types of wood. But that expedient does not touch the question; small detached words and signs have for ages been cut on wood and printed from. Other authors have even printed several lines of such types; but in such cases those lines have invariably been separated by leads. As every printer knows, uneven lines, such as those containing bodies of slightly different sizes, can be set up and fastened in the chase so as to "lift," provided they are leaded out; but not otherwise. The "Speculum" lines, as already stated, were unleaded. No one, in fact, has ever been able to produce types which could form a page "set solid," to use the typographical technology.

One of the stoutest supporters of the Koster theory was Enschedé, the celebrated Haarlem type-founder; but even he had to reject this part of the narrative of Junius. He says:

I have exercised printing for about fifty years, and I have cut letters and figures for my father's and my own printing office in wood of palm, pear, and medlar trees; I have now been a type-founder for upward of thirty years, but to do such things as those learned gentlemen (Junius, &c.) pretend that Laurens Koster and his heirs have done, neither I nor Papillon (the most clever wood engraver of France) are able to understand . . . the hands of men are not able to do it.

He says he had no want of good tools for his experiments, but to saw the letters straight and parallel was impossible; "there was not a single letter which could stand the test of being mathematically square." It was impossible to polish or file them after they were cut a sunder. "No engraver is able to cut separate letters in wood in such a manner that they retain their quadrature, for that is the most important part of the work of type-casting." Assuredly what Enschedé, with all modern resources of exact tools, could not do, the supposititious Koster, with his rude appliances, cannot possibly have accomplished. The figment is but one of the inherent improbabilities of the Koster legend. We do not hereby express our absolute adherence to the opposite theory, that of the original invention by Gutenberg of movable types. It is necessary to make this reservation, after the very remarkable investigation lately made by J. H. Hessels.

It is worthy of notice that no writer of repute has handed down to us any particulars which would establish the fact of wooden types ever having been used. It may be said that, on the other hand, there are not preserved any specimens of the metal types used by the printers of the fifteenth century. By a curious accident, however, we know what their shape was, and of what material they were composed. In reading a book issued at Cologne in 1476, M. Madden, of Versailles, found that a letter had by a mischance fallen on one of the pages, and the result was an impression showing the exact contour of the archaic type. That it was of metal and not of wood is evident from the nature of the print. A practical printer can well understand that, although large wood types such as are used for placards can be printed from without it being possible to distinguish them from metal, it is owing to the body of ink they are capable of containing. Small letters, requiring so much less "color," would unmistakably expose the fibrous material of which they were made. There was a circular mark, about one-tenth of an inch in diameter, on the side of the type, showing that it had been cast in a mold. This mark had evidently been firmly depressed in the metal, but did not perforate it. As the letter had no "nick," it is conjectured that the mark was there to guide the compositor.

In the Plantin Museum at Antwerp there are preserved a great number of old types, but none of them are more ancient than 1555. We merely mention this circumstance because these are probably the oldest types in existence to which any precise date can be attributed. They do not, of course, affect the present question. In shape they are the same as modern characters; all the "body founts"—those used for the subject-matter—are, it need hardly be stated, of metal. It may be concluded that, practically, the material and the shape of the types of the very earliest printers were identical with those of the present day. We are aware of the controversy as to the alleged pewter types, but

they, if ever existent, fulfill the perpetual conditions—metal cast in a mold, not wood cut by graving tools.

Perhaps not altogether irrelevant to this subject was a discovery made in 1873 in the River Saône, near Lyons. Nearly opposite the site of a famous fifteenth-century printing office was found a quantity of ancient types. These are now in the possession of M. Claudin, of Paris. They are of metal, and some of the letters, spaces, and quadrats have had a hole pierced through them—probably in order that they might be held together by a wire or string.

In reference to this method of fastening the type together, we may add that it was certainly not the plan adopted by Gutenberg, Faust and Schoeffer. Several pages in their books show indentations caused by the wooden frame that was used to secure the form before iron chases were invented. Practical printers can understand readily that any expedient such as that indicated would be clumsy to a degree, and probably quite ineffectual. Half-instructed artisans or amateurs may have resorted to it in the course of their experiments; but such admirable specimens of printing as the 42-line or the 36-line Bibles must have been composed in quite a different manner. We may add, too, that the "Citoyen Bodmann" referred to in the paper exhibited at the Bodleian is one of the most notorious forgers, whose impostures have been exposed by typographical investigators, Mr. Hessels, of Cambridge, in the course of a review of a work containing several statements which rest upon alleged discoveries made by Bodmann, who was the archivist of Mayence, found three or four distinct forgeries perpetrated by Bodmann; and the reference to Alef, the printer of Mayence, is probably as apocryphal as other of his statements.—*Printing Times and Lithographer*.

FOLDING SLATE.

A new form of folding slates consists of two slates or writing-tablets, each set in a separate frame, and preferably protected on the back by a suitable board or cover. These two frames are, at one of their sides, hinged together by a peculiarly simple and strong hinge construction in such manner that either of the tablets may be turned through an angle of three hundred and sixty degrees, thus exposing in one position the writing-tablets on both sides and in the other position the covers or backs. On the edges opposite the hinges is a simple and effective locking means for holding the slates in either of these two positions.

ADVERTISING FAN.

A new design in advertising fans is intended to furnish a programme, order of dancing, or advertising device which by a simple manipulation can be changed into the shape of a fan and folded up into narrow space after use. The invention consists of a programme made of a continuous piece of paper that is transversely creased, so as to be folded up, and provided at the one end with a gathering-cord that is passed through perforations of each fold. The opposite edge of the paper is creased longitudinally, so as to be folded over at right angles to the body thereof, forming a retaining-flange for the body of the paper when it is arranged for a fan.

TRAGACANTH MUCILAGE.—An excellent mucilage may be made of one drachm of powdered tragacanth, rubbed in a mortar with six drachms of glycerine, and enough water added to make ten ounces.

"Hemphill, lend me your pencil, please, I never can find mine when I need it."

"Why do you not have one of KIGGINS & TOOKER CO.'S PATENT PENCIL LOOP MEMORANDUM BOOKS; then you would always have your pencil ready for use."

FOR SALE BY THE TRADE GENERALLY.

IN VARIOUS SIZES, STYLES OF BINDING, AND RULING.

Will Not Corrode or Oxidize Steel Pens.

Will Not Corrode or Oxidize Steel Pens.

The Writing turns intensely Black, and gives a tone and beauty to the lines.

Specimen writing with this INK sent on application, with Price List.

THE BROWN & CARVER Improved Paper-Cutting Machines.

The Best and Only Reliable Machine now in the Market.

The attention of Buyers is called

To the Following Points:

Superior manner of hanging and adjusting knife bar, thus relieving head of machine frame from undue strain during the cut, and allowing easy and accurate adjustment of knife from either end.

The machine table is fixed so as to prevent sheets of paper becoming wedged between bottom of gauge and table.

With this paper-cutter you can cut to the last half-inch, effecting saving in paper, and also cut two widths at once.

The perfect position of clamp-wheel enables operator to clamp stock rapidly and without stopping.

The simplicity of this machine is remarkable; there is no traps or springs of any kind, and all parts are easily accessible.

Noiseless friction clutch for starting and stopping the machine easily and without jar is one of the great qualities of this cutter; it gives a greatly increased speed without endangering the machine.

On all of the accompanying Claims we defy Competition.

Soliciting your orders, we feel confident of the ability of this machine to give perfect satisfaction in every particular. After using it once every one will be convinced of its merits. *For Sizes and Prices, address*

OBITUARY.

CHARLES A. BURNHAM.

The Norwich, Conn., *Weekly Courier* announces the death of Charles A. Burnham, on July 4, and says:

"Mr. Burnham was born in 1841, in the Sandwich Islands, whither his father, Charles Burnham, had gone to erect certain buildings for missionary purposes. His boyhood was mostly spent in Tolland, where relatives still reside, and the adjacent town of Ellington; and his business career began in Springfield, where he learned the book and stationery trade of Robert Burt, whose daughter he subsequently married.

"About the year 1864 he came to Norwich, and bought out the old book and stationery business of L. and E. Edwards, which had recently been conducted by Lewis A. Edwards, son of one of the old members of the firm, where Lee & Osgood's retail store is now located. In 1866 he removed to the newly erected *Bulletin* building. His first wife, who was a good deal of an invalid, died within a few years after coming to Norwich. In May, 1875, Mr. Burnham was again married, to Catherine, daughter of Peter Lanman, of Norwich town, and she, with three little ones, survives him. During his nineteen years' residence in Norwich, Mr. Burnham showed himself enterprising, alert, honorable and successful in business; warm-hearted, modest, true, obliging and genial in his personal relations with friends; a devoted father and husband, and an exemplary Christian. He was a gentleman of much culture, delightful conversational powers, and noticeably winning ways, and all who knew him well will recall many instances of his singularly delicate consideration for others. It is impossible to recall a single unkind word that he ever said of or to another. His death brings a real loss to society, as well as to his family; and he will be deeply and sincerely mourned."

VENEERING.

A correspondent of *The Cabinet Maker* (London) gives the following directions for veneering a large surface, say, six feet by one foot nine inches, of pine or deal. After preparing the heart side for veneering, swell the other side by placing a layer of damp sawdust overnight; it will in the morning be about three-quarters of an inch hollow on the face side; then size the face side, keeping the back damp until the size is sufficiently dry for the cold, and it will be observed on coming from the cold, to be round on the face or veneered side, and may be kept nearly so by placing the veneered side against a flat board, or the two veneered sides face to face, to dry gradually. Of course, after trying this experiment, it will be necessary to acquire the judgment of how long the article will require swelling. Considering the deal fairly seasoned and the veneer well dry, one night as a rule is sufficient, and perhaps those who try this experiment will acknowledge and approve of the correctness of the method.

Wicker chairs, which have become such favorites, are now painted in all colors, and when furnished with cushions are exceedingly pleasant to handle and to use. Some of the smoking chairs have pockets or baskets attached, a great convenience to a lazy reader.

Advertisements cannot be received for insertion in the current week later than 12 m. on Wednesday. The charge for advertising is 25 cents a line, each insertion. Special terms for standing and displayed advertisements to be had on application.

This journal aims to be a medium of information for and a representative of the interests of every one connected with the stationery and fancy goods trades. It contains a full and trustworthy survey of the market for stationery in this country, in all cases giving the actual prices at which goods can be bought of importers and jobbers in this city, together with a detailed account of novelties in the trade, patents relating to stationery, and current items of interest. A review of foreign markets and accounts of movements abroad will also be furnished, and no pains will be spared to make THE STATIONER a thorough and complete exponent of the trade.

Subscription and postage for Great Britain, per annum..... 12s.

Any information our readers may wish to obtain shall be cheerfully given, and prompt replies will be made to all inquiries addressed to us on any subjects of interest to the trade.

Communications on all trade matters are earnestly solicited. Address

HOWARD LOCKWOOD, Pres. and Treas.

American Stationer Association,

74 DUANE STREET, NEW YORK.

Subscribers to THE STATIONER can be supplied with the best cloth binder in the market. Deliverable at the publication office. Price, fifty cents.

Readers of this paper who avail themselves of the information obtained from its columns, by advertisement or otherwise, are requested to notify their correspondents of the source of their information.

In this issue of THE STATIONER the readers of this paper will find many new announcements for the fall season. The trade ought to scan every page from first to last and note what our advertisers have to say for themselves. It will not be unprofitable reading.

THE playing-card trade is in a small ferment. The larger manufacturers avow their intention to crowd out minor competitors, and to effect this are selling the cheaper lines at low prices. It is hard on the smaller manufacturers, but it makes somebody's opportunity.

THE American Paper Makers' Association will meet at Saratoga on Wednesday next, the 25th inst. We believe that one of the subjects to be considered at that meeting will be the export trade, than which there is nothing more important in its relation to the manufacturing interests of the country. The stationery trade are equally concerned with the paper makers in seeking for foreign markets, and, as we have before suggested, we think that it would be well if they were represented at the meeting referred to for the purpose of ascertaining how they could unite their efforts with the paper manufacturers for their joint benefit and for the extension of American commerce.

WE notice that the German and Austrian newspapers are quite generally opposed to the traffic in stationery and school books in which teachers in those countries have been engaged directly or indirectly in many localities, and the various meetings of the paper and stationery trades in those countries have expressed themselves throughout in the same sense. In order to put a stop to the abuses that had grown up under this head, various municipalities have been induced to prohibit such traffic outright. A good many flagrant cases of bribery seem to have come to light in which certain prominent dealers and manufacturers had got the inside track in educational establishments, and the jealousy of their competitors led to exposures causing a great deal of bad blood. Poorly salaried as teachers are in many localities in Central Europe, it was only natural that they should accept a commission if it was offered to them in a non-committal shape. Hence all of the trouble.

A BIT of mob violence in a Mexican town may lead to a rupture of the friendly relations between the United States and Mexico and end the growing intimacy between the two republics. The attack on the American Consulate at Monterey, scarcely justifiable under any circumstances, does not seem to admit of excuse. The facts in this affair yet remain to be developed officially, and it will not do for us to form hasty opinions, although no one will hesitate to resent an attack upon our flag in any country with which we have presumably friendly relations. There seems to be an un-

warranted jealousy on the part of a portion of the Mexican people of the extension of American enterprise and commerce in their country. The same feeling does not seem to prevail as to other foreigners, and we are led to question whether European influence, alarmed at the rapid progress which we are making socially and in commercial and industrial enterprises with Mexico, is not at work to foment ill-feeling and excite disturbance. We have every confidence that our government will sustain the honor of our flag, and at the same time act with such judgment that no breach between the two countries will be made if it can be honorably avoided.

ANSWERS TO CORRESPONDENTS.

C. & Co. want the address of "manufacturers of plate papers used by lithographers in printing box labels of all kinds in colors. It is something like a book paper, but sized on one side only."

Ans.—In making such inquiries our correspondents should send samples of paper, and thereby expedite reply. We don't know what our correspondents have in mind, but suppose that they want glazed colored papers, such as are made—or rather prepared—by L. De Jonge and Doty & McFarlan, New York.

M. A. R. wants names of manufacturers of good willow-ware for office use.

Ans.—The principal manufacturers in New York are Charles Zinn & Co., 74 Walker street and 406 Broadway. Other reputable manufacturers are John W. Louderbach & Co., 80 Chambers street, N. Y., and John Krauss, 81 Walker street, N. Y.

S. C. W. wants to know where to get "notched" rubber rulers.

Ans.—They are kept in stock by very few in the trade in New York, and are made by the Goodyear Rubber Company. Henry Bainbridge & Co., New York, keep them in stock and take orders for them.

Subscriber asks: Can you inform me what is patented about the M. & H. Blotter Tablets, patented August 6, 1878. Is it the fastening of the sheet of blotting paper or the binding?

Ans.—We suppose that you have a copy of the patent. If you will look at the claim you will see that it is for "a book provided with a blotter secured to the back of the book by the flexible strip or band, whereby both sides of the blotter may be utilized." This seems to mean the method of securing the blotter.

J. W. Co. say that they cannot find rubber marking pens, which they saw two or three years ago, and want to know where to get them. They have handles with soft rubber tips, spear shaped.

Ans.—We are using them constantly. The large jobbers here handle them. The Tower Manufacturing Company, Broadway and Duane street, N. Y., can supply you.

Transparent paper may be made by dipping good paper in a solution of castor-oil in alcohol. The paper becomes quite transparent after the evaporation of the alcohol.

Artificial marble is made by mixing finely powdered marble dust or white limestone with one-fourth its weight of zinc oxide and one-eighth its weight of Portland cement and mix thoroughly into a thick paste, with a sufficient quantity of a hot, aqueous solution of water-glass, containing about 40 per cent. of the glass. Hold the paste under pressure while warm, and expose the molded form for a week or ten days to warm, dry air, before finishing.

MORTGAGES, ETC.

[In the appended list R. signifies a renewal of a pre-existing mortgage; B. S., bill of sale; and Real, a mortgage on real estate.]

Market Review.

OFFICE OF THE AMERICAN STATIONER,
WEDNESDAY, July 18, 1883.

THE MONEY MARKET.—There is nothing to call for remark on the money market, which remains easy and abundantly supplied with funds. Call loans on stock collateral are $2\frac{1}{2}$ to 3 per cent. and $1\frac{1}{2}$ to 2 per cent. on government bonds. Time loans are firm in comparison with money on call, and are less easily obtained than of late. The conflict between the bulls and bears in stocks continues exceedingly tame, and the advantage is all on the side of the latter, the disposition being to unload rather than purchase. Prices are all lower, and the break has destroyed all chance for an improvement at present, and nothing but stagnation and weakness is to be expected during the rest of the summer. The depression in the share list continues to exercise an unfavorable influence on the market for railway mortgages, there having been a pretty general decline in prices. Even government bonds are dull and lower. Foreign exchange continues dull, with a further reduction in rates for sterling—Continental sympathizing.

THE PAPER MARKET.—While there is a unanimity of opinion among the trade that business is dull and has undergone no improvement since the date of our last review, yet there is a very hopeful feeling expressed everywhere that the causes which have exerted an influence upon general trade for

several months past, have very little force left to work any further detriment. The crops are now well assured, and the tariff changes have become established without any particular inconvenience in any branch of trade, so that the feeling among business men generally is for the most part one of confident hopefulness. Fine writings show some weakening in price, loft-dried, animal-sized being offered at 12c and up, and machine-finished, engine-sized down to 8c, and upward. In book papers we hear of an order taken last week at an exceptionally low figure. Dealers are now offering super-sized and calendered at as low as $8\frac{1}{4}$ to $8\frac{1}{2}$ c. News shows a very weak condition to judge of the figures made on some recent contracts. Manillas have a better outlook than any other grade on the list. We hear of a manilla manufacturer who has orders for over 700 tons of light weight sold ahead, and is full on orders for several months on heavy weight.

THE STATIONERY MARKET.—There doesn't seem to be as much doing in the stationery trade, generally, as of late, business being somewhat duller with the exception of a few specialties. There are few buyers in town and country dealers and commercial travelers are sending in few orders by mail. Manufacturers and dealers in various goods, however, are keeping up their stock in anticipation of a brisk fall trade. A few novelties which have been put on the market recently are selling quite briskly. One of these is a sealing stamp which is intended as a substitute for sealing wax. The trade in this is very brisk. The blank-book trade is very fair and rather better than usual at this time of the year. The envelope trade is very dull, but dealers are anticipating better business in the fall. Steel pens are commanding a fair business for this season, and trade, though not over-brisk, is quite steady. In photograph and autograph albums the demand is exceedingly good, more orders being received by dealers than they can possibly fill just now. The same may be said of fancy, plush and leather goods generally. The playing card trade is somewhat demoralized, owing to circumstances narrated in another column. Staple goods are generally steady in values.

Correspondence.

LOUISVILLE LOITERINGS.

[FROM OUR REGULAR CORRESPONDENT.]

LOUISVILLE, Ky., July 14, 1883.

Trade has been seasonably quiet of late and outside of stock-taking and preparations for fall there has been very little doing in the wholesale lines. Retailers are, generally, having a fair trade for this period of the year, though it requires considerable effort in most branches to make things "go" in this warm weather. Manufacturers are tolerably well employed and while light margins are complained of here and there, the industrial situation seems to be very healthy. Bradstreet's Agency reports that there was not a single business failure in this city during the past month of June, and very few in the surrounding territory, showing that affairs here abouts are in a sound condition.

The Southern Exposition buildings have been completed by the contractors and accepted as finished by the management. The allotment of space is in progress and carloads of exhibits are pouring in daily. The Exposition will have a national character, scope and influence, and as it was created by the demands of the "New South" so will it be sustained by the entire country, whose interests go hand in hand with the development and progress of this section.

The power for the machinery exhibits will be furnished by seven engines with a total capacity of 1,425 horse-power. There are seven batteries of four boilers each, and in addition the Edison Electric Light Company will add 1,200 horse-power for the purpose of lighting up the building and grounds. There will be on the ground-floor 4,600 incandescent electric lights, and in the art gallery 250, which will exceed three miles of private buildings; besides, there will be 125 arc lights in the park and grounds. There will be fifteen dynamo machines, bringing the cost of the electric light plant up to \$100,000. Forty thousand pounds of electric wire will be used.

A plantation, farm and vegetable garden has been cultivated on the outer edge of the grounds where all of the staples may be seen growing finely. In short the exhibition will consist of fifty acres of machinery and merchandise, and mineral, vegetable and animal resources, in every stage and shape, including the finest collection of paintings and other branches of art ever brought together on this continent. The mint and other Washington departments will contribute their leading features; the music will be on a scale of rare magnificence; the big organ has arrived from Boston and is being put in position; Gilmore's and the Seventh Regiment bands from New York, and local orchestras will each have a concert season in the building.

During the progress of the Exposition, which opens on August 1, and will continue 100 days, there will be, on adjoining grounds, the grandest races ever given by the Louisville Jockey Club, and a mammoth show of thoroughbred cattle, horses and all kinds of livestock, by the Louisville Fair Association.

Hotel rates will not be advanced, and the city is quite prepared to accommodate the flood of visitors. This will be the blue-ribbon year in Louisville's commercial, social and artistic development.

The *Spectator* Publishing Company is a corporation just formed for the purpose of conducting a new daily newspaper.

James A. Hart, of Hart's cheap varieties, commonly known as the 5 and 10 cent store, made

an assignment to C. G. Davison on the 10th inst.; he states that his assets and liabilities are about equal—\$10,000, and that the immediate cause of his trouble was the presentation of \$1,200 worth of his paper gathered in by the Stationers' Board of Trade of Chicago. He has a branch store at Lexington, Ky., and hopes to arrange an early settlement.

The manufacturing stationers, printers and lithographers are busy. The school supply order trade has opened briskly, and from now to the end of the year activity ought to be the watchword. John P. Morton & Co. say orders for their standard school books are very large, and from every section of territory, and all the other publishing houses here are finding new channels for their goods, besides maintaining the old.

There has been a very numerous representation of the urbane gentlemen with "the finest line" here every day this month, and, as a rule, they report crops booming and business waking up.

BOURBON.

DAYTON NOTES.

[FROM OUR REGULAR CORRESPONDENT.]

DAYTON, Ohio, July 14, 1883.

The trade in articles pertaining to stationery is very quiet and will be for a week or two yet. The harvest is about over, and wheat is turning out better than expected. Corn is looking finely, and there never was a better may crop. Tobacco promises well and a good average return for outlay will be received by every good farmer in this valley. Our whole trade depends in a great measure on the farming community, and I give the above information as an indication of how trade will be. Travelers have not been very plenty in the last few days. Mr. Hallenbeck, with J. Q. Preble & Co., was in our city yesterday and reports his trade of the last six weeks as the best he has had. Mr. Hovenden, with R. Worthington, was here a few days ago and showed a handsome line of "Juveniles," &c., and seemed pleased with his orders. Messrs. Myers and Benson, representing R. A. Rogers & Co., of this city, report good trade, as their first week's experience on the road this season and say that their sales of Christmas novelties, hand-painted to order, is something immense.

James Rickey has sold out his store to Crane, Jackson & Crane, who seem to be pleased with their start and when they get into their handsome new double room, promise to make a display that will astonish the natives.

Thomas, Mayer & Vansant are busy fixing up their present rather contracted quarters, waiting for some one to build a store suitable to their wants.

Reynolds & Reynolds are busy night and day with their specialties.

The Holden Manufacturing Company reports good trade in school supplies. Its school-book cover is a success, and once introduced to the trade, like old Sinbad, you can't get out of it.

H. E. Mead & Co. are getting ready to occupy their new quarters in the rear of Crane, Jackson & Crane's bookstore. Their new room will be 100 feet square, and will make the finest paper warehouse in the State. Mr. Williamson, their former store superintendent, died a few weeks ago after a long illness. He was well liked among the trade.

Rutledge & Co. made an assignment of their paper-mill property yesterday to Frank N. Nixon. This was brought about by the continued depression in the paper manufacture. The mill will probably be run by other parties. The mortgages on the property will hardly be

realized, and nothing will be left to the outside creditors. There are no other failures to note in the

MIAMI VALLEY.

CINCINNATI CINCTURES.

[FROM OUR REGULAR CORRESPONDENT.]

CINCINNATI, July 17, 1883.

As the stationer's business is a barometer of the condition of trade, so by virtue of that fact all of the vicissitudes of trade in general affect it speedily. It is not only a register of the present state of business, but a sort of oracle which one may consult in regard to the immediate future of trade. Indeed, the business of the manufacturing stationery in this city is a reflex of the combined judgment of the trade in Cincinnati and in the broad, rich region tributary to it of "what the signs of promise are." Taking this sensitive indicator for a criterion of the immediate future in this city and in the adjacent regions, the signs at present are that the fall trade will be generous and healthy. Manufacturers in many lines of business are getting mail circulars, dodgers and pamphlets turned off for opening the fall campaign. The quantities are much larger than usual, and the styles are finer. Dealers in blank-books and commercial blanks of kindred classes (which means manufacturers also) are finding no falling off in orders and no sluggishness in collections. On the contrary, their business is not only holding up but increasing, as a rule, so as to make a material average increase in the aggregate volume of this class of business in the city.

Merchants and business men here and in the vicinity are preparing their counting-rooms for a brisk fall trade. The printing of labels has had an extraordinary growth during the past two or three years. That has been brought about by a growth in branches of business in and around the city which consume labels largely. This is one of the largest fruit-canning centres in the country, and that business is growing with amazing rapidity. The fruit promise of this year is giving it a prospective stimulus, and the orders and inquiries for labels at the factories that turn off these articles have been prodigious in numbers. Designers have their hands full of work. Colorists are in constant demand, and all of the available talent in these lines is retained at high salaries. One man gets \$10,000 a year; many range from \$2,000 to \$3,500. More would be paid high wages if more were to be had. There is a demand for the very best work in all manufacturing stationery and printing lines, and in this vicinity it is growing.

Those who underrate the quality and the standard of public taste do so at their peril. Manufacturers who start, as they suppose, in advance of the standard of the public in matters of taste find that they must be constantly raising their standard on the public, will leave them behind. There is no business which so sensitively shows the restless activity of the age by the effects of that activity and changefulness upon it as that of the stationer. Every new lawn or indoor amusement shows itself early in his shop. A short memory only is required here in Cincinnati to prove, by comparison from the pictures on sale in the book stores, that the public taste and appreciation in fine arts have made and are making gigantic strides.

The indications by all of these tokens here today are that the trade is enjoying an average prosperity with which only an avaricious man will find fault. There are special drawbacks in a few lines of business; but they are such as occur periodically and are liable to periodical

reactions in the other directions calculated to make things even. All reports of crops average good of some products, the reports are of a wonderful promise and of nothing in the promise bad.

Cincinnati has been, as is its wont, too conservative to be hurt by Chicago fluctuations in pork. The general healthfulness of the city and vicinity is remarkable. Those who are importing rags from the Orient will be watched by health boards now that cholera has taken its start Westward and is prevailing in Egypt, a great rag-producing centre. There is a little fun here, now that it is reported as having been brought to London. There were never in any season so many of the rich middle classes made the trip to Europe as during this year. Their friends left behind are now telegraphing them to return. So it was when there were rumors of yellow fever in New Orleans a day or so ago; telegrams poured from here down there advising people to hurry back. During the prevalence of pestilence the stagnation of business stops the stationer's business and, one dropping down here from a balloon trip hither from another hemisphere, or even from another sphere, need only inspect the stationery establishments to form a general idea of the average business condition of the country.

In Cincinnati nobody in the stationery or printing line is failing. Prosperity seems to be the rule, and activity continues in spite of mid-summer weather.

PRINCE WILLIAM.

PHILADELPHIA TRADE NOTES.

[FROM OUR REGULAR CORRESPONDENT.]

OFFICE OF THE LOCKWOOD PRESS,
150 South Fourth Street,
PHILADELPHIA, July 19, 1883.

You will perhaps find it refreshing to know that the thermometer here has evolved to between 93 and 97 degrees. This is the true and honest report of THE AMERICAN STATIONER, although it is not the official government report. Our signal service station is located at the top of one of the highest buildings in Philadelphia, where the reflection of the heat is not felt, and, thereby, after a burning day, we have had the satisfaction of seeing in our daily papers that we had only 89 or 90 degrees of temperature, when, in fact, there have been six or seven more, at least, to cause abundant perspiration. I tell you, indeed, that any one who should take Philadelphia for an agreeable summer resort would be altogether mistaken. All of the wealthy people have deserted the city, and the only rich persons to be seen in town are the newspaper men, who, on account of their cold blood and tough skin, can stand a great deal of heat. On this account they are to be congratulated, as they will not feel the heat so much after death when they are directed to a very hot place.

But let us now talk about business. Spring trade, I must confess, has not been very brilliant in Pennsylvania if we compare it with last year, and, as for the summer business, it is absolutely dull. As a compensation, the prospect for the fall is really good, and this is a fact worthy of consideration by the retail trade when they give their orders for next season; because, if buyers permit themselves to be influenced by the dullness to which business has been subjected, and only order in small quantities, they will find it difficult hereafter to duplicate their orders. The prices of goods will be higher, and in many cases it will be impossible to procure goods, because the manufacturers (and there is no question of that here in Pennsylvania) will be unwilling

to run any risks and will produce no more than their orders will justify.

The iron trade, which in this State is the corner-stone of prosperity, has suffered very much since the beginning of the year, but within the past two months prices have gone up, the demand has become satisfactory and the stock is absolutely closed out. This state of affairs would not naturally make much improvement here within two months, but it is a revival. On the other hand, the harvest, which is excellent, assures us of a good closing for the year, which it would be wise to profit by.

We have had, it is true, a great number of failures, but this is an inevitable and periodical trouble, which, so far from being discouraging, ought to be reassuring, for it must be remembered that the good houses remain while the bad are disposed of.

The paper trade has certainly suffered much, although prices are low and goods are not so very abundant because a great number of mills have taken advantage of the quietude of trade to repair or change their machinery. C. Kennedy, of the firm of S. A. Rudolph, Sons & Co., told your correspondent, a few days ago, that he founded the greatest hopes on business for the next season, and that his house, one of the most important in this city, would be amply prepared for it. J. G. Ditman & Co. are entirely of the same opinion. In the line of trade in which A. M. Collins, Son & Co. are interested, it would be necessary to hurry up orders; for, although this house, which is the most important of its kind in the United States, has confidence in the revival of business, it has only a very limited stock. If orders reach it too late it will find it impossible to fill them.

J. B. Lippincott & Co. are now receiving their importations of stationery and fancy goods by the incoming steamers, and will be prepared at an early day to show the most extensive assortment, comprising the latest novelties from London, Paris, Berlin, Vienna and other manufacturing towns of Europe, which have been selected with great care by their resident buyer. Noticeable among this importation are metal, earthen and china plaques, metal and oxidized inkstands, bisque and china figures, smokers' sets and tables, dolls, cigar-cases, work-boxes and baskets, and, in fact, the entire list embraces everything prominent in the fancy goods line suitable for presents and for use. In addition to their own line of hand-painted Christmas novelties, embracing some thirty numbers, their selection comprises all of the leading lines, containing some 500 numbers. Their stock of school-bags, slate pencils and other requisites for school children is conspicuous by the addition of many new articles. This house is also agent for the Sayres Pennsylvania "D" school slates, of which it has an immense supply.

Charles J. Cohen reports that school trade has opened actively and that there is a good demand for all of the novelties in that branch as well as for fresh stock in the staples extensively handled. Mr. Cohen has just issued a corrected list of prices to be used in connection with catalogue No. 41. This sheet, which shows the alterations that have occurred during the past few months, will enable the trade to keep thoroughly posted on prices current. I have seen some of the advance supplies in the line of fancy goods that is a specialty with the house in the autumn, and must congratulate this section of the country upon having so well and richly an assorted stock at "first hands." Mr. Cohen is very sanguine for the success of this season's trade, and as he justly bears the reputation of

care and conservatism in all of his opinions, this may be accepted with full credence in the accuracy of its prophecy.

Langfeld, Turner & Andrews have several new articles for the fall trade, which will certainly meet with the same success that they had with their drawer pocket-books and satchels. Among their novelties are to be mentioned some new bags in seal and calf combined with diamond-shape front. They have also used a great deal of Japanese leather. The alligator bags are always in demand; some are made with plaided leather, others imitating baskets. Their new portemonnaes combined with pocket-books, framed all around, will be the success of this year.

The B. B. Hill Manufacturing Company, which was located at Springfield, Mass., and removed a year ago to Philadelphia, is doing a large business. It has so perfected its manufacture of hand-stamps, copying-presses, seal presses, numbering-machines, &c., that it can be considered as the best and the largest manufacturer in that line. It has in hand as many orders as it can attend to.

J. VIENNOT.

SHAWMUT SHAVINGS.

[FROM OUR REGULAR CORRESPONDENT.]

EASTERN OFFICE LOCKWOOD PRESS,
49 Federal St., BOSTON, July 9, 1883.

So far as I am able to learn, the opinion is generally entertained that the stationery trade of the whole country for the past six months has been somewhat lighter than for the first six months of last year; that a given number of customers have used fewer goods, and that with the lower prices received, the entire volume of trade has been quite considerably smaller. Whether the gross amount of goods sold by Boston houses is less than last year, however, may be a matter of question, for nearly all of the leading wholesale houses of this city are fully alive and are yearly putting forth more effort, and as a result every year witnesses an increase in this trade. Carter, Rice & Co., for example, have done more business in the past six months than during a corresponding period of any previous year. This is due, however, to the orders of new customers. Winkley, Thorp & Dresser have sold more goods than they had last year at this time, but it is well known that they have added an elegant line of scrap-books and autograph albums. Knight, Adams & Co. have added very materially to their line of foreign novelties, while Ward & Gay, doubtless, offer the finest assortment of cards of any house in this country.

H. H. Carter comes to the front with an excellent line of Christmas and New Year cards. In addition to the goods of the well-known makes, such as Marcus Ward & Co., of whom he is special agent, Mr. Carter offers some novelties decidedly unique in the way of "antiques" and Japanese hand-painted cards procured by Arthur W. Carter in Europe.

Charles K. Wadham & Co. are bringing out a new line of scrap-albums for the fall trade. Large orders are entered for their "Owl" and "Sunflower" series.

William A. Davis, manufacturer of the United States Treasury mucilage, black and colored writing inks, of this city, has been awarded the contract for supplying mucilage and ink to the first and second class post-offices, War and Treasury departments of the entire United States.

H. H. Carter has the exclusive agency for Hack's roll calendar for 1884.

Charles K. Wadham & Co. announce that they will carry in addition to their regular line a full

stock of all specialties in blank books and stationery recently manufactured by Frank S. Thayer.

The Davidson Rubber Company's new patent velvet erasive rubber is meeting with much favor among those who want a really fine article; in fact, this company makes nothing but the best in either soft or hard rubber stationery goods.

Charles H. Whiting is now special agent for the following-named publishers: A. S. Barnes & Co., New York; Robert Clark & Co., Cincinnati; Charles De Silver & Sons, Philadelphia; P. Jarrett & Co., Philadelphia; S. C. Griggs & Co., Chicago; Orange Judd Company, New York; Jansen, McClung & Co., Chicago; Porter & Coates, Philadelphia; Potter, Ainsworth & Co., New York.

C. W. Clark is exclusive agent for an artificial stone slating for blackboards, on which a slate-pencil may be used.

George F. King & Merrill have been granted a patent on their "office pen," which has been growing in favor of late. H.

PROVIDENCE PICKINGS.

[FROM OUR REGULAR CORRESPONDENT.]

PROVIDENCE, R. I., June 27, 1883.

There is little transpiring in this city that would be of interest to the readers of THE STATIONER generally. Since my last letter there has been one new stationery store established; that of Wm. T. Tibbetts, formerly of Tibbetts & Shaw. Mr. Tibbetts' store, at 64 Westminster street, is a light and pleasant one, and is very tastefully filled with new goods.

The Sydney S. Ryder business is still unsettled.

Pearce & Hoagland, manufacturers of the quill reserve tooth-pick, are getting out some elegant novelties in the way of pearl, ivory and decorated porcelain pencils and tooth-picks. Stationers will do well to drop a card, asking for their complete illustrated catalogue, which will be out in a few days. The Livermore and the Cross pen companies are both on hand with numerous new lines of goods in pencils and the like. H.

OUR LONDON LETTER.

[FROM OUR REGULAR CORRESPONDENT.]

5 LUDGATE CIRCUS BUILDINGS,
LONDON, E. C., June 23, 1883.

The minds of business men here are now being considerably exercised on the question of long credits. The keen competition which has existed for years past in almost every trade has had the effect of not only reducing profits, but of extending the time at which accounts are payable. The system known as "dating forward" in the "soft goods" trades has, in the end, made the monthly accounts payable six or nine months after delivery. As a result of this, a large number of the lesser wholesale houses have had to "shut up shop," while the larger houses have grown to tremendous proportions.

The stationery and bookselling trades are rapidly coming under the general influence. The publishers' travelers, as an inducement to the bookseller to do business, extend the time of payment and thereby enable the adventurous and unscrupulous to embark in trade at the expense of the honorable and industrious. The stationery trade has become even more seriously injured by this demoralizing system. Business is disorganized and "bills" are plentiful, while money is scarce. The bills moreover, are rarely

met to date, by far the majority are renewed, and in some cases renewed.

What the end of this will be it is not difficult to prophesy, unless some means are adopted for checking the growth of the evil. As credit is extended competition increases and reckless speculation is encouraged, until a "big smash" ensues, and even the soundest houses suffer in a greater or less degree. It is satisfactory to know that a few, at any rate, of the best firms, are alive to the danger and are anxious to bring about a union among the manufacturers and wholesale dealers, with a view to the establishment of a sounder and more equitable system of trading.

Since the time when Joseph Gillott entered Birmingham with a penny in his pocket the trade in steel pens has grown steadily, till now it has reached such large proportions that many thousands of persons are employed in the manufacture and distribution of these now indispensable articles, and of the holders which are necessary to their use. There seems, moreover, to be no limit to the number of improvements which are constantly being made in both. Macmaen & Cameron, of Edinburgh, for instance, have recently brought out a new "quill yielding penholder," of which they are the inventors and patentees, which is contrived, in the words of the makers, "to relieve the irksome rigidity of ordinary penholders. By a series of slits, the sides of the penholder are made to possess the elasticity of an ordinary quill, and to impart to the hand of the writer the pleasant sensation so agreeable to those who write much or who have been accustomed to write with the quill."

There is no question that this is one of the best of the many improvements in writing implements which have been made by this enterprising firm. The holder possesses every qualification required to constitute a luxuriously comfortable appliance; it is light, easily held, and of agreeable substance, and there is little doubt that it will become very popular.

To the notions of Christmas and New Year cards given in my last letter must be added the productions of one or two firms not then mentioned. Thos. De La Rue & Co., who for years have occupied a very high position as the publishers of cards on which artistic designs have been executed with exquisitely perfect coloring and finish, have this year an assortment of them which quite surpass any that have preceded them. They have a number of fancifully drawn and delicately printed designs of girls, classical in style of the kind, that has achieved much success in past years; also, beautiful faces of maidens and little girls and exquisite pictures of birds, flowers, growing plants, &c. The get-up of all the cards published by De La Rue & Co. is most elegant and finished.

Those who desire a complete assortment of the cards of the coming season will find many novel and pleasing devices among the collection of the Artistic Stationery Company, of Dyer's Buildings, Holborn, London. Besides some high class chromo cards, this firm has produced a number of etchings by George Cruikshank, Jr. and Percy Tarrant, which will certainly be much admired. They consist of sets of two, three, or more, enclosed in tasteful wrapper and are named the "Cavalier," "Auld Lang Syne," "Coaching," "Skating," &c. There are also some charming engravings by Bartolozzi produced from the original plates. All of these have been carefully printed and form one of the most effective collections before the trade.

Chromo-lithography has never been more effectively employed than in the production of the

cards of J. F. Schipper & Co., of King street, Covent Garden, London, almost all the effects of an original painting being reproduced with a fidelity and harmony that leave nothing to be desired. The floral cards are genuine likenesses of the "Garden Queens" they are intended to represent, and the landscapes are among the best of the "Scene" cards of the season. The heads of girls and women are, however, Messrs. Schippers' specialty, being full of grace and delicate beauty.

Among cheap cards those of Bernhard Ollendorf, of Jewin street, London, deserve especial mention, being pretty and taking, without being showy. This collection contains floral cards in plenty, and pretty girls and boys as gardeners, sailors, &c. One design, "Head of a Cherub," is a particularly beautiful card, though small. Nearly all the designs are executed both on plain card and on satin, and can be had fringed and made up as double or treble folding cards. The prices of all are very moderate.

Charles Lee & Co., a firm who have only been in existence for a few months, have produced a sample-book, which, though not very pretentious in regard to size, will bear comparison with those of many older firms. The designs are popular in style, well printed and moderate in price.

S. Hildesheimer & Co. have lately issued a sample-book of menu and programme cards which fully sustain the reputation of the firm, some of them of heraldic design, others suggestive of stained glass, and one intended to be so folded as to form six pages, the design being emblematic of good cheer generally. Another set consists of flowers in subdued tones, and are very artistic. Silhouette figures are the chief features of another set. They are highly effective, and, executed in a monotint, have a humorous effect. Among other novelties may be mentioned a series of chromo reliefs, representing hares, deer, fishes, lobsters, boars, &c. These have easel backs, so that they will stand upon a table. A vacant space in the figure allows the name of the guest or the dish to be inserted. These are likely to be popular, and all the designs, though admirably got up, are very low in price. W. F. C.

THE REBACKING OF PAINTINGS.

A Washington letter describes the *modus operandi* of taking off the old canvas of some of the great paintings hanging in the Capitol rotunda and substituting new. The picture is laid upon its back on the floor and a sufficient thickness of cartridge paper gummed on the face to prevent injury. It is then turned over and the old canvas scoured off with pumice-stone. This is a tedious operation, requiring much care. The new canvas is stretched and covered with a thick adhesive substance, which penetrates every part. The back of the painting is then covered with a more fluid mixture, when the canvas is laid upon it. The whole is turned over, the face of the picture coming uppermost. Small flat irons, heated to a temperature that will hasten the drying of the glues without injuring the paint, are passed carefully over the surface, the cartridge paper preventing harm. Toward the close heavier irons are used. The paper is then moistened and removed, when, after imperfections have been touched up, the picture is returned to the wall.

Vase stands are made quite tall and very light, a slender mahogany stick at each corner serves as a support for a small top piece. The corner sticks incline upward toward each other, and have one or two cross bars between them.

GEORGE B. HURD & CO.,

79 Beekman Street, New York,

MANUFACTURERS AND DEALERS IN

FINE STATIONERY.

WE CARRY A COMPLETE LINE OF Z. CRANE, Jr. & BROS.' UNRIVALED PAPERS,

In both SUPERFINE and EXTRA-SUPERFINE Qualities, GRECIAN ANTIQUE, DISTAFF, PARCHMENT VELLUM, Etc. We use their Flat Papers in the manufacture of our LINE OF WEDDING GOODS, which embraces all the leading styles, and many new designs of embossing.

WE HAVE A VERY HANDSOME LINE OF PAPETERIES, CARD CABINETS, ETC.,

Also, Many New Patterns in Fancy Writing Papers,

The latest of which are POLKA DOT, CELESTIAL, in Mazarin or Deep Blue, EMBOSSED MOROCCO in Sea-Shell, Drab, Opaline and Silver Gray.

EMBOSSED ALLIGATOR, in Cafe, Terra-Cotta, Drab and Marguerite. PLAIN ALLIGATOR, in Russet. HAMMERED SILVER, in Cream and White.

RAGGED EDGE, Imported and Domestic. PIQUET, in all Tints. GROS GRAIN, in all Tints. BIRCH BARK, an exact imitation in Paper.

SPECIAL ATTENTION GIVEN TO THE MANUFACTURE OF FIRST-CLASS MOURNING GOODS. OUR LINE OF BRISTOL BOARDS,

Both Pasted and Mill, are unsurpassed in quality, being made by Z. CRANE, Jr. & BRO., to match their paper. We manufacture from this stock VISITING CARDS, in Plain and Gilt Edge, Plain and Gilt Bevel, and can furnish any special size desired.

Decorated Note Paper in Colors, Bronzes, Etc.

GENERAL AGENTS FOR Z. CRANE, Jr. & BRO.

COMPETITION IN THE PLAYING-CARD TRADE.

Competition in the playing-card trade has recently caused a veritable slaughter in prices, some of the cheaper grades of goods that before the repeal of the internal revenue tax sold for \$24 per gross are being put out as low as \$9.50. This variation in price is, therefore, not caused by the repeal of the internal revenue tax, as at first glance would seem to be the case, but to brisk competition, which has resulted in a great reduction in profit. This conflict, it is claimed by some dealers, originated with Andrew Dougherty, in combination with the Consolidated Card Company, for the purpose of driving out of business other houses and monopolizing the card trade.

A representative of Andrew Dougherty, when questioned on the subject by a reporter for THE AMERICAN STATIONER, said that it was a fact that his firm was selling the cheaper grades of cards at much below a profitable figure, and he acknowledged that Mr. Dougherty was acting in combination with the Consolidated Card Company in this movement.

James A. Tappan, treasurer of the Union Card Company, said: "The fact of the business is this—the New York Consolidated Card Company and Mr. Dougherty some time ago reached an understanding, without consolidating their business interests, whereby it was agreed that they should sell at the same price and the same discount, quality considered. That arrangement has existed for several years and still exists, but within the last year several new firms have gone into the manufacture of playing cards on a limited scale. They have no facilities for making a fine grade of cards, and the two houses named, ourselves and one Western concern are the only ones that can manufacture fine enameled playing cards suited to the demands of the better class of trade. It will be noticed that the prices at present are reduced only upon that class of goods which the various small manufacturers have facilities for making. The only thing they have got to live on is the profit on these cheap goods and, inasmuch as the prices on these goods have been reduced to a point where there is a greatly reduced margin of profit, many of them must go to the wall, in my opinion."

S. L. Cohen, the president of the New York Consolidated Card Company, said: "My house represents the oldest playing-card manufacturing company in the United States. As matters now stand, the value of the whole number of cards sold in the United States amounts to about one million of dollars, while the capital employed to manufacture them is fully equal in value to the entire amount of sales. This company alone has facilities sufficiently large to supply all of the cards which are used in this country. It therefore becomes apparent that it is necessary to make a profit upon the goods in lieu of being obliged to turn over our capital frequently within the year as other branches of trade are capable of doing. Recently there has sprung up no less than six small manufactories which produce an article inferior in quality to that of the lowest grade manufactured by our establishment or Mr. Dougherty; and, as there is always a certain number of consumers who regard price rather than quality, they have forced our firm and Mr. Dougherty to sell our lower grades of goods below cost. That is the state of affairs in a nutshell."

Most of our misfortunes are more supportable than the comments of our friends upon them.

NEWSPAPER WRAPPER.

A new form of wrapper for newspapers and other like matter has been devised, which can be secured over the paper very rapidly and conveniently without the use of adhesive material. It consists in a wrapper, on the inner surface of which a wire is placed, provided with loops at the projecting ends, the wire being held on the wrapper by a strip of paper secured on the inner surface of the wrapper and over this wire. When the wrapper is folded over the paper the projecting ends of the wires are twisted together; or one projecting end of the wire is passed through the loop of the other end.

The wrapper, which is made of paper of any desired or suitable kind, can be made square or oblong, or can have its ends shaped in the same manner as the flaps of an envelope. A wire is placed across the wrapper from end to end—that is, from flap to flap—on the inner surface of the wrapper, and the ends of the wire are twisted to form loops, the twisted ends of the wire projecting some distance from the ends or flaps of the wrapper. A strip of paper or muslin is pasted on the inner surface of the wrapper, over the wire, for holding the same on the wrapper. The wrapper is passed around the folded newspaper, or other like matter, and one projecting end of the wire is passed through the end loop of the other end of the wire, and that end of the wire that has been passed through the loop is pressed down flat on the wrapper, and thus holds the wrapper closed on the paper; or the two projecting ends of the wire can be twisted together for the same purpose. This wrapper can be closed very rapidly and easily, and can be removed very easily in case the contents are to be examined by post-office or custom-house officials; and the wrapper can be replaced and secured without being injured in any way whatever.

A cord may be used in place of the wire, if desired; but the wire is preferred.

Instead of retaining the wire in place by the strip, the wire may be placed in the body of the paper, such situation being given to it when the paper for the wrappers is manufactured.

SCHOOL BLACKBOARD.

Great difficulty has heretofore been experienced in the use of slates and blackboards in teaching perspective and in indicating the various degrees of light and shade in a manner sufficiently simple to be readily comprehended by the pupil, and likewise in teaching industrial drawing much confusion is felt by the pupil in distinguishing the "construction-lines" from the others where both are of the same color. It is essential that the learner should understand that "projection" is indicated by light and shade, and in order to do this he should be shown all the gradations from white to black. Outline exercises only are practicable upon the ordinary blackboard or slate, the single color of white being alone clearly shown upon its surface, while black is invisible. Both, however, should be shown with equal clearness in order to accomplish the best results either in industrial or free-hand drawing, while, for the reasons hereinafter shown, the writing-surface should not be opaque but semi-transparent.

As the majority of teachers in schools who are called upon to teach drawing of various kinds are not skilled artists, and hence are incompetent without the assistance of other means to convey knowledge the illustration of which they do not possess the practical skill to impart, a means has been devised whereby penmanship,

free-hand and industrial drawing, and especially the latter, as well as perspective, may not only be clearly illustrated, but by unskilled teachers. In order to do this, a transparent or semi-transparent writing-surface, preferably made of ground or etched glass, behind which outline charts, maps, or drawings may be placed, is provided, this writing-surface having a neutral tint, upon which white or black or colored crayon, charcoal, or other like material may be used for drawing with such effect that the lines of each may show with equal or proportionate distinction and clearness, thus enabling the laws of perspective—of light and shade—to be the more readily explained to and comprehended by the pupil, while in the teaching of industrial drawing the construction-lines, by their different color, are, in the minds of the pupils at all times separated from the others. Much confusion is thereby avoided, and the teacher of moderate experience is thus enabled to exhibit all the proficiency of an accomplished artist.

A further object is to provide such mechanical appliances in connection with the drawing or writing-surface, that geometrical and industrial drawings may be produced and illustrated with accuracy and ease. This is done by providing bars pivoted to the frame or boards and provided with a horizontal ruler, a T square and double-jointed pivoted ruler all operating in combination.

LITHOGRAPHIC PROCESS.

A plate (stone) on which it is desired to etch a sky is covered with an etching-ground, consisting of asphaltum varnish, and the parallel lines are then cut through this ground by means of a diamond, without, however, cutting the face of the plate or stone. Now, before etching in these lines to the strength required to produce clouds, or any other effect that may be desired, they are filled or stopped out with ink at regular intervals, so that a line of minute white dots appears in place of the previously solid or continuous line. The method of doing this is to transfer on the lines—that is to say, on the surface of the plate across which the continuous lines are drawn—an impression taken in strong transfer ink from another plate on which lines have been ruled to appear in white while the remainder of the impression is covered with ink. The impression or transfer sheet having such lines in white is laid across the plate on which are the lines it is desired to stop out, and the latter will absorb the ink from the impression or transfer sheet at all points where the lines of the plate and sheet intersect. It is preferable that the lines of the impression shall cross the lines of the plate at right angles; but a diagonal position will produce good results. As the result of this operation, the lines on the plate are filled or stopped out at regular intervals, leaving only that portion of the lines exposed where the white lines of the transferred impression cross them. Such portion will hence appear as minute white dots on a dark surface. The comparatively soft ink which was thus transferred is now dusted with finely-pulverized rosin to strengthen its power of resistance to the action of the acid, which will only act on the exposed portion—to wit, the white dots. The further procedure of etching in the dots instead of the lines is precisely the same as in former lithocautic processes. The dots, being in lines, and small as well as close together, are almost invisible to the naked eye, and will hence present to it the appearance of unbroken or solid lines, but of so extremely delicate shading as to produce the effect of a gray tint.

CELEBRATED "CLIMAX" BLOTTING PAPER,

The "CLIMAX" possesses the following advantages:

- 1st, *Full weight*, as marked in *figures* on bundle.
- 2d, Absolute uniformity as to quality and color.
- 3d, It will not harden with age.
- 4th, It is of absolutely *unrivaled* quality.
- 5th, Cheapness, in view of its excellence.

PUT UP FULL WEIGHT AND COUNT.
— A FULL LINE OF —
White, Buff, Blue, Pink and Salmon,
In 60, 80, 100, 120 and 140 lbs. always on hand.
Quarter-ream packages of assorted colors will be sold as a sample,
if desired.
Sold by all Prominent Stationers and Paper Dealers.

Manufactured by **RICHMOND PAPER MANUFACTURING CO., RICHMOND, Va.**
N. H. FURNESS, Selling Agent, 5 & 7 Beekman St., Room 12, Temple Court, New York City.

LEROY W. FAIRCHILD

18 JOHN STREET, NEW YORK,

GOLD PENS,

Pen and Pencil Cases, &c.

FACTORY, BROADWAY AND FOURTH STREET.

N. B.—All Gold Pens bear my name-stamp, LEROY W. FAIRCHILD, and my other goods, "FAIRCHILD" (my Trade-Mark), all of which are made at my own Factory.

Orders should be given to my Travelers, or sent direct to me.

Trade Gossip.

All new goods and designs which are not, strictly speaking, "Novelties" will be noticed under this head. The trade are requested to forward descriptions with samples in order to secure proper notice.

Sea shells are mounted on terra-cotta plaques.

John H. Lee, publisher of the *Record*, Bakersfield, Cal., has sold out.

Sullivan & Parsons, publishers of the *Times*, Zanesville, Ohio, have sold out.

H. Hoffman, dealer in fancy notions, Columbus, Ohio, is closing out his business.

Jacob Caro, manufacturer of frames, &c., New York, has made an assignment.

J. D. Stome, of J. D. Stome & Sons, paper manufacturers, Enfield, Conn., is dead.

William Bancroft, pulp manufacturer, Barre, Vt., has sold out to Gould & Somers.

Charles E. Wilson, publisher of the *Patriot*, Lebanon, Ind., has sold out to W. C. Gerard.

C. Jones, of the firm of C. Jones & Son, dealers in notions, &c., Philadelphia, Pa., is dead.

G. W. Blatterman, bookseller and stationer, Denver, Col., has made an assignment to B. L. James.

The *Chieftain* Publishing Company has been incorporated at Pueblo, Col., with a capital stock of \$100,000.

Rutledge & Co., paper manufacturers, Dayton, Ohio, have been attached for \$1,000, and have made an assignment.

The stock of fancy goods belonging to the estate of C. Stuebing & Co., Berlin, Ont., has been sold for 58 cents on the dollar.

Murphy & McCarthy, publishers, Boston, Mass., have secured an extension of three, six and nine months with interest at 6 per cent.

Senseman Brothers, printers and paper bag manufacturers, Philadelphia, Pa., are advertised to be sold out by the sheriff, on July 20.

The Esterbrook Pen Company has issued a pamphlet of poems, for one of which a prize was awarded to Emily Grossbrenner, of Philadelphia.

The firm of Kennedy & Hamilton, Putnam, Conn., proprietors of the *Sunbeam*, has been dissolved. N. W. Kennedy continues the business.

H. G. Greiner has succeeded to the business of Greiner & Moore, manufacturers of picture-frames, &c., Philadelphia, the old firm having been dissolved.

Charles T. Bainbridge's Sons, stationers, 114 William street, this city, are introducing a novelty in Christmas and New Year cards which will be described in a future issue of THE STATIONER.

Portieres of striped materials in graduating shades, have a bar of silver or gold thread dividing the stripes. They are cut exactly the right length and reach the floor, and fall in straight heavy folds, no attempt being made to drape them.

Beautiful chair scarfs are now wrought in arrasene, a very elegant and delicate style of work. A remarkably handsome specimen recently shown is composed of Nile green satin with the centre-piece of arrasene, the design being a cluster of orange blossoms and pale pink rose buds.

The Harding Paper Company and the Moline Paper Company have filed a bill in the United States Circuit Court for the district of Missouri, against H. H. Wilcox, the Williamson-Stewart Paper Company and the Mullanphy Savings Bank, all of St. Louis. The petition sets out that the Williamson-Stewart Paper Company was incorporated with a capital stock of \$60,000; that the company is indebted to the Harding Paper Company for \$15,114 and to the Moline Paper Company for \$5,862; that on June 17, 1883, the Williamson-Stewart Paper Company was indebted to various parties in the aggregate sum of \$200,000; that on June 20 the company made a deed of trust to H. M. Wilcox, transferring to him all of its assets to the value of \$100,000, to secure its indebtedness to the L. L. Brown Paper Company, Adams, Mass., to the Exchange Bank of Cincinnati, to the Mullanphy Savings Bank and others; that on June 20, at the same time and place, the Williamson Paper Company made a deed of assignment to Joseph Whyte of all of its property for the benefit of all of its creditors. The statement filed therewith refers to the same property set forth in the former deed as subject to the same; that no part of such property was delivered to Whyte, but all of it to Wilcox, who now has possession of it; that the deed to Wilcox was not in reality to secure any debts which the assignor expected or intended to pay, but was, in fact, a transfer of the property; that Wilcox had threatened and is about to sell this property. The plaintiffs ask a restraining order enjoining such sale during the pendency of this suit, except on the appropriate order of the Court, and that the Court declare the deed to Wilcox to be for the benefit of all of the creditors of the Williamson-Stewart Paper Company.

At Glens Falls, N. Y., July 16, the boiler in the Glen Falls paper mill exploded, completely wrecking the building and seriously injuring a number of persons. The boiler was thrown a distance of four hundred feet. The concussion was so great that buildings were shaken and windows broken within a radius of a mile. The ruins were on fire within fifteen minutes after the explosion, and the flames spread with great rapidity, destroying buildings wherein were stored soda ash and fuel. The loss is estimated at between \$75,000 and \$100,000; insured for \$40,000. A small brick building located forty feet from the boiler room was destroyed by the concussion.

Francis H. Loss, 46 Murray street, shows a neat line of fox and racoon tail dusters for office, library and household use. Each is composed of two tails of the same species of animal sewed together and attached to a handle in a neat form. They are particularly adapted for piano bric-a-brac and library dusting, and are offered at low figures.

The Fountain Ink Company reports business brisk for this season of the year. "Caw's Black Fluid" is its leading ink, and it is becoming deservedly popular. It is said that the business of this company has increased over five-fold within the past two years.

The Davidson Rubber Company, Boston, Mass., manufactures a full line of rubber stationery goods, including bands, rubbers, rings, penholders, &c. These goods are made from the best gum.

Brieger, Sander & Co., manufacturers of pocket-books, satchels, &c., Philadelphia, Pa., have dissolved partnership. Grab & Sander succeed.

The stationery establishment of H. C. Megerie, of Sacramento, Cal., has been burned out.

George H. Williams, Putnam, Conn., book-seller &c., is dead.

L. J. Hobart, stationer, Leadville, Col., has sold out to John Izoard.

W. M. Allison, printer, Wellington, Kan., has sold out to Hamilton & Morse.

George W. Quimby, publisher of the *Gospel Banner*, Augusta, Me., has sold out.

McKee Brothers, Chrisman, Ill., have bought the book and jewelry business of J. Lembrick & Co.

E. F. Parker, Peoria, Ill., will continue the printing business lately done in that city by Drysdale & Parker, who have dissolved partnership.

The business of Bonnell & Valentine, manufacturers of printers' ink, New York, will hereafter be done under the firm-name of J. H. Bonnell & Co., the old firm having dissolved.

The stationery and fancy-goods' business of Rosenbaum & Co., Philadelphia, has been sold to Edward L. Rosenbaum, who will continue the business under the name of the old firm.

A. H. Tennis, 26 Union square, New York, brought out a new stitching machine adapted to stitching blank-books of every kind. It makes a stitch of any desired length up to three-fourths of an inch.

Hanging cabinets are covered with stamped terra-cotta plush, and some have eight or more irregular shelves, each once decorated with a hanging railing in fine open brass work, and containing compartments large enough to hold a moderately sized piece of bric-a-brac.

Japanese wall-papers, made of rush beaten into paper, and having richly gilded embossed surface, have revived in popularity. The embossed and gilded face throws back the light, and many who like peculiarity as well as beauty in art may indulge their fancy in this paper.

Framing appropriately and prettily is really a difficult undertaking. A very neat device was noticed recently where a painting upon embroidery canvas was mounted on a background of plush, and attached to it by gold cords fastened at the corners in a tie. The plush projecting on all sides forms the frame.

G. Henry Whitcomb & Co., have bought out the Logan & Lowe Envelope Company, of Worcester, and the latter company has been dissolved. James Logan re-enters the employ of G. Henry Whitcomb & Co., and George H. Lowe goes back to Carter, Rice & Co., Boston, and each of them will have an interest in their respective concerns. The Logan & Lowe Envelope Company started business less than a year ago, and was induced to sell out by the liberal offer made to it and the opportunity to have an interest in the old house. Besides this, the prospect of the envelope market for the near future was not especially encouraging to a new concern.

John B. Davids & Co. are putting up their chemical fluid, combined writing and copying fluid and blue-black copying ink, in heavy dark amber glass bottles, which are of full measure and of sizes 8 ounces, pints and quarts, and resemble the flint glass carmine quart bottle used by this house, but without any objectionable projections, which makes them less liable to breakage. A distinguishing feature in these bottles is a bell-top or trumpet mouth, by which the ink can be poured out without running down the sides of the bottle. This firm has introduced a neat specialty in mucilage, in which there is a bargain. The trade of the house is increasing

very rapidly, and it is at present far behind with its orders.

An attachment has been laid upon the property of H. S. Turner, publisher of the *Reporter*, Plymouth, Cal.

Nathaniel Dunbar, paper box manufacturer, Canton, Ohio, is dead.

G. Rogers, publisher of the *Post*, Etna Mills, Cal., has removed to Yreka.

Terra-cotta plaques are mounted in black or deep-toned velvets or plush.

Reynolds Brothers, fancy goods dealers, Jackson, Mich., have sold out to Jesse B. Reynolds.

Nagle, of Philadelphia, has lately received from the West some large orders for blank books.

Newel & Graves, paper hangers, Boston, Mass., have dissolved partnership. Charles N. Graves continues.

S. L. Hammett, dealer in school supplies, &c., Boston, Mass., has sold out his wax paper business to A. J. Warren.

John F. Warren, printer, Tuscaloosa, Ala., has admitted H. H. Brown to partnership under the style of Warren & Brown.

M. A. Lewis & Co., wholesale fancy goods dealers, Boston, Mass., have dissolved partnership. Eaton Holden & Co. continue.

Alvah Bushnell, Philadelphia, reports a very good summer trade. His preparations for the fall are very extensive, and include a great many new articles of which he has the entire control.

Potsdamer & Co., Philadelphia, have just out a number of etching cards, which surpass the artistic work for which they have a reputation. Their Christmas cards will probably be the success of next season.

J. C. Blair, Huntingdon, Pa., makes an announcement that having gone over his accounts for the past year he finds that his business has for that period been the most satisfactory that he has ever had. He extends thanks to his friends for their favors.

An active man, with capital, knowing the stationery and fancy retail trade, can find a very good opportunity by buying out one of the best concerns in that trade, located in Philadelphia, and having a good paying business. Information can be had at the Philadelphia office of THE AMERICAN STATIONER.

The travelers for Charles Beck, Philadelphia, are all on the road, and have sent in many good orders. This firm has a reputation for its imported Christmas, New Year and birthday fringed cards. Mr. Beck has, this year, the best assortment of these goods that he has ever had. His importation of gold and silver paper is unusually large this season.

The Higgins & Tooker Company has just introduced a new vest-pocket pencil loop memorandum book, its distinguishing feature being that the loop is in the back, which prevents the opening of the book when the pencil is needed, as is the case with other designs. It comes in three different styles of binding, morocco, imitation alligator and American russia, and is in four sizes, each of which has two thicknesses, respectively, containing thirty-six and forty leaves. It comes in three rulings, viz., dollars and cents, faint, and quadrille. A fine quality of pencil goes with each book. The firm reports that this article is meeting with a great demand, and that it is unable to keep up with its orders. It will probably ere long become one of the most popular articles of its class.

Wilson Brothers & Co., 119 Chambers street, New York, have introduced three sizes of solid rubber type printing outfits, viz.: the "Little Gem," "The Business," and "The Commercial." These goods are said to be perfect, practical and useful articles for business and household hand-printing. Each of the outfits comprises a certain number of letters and figures of solid rubber, and all articles necessary for practical use. All of them are very amusing and instructive to children as they may be utilized in teaching the arrangements of words, sentences, spelling, &c. The "Little Gem" family printing outfit is put up in a lithographed tin box. This outfit is especially designed for household use and the amusement and instruction of children. As a linen marker, it combines in one as many names as there are members in the family. Any name can be easily adjusted in a few moments, which will always give a beautiful impression on all fabrics. The ink is indelible. As a book marker it can be used for marking school books, private and public libraries, letters and papers. As a card printer, with it a boy or girl can print 500 cards an hour, and it will be found not only a source of much amusement but also of pecuniary advantage to the young. "The Business" printing outfits are similar to the "Little Gem," but are designed more for business and office use, the number of letters and figures, &c., in each font being increased to 200 pieces, or eight alphabets (3 A 5 a), including two sets of figures, points, &c., of solid rubber type, and everything necessary for printing any name and address, or other two lines of matter. It is put up in a strong and handsome walnut box, with a two-line pallet and every improvement to make it most effective for the purpose intended. "The Commercial" is used in printing envelopes, tags, cards, &c. This house also manufactures toy and riding whips extensively, from the cheapest braided grades to the fine nickel-plated, polished articles. These goods come with whistles, rings, ball butts, &c., and some have neatly chased butts. A large lot of these goods have recently been shipped to England and Germany, and the firm at present is unable to keep up with the demand. The firm also shows a large variety of games for home amusements, among them being the "Magic Hoop and Pitch-a-ring," "Authors Improved," "Trip to Coney Island," "The Phrenological Character Game," and "Chime Hoops."

A visit to the factory of Jas. D. Whitmore & Co. will demonstrate what may be expected this fall in the way of trade. All of their departments are running to their utmost capacity, and in some cases they find it necessary to run overtime in order to keep up with the demands of their customers. Their lines of New Year cards and orders of dance are said to be the finest shown this season, and the orders their travelers have sent in seem to bear testimony to the correctness of the assertion. They have also brought out some new and unique designs in wedding envelopes, bronzed, stamped and embossed papeteries and card cabinets, and are constantly adding to their line, both in tints of paper and striking designs anything that is demanded by the popular taste or fine retail trade. Among the latest ideas in wedding goods brought out by this house are the "Lace" and "Dainty" wedding envelopes. These novelties are entirely new and original with this house, and have met with a very large sale.

Bayer & Kaufman, publishers of the *Journal*, Hoboken, N. J., have dissolved partnership.

Tuttle & Co., Rutland, Vt., have a new edition of their "Santa Claus Souvenir."

Van Cullen, Jones & Co., publishers of the *News*, Conway, N. H., have dissolved partnership.

Samuel C. Collins, of the firm of Collins & McLeester, type-founders, of Philadelphia, is dead.

Bloss & Cogswell, publishers, &c., Titusville, Pa., have dissolved partnership. Henry C. Bloss continues.

Louis Freutier, fancy goods dealer, Montreal, Quebec, is offering to compromise at twenty cents on the dollar.

De La Rue & Co., London, forward their monthly circular for July. They present some new ideas in miscellaneous goods.

Dreka, Philadelphia, has one of the most taking papeteries of the season in his "base-ball" line. He has also a fine selection of fine goods of recent importation.

John Millay, the well-known salesman for Alexander Agar, has just returned from a well-merited vacation which he has spent with his friends in Pennsylvania.

Albert E. Tolle, for a number of years with John R. Edwards as traveling salesman, has left to accept a like position with Charles H. Sherman & Co., Philadelphia.

The bird's-nest panel is a novelty in floral decoration. The panel itself is composed of Faust pansies, and upon it a branch, between the twigs of which is a bird's-nest containing eggs. About the branch is a garland of flowers and foliage.

John F. Hope, Philadelphia, hitherto doing business under the style of the Hope Manufacturing Company, manufacturer of picture frames, &c., has sold out to a new incorporated company which will do business under the old style.

Morton, Phillips & Bulwer, Montreal, have just published a new edition of the customs and excise tariff, with list of the warehousing ports of the Dominion of Canada, compiled from official sources, with corrections to June 26, 1883. The publication contains other information, and will be useful to all who do business in Canada.

Henry Levy & Son, 477 Broadway, have made extensive alterations in their store, to accommodate the three departments of the house. These departments are those devoted respectively to the plush and leather goods, the silk and gilt novelties and the imported fancy goods. The room set apart for the plush and leather goods is handsomely decorated and is 60x20 feet in size, lighted by twelve reflecting jet burners. Here are shown brush and toilet sets in every conceivable shape. Toilet stands of great beauty are also shown. Some of them being very fancy and unique patterns. In work-boxes there is a great variety in embossed, plush and corrugated satin, richly decorated with hand-paintings and silk embossings. In jewel cases the variety is also large. Manicure sets consist of forty designs and contain from four to twenty fittings. In this department are also exhibited fine cigar cases lined with a patent box to keep the contents moist. The room for silk and gilt novelties is about 40x20 feet, brilliantly lighted with two reflectors. Among the goods displayed is a line of satin and plush whisk cases, also a new line of sachets suitable for birthday and Christmas gifts, pin-cushions, toilet bottles, grate and lamp screens, glove and handkerchief sets. The odor cases, inkstands in new and original designs, exquisitely gotten up. Jobbers will find this a very desirable line to have in their stock. The store proper is devoted to the display of the firm's imported fancy stock which includes all of

the recent novelties for the fall and holiday trade.

The Globe paper mills, at Middleton, Ohio, were damaged \$12,000 by fire on July 13.

Fern damask is a new woolen hanging, showing a running vine over a solid color background.

The estate of S. McIlvanie, paper manufacturer, Portage La Prairie, Man., is advertised to be sold at auction.

Colored glass lamp-shades, semi-opaque, in yellow, blue or pink, are painted with floral designs, roses, lilies, violets and others.

Copper color has been considered fashionable for some time, and now copper itself is assuming a place in the economy of domestic decoration. Copper lamps, particularly, are seen, and with a judicious contrast of silver ornament, the metal shows up nicely.

E. B. Green, the genial and well-known chief of A. S. Barnes & Co.'s stationery department, will leave the city this week to rusticate for a short time in the Adirondacks.

Sheila cloth is an admirable material for the portieres of an ordinary room. It is heavy in texture, and being alike on both sides, renders the ordinary lining needless. Of the several colors in which it is shown, the most effective is Indian red and black.

The copying presses manufactured by T. Shriver & Co., New York, are of exceptionally good design and finish. Their large presses for railroad, transportation and express companies' use are gotten up with careful regard to the heavy work in copying which they are expected to do. Their illustrated catalogue will be sent on application.

The Thomas W. Price Company, Philadelphia, has issued its summer price list of supplies for job printers and stationers. Among the numerous articles of its list, at remarkably low prices, are album cards; cards in sheets and cards cut to size; visiting, wedding and invitation cards; gold and bevel edge cards, fancy envelopes, mourning stationery and wedding stationery.

The new line of family Bibles, imperial quarto printed from large, clear type, lately issued by the National Publishing Company, Philadelphia, is a magnificent volume. It is bound in plain but exceedingly rich and beautiful designs, and is equal to the best London and Oxford Bibles at a much less price. Copious notes and marginal readings are given with each chapter.

The attention of the trade is called to the page advertisement of the Philadelphia Novelty Manufacturing Company. All of the articles represented on that page are specially made for stationers and find an easy and prompt sale. The system of this company is to manufacture for low prices good, substantial novelties which are of universal want. The demand for the novelty paper fastener is increasing.

The attention of the trade is invited to an advertisement of the Acme Stationery and Paper Company in another part of this issue. Several new lines of goods are described, which the firm has recently put upon the market, and which have met with much favor. The goods are now being ordered chiefly in case lots, and no dealer will find his line complete without at least an assortment of them. The demand which this firm's lines generally meet with show that they meet the requirements of the consumer, both as to quality and price. Parties not having received a catalogue of the new goods, can have it at once upon application. N. S. Otis, representing this firm, has started out to visit the Western trade, and all interested ought to see his samples.

T. Sinclair & Son, Philadelphia, who rank among the largest manufacturers of chromo cards, are making very extensive preparations for the coming season. They will have a great many new, fancy articles, which will surpass anything that they have made, so far, in this line. Their new "Boys' Cockade Hat," which has already had a very large sale, is in great demand. "The Old Woman that Lived in a Shoe" also meets with success. "Beware of the Dog," a fancy chromo with compartments, and also "The Rabbit and the Cat," find an easy sale everywhere. Mention may also be made of a pretty panel representing a slate on which has been painted a bunch of flowers. The classical story of "Jupiter and Danae" or "How to Win a Woman," is extremely funny, as is also their series of twenty grotesque cards for advertisements. Their "History of the Dude," in red and blue on silver ground, is treated with great spirit and taste. There is also to be mentioned a series of four cards representing heads of children, dogs, cat and monkeys, with space for mottoes or advertisements, and a series of advertising cards with marine scenes, and of cupids of very good design. The "History of Sam'l of Posen," a panel folding card in gay colors, is the best work of the kind which they have published yet. Another novelty is an odd folding card representing a lady's red portfolio, with a bank-note and different other articles inside.

The Brown & Carver improved paper-cutting machines, manufactured by C. R. Carver, are said to be remarkable for their durability, excellence of construction, accuracy of work and rapidity of movement. These machines are also recommended by all stationers and paper dealers who have used them, and are said to deserve the reputation they have got.

G. W. Arms & Co., Philadelphia, are greatly increasing their wholesale trade in stationery articles. They are preparing on a very large scale for the fall trade, and have received so far a great many orders to be delivered in September and October. They make a specialty in manufacturing blank books.

L. Dreka, Philadelphia, is now in Europe buying fancy goods for the next season. He will have one of the finest lines of tasty articles ever imported. His Dreka engrossing pens are always in good demand.

John Moore, bookseller and stationer, Ann Arbor, Mich., has sold out his business to George Osius & Co., who will conduct it as heretofore in connection with their wholesale and importing business.

A candelabrum, with crystal pendants, has a stem of Mexican onyx and branches of the same material. Bands of cloisonné give it an exquisite finish, and the shades are of delicately tinted glass.

A new wall-paper has a field of palest electric blue, bearing a varied-colored convolvull. The dado is leather-colored, with black and gold figures. The frieze scrolled in black and gold.

A brush broom case is made by covering a pasteboard, cut in the form of the broom, with silesia, and covering it again with a crocheted cover, with a ribbon handle to hang it by.

The perforated tablets, manilla order books, and students' note-books manufactured by John R. Edwards, Baltimore, are in good demand for the fall trade.

The Guarantee Chemical Company, Philadelphia, is kept very busy with large orders from wholesale stationers from all parts of this country.

Lipman's Indispensable eyelet machine is reported as having a very good sale. It is certainly one of the best machines of its kind.

Moldings in close imitation of the several shades of bronze are used with excellent effect for bordering wall-paper in dark rich tints.

The copying paper and books manufactured by William Mann, Philadelphia, are staple articles in the trade. Their sale is now very large.

Alligator skin having become popular in upholstery has extended to the metals and is now imitated in silver, which receives the name of *L'argent pressée*.

F. S. Van Vleck, late with Daniel Slote & Co., has made an engagement with John R. Edwards, Baltimore, and will be on the road in a few days with a full line of samples.

Summer fire-places are no longer to be occupied by grasses and that sort of open-lot product, but by a neat Japanese screen just the right size to set into the opening.

Latice work is increasing in popularity, and it is introduced wherever it can consistently be done. This latice is not only in wood, but in metal, and not alone in furniture, but in architecture.

Table screens for protecting the eyes from the light of a lamp or drop light, while writing or working, have been introduced from Europe, and are made in many neat and appropriate designs.

Lambrequins for corner brackets are of dark blue satin, and have a band of plush or velvet across the bottom. The satin might be fringed, and could have upon it a neat design painted in suitable colors.

A flock paper has a dado in two shades of brown. The heading above the dado is in dull gold and black; the cornice is narrow and decorated with arabesques, and has beaded edges of black and dull gold.

An oval mirror to hang in a lady's dressing-room has the frame covered with fine embroidery on cream-colored satin sheeting. The appearance is very rich and quite deceptive as to the material used in the work.

The attention of stationers is called to the advertisement of Rosenbaum & Co., who are sole agents for Savage's wire easels. These easels are said to be the finest and cheapest that can be had, and have an enormous sale.

Colored glass panels, representing incidents from favorite poems, history or fables, are hung in the windows, somewhat on the principle of the almost obsolete transparencies of porcelain or glass, but larger and much richer in effect.

Ivory has a natural brown bark that must be turned off by the chisel of the workman before the white, the truly valuable part of the tusk, is shown. It is now regarded "quite proper" to polish this bark and show a brown in place of a white surface.

Fire screens display a variety of attractive phases, the latest being worked with a landscape with long stitch in filloes upon a square of shaded crimson silk, the shades graduating in such a way as to represent light and shade through the foliage. It may be lined with embossed leather and mounted in ebony.

Bronze picture frames, in gold, silver or copper, continue to gain in favor. They are a handsome and massive mounting for large and moderate sized pictures, and harmonize well with either steel engravings or the productions of brush or pencil.

724, 726 & 728 Cherry Street, Philadelphia.

Illustrated Catalogue, containing full description, prices, &c., mailed on application.

ANCIENT CLOCKS.

Octavius Morgan, writing in *Notes and Queries*, says: "There is a remarkable clock at Leeds Castle, in Kent, the seat of Mr. C. Wykeham Martin. It is within the castle, but has no dial. It strikes on a bell bearing the date 1435, which seems to be the probable date of the clock, and on that bell the curfew is rung every night at 8 o'clock—a custom which has been kept up every since the castle was built, about 1280. The striking part of the clock is in its original condition, but the going part has been altered to adapt it to a pendulum.

There can hardly be a doubt that many, if not most, of the ancient abbeys, cathedrals, and castles had similar clocks, but that, like the celebrated clock of Richard Wallingford, at St. Albans, they have been destroyed; and I think it very probable that much information might be gained on the subject if the fabric rolls of the cathedrals were examined with that object.

These were all fixed clocks of large size; but we now come to the domestic, or indoor house clocks, which were of smaller size, and not permanent fixtures, but movable, being hung up against a wall or set upon a bracket, with the weights and chains hanging down, generally exposed. These clocks, though not absolute fixtures, could not conveniently be moved or carried about. They must have come into use in the fifteenth century; but, with the exception of that already mentioned, I have never seen a clock of that description so early as 1500, and it is a curious thing what has become of them. Some were richly and highly ornamented, for I am now sitting before a very fine large and early picture of St. Jerome in his study, a work of about 1500, beautifully and minutely executed; and here is represented, hanging against the wall above his head, an extremely elegant clock, with weight and counterpoise hanging from it. The case of the clock is apparently of gilt metal of most elegant form, elaborately ornamented with a beautiful rich and delicate cinque cento design. The hour circle is apparently of white metal, and the centre of the dial is red. This seems to show what the style of room clocks was at that time; but none of them seems to have come down to us, certainly none has come over here, and I do not remember to have seen any in continental museums; but it is now many years since I have traveled, and the museums may all have been rearranged and new antique objects brought out and displayed. I am, however, fortunately in possession of one small hanging clock, but that is of the sixteenth century. That and the beautiful clock at Windsor Castle, made for Anne Boleyn, are the only two weight-clocks that I can call to mind.

The domestic clocks divide themselves into two classes, those which go by weights and those of which the motive power is a coiled spring, which was not applied till about 1500, and these spring clocks form the class of chamber and table clocks. The weight clocks, which the dealers are apt to call fifteenth century clocks, are, in fact, the work of the sixteenth and seventeenth centuries—at least, I have never heard of one earlier."

Mr. Morgan infers from the marked similarity of the brass house clocks of the sixteenth century that there were brass works at Clerkenwell and Coventry, which supplied brass frames and dials to the clockmakers in London and the provincial towns.

As the flint and steel stricken together produce fire, so the conflict of men's minds elicit truth.

D. W. GLASS & CO., Baltimore, U. S. A.

SWISS CARVINGS.

The first attempt to introduce wood-carving into Berne was made half a century ago by Christian Fischer, of Brienz, who may be called the father of the art; for after acquiring it himself he taught it to others and founded a school. Besides being an artist in wood, Fischer taught music, made musical boxes, and practised the healing art, but, like many other clever fellows, he died in poverty. Some time after Fischer began wood-carving at Brienz, a certain Peter Baumann began at Grindelwold, the making of the miniature Swiss chalets which are now so popular. He afterward removed to Meyringen, where he taught his art to his three sons, one of whom, Andreas, proved to be a genius of the first order, and was equally distinguished for originality of design and skill in execution. He was the first to practise carving in relief. His roses are still regarded as masterpieces and serve as models for young sculptors. The success of the Baumanns encouraged others to follow their example, and wood-carving soon became a winter occupation in nearly every cottage of the valley of the Hasli. But the sale of carvings and

chalets being restricted to foreign tourists in the summer season, principally through the intermediary of hotel porters, the trade for a long while was limited and unremunerative. But it struggled on, and in the course of time attracted the attention of local capitalists, who started workshops, opened depots for the sale of their products, and began an export trade which, with some fluctuations, goes on steadily increasing. The business of wood-carving now finds employment for several thousand individuals. In one establishment alone—that of the Worths—three or four hundred sculptors of both sexes are regularly occupied. Each has his or her specialty, the choice of which is left to individual taste. Some have an aptitude for, and excel in, the modeling of groups of animals; others, again, prefer to carve ornamental caskets and build miniature chalets. The women have great delicacy of touch, and their work in certain branches is preferred to that of men. One thing leads to another, and the abundance of certain sorts of wood in the district suggested the idea of adding to wood-carving the production of what may be called fancy furniture—carved chairs and tables, napkin-rings and such articles.

The accompanying cut illustrates a new style of jewel-case. It is a good representation of a Swiss cottage, and is composed of different colored woods. The parts are elegantly brought out, the thatches, with the stones and ropes to hold it on, and the deep roof, being prominent features. The lower story shows a stable, while the upper stories are made to indicate the family dwelling. The surroundings, including the fence, courtyard, pump and spring, are also given. The roof is so constructed that it can be raised like a lid, and the part which represents the upper stories is lined with plush, and is intended as the receptacle for the jewels or nicknacks. A movable partition divides this also from the first story, which contains a music-box,

which is set going by lifting the top cover. Francis H. Loss, Jr., 46 Murray street, New York, deals largely in Swiss carved goods, and has arrangements with leading manufacturers for importing their products and handling them in this country. The line includes salad spoons and forks, plain and scissor shape, 15 designs, in assorted woods; match-safes, to stand and hang, 40 designs, in assorted woods; crumb brush and trays to match, nutcracks, photograph easels; inkstands, for library use, 20 designs in assorted woods; penholders, paper-knives, fancy ash and cigar stands, wall-brackets; card and fruit holders, bud and flowers vases, book-racks, for table use; fancy carved candlesticks for holding the decorated candles; fancy work-boxes, lined with silk and satin; thermometers, for library use, very choice carving; the "Swiss chalet," with and without musical attachment, novel and very fine, 15 designs, and satinwood bread-plates and knives to match, 12 designs, with plain and illuminated motto.

TO DRY PLANTS.

Obtain a half-dozen pieces of stout mill-board, cut it about 9x12 inches, or larger. Then gather about one hundred old newspapers, and fold them neatly to about the dimensions of the mill-boards. Four or five yards of common white cotton wadding, a score of sheets of tissue paper, and as many of blotting paper, all cut to the same size, complete the apparatus. One of the

boards serves as a foundation; on this place a newspaper, then a piece of wadding, and upon this place the specimen intended to be dried. The cotton being soft and retentive, every portion can be laid in a proper and natural way, including the petals of flowers. A newspaper above—two or three of the specimens having thick stems—and so on, until all the specimens have been similarly deposited. If the specimens are sticky, or hairy, or of a kind that the wadding seems likely to adhere to, then, before depositing them on it, introduce a half sheet of tissue paper. A heavy weight must be placed on top of all, sufficient to embed the specimens in the wadding; then leave the whole to rest for twenty-four hours. All the papers must then be changed, dry ones being put on in their places; and if the plant seems to throw off a considerable amount of moisture, such as will render the wadding quite damp, change the wadding also. A second or even a third change is desirable at the end of two or three days, or a week, and when this is made, introduce the blotting-paper, pressing again till everything is perfectly flat, and the specimens are absolutely dry. The writer says that when thus dried, every petal and leaflet retains the form it had in life, and nine specimens out of ten preserve their color exactly. To insure the keeping of color, it is well, if time can be spared, to change the blotting-paper many times, and to dry it thoroughly before a fire; this, however, need not be done until after the third day.—*The Field Naturalist.*

SOME NEW FANCIES.

A new line of goods has been introduced by E. & H. T. Anthony & Co. They include fancy toilet sets, odor and dressing cases and work-boxes, and come in plush, mostly lined with puffed and corrugated satin. One of the articles is a combination case. It is numbered 25, and includes toilet, odor and manicure fittings. This article is richly designed, and the contents are of the best and most approved description. The satin lining is so designed that the spaces between the folds hold the fittings in their proper places. Rich gold moldings adorn the case on the outside, while a bronze and gold card borders the linings on the inside. The case opens by means of two half doors in front and one on top.

Other styles of combination cases come in plain plush and in the shape of urns, staircases, pianos, wardrobes, valises, tambourines, baskets, smoothing irons, fans, billiard tables, and one is said to resemble Noah's Ark.

Besides combination pieces these styles are used in toilet sets, work-boxes, &c. The variety of these goods is very large.

In frames the firm shows an almost endless variety, most of the designs being new, and many of them rich and very attractive. They come in plush, gold and velvet, and in a combination of plush and velvet. The velvet goods are either plain or trimmed with gold molding and fancy braids. In gold frames the line includes many fine designs, in several of which hammered gold, with flowers, fancy borders and birds in high relief are used in decoration. Others show a combination of gold bronze and plush.

The firm has also added a large number of new subjects to its very large line of Indo-tints, and is publishing a line of these goods painted by hand. The cuts on another page illustrate some of the latest designs in fancy goods and frames brought out by the house.

It is also preparing for the fall trade a line of graphoscopes.

BRONZE LEATHER.

The application of leather in the adornment of furniture, and decorations generally, is becoming a feature. Plain, embossed or stamped leather may be utilized with excellent results in connection with almost any wood, and produces an effect not otherwise attainable. Leather, imitating gold, silver or bronze, copper, lead and iron, are all successfully produced, and are of unlimited utility. Pedestals for statues or lamps, bric-a-brac tables, desks and wall cabinets, with metalized designs in imitation of Japanese lacquer work are exciting attention.

Japanese fan photograph holders are quite tasteful. One side of the fan should be pasted over with some rich shade of satin, such as Napoleon blue, cardinal or old gold. The photograph should be placed in a slightly oblique direction, so that when the fan is placed upon the wall somewhat slantingly the picture will be upright. Cut out an oval space in which to insert the photograph (or square, if it is preferred), turn in the edges neatly, and trim them with a small gold cord; put in the photograph, and sew it in with blind stitches; on the sides of the fan paint sprays of flowers, birds, butterflies, &c.; line the back with silk-finished silesia to match the satin, and finish the edges on top with gold cord; attach a bow of satin ribbon with long ends at the bottom of the fan where the sticks join, and also add a bow at the top, with a brass ring sewed under it to suspend it by.

THE PARSONS PAPER COMPANY,

— HOLYOKE, MASS., —

In addition to their already extensive establishments at Holyoke (which rank among the largest mills in this country), have recently built a separate mill, specially constructed and equipped for the production of the Best Grades of Linen Papers, and are now manufacturing all the various sizes and weights of BOND, PARCHMENT, BANK-NOTE, AND LEDGER PAPERS. They have already demonstrated their ability to produce of these papers a quality EQUAL TO THE BEST ESTABLISHED BRANDS IN THE MARKET.

Having great strength of fibre (an essential requisite in all Legal, Government and Commercial Papers), they are recommended for use in Bonds, Deeds, Certificates, County and State Records, etc. They are thoroughly sized to stand writing upon with fluid inks, and will permit of repeated erasures and re-writing thereon, when required. Great care is exercised to produce uniformity of color, strength and finish, and to do this, they have the latest improved machinery, specially adapted to the manufacture of Linen Papers.

They would call the attention of the Trade to the following brands, which are their trade-marks, viz.: In all Bond, Bank Folio, and Parchment appears the water-mark

"PARSONS PAPER COMPANY, HOLYOKE, MASS."

The Ledger Papers, of which they manufacture two Brands, are water-marked

"PARSONS LINEN LEDGER."

"SCOTCH LINEN LEDGER."

It is the intention of the Company to maintain the quality of these brands equal to any in the market.

L

S

KENT,
ENGLAND.

These papers, made from the purest fibre, without any foreign admixture, each sheet separately formed by hand in a mold, couched by vertical pressure and slowly dried by air, possess a toughness, hardness and strength unapproachable by any machine-made papers. For Legal use, for Scrip or Bonds, and for all purposes demanding great durability, these hand-made papers are invaluable.

The heavier sorts are double sized, and they will bear repeated erasure and constant handling beyond all other makes, so that for Ledger and Account-Book purposes none can compare with them.

Proprietor: JOSEPH ARNOLD, Eynsford Mills, KENT, ENGLAND.

LE PAGE'S MUCILAGE AND FAMILY GLUE.

One would think that there would be an end to the introduction of new kinds of mucilage, but it is evident that there is always something to be developed in every line of manufacture.

Fish glue, or isinglass, though much stronger and more flexible than glue made from the skins of animals, has, owing to the high cost of raw materials and the great amount of labor involved in its manufacture, been precluded from general adoption for mechanical purposes. At the present time, however, the boneless codfish industry produces in the city of Gloucester alone several thousand tons of skins and bones,

which by Le Page's valuable and economical process are utilized in the production of adhesives of very superior quality at moderate cost. This process has the further advantage of keeping the glue in a liquid state; hence, it is always ready for use, and, when applied, dries for the first time, when it is much stronger than if dried and redissolved. For gumming paper and envelope it is said to be unequaled, as it is so extremely adhesive that only a very thin coating need be applied to the paper. It is said to be more economical than

any other substance used for this purpose; it does not curl the paper; it can be printed over without injury to type; it is pleasant to taste and smell, and being preserved without the use of poisonous acids will not discolor the paper or make the tongue sore. It may be used on the most delicate tints and papers or other substances without injury to the color, which, with the fact that paper is not curled by it, renders it peculiarly adapted for scrap-books and similar uses. For office and family use the glue is put up in convenient form, as shown by the cut in an advertisement on another page. Mucilage is put up in the ordinary form, at about the cost of common mucilage, but is said to go twice as far in use.

The cut given herewith illustrates the factory of the Russian Cement Company, Gloucester, Mass., which is the manufacturer of the mucilage and glue above referred to.

Concerning the merits of its product, the managers of the United States Envelope Works at Hartford, say:

"We have used your liquid cement for the past five years in making the registered package envelopes for the Post-Office Department of the United States. For making a strong, secure envelope we find this cement superior to any adhesive substance we have been able to obtain."

Thermometers are ungainly though interesting articles. Cheap ones are hardly decorative enough for ornaments, but if the scale and tube are removed from the usually ugly case, and placed on a bevel-edged board, covered with plush or satin, the effect is very different. The satin or plush may be ornamented by a piece of embroidered ribbon, placed obliquely, embroidering with a space for the scale, or a painted or appliquéd flower may be added to suit the taste.

HARMONIOUS COLORS.

A whole wall, ceiling or other space should not be entirely covered over with rich ornament; and so also in a colored piece of drapery or other ornamental work, it is better to have some portion of it much less rich and of less complicated pattern than the rest; and, in some cases, to have only a border round a single ground destitute of any pattern, as it is apt to fatigue the eye when overloaded with equal richness of detail throughout. This is still more important in a colored building, where, if the whole walls, columns and other parts are covered with elaborate and colored patterns, the eye feels a want of repose; and the same when

its appearing black. This may be seen in some Persian carpets where two blues are used. And if some of these have too much green for daylight, they have a good effect at night, except when in excess. Dark green, like dark blue, looks darker by artificial light.

Colors that harmonize well may appear less pleasing, in consequence of each not being properly placed next to a neighboring one that accords well with it.

The arrangement must, therefore, be consulted; and it is not enough that they should be such as accord, they must be so placed as to have their full effect upon each other. Thus, when a blue is placed only at the edges of a pattern, the centre of which consists of red,

yellow and other colors, it looks isolated; it should be connected by being carried through the inner part, in order to give the full combination of all the colors, and the blue would thus be united with the other colors in the centre of the pattern. When white or yellow is introduced, a pattern is generally improved by the introduction of black or by a black ground; and an outline of black, separating each color in a complicated pattern, has a good effect.

The combination of warm and cold colors in proper proportion, is a

very great means of obtaining harmony; and thus we find that when red or orange predominates, a good effect is produced by a corresponding quantity of blue.—*Professor Gardner Wilkinson.*

WOOD DECORATION.

A firm in Boston is making a wood decoration that has many of the advantages of carving, and can be sold at about one-tenth the figure that is demanded for the ordinary carved work. The process is a mechanical stamping of various forms upon the work, so that, after stamping, the design has very much the appearance of being hand-carved. The extent to which these carvings can be used is almost unlimited. Not only can furniture be beautified and embellished at a slight cost, but also a great variety of panelings and the like, which the expense of decorating in any way has heretofore kept plain. Tables and easels and frames and plaques are treated to the process, and it is often silvered or gilded or bronzed. In car interiors, where the long-distance traveler is ever inspecting the architecture and finish, it will be a relief to the eye and an addition to the decoration in paint and brush. In house interiors, on organs, and in fact in every conceivable phase of decoration, this stamped wood may be utilized, and that it is calculated to become popular is self-evident, when the great amount of effect obtained is considered for the small amount of money necessary to expend.

PAPER-HANGERS' PASTE.—Four pounds of fine wheaten flour are mixed with a small quantity of cold water, thoroughly stirred; two ounces of powdered alum are then added, and, when dissolved, a gallon of boiling water. When cool it may be thinned as desired with cold water and used.

a building is covered entirely with sculptured ornament without color. The richly carved part not only requires an unsculptured portion, in order that it shall not fatigue the eye, but is improved and set off by the contrast; and contrast is as necessary for effect in form, quantity of detail, position of lines, as it is in color. On this principle great effect is sometimes given to a colored pattern by having a portion of the composition, on the wall of the building, without any color at all; and for the same reason, an expanse of wall in a room often looks well when painted with a single uniform ground surrounded by a rich pattern.

Hogarth truly says: "When the eye is glutted with a succession of variety, it finds relief in a certain degree of sameness; and even plain space becomes agreeable, and, properly introduced and contrasted with variety, adds to it more variety."

Again, certain colors are better suited for some places than for others, and the brighter and more transparent for higher positions, and if the hangings of a room are scarlet, crimson with gold has a richer and better effect for chairs than scarlet and gold. A carpet may be darker than the general tone of the draperies, and some of its colors may be carried up by the walls or the curtains; but if the carpet is dark the carpet shows better by being of a lighter hue. Red, or a light color, is better than blue for table-covers; and though green is not recommended for daylight, it lights up well at night, when blue does not, and this, then, often appears black, or when of a light tone is scarcely to be distinguished from green. Much, however, may be done to give blue its proper effect even by artificial light, either by placing a light tone of blue close to the darker one or by interspersing it with white, which will often lead the eye to see the darker blue and prevent

DAVIDSON**PATENT****HARD RUBBER PENCILS**

WITH VELVET ERASIVE RUBBER HEADS.

THESE Pencils are fitted with Erasive Heads made of our PATENT VELVET RUBBER, and will be found to be very convenient and useful. This Erasive Rubber Head is secured by a patent device, consisting of a split Screw ring which can be easily unscrewed, then slipped down to any desirable position on the eraser and returned to its original place on the pencil; this prevents the Erasive Tip adhering firmly to its holder, so as to become immovable, which is the case with the common pencil head, and it also allows the use of the entire piece of erasive rubber, which will last a long time.

OUR PATENT PENCIL No. 25

will be found to be THE MOST CONVENIENT POCKET PENCIL ever produced, the exact size of which, both open and closed, we give below.

By its peculiar construction it can be closed when not in use, thereby protecting with a shield both the erasive and lead points; the Erasive Head can be easily unscrewed as explained above, the pencil when open can be locked so as to prevent the Eraser being forced down into the shield, and its shape makes it a very comfortable pencil to hold in the fingers.

Our Propellers, Nos. 11, 12 and 13, with the Patent Velvet Rubber Erasive Heads, will commend themselves to the Trade by their simplicity and extremely low price.

Propellers Nos. 11, 12, and 13.

We also call attention to our Elastic Bands and Rings, Copying Sheets, Velvet Rubber, Hard Rubber Penholders and Pencils in great variety.
 Lists sent on application to

ROBERT CLARKE & CO., 65 WEST FOURTH STREET, CINCINNATI, OHIO.

THE NEW DOOLEY PAPER CUTTER.

The Atlantic Works, East Boston, Mass., builders of the Dooley paper cutters, have just brought out a new style 48-inch cutter, an illustration of which is shown. It is of handsome design, exceedingly strong, and as simple in construction as any machine in the market. It will cut 48 inches in width and 6 inches in thickness, of any material used by binders, printers, &c., which is something which it is asserted no other cutter will do. It is quick-running, and has an absolutely "stiff" back gauge—a thing all users of cutters will appreciate.

The first one finished is running in the extensive pamphlet bindery of S. K. Abbott & Co., Boston, where it is in use ten hours per day throughout the week, and is giving satisfaction; it is quick-running and almost noiseless, and is very easily handled and taken care of. It doubtless will fully uphold the reputation of the Atlantic Works for first-class work.

The company also makes in other styles 32-inch steam or hand-power, 36-inch steam or hand-power and 40-inch steam power.

The sales of the Dooley cutter during the year ended June 30 have exceeded those of any year since the Atlantic Works commenced their manufacture in 1875.

INCOMBUSTIBLE INK OR COLOR.

An incombustible ink or color for use with a fireproof or incombustible paper is made from artificial ultramarine and natural or calcined clays, these being the essential constituents of the coloring matters. These matters are generally employed alone or mixed together, according to the shade desired for the incombustible ink. By proceeding in the following way excellent results are said to be obtainable, and all colors or inks for printing or writing remain in combustible or indelible by the action of acids, air and fire, whatever may be the temperature to which the writing or printing may be exposed, and always retain their pristine transparency and brilliancy.

The essential part of the process for liquefying the indestructible and indelible inks consists in employing, according to the different combinations and requirements, plain or distilled water, sugar, silicates of soda or potash, or others, glycerine, borax, or boric acid, added to oils or to compositions already in general use for the manufacture of printing inks.

To make indestructible inks of all colors the mixtures are effected with the coloring matters already specified in the following manner. For example, in order to make a black ink, use the dark-brown clay generally known as "cassel-earth" or "sienna," with artificial ultramarine, in the following proportions:

Black ink: Sienna or cassel-earth (dark brown), eighty parts; artificial ultramarine, twenty parts; total, one hundred parts. Violet ink: Red ocher, fifty parts; ultramarine, fifty parts; total, one hundred parts. Orange color: Red ocher, fifty parts; yellow ocher, fifty parts; total, one hundred parts. The latter color, when exposed to fire at a high temperature, becomes dark red.

The natural colors employed for the following shades are: Chestnut brown, the clay called

"sienna" or "cassel-earth;" red, the clay called "red-ocher earth;" yellow, the clay called "yellow earth;" blue, artificial or natural ultramarine.

The proportions given may be varied indefinitely, according to the shades to be obtained, and, in order to obtain greater brilliancy, the tone of the shades may be modified as described or other colors may be added. For example, in the first mixture above specified, substitute for the artificial ultramarine, burnt black or other black. The following is the formula for writing-ink: Oxide, dissolved by borax or other flux, forty parts; glycerine of commerce, five parts; silicate, ten parts; water, forty-five parts; total, one hundred parts.

To make a printing-ink, take of oxide, dissolved, fifty-five parts; glycerine, five parts;

48-INCH DOOLEY PAPER CUTTER.

printers' oils or inks, forty parts; total, one hundred parts.

For an indestructible writing-ink of any color, take, first, clay, pure or mixed, as above explained, thirty parts; second, commercial glycerine, ten parts; third, silicate of soda or potash, forty parts; fourth, plain or distilled water, twenty parts; total, one hundred parts.

The following also gives a good writing-ink: First, clay, pure or mixed, twenty parts; second, silicate, sixty parts; third, plain water, twenty parts; total, one hundred parts. The proportions may, however, be varied indefinitely.

To make copying-ink, it is only necessary to dissolve in water two per cent. of sugar-candy or three per cent. of raw sugar.

Indestructible printing, autographic and lithographic inks may be obtained by the following formula: Clay, pure or mixed, seventy parts; virgin wax, twenty parts; glycerine, five parts; silicate, five parts; total, one hundred parts.

An ink for typographic and other printing is composed as follows: Clay, pure or mixed, seventy-five parts; boiled linseed or nut oil, twenty parts; Glycerine, one part; silicate, four parts; total, one hundred parts.

Ink for copper-plate printing: Clay, pure or mixed, eighty parts; silicate, ten parts; turpentine of good quality, five parts; glycerine, five parts; total, one hundred parts.

For the decoration or printing of wall-papers the argils may be simply diluted in a paste or other sort of gum.

To produce water-colors for printing on the unflammable and incombustible paper and card-board of the invention, and for the documents to be incased between two parts of crystal or common glass in a state of fusion, proceed as follows: The glaze colors employed for the decoration of crystal or ceramic ware are specially suitable for the manufacture of water-colors, the addition of silicates of soda or potash employed alone or combined with spirits of turpentine, being of essential importance.

Formula 1: Fusible enamel color, eighty-five parts; silicate, five parts; spirits of turpentine, ten parts; total, one hundred parts.

Formula 2: Hard enamel color, eighty parts; silicate, ten parts; water, plain or distilled, ten parts; total, one hundred parts.

These compounds, besides being indestructible and suitable for use with advantage on indestructible paper or card-board, may be employed for the decoration of ceramic ware generally. By the above means all shades of water-colors may be obtained.

INDIAN WORK.

The lacquered and papier-maché articles of Indian work, with which we are all familiar, have each a character and individuality of its own.

The Sindh boxes are made by laying variously colored lac in succession on the boxes, while turning on the lathe, and then cutting the design through the different colors.

The Punjab boxes are distinguished by the purple colored lac used on them.

The Rajputana boxes have generally a drab-colored ground, decorated with conventional flower forms of two colors, or two forms

arranged in the alternate rhythmical manner seen in all Indian decoration. The lacquered papier-maché work of Cashmere is the choicest in India, and inferior only to the very best Persian. It is chiefly used for native pen cases and boxes, which are painted all over, either with the shawl pattern in many colors (a most unpleasant style of decoration for large articles, such as tables and chairs) or with the common flower forms of the Cashmere valleys, the rose, narcissus, pink and jasmine, painted in their natural colors, but without light and shade. In the northwestern provinces, Bareilly is celebrated for its black lacquered and gilt furniture. Karnul lacquer work on trays and boxes is embossed with flowers, painted on a green ground and lighted up with gold.

Dull gold is cleaned with the following mixture: Eighty grammes calcium hypochlorite, eighty of sodium bicarbonate and twenty sodium chloride are mixed in three quarts of distilled water. It is then kept for use in corked bottles. Goods to be cleaned are put in a basin and covered with the mixture. After a time they are taken out, washed, rinsed in alcohol, and dried in sawdust. The articles then look good as new.

Regilded frames are seldom satisfactory. When it is wished to renovate them, the better way is to give them a good coat of bronze.

TOY BUILDING-BLOCKS.

A new form of toy building-blocks consists in a series of building-blocks proportioned to represent miniature bricks and half-bricks, with dowel pins fitted thereto, and corresponding holes to receive the pins from therein, and the combination with windows and doors having dowel-pins fitted into the frames thereof, and steps, base-bars or sills, cornices, and railings.

Toy building-blocks of many different sizes and forms are well known; but they have not been made of a form that would enable the child, if sufficiently ingenious, to reproduce in miniature substantially a correct representation of many familiar structures.

These blocks may be made of any suitable material, preferably wood, which is light and easily handled, and to each full size block are fitted two dowel-pins, and in their under side are formed two holes to receive the dowel-pins of the block next adjacent, and to each of the half-blocks is in like manner fitted a dowel-pin and formed a hole. In addition to the blocks described, a series of base-bars or sills are provided having dowel-pins and holes corresponding with those attached to and formed in the blocks; and windows and doors are made of convenient size, to the frames of which are also fixed dowel-pins, and formed holes to receive the dowel-pins in adjacent blocks. The box for the blocks is used to serve as a foundation and its cover is pierced with holes.

When the blocks are to be put together the dowel-pins are inserted into holes in the cover of the box, and the blocks are placed one upon another, so as to "break joints," the dowel-pins in one block entering into the holes in the blocks next below or next above it, and so on until the structure has attained the size and form desired. As the blocks are in this way built up, the windows and doors at proper places are built in with the blocks and kept in position by the dowel-pins of the blocks entering into the holes in the frame of the windows and doors, respectively; and when the structure has reached the required height it may be finished with a cornice placed around the top course of blocks, the cornice being also provided with dowel-pins for that purpose. A railing suitably placed in position, and also steps by its side, complete the structure.

Instead of using the top or lid of the box for a foundation, as described, base-bars or sills consisting of strips of wood provided with dowel-pins or holes may be used for that purpose. These base-bars or sills are useful in constructing bridges. Around the doors and windows the half-block may be employed with advantage, as they may be also when building up structures having any irregular front. The blocks are colored to represent the usual brick color.

BLACK STENCIL PASTE.—Bone black, 1 lb.; molasses, 8 oz.; sulphuric acid, 4 oz.; dextrine, 2 oz.; water, sufficient. Mix the acid with about two ounces of water, and add it to the other ingredients previously mixed together. When the effervescence has subsided, enough water is to be added to form a paste of convenient consistency.

A porcelain finish white paint, excellent for reflectors, is made by mixing (liquid) silicate of soda with dry, pure white zinc. Apply with brush. On receiving the first coat expose the reflector to artificial or solar heat until the paint dries. The second coat should be heavy and again subjected to a drying temperature.

THE BABCOCK PRINTING PRESS.

An improved form of cylinder printing presses is illustrated herewith. This press is manufactured by the Babcock Printing Press Manufacturing Company, New London, Conn., U. S. A. This firm produces drum-cylinder, stop-cylinder and lithographic presses, which combine a number of new and valuable improvements, the designs being entirely new and carefully studied, and the presses being intended to meet the present demands of the trade, which calls for strong, accurate and durable machines, with increased

contact with the distributor and type, without removing the rolls from their bearings. The works of the Babcock Printing Press Manufacturing Company are under the management of men who have long made a specialty of printing presses, and who are quick to realize and apply improvements, and the machines produced are of a high order.

GLASS DECORATION.

The process of applying decoration to the surface of blown hollow-ware, may be divided into

In the same manner scales of mica, and gold or platinum leaf may be permanently embedded on the surface of the glass. Surface molding may produce impressions which are only perceptible to the touch on the external surface as well. In the former case the solid molten glass is pressed into an open mold, and is subsequently expanded; in the latter the bulb is actually expanded in the interior of the mold. The usual impressions imparted by molds are ribs or ridges, net-work and honeycomb or trellis-work. The insertion of enamel reticulation has already been described. By affixing the extremity of a mass

THE BABCOCK PRINTING PRESS.

capacity for quantity of work and additional convenience for giving the operator command of his machine, and also for saving of time in adjustment without complication or liability to get out of order.

Among the improvements embodied in these machines are a newly-patented gripper motion, which is noiseless, and registers perfectly; an air valve, for removing the spring when desired, and invariably restoring it when starting the press; the shield, which effectually protects the pistons and cylinders from paper, tape or other substances, which might otherwise fall upon them; the piston, which can be adjusted to the size of the cylinder, so that any wear of either the cylinder or of the piston can be readily and accurately compensated. This adjustment is easy, positive and perfect, and renders the apparatus air tight, a most important consideration, inasmuch as any escape of air, whether through a valve or around the piston, reduces the resistance, and thus impairs the efficiency of the mechanism. A further improvement is in the roller or journal bearings, whereby any single roller may be removed without disturbing the others, and all of the rollers may be removed and replaced without altering their "set." When desired, the form rolls may be released from

those applied before and those applied after the glass has been annealed. To the former class belong casing with colors, scales and metals; frosting or crackling; surface molding; insertion of enamel reticulation; application of threading gems, seals, frills, flowers and metallic etchings and iridizing by deposition. To the latter class belong iridizing by corrosion; cutting and engraving in various branches; engraving and roughing by the sand-blast; etching; painting and enamels; gilding; silvering; carving. In addition to the method of inserting the colorless glass into a cup of colored glass, "casing" or "plating" may be effected either by gathering from the crucible a casing of color upon a colored nucleus, or more usually by gathering the colorless glass upon a nucleus of color. For every process of casing the colored glasses must be especially prepared, so as to agree with the base. If the colored glass be harder or softer, or even if it be hotter or colder than the glass upon which it is to be plated, the resultant vessels are almost certain to be fractured. For the imitation of colored pottery, tortoise-shell and marble, it is customary to spread upon the marver powdered opaque glass of the required color, and to roll the molten mass of glass in the powder before it is expanded and manipulated.

of molten glass, gathered upon a working-rod, to a given point on the surface of a vessel still attached to the blowing-iron, and rapidly trundling the blowing-iron, a thread of glass may be evenly coiled round the vessel. A machine is now in common use to give an even rotatory motion to the working rod during the process of threading.

Gems or seals are formed by letting fall upon a vessel, in course of manufacture, small drops of white or colored glass, and immediately pressing them with metallic seals. If instead of a drop, a line of molten glass be applied to the side of a vessel, and a metallic wheel with an inverted edge be run over the line, the pattern on the edge of the wheel will be reproduced continuously on the glass. Upon vessels in course of manipulation, glass seals which have been previously prepared and gilded and sections of glass flower-cane may be fixed. If exceedingly thin sheets of glass be coated with gold leaf, and etchings be executed in the leaf, the etching may be incorporated in glass vessels by the cohesion produced by heat through the pores of the leaf.—*The Earthenware and Glass Traders Chronicle (London.)*

Only present fidelity from moment to moment is security for the future.

ANCIENT WOODCUT INITIALS.

Readers of old books are constantly observing beautiful, curious and remarkable initial letters and printers' ornaments, but I am not aware that anyone has yet taken the trouble to collect or describe them in any full or systematic manner. I believe the doing so would well repay the trouble, and possibly lead to the elucidation of more than one literary puzzle. There are two distinct classes of these woodcuts. Firstly, there are those made for some special purpose, ordered by some enterprising printer or publisher for a particular book, and often to adorn the dedication to some noble patron. These generally may be called armorial letters, as they often contain the heraldic shield or crest of the person to be complimented. The second class consists of old letters and ornaments, part of the stock of some old printer, perhaps bought cheap, and used as mere ornaments, without the least regard to their being appropriate or otherwise.

In Thomas Fuller's "Church History of England" some of these things are well illustrated. It was printed in 1655 for John Williams, "at the signe of the Crown in St. Paul's Church-yard," and as almost each chapter or division was dedicated to a different person or institution, so each commences with a specially cut letter, containing an appropriate heraldic device or coat-of-arms. Some of the arms are left out, and at the end of the work a plate was added containing them, with a note to this effect: "Know, reader, the Cutter in wood being sick, and the Press not staing his recovery, the armes of my Patrons omitted in ye body of ye booke are supplied in these quarters."

Besides these special and appropriate letters, there are, however, a good many others, mostly a good deal older, and which had evidently done service in previous publications. Thus, the first general dedication, which is to the Duke of Richmond, commences with a letter I, showing the garden of Eden, the forbidden tree, with Adam and Eve in the act of girdling themselves with fig-leaves, while a monkey at the feet of Eve is apparently munching an apple. A dedication on page 47 to the Marquess of Dorchester begins with a letter H, on an altar placed between Moses and Aaron, and surmounted by the tables of the law; another on page 138, to Dr. Baldwin Hamer, commences with a capital T, under which the daughter of Herodias is represented receiving the head of John the Baptist on a charger; and a fourth, on page 151, to Sir Simon Archer, in place of his arms shows Saul stricken down from his horse, with a ray from heaven inscribed "Saul, Saul." It is plain that all these older woodcuts were used because "the woodcutter was sick."

There are other initial woodcuts of this period which are interesting as giving the representation of particular places or persons. Books published in the reigns of Elizabeth and James I. are especially rich in letters of this sort; and among these the initial letters containing representations of Queen Elizabeth at different ages are of peculiar interest. Such, for example, is the initial E which commences the ninth book of Warner's "Albions England," in black letter, showing the Queen throned and crowned, but quite young, and looking upward. This is very different from the initial letters of the same style which are common in the prayer-books of that time. Many of the initial letters of the prayer-books are beautiful as works of art, but singularly inappropriate, being evidently old woodcuts from the workshops of Antwerp and Cologne, which had been cut for books on heathen mythology or collections of fables. In one of

these, without date, but "printed at London by the deputies of Christopher Barker, Printers to the Queens most excellent Majestie," and which has at the Epistle for the Epiphany a grand letter F, with a very good figure of the Queen, there is at the end of the Communion service,

and commencing the final "Glory be," a very delicate, or rather it would perhaps be more correct to say, a very indelicate, picture of Leda and the swan; very proper it may be for the works of Ovid, but singularly inappropriate in a reformed prayer-book.—Edward Solly, in *Bibliographer*.

WHO IS UNACQUAINTED WITH THE GEOGRAPHY OF THIS COUNTRY WILL SEE BY EXAMINING THIS MAP THAT THE

CHICAGO, ROCK ISLAND & PACIFIC RY

By the central position of its line, connects the East and the West by the shortest route, and carries passengers, without change of cars, between Chicago and Kansas City, Council Bluffs, Leavenworth, Atchison, Minneapolis and St. Paul. It connects in Union Depots with all the principal lines of road between the Atlantic and the Pacific Oceans. Its equipment is unequalled and magnificent, being composed of Most Comfortable and Beautiful Day Coaches, Magnificent Horton Reclining Chair Cars, Pullman's Prettiest Palace Sleeping Cars, and the Best Line of Dining Cars in the World. Three Trains between Chicago and Missouri River Points. Two Trains between Chicago and Minneapolis and St. Paul, via the Famous

"ALBERT LEA ROUTE."

A New and Direct Line, via Seneca and Kankakee, has recently been opened between Richmond, Norfolk, Newport News, Chattanooga, Atlanta, Augusta, Nashville, Louisville, Lexington, Cincinnati, Indianapolis and Lafayette, and Omaha, Minneapolis and St. Paul and intermediate points.

All Through Passengers Travel on Fast Express Trains.

Tickets for sale at all principal Ticket Offices in the United States and Canada.

Baggage checked through and rates of fare always as low as competitors that offer less advantages.

BINDER.

Send for Price List.

The MOST COMPLETE AND PERFECT DEVICE
ever offered the public for filing and binding Pam-
phlets, Periodicals, Magazines, Sheet Music, and
loose Papers of every description.

The BINDING DEVICE is composed of steel
strips or stubs, between which the papers are held
firmly—as in a vice—by means of two or more Steel
Fasteners, which cannot stretch and allow the papers
to work loose, or the book to sag from the cover.

Intending exhibitors should make early application. Every information will be supplied by addressing

J. H. DE BUSSY,

93, Heerengracht, Amsterdam

TO THE TRADE.

GENTLEMEN:—Annually, since 1867, we have offered our New Samples of **CHRISTMAS CARDS**, and yearly have we been encouraged to renewed efforts.

Our permanent staff in the Designing Rooms has been steadily increasing, and every issue of New Patterns is greater in number than that of the previous year.

Competitions in design among unskilled amateurs, and lavish advertising of cards produced from their drawings, have only resulted in

MARCUS WARD'S CARDS

BEING MORE IN DEMAND THAN EVER.

Again we have to announce the completion of our **DESIGNS** for the **NEW SEASON**, all printed at **OUR OWN WORKS**. We think our artists have surpassed themselves in novelty and beauty of design. The quality of our work is well-known, and the variety and value leave nothing to be desired. **Sample-Books** now in our 'Travelers' hands.

Yours respectfully,

MARCUS WARD & CO.,

LONDON AND BELFAST.

734 Broadway, New York.

STEAM PRINTING WORKS, AMSTERDAM.

When People are Traveling Comfort and Safety are the

TWO PRINCIPAL OBJECTS IN LIFE!**COMFORT!**

"The Erie is by far the smoothest road I ever traveled on, either in this country or in Europe; and I consider it the perfection of railroad traveling. With the clean, light and airy coaches, polite attendance, freedom from dust, noise and jar, we reached Chicago hardly realizing what a long journey we had performed. And then such a breakfast as we had the morning after leaving New York, at Hornellsville, is certainly deserving 'honorable mention.' Such a table as they have there, with a full half an hour to enjoy it, is enough of itself to attract passengers."—*Ex. U. S. Minister, E. B. Washburne.*

SAFETY!

"5,491,441 Passengers were carried over the Erie Railway in 1881. Of this vast number, only two were killed—one by falling from the platform of a car on which he insisted on standing, and the other in jumping from a train while in motion."—*New York State Engineer's Report for 1881.*

No better evidence than the above need be wanted that both of these objects are secured to the traveler who purchases his ticket over the

— MANUFACTURERS OF —

**GLUCINUM PENS.**

NOTICE TO THE TRADE.—We call attention to our circular letter, dated June 10 1883, which has been directed to our patrons and principal stationers in this country, containing some very important information to consumers of our celebrated Glucinum Pens. We confidently claim that they are the best series of writing pens ever placed before the public. The demand for them is constantly increasing on account of the uniformity, smoothness of points, and durability over all other steel pens. This

Trade-Mark and the word Glucinum are copyrighted and registered at the Patent Office, at Washington, D. C., United States of America, and every box has a fac-simile of our signature, so beware of unscrupulous parties misrepresenting us.

A Revolution in Stylographic Pens. }
The Latest Improvement.

THE KERNER.

\$1.

It is constructed on strictly scientific principles, and being devoid of the complications which exist in old styles is less liable to get out of order. It has no springs to be affected by the action of the ink. The reedle is rigidly fixed to a FLEXIBLE air tube extending entirely through the barrel, which when writing is constantly vibrating throughout the entire length of the barrel agitating the ink and causing a perfect flow to the point. It is unequalled by any writing instrument of the kind ever offered for public favor, and gives entire satisfaction to all who use them. It is constructed of the best material throughout, and the point is of platina alloyed with iridium. Prices: No. 1, Plain, \$1; No. 2, Engraved, \$1.25; No. 3, Gold Mounted, \$1.50; No. 4, Entire Gold Cap, \$3; No. 5, Mottled Ruling Pen, \$1.50. Send for Circulars.

so that every single particle will stick.

CARTER, DINSMORE & CO., BOSTON and NEW YORK

BYRON WESTON,

DALTON, MASS., U. S. A.,

HAS BEEN AWARDED THE

GRAND PRIZE GOLD MEDAL

AND RECOMMENDED THE

Medal of Honor and Perfection

At PARIS, 1878,

This being the HIGHEST and ONLY AWARD given for

LINEN RECORD & LEDGER PAPER

Also, the only Gold Medal given for Ledger Paper at the Adelaide, Australia, Exhibition, 1881.

—A SPECIALTY.—

THIS Paper has received THE HIGHEST PREMIUM over all
others from the Cincinnati Industrial Exhibition, Massachusetts
Charitable Mechanics' Association, Franklin Institute of Philadelphia,
Louisville Exposition, Medal and diploma from United States Centennial
Commission, Medal of Progress American Institute, 1877, and Medal of
Improvement and Progress, Boston, 1878. Its

PRINCIPAL ADVANTAGES

are as follows:—1. It contains more LINEN than any other Ledger
Paper, has a longer fibre, and is, consequently, tougher. 2. Having a
harder and better body, it frays less in erasure, so that by simply using
the rubber after the eraser, the ink is prevented from spreading. 3. It is
more uniform in Weight Color and Finish. 4. It never cockles if properly
bound. 5. Its chemical action upon ink is such that it both writes and rules
up better. For proof of the foregoing, refer to a large number of Sta-
tioners, Bookbinders, Bookkeepers, and Recorders, who have given it,
after a severe test, the preference over all others. This paper is Double
Sized, and will stand any climate or the most acid of fluid inks.

Each sheet is water-marked with name and date.

Send for sample

LOCKWOOD PRESS, 74 Duane Street, New York.

The American Stationer

A JOURNAL DEVOTED TO THE INTERESTS OF THE STATIONERY & FANCY GOODS TRADES

"The Stationer"—Every Thursday—\$2.00 Per Annum.

VOL. XIV.—NO. 4.

NEW YORK, JULY 26, 1883.

WHOLE NO. 422.

Correspondence.

CINCINNATI NOTES.

[FROM OUR REGULAR CORRESPONDENT.]

CINCINNATI, July 24, 1883.

"What a brilliant piece of commercial journalism the last number of THE AMERICAN STATIONER was! Did you see it?" I have heard this exclamation more than once from Cincinnati people, who had become, as I thought, indurated to impressions by splendid work by THE STATIONER simply because they had grown so accustomed to seeing it. But I was mistaken. The fireworks in the first leaves of the number spoken of were too much for their eyes, and they had to burst out in exclamations. That new departure article on "Fashions in Stationery" made a happy impression. Advertising is so difficult and so monotonous when in the old methods that it isn't advertising any more, and only becomes so by methods which lift it out of the ruts. Why, there are E. & H. T. Anthony & Co., No. 591 Broadway, New York, who sell amateur outfits for experimental photographers, and there are many other such people right here in Cincinnati, and even dealers in cameras, who didn't know Anthony sold them before. They have been in the habit of going to P. B. Smith & Co., on Fifth street, or to some opticians that keep about two in stock when they wanted an article of that kind. Then the Shriner copying press page is a famous eye-catcher, and it shows that there is more than one man in this hemisphere making copying presses. In that article on ceramic decoration and kitchen decoration you come right squarely to the Cincinnati hearts. Here is the birthplace and the home of ceramic art of the highest order on this continent. And so they have a copying press manufactory in Carpentersville, Ill.! They are surrounding Cincinnati with them. But here comes John Holland, one of the best advertised men in Cincinnati by the variety and quality of the work he turns out; a close, careful dealer, but a man who knows the value of printers' ink, from a long experience and thorough test of it. Here he comes pictorially, chromatically, typographically, and in every respect artistically, with a whole page. Brilliant as that page is, a peep into one of his show-cases will make it look mean and beggarly in comparison.

Robt. Clarke & Co. have one of the finest bookshops in this western country, and in many respects one of the most complete ones in the nation. I have already mentioned their collection of rare books on American history and

biography. Rare and otherwise, they have probably the most complete collection of books of this description of any bookshop on the continent. Many of the members of the firm constituting the company are gentlemen of reading and literary taste, and have a penchant for rare works, and thus aid in accumulating this collection. Their stationery department is full and is well displayed. In printing and binding, the whole West knows what they are, and, for that matter, the whole nation, for their law publications go everywhere in America, and they cross both oceans in greater numbers than Cincinnati excursionists do. Their book department is immense. No idea can be formed of it from a glance at their salesroom, and all the libraries west of the Alleghanies, public and private, appreciate it.

Among the paper specialties attracting notice in this Cincinnati region, none are attracting more attention or exciting more surprise of the sort calculated to flatter our local pride than the products of the Harding Paper Company, made at its mills at Excello, Butler County, and Franklin, Warren County. I saw a sample of its fine ledger paper in the hands of J. R. Mills, the other day. He and Wm. J. O'Neill were admiring it, and both are experts in this line of goods whose judgment is worth something.

I really don't know what to say about the Peerless Paper File Company and the Globe Files Company, of this city, that I have not already said, unless it is that, push their business as they may, it keeps them pushing harder and harder to get out of the way of orders and keep from being pushed by them.

Snider & Hoole are always on the go. It looks as if neither flood nor famine nor pestilence nor a universal telegraphic strike, could resist the momentum with which they move so as to perceptibly affect their velocity.

Samuel C. Tatum is running off his copying-presses about as fast as he can, and consumers are running off with them about as fast as he turns them out.

Louis Snider's Sons are enlarging their domain on Walnut street by taking in the adjoining building formerly occupied by Winchell.

Charles Stewart, of Charles Stewart & Co., keeps stirring up everything round him at such a rate that one would think his already large warerooms were almost too small to give such a man elbow room.

Sales in stores are a trifle light just now, but orders for printing are heavy for the season.

New wheat is coming in rapidly, and prices of grain hold up well. There is nothing discouraging in the present outlook for business.

It is hardly worth the while to speak of the

telegraphers' strike, for it seems to be the opinion of everyone that it cannot outlast the present week. It has not crippled business here, but it has caused it great annoyance. The unobtrusiveness of the strikers here has excited much admiration, and thus far has distinguished the strike.

Among recent trade visitors are J. R. Hope, of Hope & Co., West Point, Pa.; James Wallace, of Southworth Company, Mittenque, Mass.; Frank Keeney, of White, Corbin & Co., Rockville, Conn.; William Stahl, of New York Purse and Novelty Company, New York; William A. Davis, Boston, Mass.; W. S. Stedman, of Judd Paper Company, Holyoke, Mass.; E. Dickinson, of Union Paper Manufacturing Company, Holyoke, Mass.; C. M. Borden, of Carson, Brown & Co., Dalton, Mass.; P. L. Bayes, of J. D. Ditman & Co., manufacturers paper and envelopes, Philadelphia, Pa.

PRINCE WILLIAM.

PAPER OR PASTEBOARD.

This invention has for its object the utilization of the refuse scrap and the finishing-dust, or either, of leather tanned in oil or other liquor, such as buckskin and other leather used in the manufacture of gloves and mittens.

It consists in a novel process or method of treating such leather scrap or waste whereby it is made into a pulp, which may either be used separately, or be mixed with straw or other vegetable matter for rolling into paper or pasteboard, or for pressing into box or other shape, and which, combining cheapness with softness and toughness, may be used to advantage as a substitute for straw and other paper or board. The method of proceeding is essentially as follows: Take the buckskin or other leather scrap or waste, and for each ton, or thereabout, first subject it to a preparation or bath consisting of sixty-four gallons of water, more or less, four pounds chloride of lime, or thereabout, and about four ounces carbolic acid, and allow it to remain therein twenty-four hours, more or less, for the purpose of removing the color and cleaning the material. Then expose the mass to a drench of potash and lime-water, made, say, in the proportion of $1\frac{1}{2}$ pounds of chloride of potash to sixty-four gallons of water and one bushel of stone lime; or these proportions may be more or less changed. This removes the glue contained in the scrap. The mass may then be ground in an iron or other mill, but before or after grinding we subject it to a drench consisting of about four pounds of concentrated potash to sixty-four gallons of water, more or less, for the purpose of killing the animal matter contained in the skin or scrap, and afterward drench

in pure water to remove the lye and other foreign matter. The grinding of the material is effected while the same is wet, after which it may be spread on kiln-cloths to dry, or the drying may be dispensed with and the mass be rolled into paper or board at once in any ordinary or suitable paper or board machine; or, instead of rolling into paper or pasteboard sheets, the pulp may be put into molds and pressed into seamless paper or pasteboard butter, glove and other boxes, oyster and other pails, and various articles for which paper or pasteboard made from other pulp is used.

A paper or pasteboard thus made is said to be superior to straw paper or pasteboard, both in looks and strength, although it may be mixed with straw and in the proportion of one-half, more or less, if desired; or it may be used clear, with varied hardness, and will be found cheaper than straw and superior to it for making seamless boxes and numerous other articles.

THE METROPOLITAN DAILY PRESS.

The metropolitan daily press comprises twenty-four papers as follows: *The Herald, Times, Tribune, World, Sun, Star, Truth, Commercial Advertiser, Post, Graphic, Mail and Express, Telegram, Staats Zeitung, Journal of Commerce, Commercial Bulletin, Morning Journal, News, Courier des Etats Unis, Le Messager Franco-Americain, Evening Times, Jewish Gazette, L'Eco D'Italia, New Yorker Herald, New Yorker Volks Zeitung, New Yorker Zeitung.*

The amount of capital invested in the metropolitan dailies is about eight millions of dollars. The first daily paper in New York was the *New York Journal and Daily Patriotic Register*, which was established in 1787 by Thomas Greenleaf, of Abington, Mass. It was a folio of four columns to a page at \$6 per annum. Of the fourteen papers published in the metropolis in 1810, only two now exist, the *Commercial Advertiser*, started in 1794, and the *Evening Post* in 1801. In 1816 seven of these journals circulated nine thousand copies, while in 1881 the daily issues of the *Herald, Sun* and *News* alone exceeded 350,000 copies. In 1827 the *Journal of Commerce and Enquirer* was fledged. The *Sun* rose in 1833; the *Herald* dates from May 6, 1835; the *Tribune*, 1841; the *Times*, 1851; the *World*, 1860; the *Express*, now the *Mail and Express*, in 1836; the *Star* in 1868; the *Truth* in 1879; the *Morning Journal* in 1832; the *News* in 1858; the *Telegram* in 1867; the *Graphic* in 1873; the *Commercial Bulletin* in 1865; the *Staats Zeitung* in 1834; the *Courier des Etats Unis* in 1827; the *Jewish Gazette* in 1881; *L'Eco D'Italia* in 1849; *New Yorker Herald* in 1879; *New Yorker Volks Zeitung* in 1878; *New Yorker Zeitung* in 1845; *Le Messager Franco-Americain* in 1859; and *Evening Times*, 1832.

The average metropolitan daily paper issues eight copies where the average daily paper of the smaller cities and towns issues one. When the *Sun* was started in 1833, the total yearly number of copies of all of the papers printed in the city of New York was 6,000,000 to 8,000,000, valued then at \$400,000 or \$500,000. A few years ago returns were made to the Assessor of Internal Revenue of the gross receipts from the sales of New York newspapers for one year, showing the total to be \$801,327, and this was exclusive of an allowance of \$1,250 per quarter allowed by law on each return. It is probable that, against the 3,000,000 copies issued in 1833, the number in 1869 came up to 150,000,000 to 200,000,000, almost twice as many copies as were issued in the whole country in the year that the

first penny paper, the *Sun*, made its appearance.

THE SUN.

Moses S. Beach established the *Sun* as a penny paper in 1833, and continued to be its owner until January, 1863, when it changed hands. The office of its publication at that time was located on the southwest corner of Fulton and Nassau streets, the present location of the *Commercial Advertiser*. In a short time after its sale, the old establishment was removed to Tammany Hall, which Mr. Dana and his associates had purchased for \$175,000, and where, with its new motto, "Excelsior," added to the old one, the *Sun* has continued to make its daily appearance under the editorial management of Charles A. Dana, the ownership of the *Sun* Company and the able business management of I. W. England. Of the first number under Mr. Dana's management 43,000 copies were printed. Since then over 118,000 copies have been sold in one day.

Mr. Dana became connected with the *Tribune* in about 1846. At first he took charge of the foreign department of that paper, being an accomplished linguist. In the course of events, he some years subsequently became the managing editor of the *Tribune*, and, as such, Mr. Greeley held him in high estimation, and felt, at one time, that he was an indispensable adjunct to that establishment. Mr. Dana and Mr. Greeley, however, could not agree, and the latter separated early in 1862.

THE HERALD.

On Wednesday morning, May 6, 1835, with a capital of \$500, the initial number of the *Morning Herald* was issued by James Gordon Bennett & Co., from the basement room of No. 20 Wall street. With a nominal cash capital of \$500 the *New York Herald* was established, and the independent press inaugurated. But the real capital of the concern was in the brains of the founder. With twelve or fifteen years of active application and close observation in manners, politics and society in New York, Albany and Washington, and in the newspaper offices of the Charleston (S. C.) *Courier*, the *National Advocate*, the *Sunday Courier*, the *New York Enquirer*, the *Morning Courier and Enquirer*, the *New York Globe*, and the *Pennsylvanian*, as reporter, correspondent, assistant editor, and owner, he was prepared for such a paper as the *New York Herald*. Journalism had become a science with him, and this science he applied in building up the greatest newspaper establishment in the world. At the time the *New York Herald* was started by Mr. Bennett there were seven large morning papers called "sixpenny sheets," four evening papers of the same character and price, and four small cheap papers known as the "penny press." The following are the names: *New York Gazette and General Advertiser*, published by John Lang & Co.; *Mercantile Advertiser and New York Advocate*, by Amos Butler & Co.; *New York Daily Advertiser*, by Dwight, Townsend & Co.; *Morning Courier and New York Enquirer*, James Watson Webb; *New York Journal of Commerce*, by Hale & Hallock; the *New York Times*, by Holland, Sandford & Davies. The sixpenny evening papers were: *Commercial Advertiser*, Francis Hall & Co.; *Evening Post*, Bryant, Leggett & Co.; *New York American*, Charles King; the *Evening Star*, Noah & Gill. The small daily or penny papers were the *Sun*, Day & Wisner; the *Transcript*, Hayward, Lynde & Stanley; the *Man*, George H. Evans; the *Jeffersonian*, Childs & Devoe. The circulation of these fifteen daily papers at that time was 9,300,000. Only one paper in 1835 circulated 6,000 copies daily. All

the others were far below 5,000, and running down to 500. It was estimated that the average daily circulation of the "sixpenny sheets" was 1,700 only. The first issue of the *Herald* was neatly printed on sheets ten by fourteen inches in size. Twelve columns of reading matter and four columns of advertisements filled this number. There was a population at that time within the radius of the city of 270,000, with fifteen daily newspapers printed inside of the metropolitan limits. Now, with a population of upward of 1,200,000 there are only twenty-four papers published here. On August 12, 1835, the office, type, presses, books, and papers of the *Morning Herald* were destroyed by fire—all disappeared in flames. Owing to this calamity there was a suspension of the publication of the paper for nineteen days. On August 31 it reappeared. It was then called *The Herald*, and owned, edited and published by James Gordon Bennett alone. This was the second epoch in the history of this great and influential paper. Thus started the *Herald* on its second race, and from this start it was under the sole guidance of the elder Bennett until his death. His son, James Gordon Bennett, Jr., upon the death of his father in the early part of 1872, succeeded to the control of the paper, and has supervised it until the present day. Indicative of the progress made early in the revolution in journalism, the *Herald*, October 31, 1835, stated that the aggregate circulation of the *Courier and Enquirer*, *Journal of Commerce*, *Gazette*, *Daily Advertiser*, *Times*, and *Mercantile Advertiser*, the "respectable sixpenny papers" on the previous day was twelve thousand and five hundred, while that of three "penny papers," the *Sun*, *Transcript*, and *Herald*, was twenty-eight thousand and five hundred. Mr. Bennett inaugurated the cash system of payments for subscription and advertisements upon his establishment of the *Herald*. An offer of \$2,200,000, made by George W. Childs and others, was refused for the *Herald* a few years ago. Mr. Bennett, at his death, is reputed to have left an estate valued at upward of \$8,000,000.

[To be Continued.]

AN EXPENSIVE MS.

The sale of the beautiful manuscript of the "Life of Christ," with the series of splendid miniatures by Giulio Clovio, attracted a crowded audience last month to the rooms of the auctioneers, Messrs. Sotheby, to witness the contest for this rare example of the greatest miniaturist of his time. When the magnificently-bound volume was placed before the audience, Mr. Quaritch, the well-known bookseller and great connoisseur in old manuscripts and printed books, stated that there had been some difference of opinion as to the authenticity of this fine work, and that he would, therefore, ask the auctioneer whether he would guarantee it. This inquiry was answered by a negative, but also with an assurance that the manuscript would be left with confidence to the appreciation of those who were disposed to bid for it. After this, Mr. Quaritch started the biddings with £250, and was met with £500 from Mr. Ellis, who continued to advance, though not against Mr. Quaritch. The latter waited until Mr. Ellis bid £1,500, and then advanced steadily by fifties, in the end carrying off his prize at the large sum of £2,050. We believe that it was intended by the British Museum authorities to purchase this fine MS., but the sum named as a limit was £1,000. This lot formed the most important item in the sale of the Towneley MSS.—*Printing Times and Lithographer.*

THE PARSONS PAPER COMPANY,

— HOLYOKE, MASS., —

In addition to their already extensive establishments at Holyoke (which rank among the largest mills in this country), have recently built a separate mill, specially constructed and equipped for the production of the Best Grades of Linen Papers, and are now manufacturing all the various sizes and weights of BOND, PARCHMENT, BANK-NOTE, AND LEDGER PAPERS. They have already demonstrated their ability to produce of these papers a quality EQUAL TO THE BEST ESTABLISHED BRANDS IN THE MARKET.

Having great strength of fibre (an essential requisite in all Legal, Government and Commercial Papers), they are recommended for use in Bonds, Deeds, Certificates, County and State Records, etc. They are thoroughly sized to stand writing upon with fluid inks, and will permit of repeated erasures and re-writing thereon, when required. Great care is exercised to produce uniformity of color, strength and finish, and to do this, they have the latest improved machinery, specially adapted to the manufacture of Linen Papers.

They would call the attention of the Trade to the following brands, which are their trade-marks, viz.: In all Bond, Bank Folio, and Parchment appears the water-mark

"PARSONS PAPER COMPANY, HOLYOKE, MASS."

The Ledger Papers, of which they manufacture two Brands, are water-marked

"PARSONS LINEN LEDGER."

"SCOTCH LINEN LEDGER."

It is the intention of the Company to maintain the quality of these brands equal to any in the market.

Extra Fine Papers

Manufactured by

Z. CRANE, JR., & BRO.,

DALTON, MASS., U.S.A.

These Goods, which are acknowledged to equal the finest foreign manufactures, are presented in the following styles and qualities:

SUPERFINE QUALITY.

In handsome Light Blue Boxes containing one-quarter of a ream of Note Paper each, and bearing in blue letters description of contents.

In separate Boxes of uniform size, are one-eighth of a thousand Envelopes corresponding in tint and quality to the paper.

EXTRA SUPERFINE QUALITY.

In attractive Lavender Colored Boxes containing one-quarter ream of Extra Fine Paper each, with contents printed in red. Corresponding to this, in like Boxes, are Envelopes to match.

All this Stationery may be relied on to be according to representation. It is suited to the tastes of the most select trade.

In addition to the above lines, our other Specialties are put up with care, in attractive and substantial form. Goods can be seen at the Mill, or at our New York General Agency, GEO. B. HURD & CO., 79 Beekman Street.

SEASON 1883-1884.

SEASON 1883-1884.

L. PRANG & CO.'S

Christmas and New Year Cards.

WE beg to express our thanks to our patrons and friends for the kind and flattering appreciation of our past efforts, and feel a pardonable pride at the very emphatic endorsement which our Cards have received from the American, English, German and Australian press. With one accord these exponents of public taste have given our Cards the first rank over all similar productions in the market. We are bound to maintain this superiority; and we have, as heretofore, spared no expense to create, with the aid of our enlarged experience, a Series of Novelties for the Christmas Season, which, we have no doubt, will meet the expectations of the Trade. We have been singularly fortunate in procuring the assistance of, we may say, **REPRESENTATIVE AMERICAN TALENT** in the preparation of designs, and besides have secured the coöperation of some of the most **EMINENT EUROPEAN ARTISTS**.

OUR LINE IS NOW COMPLETED, and our agents are on the road to call on our patrons and friends. An inspection of the Sample Books will convince them that in regard to **ORIGINALITY AND VARIETY OF DESIGN, EXCELLENCE AND RICHNESS IN EXECUTION**, it far exceeds our last year's efforts. To give an idea of the high artistic order of the line, we would say that it comprises:

FIGURE DESIGNS by Miss DORA WHEELER, Miss ROSINA EMMET, Miss L. B. HUMPHREY, Miss L. B. COMINS, ELIHU VEDDER, WALTER SATTERLEE, A. F. BROOKS, and others.

LANDSCAPE DESIGNS by W. HAMILTON GIBSON, THOMAS MORAN, F. L. SMITH, and others.

ANIMAL DESIGNS by B. E. BENSELL and HARRY BEARD.

FLOWER AND BIRD DESIGNS by Miss FIDELIA BRIDGES, Mrs. O. E. WHITNEY, JEAN ROBIE, of Brussels; H. GIACOMELLI, of Paris, and others.

THE LITERARY MATTER in connection with our designs has been carefully attended to—among others, by Mrs. CELIA THAXTER, Mrs. EMILY SHAW FORMAN and JOAQUIN MILLER.

OUR REGULAR LINE of Christmas and New Year Cards will comprise plain cards, fringed cards, and double fringed cards, varying in price from 30 cents to \$60, per set of 12.

PROTECTORS are furnished with all fringed cards, and also **ENVELOPES** for all series costing \$1.80 per set and more.

Besides our **REGULAR LINE**, we would call special attention to the following

NOVELTIES AND SPECIALTIES:

ALADDIN'S LAMP. This is one of the most elaborate and elegant Christmas Gift Cards we have ever offered to the trade. It is a large folding card, heavily fringed, and provided with a leatherette protector. The front outside page is a design of peacock feathers on satin; the left inside page contains a poem specially written for this gift by JOAQUIN MILLER, also on satin, and surrounded by a delicate border of Oriental design; the right inside page presents Aladdin bearing his lamp, after a painting by the eminent American artist, ELIHU VEDDER; and to complete the whole, the back is embellished with a most unique, artistic design of high order.

RUSKIN CALENDAR FOR 1884. At the solicitation of some of our business friends, we have this year decided to bring out a Calendar, and are happy to be able to announce that we shall issue **A CALENDAR FROM JOHN RUSKIN, FOR 1884**. This consists of an artistic mount with a block calendar, having suitable selections from JOHN RUSKIN's works for each day of

the year. The selections have been made by a lady well-known for her cultivated taste and judgment. The mount has been designed by a well-known Boston artist, and, coming from her thought and tasteful skill, the form and decoration will be a fitting accompaniment to the words within. This Calendar will be a source of pleasure to all who love and appreciate RUSKIN, that they may have every morning a jewel from the treasure of his noble and earnest thought.

"THE CHRISTMAS SHEAF." A folding card, with inside pages, in color, stamped out in the shape of a sheaf of wheat. Tied with silk cord and tassels.

"THE CHRISTMAS BOOK." A surprisingly natural representation of an open book, with floral designs by Mrs. FISHER, and original poems by JOAQUIN MILLER.

CHRISTMAS ART PRINTS ON SATIN.

The great success attending our efforts in this line has induced us to bring out a number of new Series, consisting of Flowers, Landscapes and Figure Designs. These are elegantly finished in several styles, in fringed tinted mats, with cord and tassels; on mounts, with silk fringe and cord; in hook form, richly fringed and with leatherette protectors, and on rich Plush mounts. Prices vary from \$1.50 to \$3.50 each.

We have made large additions to our **BIRTHDAY** line, comprising Plain Cards, Fringed and Double Fringed Cards and Art Prints on Satin. Numerous Series at popular prices have been added to our list of **SCRIPTURE TEXT CARDS**. New **FLOWER PIECES** in Mats, &c. **THANKSGIVING CARDS**,—Our line will also be shown now.

Descriptive Price Lists of our **CHRISTMAS** and **NEW YEAR CARDS** are now ready, and will be sent on application.

- A toy consisting of a figure or object on wheels, a bell, and a depending spring-arm connected with the floor or support of the toy, and a wiper on one of the axles, the spring-arm being rigidly attached at its upper end to the floor or support and carrying a bell-hammer.
- No. 278,697. Penholder.—Ernst Fischer, Halle-on-the-Saale, Prussia, Germany. Patented in Germany July 25, 1880, No. 12,966; in Luxemburg January 14, 1881, No. 108; in Austria-Hungary January 14, 1881, No. 2,823 and No. 11,851; in Belgium January 31, 1881, No. 53,576; in England February 9, 1881, No. 553; in France March 23, 1881, No. 140,924; in Italy March 21, 1881, XV. 12,606, and in Spain July 12, 1881, No. 1,397.
- No. 278,700. Composing Stick.—Wm. H. Golding, Boston, Mass.
- ### DESIGNS.
- No. 13,923. Font of Printing Type.—Herman Ihlenburg, Philadelphia, Pa., assignor to MacKellar, Smiths & Jordan, same place. Term of patent, 14 years.
- No. 13,948. Inkstand.—James Gibbins, Springfield, Mass. Term of patent, 14 years.
- No. 13,950. Font of Printing Type.—Herman Ihlenburg, Philadelphia, Pa., assignor to MacKellar, Smiths & Jordan, same place. Term of patent, 14 years.

SILICATE BOOK SLATES, BLACK DIAMOND SLATING, REVOLVING BLACKBOARDS, LAPILINUM (Slated Cloth).

THESE GOODS are in constant use by the BOARD OF EDUCATION of the City of New York (in every Public School), and have been for the past twelve years, which is a sufficient guarantee as to their durability and perfection. They are also in use by a large number of the BOARDS OF EDUCATION, Colleges and Schools throughout the country. The Private Schools have also adapted our Book Slates in preference to slate or paper pads—finding them more economical and more advantageous to the pupil. They are handsomely bound in fine black cloth, attractive in appearance, and finely finished. The BLACKBOARDS are well seasoned, and will last for years, slated on both sides with the celebrated BLACK DIAMOND SLATING. For sale by all the leading Houses throughout the United States and Canada. SEND FOR CATALOGUE. Patented and manufactured only by the

PRICE LIST NOW READY.

RELIEFS (SCRAP PICTURES).

The constant growing demand for Reliefs has impressed upon us the necessity of an improvement of the present way dealers are obliged to keep their stock, and we are pleased to say that we are now able to offer the trade a complete solution to the matter in the form of a

— RELIEF CABINET, —

of which the cut herewith given is an exact illustration. This Cabinet will hold 5,000 to 6,000 Reliefs (according to the sizes desired), and will be presented to every retailer who purchases that number of sheets, amounting to at least \$100 net.

The assortment may be made up of one hundred each of fifty kinds, or fifty each of one hundred kinds. This Cabinet is a solidly built, durable piece of work, in black walnut, and an ornament to any store.

"LANGUAGE OF FLOWERS."

Trade Gossip.

All new goods and designs which are not, strictly speaking, "Novelties" will be noticed under this head. The trade are requested to forward descriptions with samples in order to secure proper notice.

Landow & Herman, fancy goods dealers, New York, have made an assignment.

A. B. Goodhue, bookseller and stationer, Marion, Ala., has sold out to J. L. Wyatt.

Taylor, Nichols & Co., Springfield, Mass., have opened an office at 46 Howard street, New York.

Clay & Gray, publishers of the *News Miner*, Hailey, Idaho, have sold out to Richards & Richards.

The process for producing an imitation stained glass, described in last week's *STATIONER*, is a patented invention.

Koch, Sons & Co. have just issued their new catalogue of albums, binders, scrap-books and other miscellaneous goods in their line. The trade should send for it.

Henry Levy & Son, 477 Broadway, are now prepared to receive orders for Parker's Dundee school-bags, which they claim to be the best and cheapest in the market. Send for catalogue and price-list.

A new magazine has been started. It is intended to extend a knowledge of hygienic and healthful living. It is called "Dio Lewis' Monthly," and is edited by the well known Dio Lewis. Clarke Brothers, 68 Bible House, New York, are the publishers.

The nines representing the New York Paper Trade and Boston Paper Trade base-ball clubs contested, at Holyoke, on Saturday last. An eight innings game was played, the score standing at the close: Boston 16, New York 8. This is the result of culture. The New York boys evidently need to study the game more assiduously.

Williamson & Higbie, Rochester, N. Y., have made a new departure. They have taken an entire floor at 33 Exchange street, in that city, and have filled it with a stock of second-hand and shop-worn law books, which will be offered at low prices. They will continue their regular trade in law books and legal supplies at their old stand, 62 W. Main street.

Charles A. Burkhardt has got out "Elite" calling, record and correspondence cards, which have been published by Geo. B. Hurd & Co. These are similar to the Elite engagement cards, and afford convenient and stylish mediums for keeping the records of correspondence or of calls. These will soon be followed by the Elite monthly engagement and correspondence cards and the Elite engagement and correspondence calendar for 1884. The cards are put up in handsome frames and will doubtless sell readily. They will be neat attractions for the holiday season.

The following named out-of-town buyers of stationery goods have been in town during the past few days: G. W. Burke, Macon, Ga.; L. Bucki, Ellaville, Fla.; George Mullio, of Smith, Mullin & Voorhees, booksellers and stationers, Cedar Rapids, Ia.; Mr. Fretwell, of Fretwell & Nichols, wholesale stationers, Savannah, Ga.; J. H. E. Stelling, Charleston, S. C.; Robert D. Patterson, St. Louis, Mo.; J. H. Blythe, St. Louis, Mo.; J. H. Frank, San Francisco, Cal.; Julius Meyer, New Orleans, La.; George Holden, Dayton, Ohio; H. Yost, San Francisco, Cal.

Fairbanks, Palmer & Co., dealers in subscription books, have sold out their business in this city to Bryan, Taylor & Co. The subscription-book business of the firm at Chicago remains unchanged. The reason assigned for the firm's selling out its interest in this city is the failing health of Mr. Fairbanks, who managed the New York business.

Arthur E. Lane, a member of the firm of Gane Brothers & Co. (Chicago branch), who has been sojourning at Brattleboro, Vt., his place of nativity, during the past two weeks, has returned to this city and will leave for Chicago in a day or two. He reports trade in Chicago as being very good.

The very large facilities of the National Publishing Company, Philadelphia, enable it to give prompt attention to all orders for its popular line of family bibles. The company will be pleased to have any members of the trade visiting Philadelphia call and examine its establishment.

French & Choate, 4 Bond street, are now making the Lambie dictionary holder in cherry, as well as walnut, and its sale is increasing rapidly. Mr. French will start West on August 1, going as far as Omaha and Kansas City to push the sale of this holder and some other specialties.

Schedules in the assignment by Philip J. Landon and Calvin Herman, fancy goods dealers at 286 Bleeker street, to Emanuel Frey, were filed on Monday in the Court of Common Pleas. They state liabilities, \$6,105.24; nominal assets, \$1,624.11, and actual assets, \$946.86.

John E. Potter & Co., publishers, Philadelphia, have opened a branch of their business at 743 Broadway, New York, over the store of Chas. Scribner's Sons. E. O. Chapman will manage this new house, and invites a visit from the trade.

The publication of the *Savannah Times*, Savannah, Ga., will henceforth be carried on by B. H. Richardson, the firm of Richardson & McNulty, the former publishers, having been dissolved.

Street & Smith, publishers, New York city, have dissolved partnership. The business will be continued by Francis S. Smith and Ormund G. Smith under the same style.

Calkins & Barton, publishers of the *Sierra County Times*, Downieville, Cal., have dissolved partnership, G. Barton retiring. Calkins & Sweetman succeed.

The August number of "Our Little Ones" is to hand, full of bright illustrations and interesting matter for the children. It is an elegant child's magazine.

Rudolph & Co., dealers in picture frames New York city, have dissolved partnership. Oscar Rudolph will continue the business under the same style.

The Powers Paper Company, of Springfield, Mass., is being rushed just now to its utmost limit to supply the demands of the fall trade in envelopes.

The stock of envelopes, &c., of the estate of Mackay, Lockhart & Co., Toronto, Can., has been advertised for sale by the trustee.

The Gem bookstore, Talladega, Ala., asks manufacturers and publishers to forward catalogues and price-lists.

The *Journal Company* (Mills & Waitman, proprietors), Pittsfield, Mass., has been attached.

James Bingham, paper manufacturer, North Lyme, Conn., is reported to have failed.

C. Hirstel & Co., booksellers and stationers, Portland, Ore., have sold out.

V. W. Richardson, printer, Milwaukee, Wis., has sold out.

John Hasslet, dealer in stationery, &c., Philadelphia, Pa., is dead.

Mrs. E. H. Backenheimer, fancy goods dealer, Dayton, Ohio, is closing out.

Gilmore & Babcock, fancy goods dealers, Belfast, Me., have advertised to close out.

Cohn Brothers, booksellers and stationers, Denver, Col., have sold out to E. N. Jenkins.

The plant of F. N. Ham, printer, Brandon, Manitoba, Canada, has been sold out by the sheriff.

Ecker Brothers, dealers in notions, &c., Vincennes, Ind., have bought out the business of S. Teifelbaum.

The *Quincy Journal Printing Company*, Quincy, Ill., has been incorporated with a capital stock of \$5,000.

The establishment of Bryant Brothers, publishers, Burlington Junction, Mo., has been damaged by water.

A. J. Nichols & Co., printers, Foxboro, Mass., have dissolved partnership. The business is continued by A. J. Nichols.

L. Basch & Sons, dealers in paper stock, Columbus, Ohio, have suffered a loss of \$1,500 from fire: fully insured.

R. G. Callison & Co., booksellers and stationers, Eugene City, Ore., have sold out to Joel McCormick and George Collier, Jr.

Charles A. Rohde, of the firm of Brunnegnell & Rohde, stationers, Milwaukee, Wis., is in town purchasing novelties to meet the demands of the fall trade. He reports the stationery business in Milwaukee as very fair for this season.

A pamphlet, containing thirty-four poems, has been issued by the Esterbrook Steel Pen Company. The poems were selected from about one hundred rhymes on the Esterbrook pen, the excellence of which is presented in a variety of forms. The literary merit of the contributions makes them a source of interest to the general reader.

A fire broke out on Sunday afternoon on the seventh floor of the eight-story brick building, Nos. 17 to 27 Vandewater street, and occupied by Lovejoy, Son & Co., electrotypers and stereotypers. Loss about \$25,000. The seventh floor was occupied by the Clay Manufacturing Company and George Munro, publisher, who also occupied the eighth floor. The fifth floor was occupied by A. Anderson, printers, and the Vulcanite Jewelry Company; the fourth floor by John Medole & Son, printers; the third floor by E. E. Tomlinson, printer, and H. S. Geadt, printer. The second floor was occupied by Henry Dawson, printer, and Charles A. Leib, machinist, and H. C. Cherouny, printer. The first floor was occupied by Henry McCobb, dealer in chocolate, and the New York Screw Top Works. The fire extended to the buildings, Nos. 45 to 51 Rose street, occupied by Bingham, Daly & O'Hara, printers' rollers, and Charles E. Johnson, dealer in ink; Stringam & Combers, table cutlers, and E. E. Tomlinson, printer; Handy & Walton, printers; David H. Gilder-sleeve, bookbinder, and the Universal Rubber Company. The fifth floor was occupied by Lovejoy & Co. The sixth floor was unoccupied. The seventh and eighth floors were occupied by George Munro, publisher. The ninth floor was occupied by the Kendall Bank Note Company. The building is owned by George Munro, and was damaged about \$50,000. The total damage done by fire and water is about \$300,000. The

losers are all partially insured. The origin of the fire could not be ascertained.

Frederick F. Keethan, dealer in toys, &c., Shenandoah, Pa., has been burned out.

Freund & Co., booksellers and stationers, San Francisco, Cal., have been attached.

The Miller Brothers Cutlery Company has removed its New York office to 62 Read street.

A. B. Mayer, paper-stock dealer, St. Louis, Mo., has admitted Julius Mayer to partnership.

Frank Baker, dealer in varieties, Virginia City, Nev., has advertised to close out his business.

The firm of Nordhausen & Jonnicksen, novelty actioneers, Oakland, Cal., has been dissolved.

An attachment has been issued against James M. Keep, dealer in stationers' hardware, New York city.

The Springfield Mercantile Company, Springfield, Mass., has been incorporated, with a paid up capital stock of \$100,000.

The recent floods in Missouri have damaged the establishment of J. B. Chrissenger, dealer in notions, Burlington Junction.

An execution has been issued against Samuel H. Ettla, dealer in toys and fancy goods, of Harrisburg, Pa., in order to satisfy a judgment of \$400.

Some 160 new designs in Christmas and New Year cards are being offered to the trade just now by Charles T. Bainbridge's Sons. Many of the designs are very striking and handsome, and closely imitate hand paintings.

Henry Bainbridge & Co. are already receiving orders for their patent daily memoranda calendar, which is about to be issued for 1884. The frame of the calendar this year will have a card attachment for advertising, stationery cards, &c.

Gunn, Curtiss & Co., Boston, Mass., mercantile and label printers and stationers, have suspended. The liabilities are said to be some \$120,000. The firm has been granted an extension by their creditors, and its label works are running as usual.

Gane Brothers & Co., dealers in binders' materials, New York city, are now offering to the trade an imitation leather. It is in different colors, and although manufactured of paper, is very strong and durable, and cannot be told from the genuine article. It is calculated for jewelry box coverings and similar fine work.

A special committee has been appointed by the business men in this city, representing the toy trade, for the purpose of acting in the matter of organizing a Board of Trade. The object is to learn what the feeling of the toy tradesmen, generally, is on the subject. Five toy dealers, at present, belong to the Stationers' Board of Trade. The committee will make a report in a few days.

The manufacture of tin toys is being done on a much larger scale this season by A. Weidmann, who practically controls this business in this country, being the only manufacturer. Formerly these goods were all imported. Mr. Weidmann is making 15,000 gross of toy sleigh-bells, which are also extensively used on masquerade suits. Mr. Weidmann will also offer to the trade a new style of a patent toy-gun, a description of which will be duly furnished in these columns.

McCarty & Hasberg, dealers in fancy stationery goods and novelties have not yet completed their work of stocking up for the fall trade. They will have a complete assortment, however, in a few days when they will offer several novelties, a description of which goods will duly appear in THE STATIONER.

Augustus Frey, of the firm of Frey & Sannger, bookbinders, St. Louis, has been 'paying a visit to Eastern men in his trade for the purpose of acquainting himself more fully with Eastern methods of bookbinding.

The Chicago toy trade has been represented in this city for the past few days by Louis Schutt, of the firm of Schutt & Co., dealers in toys, Chicago, who is in town to purchase stock for the fall trade.

S. F. Hansel, New Orleans, La.; Richard Crampton, Rock Island, Ill.; M. H. Dickinson, Kansas City, Mo., and D. S. Caulfield, Omaha, Neb., are in town buying stock.

E. & H. T. Anthony & Co., are about to introduce several novelties in their line of trade, which will be described in a future issue of THE AMERICAN STATIONER.

John A. Somerville has succeeded to the business of James Somerville, bookbinder, New York, with special capital of \$5,000 to July, 1886.

The sheriff has advertised to sell out on the 31st inst., H. C. Lanphiar, dealer in novelties, Philadelphia, Pa.

Ralph Trautmann, who went to Europe in June last, is expected to return on the 15th of next month.

An assignment has been made by D. S. Carraway, the publisher *Wilson Siftings*, Wilson, N. C.

G. A. Wilson, paper-hanger, &c., Wilkes-barre, Pa., is dead.

William Farr, stationer, Brandon, Manitoba, has been burned out.

George Baker, publisher of the *Herald*, Stamford, Conn., has sold out to B. F. Ashley.

The insurance on the burnt Hurlbut Paper Mill, at South Lee, Mass., has been adjusted at \$58,000.

An execution has been issued against H. T. Barbour, publisher, of Smithport, Pa., to satisfy a judgment of \$210.

Wills & Wilberger, stationers, Memphis, Tenn., have made an assignment; liabilities about \$15,000; assets about the same.

Henry Cohen, of the firm of Keyes, Walter & Co., dealers in fancy goods, Portland, Ore., has retired. The business will be continued by W. Keyes.

PROPOSED REDUCTION IN BRITISH POSTAL TELEGRAMS.

A Treasury minute relating to the proposed reduction of the minimum charge for telegrams to 6d. has just been published as a Parliamentary paper. The Postmaster-General finds that if orders were now given for the additional plant and other arrangements required, the reduction might be made on October 1, 1884. An expenditure of £500,000 in new main lines of telegraph and other works will be necessary. Were free addresses to be abolished, and a halfpenny charged for each word, including the address, the minimum charge being 6d., the loss of income during the first year would, it is estimated, be £170,000. Were the receiver's address to be free and that of the sender to be charged for on the scale of 6d. for the first five words and 2d. additional for each subsequent five words, the loss of income would be £270,000. Were this latter scale to be adopted, with both addresses free from charge, the loss of income would be from £500,000 to £625,000. This latter plan would, it is considered, involve too heavy a charge upon the public purse. A decision on the first two methods is reserved, but meanwhile general authority has been given by the Treasury to the Postmaster-General for the necessary preliminary outlay. A sum of £200,000 is to be expended during the current year, and a supplementary estimate for this amount will be presented to the House of Commons.

A TRADE SECRET.

There is no branch of industry connected with the stationery trade, which it is more difficult for an outsider to acquaint himself with, than the manufacture of playing cards. To the uninitiated this business seems to be simple enough, yet there is such mystery about it as to excite even the interest of the incurious. Whatever this mystery may be, manufacturers absolutely refuse to disclose it to the public, as they do not like the idea of giving the secret of their business away. Perhaps, after all, it is no secret.

"I am sorry," good-naturedly said one of the leading manufacturers of playing cards to a representative of THE AMERICAN STATIONER, as the latter pressed him for permission to go through his establishment for the purpose of getting the points for a descriptive article on the playing card industry, "that I cannot grant your request. We never permit outsiders to become acquainted with our methods of manufacture—not even those in the trade, not connected, of course, with our own establishment. Every manufacturer has methods peculiarly his own. With the exception of an ordinary printing press even the machinery used by him differs in many essential features from that of other manufacturers. He has patents which no one else can use without rendering himself liable for damages for infringement. The manufacture of playing-cards outside of my own establishment I have as little an idea of as yourself. No, my dear sir, let me dissuade you from your notion of learning the secrets of the playing-card manufacture, for I assure you it will be impossible to succeed in any attempts you may make in that direction. I speak not only my own sentiments, but those of other manufacturers."

A dealer in the playing-card business, in speaking of the secret methods pursued by manufacturers, said:

"The gist of the matter is this: The trade in playing-cards is comparatively limited, and manufacturers have all they can do to keep out competitors. The business already is pretty well divided up, and there seems to be a mutual understanding between manufacturers to keep their methods of manufacture a secret. This acts as a sort of protection. So strictly do manufacturers act upon this understanding that all of the implements and machinery used by them are made in their own establishments."

Macrame thread can now be had in various shades of olive, gold, red, maroon and other popular colors, and in several grades of fineness; so that it is now possible to use it for trimmings on jute and other fabrics.

FOR SALE—THE BUSINESS OF THE LATE Chas. A. Burnham, of Norwich, Conn., who died July 4th. This prosperous first-class Book, Stationery and Paper Hanging Store, to a man with a proper knowledge of the business, is an extraordinary good chance. It is well established and thoroughly known in all the adjacent manufacturing villages in the neighborhood, and bears an enviable reputation. It is now, and has been for years, returning a handsome income. The subscriber wishes to sell it without delay. In the meantime the stock will be kept complete and every endeavor made to keep it up to the high standard of its former owner. For further particulars, address WM. C. LANMAN, Administrator, Norwich, Conn.

FOR SALE—BOOKS, STATIONERY, WALL Paper and Fixtures; the best of locations, in one of the richest, steady-growing cities of now 65,000 inhabitants in the West; stand at the same place for twenty years. Address G., care American Stationer.

WANTED—AN ACTIVE PARTNER, WITH A small capital, in a well established Stationery, Blank Book and Printing business, in a manufacturing city in Eastern Massachusetts. Only those who thoroughly understand the Blank Book or Printing business, and can successfully solicit trade, need apply. Address C. H. S., office of American Stationer.

DEVOTED TO THE INTERESTS OF THE

Stationery and Fancy Goods Trades.

WEEKLY---\$2.00 PER ANNUM.

Single Copies - - - 10 Cents.

NEW YORK, THURSDAY, JULY 26, 1883.

Advertisements cannot be received for insertion in the current week later than 12 m. on Wednesday. The charge for advertising is 25 cents a line, each insertion. Special terms for standing and displayed advertisements to be had on application.

This journal aims to be a medium of information for and a representative of the interests of every one connected with the stationery and fancy goods trades. It contains a full and trustworthy survey of the market for stationery in this country, in all cases giving the actual prices at which goods can be bought of Importers and jobbers in this city, together with a detailed account of novelties in the trade, patents relating to stationery, and current items of interest. A review of foreign markets and accounts of movements abroad will also be furnished, and no pains will be spared to make THE STATIONER a thorough and complete exponent of the trade.

Subscription and postage for Great Britain, per annum..... 12s.

Any information our readers may wish to obtain shall be cheerfully given, and prompt replies will be made to all inquiries addressed to us on any subjects of interest to the trade.

Communications on all trade matters are earnestly solicited. Address

Subscribers to THE STATIONER can be supplied with the best cloth binder in the market. Deliverable at the publication office. Price, fifty cents.

Readers of this paper who avail themselves of the information obtained from its columns, by advertisement or otherwise, are requested to notify their correspondents of the source of their information.

THE paper makers met at Saratoga yesterday. Our correspondent sends a brief summary of their action up to the time of mailing, and we give it to our readers.

THE export movement seems to have taken a new hold upon the minds of the paper makers. Probably they now regret that they relaxed their efforts in this direction two or three years ago. Recovering lost ground is disagreeable, but it had better be done, and done quickly. The stationery trade might as well take warning and note the fact.

THE English papers are again urging the establishment of an international copyright between this country and Great Britain. It seems to us that the greater anxiety is all on their side, and we cannot but remark, without any discourteous intent, that when our English friends persist in favoring the adoption of any kind of international comity of their own motion, we may be sure that they expect the advantage to be chiefly, if not almost, entirely on their own side. In all measures of commercial importance in which Great Britain evinces remarkable interest, we must take all propositions into a great deal of consideration. Whatever may be offered to the parties with whom she seeks to make conventions it is best to apply the principle of "Timeo Danaos." It is alleged, we perceive, that the principal authors in America have determined to cut loose from their publishers, and, for that matter, from their readers in the United States, with the purpose of appealing to Congress for protection to authors, irrespective of nationality, and that "much time and labor have been expended in maturing the new scheme, of which the programme will soon be made public." We have not yet heard that this programme has made any particular headway, and we don't suppose that very great progress will be made in the direction sought.

THE Japanese have shown their aptitude at adopting the manners and customs of the western nations. The latest instance of this that we have heard of is the fact reported by Lieutenant Shore, R. N., in a paper appearing in the *Journal of the Society of Arts*, that the Japanese have taken to reproducing the works of foreign authors. A case cited is that of a Chinese poet at Ningpo, who, being of considerable repute and withal his own publisher, made a livelihood by printing and selling his productions. But the unfortunate Chinaman has run foul of Japanese pirates and his business has been nearly ruined by cheap editions printed from metal types in Japan. As the Chinese publications are printed from wooden blocks, cut out by hand, it will be seen that the Japanese publishers have a decided advantage, particularly in adopting the improved forms of reproducing by stereo or electro plates. Our first impulse on noting

this occurrence was one of sympathy with the unfortunate author, but, upon consideration we are led to deplore his want of enterprise. Had he in the first instance printed his books from metal plates and then retailed them at the price of wood engravings, he could have amassed a fortune before his Japanese competitors had "got the protuberance on him." Now, the best thing that he can do is to retire to some remote point in his own country out of reach of Japanese invasion, and utilize the suggestion that we have given him. Perhaps, however, this may be easier suggested than put in practice. If the remote provinces of China have a different dialect and read a different kind of Chinese, he will have to prepare a translation, but he can reproduce from his MSS. all the same. In this case the matter of principal interest is the circumstance that the Japanese have shown a quickness of perception and an adaptability which challenges attention. It is suggestive to Europeans and Americans, and shows that we must not rely upon the non-progressiveness of the Eastern people. There is more in this and in other like recurring instances than may occur to the casual observer, and therefore we call attention to it, and leave our readers to reflect upon it and draw the application.

THE OLDEST BANK-NOTES.

The oldest bank-notes are the "flying money," or "convenient money," first issued in China, 2697 B. C. Originally these notes were issued by the Treasury, but experience dictated a change to the system of banks under government inspection and control. A writer in a provincial paper says that the early Chinese "greenbacks" were in all essentials similar to the modern bank-notes, bearing the name of the bank, the date of issue, the number of the note, the signature of the official issuing it, indications of its value in

figures, in words, and in the pictorial representation of coins or heaps of coins equal in amount to its face value, and a notice of the pains and penalties for counterfeiting. Over and above all was a laconic exhortation to industry and thrift: "Produce all you can; spend with economy." The notes were printed in blue ink on paper made from the fibre of the mulberry tree. One issued in 1399 B. C. is preserved in the Asiatic Museum at St. Petersburg.—*Ptg. Times and Lith.*

THE AMERICAN PAPER MAKERS' ASSOCIATION.

[FROM OUR SPECIAL CORRESPONDENT.]

SARATOGA, July 25, 1883.

The sixth annual meeting of the American Paper Makers' Association was held here to-day, and a very full attendance, larger perhaps than on any former occasion, was noted. One feature of the meeting was the diversity of paper making interests represented, thus indicating that it was more particularly a gathering of the trade than heretofore. The lateness of the hour precludes my giving you an extended report of the proceedings now.

President French occupied the chair, and in opening the meeting reviewed the course of trade and suggested several lines of action for the consideration of the members present. He referred to the necessity for making some changes in the form of organization, and touched upon the subject of the export trade, which he urged upon the attention of the association.

The death of the late secretary, Charles O. Chapin, was referred to, and the Hon. Byron Weston, eulogizing the deceased, made a motion for a committee to draft suitable resolutions expressive of the feeling of the trade. This motion was seconded by the Hon. Wellington Smith, and carried.

The committee subsequently presented resolutions which were adopted.

Several amendments to the constitution were proposed and adopted.

Reports from the several divisions were called for and read.

A paper on the export trade was read by Mr. Woolworth. M.

In the course of a lecture delivered on the 10th inst. by Oscar Wilde, on his recent tour in America, he made the following reference to American journalists: "The steamer in which he was conveyed," he said, "anchored outside New York on a wild, stormy night; yet, there suddenly leaped on board from a small steamer what I can only suppose to be the literary pirates of America coming to seize the first manuscript on board. These turned out to be the first interviewers. They at once came to me, and asked me my opinion concerning America. Not having seen it, I was entirely unbiassed on the subject, and I gave, on the whole, a very flattering account of my experience of America as far as it had gone. Now, that I have seen it, it is more difficult."

Market Review.

OFFICE OF THE AMERICAN STATIONER,
WEDNESDAY, July 25, 1883.

THE MONEY MARKET.—The money market continues easy. The rates for call loans remain 2@3 per cent. while the discount rates of prime mercantile paper are 4@6 per cent. as to date of maturity. At the other centres there is also an abundance of loanable funds, for which, however, the demand is light, owing to the quietness of trade and the falling off in speculation. The share market continues in a dull and generally depressed condition.

There seems to be no change in the feeling regarding the immediate future of the market, the prevailing opinion appearing to favor an uncertain tone with a tendency to weakness for some time to come. Railway mortgages are in full sympathy with the share list, while government bonds have yielded a little to buyers, under a pressure to sell. The foreign exchange market continues dull, and rates are again fractionally lower.

THE PAPER MARKET.—Here and there are to be seen instances of a little more activity in the centres of the paper trade, but the movement is of a spasmodic character, and lacking the steadiness and vim of a season of activity. Some of the trade have been looking forward somewhat hopefully to the meeting of the paper makers, at Saratoga, hoping to derive from it a means of relief in the adoption of such measures as will take away the depression under which the market is laboring. The position of values has changed little, if any, during the period covered by our review. In the line of manillas the recent advance of $\frac{1}{4}$ c. by one prominent manufacturer is likely to be followed by others to whom a demand for goods and the increase of cost in production justifies an advance in price. It is currently talked about in the trade that the prices of straw boards are being cut, and that dealers find a way to scale quoted prices about \$5 per ton, and this, too, in the face of their strict rules of organization.

THE STATIONERY MARKET.—Trade in stationery, though still dull, has improved somewhat during the past few days. Many buyers have come to town and dealers and manufacturers have been doing a fair amount of business. The improvement has been sufficient at least to meet their expectations of an unusually good fall trade. There are some specialties, however, that have not overcome the effects of midsummer dullness, being about the same as reported last week. The trade in some classes of books is very active, especially in subscription books, the publishers of which are taking advantage of the leisure afforded teachers by the closing of schools, to offer special inducements to them to push their line of goods. The trade in toy books is never very brisk at this season, but is very fair, and promises well for the fall when it is at its height. The demand for photograph goods is also very brisk just now, and several novelties in this line will be put on the market in a few days. The trade in fancy leather and novelties of this class of goods is reported to be fair and steady. Many new styles of papeterie goods have appeared in the market during the past week, and they are commanding a brisk trade. These goods are very fine and attractive, and much better in quality than they have ever been before. The trade in gold and steel pens is uniform and steady.

BLACKHALL'S PATENT IMPROVED MACHINERY

FOR THE MANUFACTURING STATIONERY TRADE.

— **BLACKHALL'S** —

PATENT POWER

PERFORATING MACHINE

IS NOW IN USE IN MOST OF THE LEADING HOUSES IN THE TRADE.

Its great rapidity for straight or stubbed work can be judged from the fact that a ream of Medium, with five lines of Perforating, can be finished in 7 minutes! It makes a clean, round hole, and will cut from Tissue-Paper to Card-Board.

THIS MACHINE HAS MET WITH THE APPROVAL OF ALL WHO HAVE USED IT.

TRADE OPINIONS.

"We could not keep house without it."—GEO. D. BARNARD, St. Louis.

"After two years' constant use, on all classes of work, we have had to replace but three pins. To-day it is in perfect order."—LEVISON & BLYTHE, St. Louis.

"By using your machine our perforated work costs almost nothing when considered by the ream."—BOORUM & PEASE, New York.

"We recommend it to the trade. Just the machine long-looked for."—SHORT & JORMAN, Cleveland, Ohio.

"Your Rotary works very satisfactorily."—WESTERN BANK NOTE Co., Chicago, Ill.

"After four years' use, on all classes of work, we consider it as good as when we got it. It is the best machine we ever saw."—BROWN BROS., Toronto, Ont.

"Your Round Hole Perforator cannot fail to meet the wants of the trade. We recommend it as a first-class machine."—STEPHEN GREENE, Philadelphia.

"We are gratified far beyond our expectations. We could not be better satisfied. Your Perforator is a beautiful piece of mechanism."—WM. A. JOHNSTON & Co., Pittsburgh, Pa.

"We fully endorse everything said in their praise by other firms. They very soon repay themselves."—WATERLOO & SONS (Limited), London.

The foregoing are a few of many Testimonials of similar import.

Blackhall's Patent Improved Machinery for the Mfg. Stationery Trade.

Blackhall's RULING Attachment.

Can be applied to any sort of Striker, and will give twice the usual results for same labor, saving from fifty to seventy-five per cent.

OPINIONS.

HUGH R. HILDRETH PRINTING Co., St. Louis, on Hickok's Striker.—"It has saved us time and money; we have every reason to be satisfied."

BEATTY & STEVENSON, New York, on Gouptill's Striker.—"Easily adjusted; perfect accuracy; indispensable; send us another."

BROWN BROTHERS, Toronto, Canada, on Hickok's Striker.—"One machine, with attachment, does work of two without it."

GEO. D. BARNARD, St. Louis, on Collins' Striker.—"It does all you claim; it effects a saving of one hundred per cent."

The foregoing are a few of many Letters of similar import.

TRADE-MARKS IN FOREIGN COUNTRIES.

BY JAMES A. WHITNEY, COUNSELOR-AT-LAW.

WRITTEN FOR THE STATIONER.

VII.

BRAZIL.

Brazil protects the trade-marks of persons domiciled in the country and foreigners having in Brazil an establishment of commerce or industry. Foreigners who do not possess branch houses or manufactories in Brazil receive no benefit from the law, except in cases where treaties of reciprocity exist between Brazil and their own country. But wherever diplomatic conventions have constituted reciprocity for Brazilian marks, citizens of such country will receive like protection in Brazil. The formalities do not differ materially from those in European countries.

Foreign trade-marks are registered at the office of the secretary of the Tribunal of Commerce at Rio de Janeiro. Substantially the same definitions of a trade-mark inhere in Brazilian usage as in France and other countries. Where several marks essentially identical with each other are registered by different persons, the applicant showing the oldest use of the mark is conceded to be the rightful owner. Where prior use is not proven the right of property is decided by the priority of the application.

The legal effect of the registry continues for fifteen years which may be renewed for another term of the same duration. In case of the sale of the establishment from which the trade-marked goods emanate a new registry is necessary.

Infringers are punishable by imprisonment of from one to six months and by a fine of from five to twenty per cent. of the amount of damages caused to the parties injured.

A distinction is drawn between the counterfeiting of a mark which amounts to a duplication, and an imitation of the mark which implies some change but not sufficient to avoid deceiving the purchaser. These latter cases are punished by imprisonment of from one to three months and a fine of from five to twenty per cent. of the damages caused. Damages pure and simple may also be collected by the party injured.

Transfers of trade-marks rest upon the same foundation as transfers of other property under the common law of Brazil. They should be registered before the same tribunal or chamber of commerce where the original application is filed.

CHILI.

Chili provides for the protection of trade-marks both to residents and foreigners. The registry of the marks is inscribed on the register of the office of the National Society of Agriculture. The papers must set forth the name of the proprietor, his business and his domicile, the locality of his manufactory and the branch of industry or commerce for which the mark is designed; these must be accompanied by a facsimile of the mark.

The Chilean definition of a trade-mark is somewhat vague and is comprised under the two heads, trade-marks applied to articles as products of industry, and marks applied to objects of traffic, the one relative to marks indicating ownership, as concerns the manufacturer, and the other that of distinctive ownership on the part of the dealer. The registry must be renewed every ten years. In default of this the mark becomes public property at the end of any given period. The applicant must indicate to

which of the aforesaid categories his mark is designed to belong.

Infringers are subject to certain sections of the penal code. Merchandise bearing an infringing trade-mark is confiscated to the benefit of the party injured, and the tools or utensils employed in the manufacture of goods thus falsely marked are destroyed.

The transfer of a trade-mark must be inscribed on the register, and a public advertisement during ten days must inform the public of the cession of the mark.

Thought is the first faculty of man; to express it is one of his first desires, to spread it his dearest privilege.

JAMES A. WHITNEY,
Solicitor of United States and Foreign Patents and Trade-Marks,
No. 140 Nassau St., New York City.

American, Canadian, British and Continental Patents obtained for Inventors on favorable terms, and in the shortest possible time. OLD CASTINGS.

The art of casting in metal is so dependent on the clay model from which the mold is obtained that it might almost be assumed *a priori* that improvement in plastic art would necessarily lead to a great development of metallurgical skill, and accordingly we find two celebrated Samian artists, Theodorus and Rhæcus, credited with the invention of casting in bronze at a date probably not many years distant from that of Butades.

When ancient writers speak of casting in metals as the invention of the two Samian artists, we must understand by this statement that improved kind of casting in which the metal is poured between the mold and a central core, and which is called hollow casting, in contradistinction to the more primitive process in which the molten metal entirely fills the mold, and which is therefore called solid casting.

We know that this clumsier solid casting was familiar to the Egyptians, the Phœnicians, and the Assyrians, centuries before the time of Theodorus, and we find it used for the handles of large bronze craters in Mycænæan tombs, and in small figures such as are found in the lowest stratum of the soil at Olympia. It was, however, unsuitable for statues on a large scale on account of its great weight and cost; therefore, it was that most Greek statues in bronze were originally made of separate pieces of metal hammered out on a mold and then nailed together on a wooden core.

Such figures, called *sphyrelata*, or hammered work, were still extant in Greek temples in the time of Pausanias. The invention attributed to Theodorus and his brother substituted for this primitive kind of metallurgy an easier and surer process, which, after having been brought to an extreme perfection by the Greeks, has been handed down to modern times with little, if any, improvement in its technical processes.—*Exc.*

BEATING AND INLAYING GOLD.

The skill in beating out and inlaying gold and other metals, to which Homer so often alludes, is attested by the remains found in the tombs at Mycenæ, of which perhaps the most Homeric are the designs on the scabbards of swords, which at the time when Dr. Schliemann's book appeared were too much incrustated with rust to be made out, but which have been recently engraved and described by Mr. Koumanoudes. The subjects represented on these scabbards are a lion hunt, a lion attacking a herd of deer, winged monsters, fish and plants. The manes of the lions are of red gold, their bodies of paler gold, probably electrum. So with the flowers—the stalk, leaves and branches are of gold, the calyxes of electrum.

The same distinction of color is observed between the sea and the fish swimming in it, and also in representing the birds—in which the color of the blood flowing from their wounds is discriminated from the color of their feathers. Further variety is obtained by the use of enamel in portions of the background. In the description of the plowing on the shield of Achilles, the poet says that the furrow behind the plowman was black, as plowed land is, although being of gold. Probably to produce a change of color a dark enamel, such as that found in the scabbards, was combined with the gold.

Homer, therefore, so far from inventing the shield of Achilles out of his imagination, as was formerly contended, derived many details both of subject and technical execution from works of art which he had actually seen, and which inspired him with the conception of what a work by the god Hephæstos himself might have been. So, again, in regard to the choice of subjects on these scabbards, and throughout the Mycænæan antiquities, they prove that when Hesiod describes the crown of Pandora as ornamented with "all manner of creatures such as the sea and the land breed," he borrowed these ornaments from the art of his time.—*Ex.*

"As quick as lightning" is a phrase well chosen to illustrate an inconceivable rapidity, but of those who use the expression probably very few appreciate its full meaning, for Sir Charles Wheatstone has shown that a flash of lightning lasts less than a millionth part of a second. This is vastly more rapid than our perception of the flash, as at least one-tenth of a second must elapse—according to Professor Swan—before our sluggish sight can take in the full effect of the light. On account of the slowness of our perception we never see the light at its real intensity. Professor Tait has suggested that the full brilliancy must be in some degree comparable with the sun, as Wheatstone's and Swan's data prove that the apparent brightness of the landscape as lit up by a lightning flash is less than one-hundred-thousandth part of what it would be were the lightning permanent. The apparent brightness, it should be mentioned, was shown by Swan to diminish in about the ratio borne by the length of time the flash lasts to the time required for us to perceive it.

NEW LIST AND DISCOUNTS MARCH 1, 1882.

TO THE TRADE.

GENTLEMEN:—Annually, since 1867, we have offered our New Samples of **CHRISTMAS CARDS**, and yearly have we been encouraged to renewed efforts.

Our permanent staff in the Designing Rooms has been steadily increasing, and every issue of New Patterns is greater in number than that of the previous year.

Competitions in design among unskilled amateurs, and lavish advertising of cards produced from their drawings, have only resulted in

MARCUS WARD'S CARDS

BEING MORE IN DEMAND THAN EVER.

Again we have to announce the completion of our **DESIGNS** for the **NEW SEASON**, all printed at OUR OWN WORKS. We think our artists have surpassed themselves in novelty and beauty of design. The quality of our work is well-known, and the variety and value leave nothing to be desired. Sample-Books now in our Travelers' hands.

Yours respectfully,

MARCUS WARD & CO.,

Striking Head Lines

Are used to call attention to the fact that this is an advertisement of the **CHICAGO, MILWAUKEE & ST. PAUL RAILWAY**.

Its **EIGHT Trunk Lines** Traverse the best portions of **NORTHERN ILLINOIS, WISCONSIN, MINNESOTA, DAKOTA and IOWA**.

Located directly on its lines are the cities of **CHICAGO, MILWAUKEE, LACROSSE, WINONA, ST. PAUL, MINNEAPOLIS, MADISON, PRAIRIE DU CHIEN, MASON CITY, SIOUX CITY, YANETON, ALBERT LEA, ABERDEEN, DUBUQUE, ROCK ISLAND, CEDAR RAPIDS, and COUNCIL BLUFFS**, as well as innumerable other principal business centres and favorite resorts; and passengers going West, North, South or East are able to use the **CHICAGO, MILWAUKEE & ST. PAUL RAILWAY** to the best advantage.

Ticket offices everywhere are supplied with Maps and Time Tables which detail the merits of the line, and agents stand ready to furnish information, and sell tickets at cheapest rates over the **CHICAGO, MILWAUKEE & ST. PAUL RAILWAY**.

Christmas and New Year Cards

FOR THE SEASON 1883-4.

Now ready, Pattern Books of the above Fine Art Publications, containing a rich profusion of choice and elegant patterns, Chromo-Lithographed in the highest style of Art, after original designs by eminent Artists. N. B.—Shown by Leading Jobbers in the States.

EMBROIDERY SERIES.—CHROMO-LITHOGRAPHED ON THE FINEST WHITE SATIN. These Satin Chromos, which have now for many years enjoyed a high reputation, this year surpass all previous productions in the same line. The large Satin, No. 646, "BIRDS AND FLOWERS," is a veritable work of art, and would form an excellent centre-piece in the most costly embroidery. In the case of the smaller Satin pictures, the prices have been reduced with the view of extending their use by ladies for every purpose of ornamental needle-work.

THE ANTI-STYLOGRAPH.

(Hearson's Patent, U. S. A., January 10, 1882.)

A SELF-FEEDING RESERVOIR PENHOLDER, FITTED WITH A NON-CORRODIBLE NIBBED PEN.

Pocket Size (4¾ in. long), \$1.00 Retail; Desk Size (6 in. long), \$1.50 Retail.

THE ANTI-STYLOGRAPH is a Pen which requires no dipping, but is ready for instant use without adjustment, and may be carried in the pocket with perfect safety. It writes with a nibbed pen, renewable at pleasure, with fine, medium or broad point, to suit all writers. It is easily refilled, and holds sufficient ink for several days' use. Any ink may be used.

N. B.—It is not a Stylograph or point-writer, but a true Pen, and preserves all the usual characteristics of the handwriting; it may, therefore, be used for short-hand and signatures.

Pens for Refilling, with Fine, Medium or Broad Points, 40 cents per Box, Retail.

FITTED WITH IRIIDIUM-POINTED PALLADIUM PEN. Pocket Size, \$2.50 Retail; Desk Size, \$3.00 Retail.

The Palladium Pen is as flexible as Steel and as durable as Gold; and, like the latter, is specially adapted for use with acid copying inks.

Wholesale Agents for the sale of the Anti-Stylograph in America, to whom the Trade are respectfully referred for particulars as to price, &c.:

A Revolution in Stylographic Pens. The Latest Improvement.

THE KERNER.

\$1.

It is constructed on strictly scientific principles, and being devoid of the complications which exist in old styles is less liable to get out of order. It has no springs to be affected by the action of the ink. The reedle is rigidly fixed to a FLEXIBLE air tube extending entirely through the barrel, which when writing is constantly vibrating throughout the entire length of the barrel agitating the ink and causing a perfect flow to the point. It is unequalled by any writing instrument of the kind ever offered for public favor, and gives entire satisfaction to all who use them. It is constructed of the best material throughout, and the point is of platina alloyed with iridium. Prices: No. 1, Plain, \$1; No. 2, Engraved, \$1.25; No. 3, Gold Mounted, \$1.50; No. 4, Entire Gold Cap, \$3; No. 5, Mottled Ruling Pen, \$1.50. Send for Circulars.

STEAM PRINTING WORKS, AMSTERDAM.

When People are Traveling Comfort and Safety are the

TWO PRINCIPAL OBJECTS IN LIFE!

COMFORT!

"The Erie is by far the smoothest road I ever traveled on, either in this country or in Europe; and I consider it the perfection of railroad traveling. With the clean, light and airy coaches, polite attendance, freedom from dust, noise and jar, we reached Chicago hardly realizing what a long journey we had performed. And then such a breakfast as we had the morning after leaving New York, at Hornellsville, is certainly deserving 'honorable mention.' Such a table as they have there, with a full half an hour to enjoy it, is enough of itself to attract passengers."—*Ex. U. S. Minister, E. B. Washburne.*

SAFETY!

"5,491,441 Passengers were carried over the Erie Railway in 1881. Of this vast number, only two were killed—one by falling from the platform of a car on which he insisted on standing, and the other in jumping from a train while in motion."—*New York State Engineer's Report for 1881.*

No better evidence than the above need be wanted that both of these objects are secured to the traveler who purchases his ticket over the

PHILADELPHIA,

— MANUFACTURERS OF —

**GLUCINUM PENS.**

NOTICE TO THE TRADE.—We call attention to our circular letter, dated June 10 1883, which has been directed to our patrons and principal stationers in this country, containing some very important information to consumers of our celebrated Glucinum Pens. We confidently claim that they are the best series of writing pens ever placed before the public. The demand for them is constantly increasing on account of the uniformity, smoothness of points, and durability over all other steel pens. This Trade-Mark and the word Glucinum are copyrighted and registered at the Patent Office, at Washington, D. C., United States of America, and every box has a fac-simile of our signature, so beware of unscrupulous parties misrepresenting us.

CARTER, DINSMORE & CO., BOSTON and NEW YORK

BYRON WESTON,

DALTON, MASS., U. S. A.,

HAS BEEN AWARDED THE

GRAND PRIZE GOLD MEDAL

AND RECOMMENDED THE

Medal of Honor and Perfection

At PARIS, 1878,

This being the HIGHEST and ONLY AWARD given for

LINEN RECORD & LEDGER PAPER

Also, the only Gold Medal given for Ledger Paper at the Adelaide, Australia, Exhibition, 1881.

— A SPECIALTY. —

THIS Paper has received THE HIGHEST PREMIUM over all
others from the Cincinnati Industrial Exhibition, Massachusetts
Charitable Mechanics' Association, Franklin Institute of Philadelphia,
Louisville Exposition, Medal and diploma from United States Centennial
Commission, Medal of Progress American Institute, 1877, and Medal of
Improvement and Progress, Boston, 1878. Its

PRINCIPAL ADVANTAGES

are as follows:—1. It contains more LINEN than any other Ledger
Paper, has a longer fibre, and is, consequently, tougher. 2. Having a
harder and better body, it frays less in erasure, so that by simply using
the rubber after the eraser, the ink is prevented from spreading. 3. It is
more uniform in Weight Color and Finish. 4. It never cockles if properly
bound. 5. Its chemical action upon ink is such that it both writes and rules
up better. For proof of the foregoing, refer to a large number of Sta-
tioners, Bookbinders, Bookkeepers, and Recorders, who have given it,
after a severe test, the preference over all others. This paper is Double
Sized, and will stand any climate or the most acid of fluid inks.

Send for sample sheet, ERASE and REWRITE FOUR TIMES on same spot.
Each sheet is water-marked with name and date.

Correspondence.

BITS FROM THE OHIO.

[FROM OUR REGULAR CORRESPONDENT.]

CINCINNATI, July 31, 1883.

Autumn is nearing and the Exposition days are at hand. Our local jealousy is naturally excited here by the Exposition which our neighbor, "The Falls City," best known as Louisville, has worked up. Just think of thirteen to fifteen acres of ground and one building 900 feet long. Why, we haven't the vacant ground within the heart of this city for the like of that. We should have had it covered with Exposition buildings had it been at our disposal. We must condemn and tear down if we ever wish to extend our Exposition facilities. But our Kentucky neighbor's airs are not robbing anybody here of sleep. The papers here are not printing a word about the Louisville big show. That is only a case of tit-for-tat. The tat is a thing of the past. Our commissioners say, "Well, we have the population around us from which to draw patronage, and we have the hotel accommodation," which is as much as to say, "That is what some one else hasn't." Leaving all bantering alone, the Exposition Commissioners here are straining every nerve to make this year's display, which opens on September 5, a great one. A feature for public entertainment, which will draw Cincinnatians, will be the introduction of musical soloists every week. Arbuckle was engaged for one week, but his death broke that off. The fête is to be opened with three nights of Mardi Gras display in the preparation of properties, for which the professional Mardi Gras property men, from New Orleans, have been working for several weeks. But this is too much exposition and too little stationery, only expositions are always good for stationers. One of the attractions at this display will be a full lithographing establishment with presses printing off in colors views of Cincinnati during the flood, which they will be permitted to sell. The only sales permissible under the rules are of products made in the Exposition. There will not be much still-life display of stationery by Cincinnati exhibitors. A Pennsylvania firm will exhibit a wire pamphlet binder taking the wire from a reel. There will doubtless be printing presses running and other work in the stationery line which has not shown surface indications yet.

Coming to business men and matters in THE AMERICAN STATIONER'S Cincinnati household,

the chief personal news is that John Holland, the gold pen manufacturer, had a pretty rough case of cholera-morbus last week. Everybody will rejoice at the news that he is on his feet again. That ailment has been epidemic here during the past two or three weeks, and many cases of it have been fatal. John Holland is selling East on orders increasing in numbers and in size. He filled numerous orders for gold pens and pencils in New York during last week, and his business pencil is taking the country.

John Sheppard, of A. H. Pounsford & Co., has returned from the East, and after an attack of pneumonia is at his post again.

Louis Snider's Sons are busy arranging for the occupancy of the addition to their commodious quarters.

Van Antwerp, Bragg & Co, have found that more steam and machinery will be required to rush their blank-book work so as to keep pace with the demands of the trade for their products in this line. The demand for their school books and school stationery, which is coming in from the South, speaks well for progress in that region, and is a very pleasant experience for the house. Texas is notably reaching out to this house for the Promethean light for its youth.

Snider & Hoole's sales are a sort of barometer of the book and stationery trade for the season, and they augur well for fall trade in business in which brain acts a most conspicuous part.

Charles Stewart keeps things moving, as any one may see who will stand at Duhme's corner during business hours and see the ever-changing barricade of boxes and throngs of droves and wagons in front of his premises on Walnut street. Taking a look at the interior of his ware and sales rooms, one would think that the elevator kept so continuously and busily at work would be footing up accounts.

J. R. Mills & Co. never fail to show signs of activity and thrift, for the head men of the firm seem to be always occupied receipting bills or scanning orders.

W. B. Carpenter & Co., whenever they have a surcease from attending to customers, employ themselves inventing some more attractive ways of displaying their goods or discussing some novelty for their custom-made envelopes.

At George Stevens' the proprietor and his assistants are kept busy meeting the wants of buyers. Mr. Beeler and Mr. Johns look after the gentlemen and the scholars, and a large corps of ladies are in attendance to wait upon comers and customers of all sorts.

In all of the establishments and shops here there appears to be an excellent summer trade. The sale of books is fairly good for the season.

and of fancy and staple stationery it is only a little short of extraordinary.

General trade is good; money is easy, and all lines of manufacturing are not only active to the extent of their facilities, but, in many instances, they are increasing their facilities. The report from harvested crops is excellent, for while the quantity is a little short, the quality is very superior. The promise for crops not yet matured could scarcely be better. If no drawback intervenes, the prospect will brighten with the approach of autumn. PRINCE WILLIAM.

ELECTRIC LIGHT IN PHOTOGRAPHY.

The taking of photographs by the aid of the electric light in lieu of sunlight is no longer a matter of experiment, but was successfully accomplished in this city a short time ago, and the result is shown in a photograph of Madison Square Theatre just published by E. & H. T. Anthony. The illumination was supplied by thirty arc lights (Brush system), which were suspended at the back, the sides and the front of the stage as well as in the auditorium. The actors were in no wise made optically uncomfortable in the glare of the lamps, and they state that the effect on their eyes was like diffused daylight. The negative was made by an exposure of thirty seconds. The development was effected by oxalate of iron, yielding a soft, yet brilliant negative, thoroughly clear in the shadows. The result obtained seems to demonstrate, beyond a doubt, the fact that the electric light can be used in photography with the same effect as sunlight.

A SUBSTITUTE FOR STAMPING PAD.

A. Vomacka gives, in a Bohemian journal called *Rundschau*, the following directions for making a color-mass for use with a stamp to take the place of ink and pad:

Thirty or forty parts of crude anhydrous glycerine are saturated warm with any desirable blue, red, green or black soluble aniline or eosine dye. Ten parts of fine glue are softened in water for twenty-four hours, the water drained off, and the swollen glue quickly dried between linen cloths and then melted on a water bath in the glycerine, the larger or smaller quantity being taken according to the kind of glue.

The water that is introduced in the swollen glue is evaporated without too much stirring, which would cause air bubbles and make it foamy. It is then cast in tin boxes.

If some air bubbles are noticed after it has been standing a while, they can be removed by scraping the surface with a stiff card.

The uniform mass of glue and color repre-

sents the stamping pad when it is saturated with ink. But instead of requiring the addition of ink put on from time to time, it is always ready for use, saves ink, and saves the stamp from wear. The mass is elastic, so that the stamp can be pressed down quite hard on it. If this mass should be injured accidentally, it is only necessary to simply warm it and let it cool again. If it gets hard on the surface from not being used for a long time, and hence gives an imperfect impression, it is only necessary, to restore it, to wash it off carefully with a sponge dipped in warm water, or vinegar and water.

This stamping pad is best adapted to rubber stamps; but it can also be employed for a metal stamp if the surface of the latter is roughened with sand paper or emery to make it take the ink.

SCHOOL-TAUGHT HANDICRAFTS.

The subject of technical education in its various phases continues to excite the attention of thoughtful minds, but in nearly all the recent discussions of the question in its details and methods of very wide diversity of opinion is conspicuous; but perhaps this is to be expected, in view of the many considerations that have to be taken into account. On the one hand, we have a class of theorists who demand that the State, as the guardian of society, should come forward and incorporate into the public school system such a course of instruction in the technique of these several industrial arts as would enable the pupil to acquire the art of self-support when he leaves the institution. In other words, the plan is to have the pupils in these public schools taught some handicraft in connection with the regular course of mental studies; and it appears from the last recent report of the Bureau of Education that something has already been accomplished in that direction, in deference we are disposed to think to a prevailing popular sentiment on the subject rather than to the dictates of sound principle. That is to say, the Board is doing the right thing in a wrong way.

The idea of equipping the pupil for bread winning in after life is naturally a taking one, inasmuch as the end to be obtained is one to be universally commended; but there is a disposition to underrate or overlook the mischiefs which must inevitably result from an injudicious enlargement of the functions of the State in that direction. Those functions, it is scarcely necessary to remark, are already much over-weighted, and, in our judgment, no pretense of accomplishing a great public good should be permitted for one moment to countenance any further additions to them.

It is admitted that there is a sad lack of opportunity for the training of youths to industrial pursuits, but the responsibility for this rests largely at the door of trades-union hostility to the old system of apprenticeship. In former years, as everybody knows, any number of youths could find places under skilled masters for learning a trade in the only way that it can be properly learned—in the workshop; but the obstructions which these dictatorial bodies have thrown in the way of that system now have practically suppressed it. It is needless to dwell upon the injury that this suppression has occasioned in many ways to the entire circle of American handicrafts, which is now, practically, in the hands of Europeans, more especially the Germans, Scandinavians and Italians. The injury is admitted, but in invoking the State to come to our assistance, let us

beware of making bad worse. It is more than questionable whether a school-taught trade, even if the State undertook the business, could realize the practical benefits expected from it, either to the individual or to society. It does not follow that a youth would ever be employed in the particular trade he had been taught at school, or that he would be disposed to work at all at a business which had been superficially acquired under conditions that were not real. The whole atmosphere about him, its literary associations and sentiments, must tend to impart to him a distaste for downright, systematic manual labor among actual workmen. In the nature of things, as a little reflection must show, it could hardly be otherwise.

But if lost opportunities cannot be restored, and if a school-learned trade is a necessity of the times, we insist that it is not the common schools or any other State institution whatever that ought to undertake it. We can do better than that. Our public school curriculum has been already expanded far beyond its legitimate limits; and, apart from that, it is not a sound principle of political economy for the State to tax one class of people for the benefit of another class. Our industrial system is best off when left to the development which comes of natural methods. We recognize, to the fullest extent, the duty of the State to maintain the public school system, so far as it is indispensable to the masses for the ordinary qualifications of intelligent citizenship; but beyond that—its original limitation—it ought not to be permitted to go. In many of the States, school commissioners, who are usually the offspring of the political machines, are seeking to incorporate the teaching of the industrial arts, with high salaried professors, at the expense of the taxpayers. Technicians are to be added to the foreign languages, and thus the common school of the future is to turn out a race of graduates who will be able not only to read Greek and Latin and the modern languages, but who, *mirabile dictu!* will also be adepts at shoe-making, tailoring, carpentering and what not. Could anything be more grotesquely Utopian? As to ordinary trades, we may venture to express the conviction that the best, if not the only way to learn them, is by serving at them. There are a thousand little things which together are essential to success in these, which cannot by any possibility be learned in the common school, but which must be learned subsequently, and often through failures and bitter disappointments; and it is a question whether any grade of education can equip a student for practical life without this intervention.

If it be not possible to break the assumption of the trades-unions to prevent the rising generation from acquiring a systematic knowledge of some industrial art, save upon such terms and conditions as they may condescend to prescribe, then, by all means, in order to have any industries worth speaking of, let us have technical schools; but let them be maintained as they are in many of the countries of Europe, where they have been eminently successful, by private enterprise. We have a large faith in such teaching, if undertaken in a spirit of enlightened self-interest, by capitalists, merchants and others interested in manufactures and trade, but none whatever if undertaken by the vague and meddlesome instrumentality called the State, which simply means the tax-eating and sinecure-seeking politicians.—*Bulletin.*

Glue soaked in strong vinegar and heated to boiling, with fine flour added until it becomes rather thick, adheres strongly to glass, and may be kept without spoiling.

COLORS PORCELAIN.

In a lecture at Berlin, Dr. Seger described the difficulties which attended the production of colored porcelain glazes, and called special attention to two methods of making a colored glaze out of an uncolored one. These processes he defined as being the addition of colored metallic oxides to the glaze, or the replacing of the colorless fluxes, potash and lime, by coloring metallic oxides in equivalent proportions. The first of these two processes is only available when the oxides have strong coloring properties, and need only be added in relatively small quantities. The reason of this is that they act as fluxes, and are thus capable of affecting the results of chemical formula according to which the porcelain has been made, and of producing cracks. The second of the two of the processes in question the lecturer considered preferable inasmuch as its application does not involve any disturbance of the normal formula, nor produce cracks. The volume of the colorless fluxes is, however, limited, being only eight to eleven per cent., and of this quantity only a portion can usually be replaced by the colored substances. It is on these facts that Dr. Heinecke has based his action in preparing glazes for hard porcelain at the Royal Porcelain Factory, Berlin. The fact that a reducing flame is required for the firing of colored glazes precludes the use of a number of metallic oxides which are easily reduced. Thus the remaining substances (the oxides of cobalt, chrome, iron, and manganese, together with the precious metals gold, platinum, and iridium) form only a limited palette of colors. Dr. Seger, however, remarks that in the case of the lighter flowing glazes in Seger porcelain, a more favorable conjunction of circumstances presents itself, the glaze consisting of only a five or six-fold silicate. There can therefore be more coloring metallic oxide employed without any injury resulting. In consequence of other special properties of these glazes the use of the oxides of copper, nickel, and uranium is practicable, and the production of green, brown, and yellow shades thus rendered possible. If, in the production of colored glazes, there be substituted for lime, equivalent quantities of monoxides, protoxide of cobalt, protoxide of nickel, or oxide of copper; for alumina, the coloring sesquioxides, oxide of chrome, oxide of iron, oxide of manganese, or oxide of uranium; then a sale of color is obtained, the various tones of which not only display a harmony of chemical composition, but possess a nearly equal melting point, and can therefore be burnt in one fire. The facility thus acquired of blending colored glazes allows of a comprehensive range of effects. During the lecture seventy-five samples of colored porcelain glazes were exhibited, which had been prepared in the manner described.

A USEFUL INVENTION.

A very useful invention has been evolved in a book-stitching machine, which is a comparatively recent device. The machine is adapted to all books as well as pamphlets not exceeding forty-five sheets, in thickness. Its stitch can be made any length up to three quarters of an inch. One advantage of this machine, besides the increased speed over the hand, is that books sewed on it are durable and open perfectly, and there is no liability to tear out as is the case when books are wired. It also gives them a finish not attainable by hand, and where there is fine work to be done the machine is said to be invaluable.

OLD BERKSHIRE MILLS

CHARLES O. BROWN, President.

DALTON, MASS., U. S. A.

JOHN D. CARSON, Treasurer.

One party writes: "The two hundred RECORD BOOKS, for 83 of the 99 Counties, now on exhibition at the Iowa State Fair, at Des Moines; and all, but four (!) of them, made from your 'OLD BERKSHIRE MILLS LINEN LEDGER,' Medium, 40lb., make a splendid show."

[The above cut is a fac-simile of the wrapper used on the Linen Ledger Paper.]

We will pay for any book rejected on account of fault in the paper. Send for Samples, test them in comparison, and see that your books are made from paper thus water-marked.

OLD
BERKSHIRE
MILLS

LINEN LEDGER PAPER

Will stand the severest
test of COLOR, CLIMATE,
INK OR WEAR.

Being Triple Sized (a process entirely our own) and Loft Dried, can be erased and written upon the fifth time distinctly. None genuine without the water mark, thus—Old Berkshire Mills Linen Ledger, and date.

CARSON & BROWN CO., Manufacturers.

Extra Fine Papers

Manufactured by

Z. CRANE, JR., & BRO.,

DALTON, MASS., U.S.A.

These Goods, which are acknowledged to equal the finest foreign manufactures, are presented in the following styles and qualities:

SUPERFINE QUALITY.

In handsome Light Blue Boxes containing one-quarter of a ream of Note Paper each, and bearing in blue letters description of contents.

In separate Boxes of uniform size, are one-eighth of a thousand Envelopes corresponding in tint and quality to the paper.

EXTRA SUPERFINE QUALITY.

In attractive Lavender Colored Boxes containing one-quarter ream of Extra Fine Paper each, with contents printed in red. Corresponding to this, in like Boxes, are Envelopes to match.

All this Stationery may be relied on to be according to representation. It is suited to the tastes of the most select trade.

In addition to the above lines, our other Specialties are put up with care, in attractive and substantial form. Goods can be seen at the Mill, or at our New York General Agency, GEO. B. HURD & CO., 79 Beekman Street.

SEASON 1883-1884.

SEASON 1883-1884.

L. PRANG & CO.'S

Christmas and New Year Cards.

WE beg to express our thanks to our patrons and friends for the kind and flattering appreciation of our past efforts, and feel a pardonable pride at the very emphatic endorsement which our Cards have received from the American, English, German and Australian press. With one accord these exponents of public taste have given our Cards the first rank over all similar productions in the market. We are bound to maintain this superiority; and we have, as heretofore, spared no expense to create, with the aid of our enlarged experience, a Series of Novelties for the Christmas Season, which, we have no doubt, will meet the expectations of the Trade. We have been singularly fortunate in procuring the assistance of, we may say, **REPRESENTATIVE AMERICAN TALENT** in the preparation of designs, and besides have secured the coöperation of some of the most **EMINENT EUROPEAN ARTISTS**.

OUR LINE IS NOW COMPLETED, and our agents are on the road to call on our patrons and friends. An inspection of the Sample Books will convince them that in regard to **ORIGINALITY AND VARIETY OF DESIGN. EXCELLENCE AND RICHNESS IN EXECUTION**, it far exceeds our last year's efforts. To give an idea of the high artistic order of the line, we would say that it comprises:

FIGURE DESIGNS by Miss DORA WHEELER, Miss ROSINA EMMET, Miss L. B. HUMPEREY, Miss L. B. COMINS, ELIHU VEDDER, WALTER SATTERLEE, A. F. BROOKS, and others.

LANDSCAPE DESIGNS by W. HAMILTON GISSON, THOMAS MORAN, F. L. SMITH, and others.

ANIMAL DESIGNS by B. E. BENSELL and HARRY BEARD.

FLOWER AND BIRD DESIGNS by Miss FIDELIA BRIDGES, Mrs. O. E. WHITNEY, JEAN ROBIE, of Brussels; H. GIACOMELLI, of Paris, and others.

THE LITERARY MATTER in connection with our designs has been carefully attended to—among others, by Mrs. CELIA THAXTER, Mrs. EMILY SHAW FORMAN and JOAQUIN MILLER.

OUR REGULAR LINE of Christmas and New Year Cards will comprise plain cards, fringed cards, and double fringed cards, varying in price from 30 cents to \$60, per set of 12.

PROTECTORS are furnished with all fringed cards, and also **ENVELOPES** for all series costing \$1.80 per set and more.

Besides our **REGULAR LINE**, we would call special attention to the following

NOVELTIES AND SPECIALTIES:

ALADDIN'S LAMP. This is one of the most elaborate and elegant Christmas Gift Cards we have ever offered to the trade. It is a large folding card, heavily fringed, and provided with a leatherette protector. The front outside page is a design of peacock feathers on satin; the left inside page contains a poem specially written for this gift by JOAQUIN MILLER, also on satin, and surrounded by a delicate border of Oriental design; the right inside page presents Aladdin bearing his lamp, after a painting by the eminent American artist, ELIHU VEDDER; and to complete the whole, the back is embellished with a most unique, artistic design of high order.

RUSKIN CALENDAR FOR 1884. At the solicitation of some of our business friends, we have this year decided to bring out a Calendar, and are happy to be able to announce that we shall issue **A CALENDAR FROM JOHN RUSKIN, FOR 1884**. This consists of an artistic mount with a block calendar, having suitable selections from JOHN RUSKIN's works for each day of

the year. The selections have been made by a lady well-known for her cultivated taste and judgment. The mount has been designed by a well-known Boston artist, and, coming from her thought and tasteful skill, the form and decoration will be a fitting accompaniment to the words within. This Calendar will be a source of pleasure to all who love and appreciate RUSKIN, that they may have every morning a jewel from the treasure of his noble and earnest thought.

"THE CHRISTMAS SHEAF." A folding card, with inside pages, in color, stamped out in the shape of a sheaf of wheat. Tied with silk cord and tassels.

"THE CHRISTMAS BOOK." A surprisingly natural representation of an open book, with floral designs by Mrs. FISHER, and original poems by JOAQUIN MILLER.

CHRISTMAS ART PRINTS ON SATIN.

The great success attending our efforts in this line has induced us to bring out a number of new Series, consisting of Flowers, Landscapes and Figure Designs. These are elegantly finished in several styles, in fringed tinted mats, with cord and tassels; on mounts, with silk fringe and cord; in book form, richly fringed and with leatherette protectors, and on rich Plush mounts. Prices vary from \$1.50 to \$3.50 each.

We have made large additions to our **BIRTHDAY** line, comprising Plain Cards, Fringed and Double Fringed Cards and Art Prints on Satin. Numerous Series at popular prices have been added to our list of **SCRIPTURE TEXT CARDS**. New **FLOWER PIECES** in Mats, &c. **THANKSGIVING CARDS**,—Our line will also be shown now.

Descriptive Price Lists of our **CHRISTMAS** and **NEW YEAR CARDS** are now ready, and will be sent on application.

MANUFACTURERS AND DEALERS IN

FINE STATIONERY.

WE CARRY A COMPLETE LINE OF Z. CRANE, Jr. & BROS.' UNRIVALED PAPERS,

In both SUPERFINE and EXTRA-SUPERFINE Qualities, GRECIAN ANTIQUE, DISTAFF, PARCHMENT VELLUM, Etc. We use their Flat Papers in the manufacture of our LINE OF WEDDING GOODS, which embraces all the leading styles, and many new designs of embossing.

WE HAVE A VERY HANDSOME LINE OF PAPETERIES, CARD CABINETS, ETC.,

Also, Many New Patterns in Fancy Writing Papers,

The latest of which are POLKA DOT, CELESTIAL, in Mazarin or Deep Blue, EMBOSSD MOROCCO in Sea-Shell, Drab, Opaline and Silver Gray.

EMBOSSD ALLIGATOR, in Cafe, Terra-Cotta, Drab and Marguerite. PLAIN ALLIGATOR, in Russet. HAMMERED SILVER, in Cream and White.

RAGGED EDGE, Imported and Domestic. PIQUET, in all Tints. GROS GRAIN, in all Tints. BIRCH BARK, an exact imitation in Paper.

SPECIAL ATTENTION GIVEN TO THE MANUFACTURE OF FIRST-CLASS MOURNING GOODS. OUR LINE OF BRISTOL BOARDS,

Both Pasted and Mill, are unsurpassed in quality, being made by Z. CRANE, JR. & BRO., to match their paper. We manufacture from this stock VISITING CARDS, in Plain and Gilt Edge, Plain and Gilt Bevel, and can furnish any special size desired.

Decorated Note Paper in Colors, Bronzes, Etc.

GENERAL AGENTS FOR Z. CRANE, Jr. & BRO.

THE GLOBE FILES CO., CINCINNATI,

Manufacture the most complete and popular line of **STATIONERS' FILE GOODS** made in America. Liberal Terms to Dealers.

Eastern Trade supplied from New York Branch, No. 28 Bond Street.

Trade Novelties.

[We will be glad to receive samples of all novelties issued in the trade, and will notice all such which possess merit free of charge. It is desirable to accompany descriptions with cuts whenever possible.]

DEVICE FOR TAKING INSTANTANEOUS PHOTOGRAPHS.

A very ingenious arrangement for taking instantaneous photographs is the subject of the illustration given herewith. It is well known not only among photographers, but with most persons engaged in other pursuits, and the public generally, that in taking pictures by the art of photography, it is impossible, by using the ordinary photographic apparatus, to shut off, quick enough, the light entering the camera in order to produce the proper chemical and optical effects.

In this arrangement the device for instantaneous exposure is probably as nearly perfect in mechanical construction and in operation as anyone could desire. The shutter, through which the light is focused, divides in the middle, and consequently the exposure is effected by a separation of the two parts from the centre to the circumference, and then, by a continuous closing motion, from the circumference to the centre. The lever pin, which controls the movement of the shutter, passes between two reciprocating spring catches, the lower notch of the catch nearest the lens holding the shutter open during the act of focusing. The adjusting rack on the left serves to regulate the speed. If a still greater speed be desired the tension may be greatly increased by placing a rubber band over the lever and spring pins. It will be seen that, as the shutter is attached directly to the camera front, there is nothing to catch the wind, and as the movement is continuous, there is nothing to cause vibration. As appears in the cut, the tension has been entirely removed, showing the separation of the shutters.

The perfection to which the art of taking instantaneous photographs by this arrangement is shown in the photograph, published by E. & H. T. Anthony, of a ten-inch mortar shell, taken when at about fifty feet from the muzzle of the mortar, and when the object was moving with a velocity of 380 feet per second. The photograph was successfully taken at Fort Morris, Va., on May 4, 1883, by Lieutenant Sedgwick Pratt, of the Third United States Artillery.

NEW PATENTS.

No. 278,712. Game Board.—James W. Larrimore, Chicago, Ill.

An educational chart in which a number of brief statements of historical, scientific, philosophical or miscellaneous facts are printed or set forth, each in separate squares, and the latter of which are adapted and arranged to adapt the chart to the playing of the game of checkers or chess thereon.

No. 278,744. Noiseless Slate.—Joseph Rldge, Chicago, Ill.

No. 278,747. Game Counter.—Helen A. Russell, Brooklyn, N. Y.

No. 278,762. Album and Book Clasp.—Ransom R. Baker, Buffalo, N. Y.

No. 278,777. Sheet Feeding and Registering Apparatus.—Luther C. Crowell, Brooklyn, assignor to R. Hoe & Co., New York, N. Y.

No. 278,778. Sheet Feeding and Registering Appa-

ratus.—Luther C. Crowell, Brooklyn, assignor to R. Hoe & Co., New York, N. Y.

No. 278,782. Type Case.—Charles C. Doten, Plymouth, Mass.

A type-case having a bottom composed of two thicknesses of woven wire, the upper finer than the lower, and both secured to the frame in contact, whereby the lower supports the upper.

No. 278,785. Type-Rubbing Machine.—George S. Eaton, Brooklyn, N. Y.

No. 278,799. Fan.—Friedrich Kinn, New York, assignor, by mesne assignments, to Eliza Sanders Brooklyn, N. Y.

No. 278,837. Paper Box.—Rudolph Van Baar, New York, N. Y.

No. 278,848. Apparatus for Taking Proof.—Charles E. Baldwin, New York, N. Y., assignor of one-half to Cornelius Beard, same place.

No. 278,851. Paper Box.—Jacob C. Bauer, Philadelphia, Pa.

No. 278,875. Variable Bed Motion for Printing Machines.—Andrew Campbell, Brooklyn, assignor to John McLoughlin and Edmund McLoughlin, New York, N. Y.

No. 278,883. Tag.—Clark R. Crane, Morrice, Mich.

No. 278,923. Newspaper Wrapper.—Georgianna Fay, Richmond, Va.

No. 278,925. Ticket Case.—James L. Ferguson, Columbia City, Ind.

No. 278,937. Printing Cylinder.—Edward Haas, Philadelphia, Pa.

No. 278,941. Card Support.—Wolff Hagelberg, Berlin, Germany, assignor to Kaufmann & Strauss, New York, N. Y.

No. 279,025. Fountain Penholder.—Charles T. Shafer, Springfield, Ohio.

No. 279,050. Fan.—Savillion Van Campen, New York, N. Y., assignor of one-half to Hastings, Todd & Schanck, same place.

No. 279,070. Device for Affixing Postage Stamps, &c.—Charles A. Zeising, Atlantic City, N. J., and Henry A. Wehmann, Jr., Philadelphia, Pa.

No. 279,104. Fountain Pen.—John S. Purdy, Brooklyn, N. Y.

No. 279,109. Method of and Means for Making Square Paper Bags.—Edgar B. Stocking, Washington, D. C., assignor to the Union Paper Bag Machine Company, Philadelphia, Pa.

No. 279,114. Machine for Making Paper Bags.—Alfred Adams, Cleveland, Ohio.

The bag tube is formed by the usual means and passes between rolls that have a portion of their surface provided with corrugations running at right angles to the length of the rolls. These corrugations mesh with each other and

make longitudinal crimps in that portion of the tube that forms the mouth of the bag.

No. 279,128. Toy Pistol.—Otto C. Butterweck, St. Louis, Mo.

No. 279,129. Face-Cloth for Printing Presses.—Andrew Campbell, Brooklyn, assignor to John McLoughlin and Edmund McLoughlin, New York, N. Y.

A face-cloth for printing presses, composed of a sheet of wire cloth interposed between exterior sheets of muslin or other similar material, and the whole cemented together with a flexible cement.

No. 279,168. Type and Space Holder.—Louis K. Johnson, Brooklyn, N. Y.

No. 279,170. Bill or Letter File.—James M. Keep, Montclair, N. J., assignor to Joanna N. Keep, same place.

No. 279,192. Tag for Wall-Paper, &c.—Francis H. Shepherd and John W. Meyer, Davenport, Iowa.

No. 279,233. Dressing Case.—Edward J. Eisenmann, New York, N. Y., and Henry Kock, Hoboken, N. J.; said Eisenmann assignor to said Kock.

No. 279,244. Paper Pail or Box.—Ira W. Hollett, Chicago, Ill.

No. 279,263. Numeral Frame.—Robert T. Martin, Toronto, Ont., Canada.

No. 279,268. Educational Map.—William R. Norris, Fort Ann, N. Y.

As a new article of manufacture, an educational map provided with indicia of localities, and constructed with cavities or recesses for receiving blocks or labels of corresponding shape, bearing the name of the several localities.

No. 279,272. Case for Toilet Sets.—Henry Patterson, Jersey City, N. J.

No. 279,275. Mechanical Toy.—Joel W. Perkins, East Hampton, Conn.

No. 279,283. Paper and Envelope Package.—Samuel J. Spurgeon, Houstonia, Mo.

No. 279,285. Machine for Making Paper Boxes.—Bernard T. Steber, Utica, N. Y.

No. 279,301. Ink Fountain for Printing Presses.—Henry Wilson, Chicago, Ill.

No. 279,302. Toilet-Case.—Leopold Wolf, New York, N. Y.

No. 279,313. Game Table.—Hans F. Arff and Detlef Bornholdt, Arcadia, Ia.

No. 279,333. Paper Bag and Twine Holder.—Arthur W. Cash, Decatur, Ill., assignor of one-half to Adam H. Imboden, same place.

No. 279,352. Composing Stick.—Adolph Danziger, New York, N. Y., assignor of one-half to Frederick Siebert, Hoboken, N. J.

No. 279,388. Pencil Case.—John Holland, Cincinnati, Ohio.

No. 279,405. Combined Letter Sheet and Envelope.—George R. Lockwood, St. Louis, Mo.

No. 279,439. Planescope.—William W. Rupert, Pottstown, Pa.

A planescope, consisting of a flat disk, upon which are semi-annular concentric perforations, and oscillating freely therein rings having their axes secured to the under face of the disk, and having clamped on the same movable globes, fixed or revolving on their axes, a central hemispherical figure representing the sun, and a series of four or more hemispherical figures representing the earth, with a circle concentric with the sun for the earth's orbit, and penumbral lines drawn from the sun to the earth.

DESIGNS.

No. 13,951. Font of Type Ornaments.—Herman Ihlenburg, Philadelphia, Pa., assignor to MacKellar, Smiths & Jordan, same place. Term of patent, 7 years.

No. 13,969. Toy Money-Box.—William S. Reed, Leominster, Mass. Term of patent, 3½ years.

NEW GOODS, JULY 1, 1883.

We desire to call attention of the TRADE to our Lines of NEW GOODS designated as

“YE KNICKERBOCKER” TABLETS.

D. W. GLASS & CO., Baltimore, U. S. A.

THE PARSONS PAPER COMPANY,

— HOLYOKE, MASS., —

In addition to their already extensive establishments at Holyoke (which rank among the largest mills in this country), have recently built a separate mill, specially constructed and equipped for the production of the Best Grades of Linen Papers, and are now manufacturing all the various sizes and weights of BOND, PARCHMENT, BANK-NOTE, AND LEDGER PAPERS. They have already demonstrated their ability to produce of these papers a quality EQUAL TO THE BEST ESTABLISHED BRANDS IN THE MARKET.

Having great strength of fibre (an essential requisite in all Legal, Government and Commercial Papers), they are recommended for use in Bonds, Deeds, Certificates, County and State Records, etc. They are thoroughly sized to stand writing upon with fluid inks, and will permit of repeated erasures and re-writing thereon, when required. Great care is exercised to produce uniformity of color, strength and finish, and to do this, they have the latest improved machinery, specially adapted to the manufacture of Linen Papers.

They would call the attention of the Trade to the following brands, which are their trade-marks, viz.: In all Bond, Bank Folio, and Parchment appears the water-mark

"PARSONS PAPER COMPANY, HOLYOKE, MASS."

The Ledger Papers, of which they manufacture two Brands, are water-marked

"PARSONS LINEN LEDGER."

"SCOTCH LINEN LEDGER."

It is the intention of the Company to maintain the quality of these brands equal to any in the market.

TESTIMONIALS.

"I am most emphatically pleased with the Prouty. I would not trade it for a C—press (price \$1,000.) It runs easier, it is much simpler, and does its work as rapidly and well" J. F. MITCHELL, Greenville, Texas.

"Would not exchange it for any of the 'Big Injun' presses."

J. A. AVERY, Waukeegan, Ill.

"The Prouty is the 'Boss press.'"

C. G. STARKS, Berl'n, Wis.

"For the country office, printing 1000 to 4000 circulation, there is no other press worthy to be compared with it."

Waterloo TRIBUNE, Waterloo, Iowa.

"We profess to be a practical pressman, and having had experience with nearly all kinds of presses, believe ourselves to be a competent judge. The Prouty is the simplest and easiest running power press in the market, and will do as good work as any machine made." F. M. HAISLET, Newhampton, Iowa.

PRICE LIST NOW READY.

RELIEFS (SCRAP PICTURES).

The constant growing demand for Reliefs has impressed upon us the necessity of an improvement of the present way dealers are obliged to keep their stock, and we are pleased to say that we are now able to offer the trade a complete solution to the matter in the form of a

— RELIEF CABINET, —

of which the cut herewith given is an exact illustration. This Cabinet will hold 5,000 to 6,000 Reliefs (according to the sizes desired), and will be presented to every retailer who purchases that number of sheets, amounting to at least \$100 net.

The assortment may be made up of one hundred each of fifty kinds, or fifty each of one hundred kinds. This Cabinet is a solidly built, durable piece of work, in black walnut, and an ornament to any store.

"LANGUAGE OF FLOWERS." — A beautiful packet of twelve sheets of the most popular flowers mounted, with the sentiment of each printed below.

ENGLISH HAND-MADE PAPERS

ORIGINAL
EYNSFORD
MILLS,

WATER-MARK:
FELLOWS

KENT,
ENGLAND.

These papers, made from the purest fibre, without any foreign admixture, each sheet separately formed by hand in a mold, couched by vertical pressure and slowly dried by air, possess a toughness, hardness and strength unapproachable by any machine-made papers for Legal use, for Scrip or Bonds, and for all purposes demanding great durability, these hand-made papers are invaluable.

The heavier sorts are double sized, and they will bear repeated erasure and constant handling beyond all other makes, so that for Ledger and Account-Book purposes none can compare with them.

Trade Gossip.

All new goods and designs which are not, strictly speaking, "Novelties" will be noticed under this head. The trade are requested to forward descriptions with samples in order to secure proper notice.

A stock of tags, &c., is advertised for sale in another column.

L. T. King, dealer in fancy goods, Preston, Ont., is closing out.

B. F. Davis, publisher of the *Republican*, Placerville, Cal., has sold out.

Judson, Dunlap & Co., printers, &c., Atlanta, Ga., have made an assignment.

Keebler & Co., ivory turners, Philadelphia, Pa., have dissolved partnership.

A. H. Alexander, publisher, Westerville, Ohio, has sold out to Beakes & Gardner.

O. Trudel, stationer, Three Rivers, Province of Quebec, Can., has offered to compromise with his creditors.

Alonzo Van Velsor, of the firm of Van Velsor & Stein, dealers in artistic flowers, New York city, is dead.

The stock of Heffelfinger & Parkhurst, dealers in picture frames, Reading, Pa., has been attached by the sheriff.

A dissolution of partnership has taken place in the firm of Radcliff & Snively, dealers in wallpaper, Pittsburg, Pa.

An execution has been taken out against V. S. Peet, dealer in stationery, &c., Pittston, Pa., to satisfy a claim of \$1,500.

The Babcock Printing Press Manufacturing Company, New London, Conn., has just issued its catalogue of printing presses.

Prael Brothers, dealers in fancy goods, Astoria, Ore., have been attached, and a meeting of their creditors has been called.

W. H. H. Rogers & Co., dealers in wall-paper, New York city, have dissolved partnership, and the business will hereafter be conducted by W. H. H. Rogers.

Various new designs in silk ornaments are now being sold by stationers and fancy goods dealers. They form very attractive decorations and can be tastefully combined in a variety of forms and to almost any desired shape.

Mr. Forsyth, buyer for the firm of H. S. Crocker & Co., stationers, San Francisco, who has been in town for several days, left for the Pacific Coast to-day. Mr. Yost, a member of the same firm, who accompanied Mr. Forsyth here for the purpose of introducing him to the trade, will remain East for several weeks.

Julius Brunner, of the firm of Julius Brunner & Co., manufacturers of toys at Railroad avenue and 168th street, Morrisania, made an individual assignment on Friday to William Siegel, preferring the Germania Bank for \$1,893. Mr. Brunner has been in the toy business for about sixteen years. The factory is valued at about \$8,000.

A new thing in the line of pencils is being introduced by J. W. Guttnecht. It is called the "Stenograph," and, as its name indicates, it is intended principally for the use of stenographers. These pencils combine in a high degree all of the necessary qualities required in shorthand writing, namely, entire absence of grit and a proper consistency of lead to prevent the rapid wearing out at the point.

At the assignee's auction sale of the stock of Thomas Toby & Co., New York, their large stock of Brunswick superfine white wove flats was closed to one of the leading banking houses of this city at one dollar per pound, in direct competition with papers of leading English manufacture, showing thereby the appreciation with which this brand of paper is held by large consumers. Samples and prices for the trade are only furnished by the manufacturer, the Powers Paper Company, Springfield, Mass., or by its agent, J. L. St. John, at 62 and 64 Duane street, New York. This brand, together with the well-known "Perfection" linens, will compare favorably with the best papers manufactured here or abroad.

Leroy W. Fairchild has just made an extension to his factory at the corner of Fourth street and Broadway. Mr. Fairchild has now in his employ ninety hands and is running "6,000 feet of lathes" and other machinery, which, he claims, makes his establishment the most complete manufactory in the country. Mr. Fairchild is engaged in getting out a new catalogue, which will embrace some 2,000 designs of pencils, watch charms, and other novelties. This will be ready in September.

Alexander Agar is offering to the trade a novelty in the shape of a letter-copying press. The press is worked by a lever and air-compressing attachment. Copies of letters taken with this machine are very clear and distinct. Mr. Agar has also a novelty in the shape of a letter scales. It is small and compact, will weigh parcels of four pounds, and is provided with a dial giving a scale of weights.

Novelties in stationery goods are being introduced with such frequency by enterprising and wide-awake tradesmen that something new in this line is looked for every few days. The latest things out are a musical inkstand, a musical album, a musical bell, a musical dice-box, a musical pot, &c., the trade being supplied by M. J. Paillard & Co.

W. Schisnonsky, manager for Theodore Leonhardt & Sons, Philadelphia, states that they have received all of their samples of European Christmas and New Year cards. This firm will also have some Paris calendars, specially made for this country. These calendars, it is said, promise to be the success of next season.

The *Racine Agriculturist*, Racine, Wis., has been discontinued and its subscription list has been transferred to the *Manufacturer*, which will hereafter be known as the *Racine Manufacturer and Agriculturist*, under management of the Manufacturers' Publishing Company.

L. H. Orr & Co., printers, stationers, &c., Springfield, Mass., are to remove into a new four-story building, 25x80 feet. The building will be completed in October.

Joseph A. Bromley, dealer in fancy goods, of New Haven, Conn., is trying to compromise with his creditors at twenty cents on the dollar.

The Louisiana Paper Mill and Printing Ink Company is a new concern, organized with \$50,000 capital in New Orleans.

C. F. Meacham, Springfield, Vt., has bought of Leach & Spaulding their job printing business at Bellows Falls.

L. J. Plummer & Co., job printers, Killingly, Conn., have offered to compromise with their creditors.

The Dedham *Transcript*, H. L. McQuillen, proprietor, Dedham, Mass., has been burnt out.

A business opening in St. Paul is advertised for sale in another column.

Henry Hartung, dealer in picture frames, Nashville, Tenn., has failed.

An assignment has been made by William Meares, dealer in fancy goods, New York city.

Alexander Agar, the well-known stationer of this city, is rusticated at Middletown Springs, Vt.

The *Herald*, published by J. M. Moran, Stratford, Ont., has been seized to satisfy a chattel mortgage.

A dissolution of partnership has taken place in the firm of Unz & Hendric, stationers, New York city.

Henry C. Lanphear, dealer in novelties, Philadelphia, Pa., is advertised to be sold out by the sheriff on the 3d inst.

The Powers Paper Company has a very fine and complete line of papeteries this season. It is offering no less than 600 varieties.

W. S. Chapman, publisher of the *Mercury*, Portland, Ore., has bought from W. R. Strubel his interest in the *Polaris*, of the same place.

The American Journalistic, Printing and Publishing Company, St. Louis, Mo., has been incorporated with a paid up capital stock of \$10,000.

Walter Scott, New York, is about to erect large and commodious shops well equipped with machinery for extending his manufacture of printing presses.

Holmes, Booth & Haydens, this city, are introducing a new patent pin-fastener for ticketing and binding all sorts of fibrous material and for fastening papers, &c.

William A. Davis, manufacturer of U. S. Treasury mucilage, black and colored writing inks, Boston, Mass., wants a reliable man to travel. See his advertisement.

The *Bookkeeper* has been succeeded by the *American Counting Room*, a monthly and periodical which takes up work where its predecessor left off. The magazine is a well printed, interesting publication.

The National Publishing Company, Philadelphia, has received the highest praise from the trade on the excellence and beauty of finish of its bindings, the clear white paper used in all of its bibles, and the splendid style in which they are printed. No one handling bibles should fail to examine this line.

The most recent thing in the line of type-writing machines is the "Hall" type-writer. The new type-writer prints directly from the face of the type, and any class of type can be used, interchangeably on the machine. A company with a capital of \$200,000 has been formed in this city to push the machine.

Palm & Fechteler, dealers in decorations and fancy household goods, have just imported some very fine alabaster ware consisting of vases and figures, some of which have never before been introduced in this country. They have also received several novelties in the line of brass picture-frames in bright color and in black.

Gum arabic, bottles and all classes of materials used in the manufacture of mucilage and inks have made serious advances in price, but having a liberal stock of all classes on hand prior to the advances, Mr. William A. Davis, manufacturer of the celebrated U. S. Treasury mucilage and Treasury writing inks, at Boston, Mass., now offers his goods to the trade at prices made previous to the extra cost in material. His sales during June and July are said to show an increase of over 50 per cent. over corresponding months last year, and all

from unsolicited trade. So much for making good goods and establishing a reputation.

A full line of novelties in the advertising line will be introduced next week by I. H. Hamburger & Co.

The business of O. Knecht, bookseller and stationer, Cañon City, Col., has been bought by George Pedley.

J. W. Burke & Co. have purchased the book and job printing business of E. D. Irvine & Brother, Macon, Ga.

William Ferry, of the firm of William Ferry & Co., stationers, Galveston, Tex., is in town purchasing stock for the fall trade.

Cliffe & Robinson, publishers of the *Tribune*, Portage la Prairie, Manitoba, have dissolved partnership. J. M. Robinson continues the business.

Frank Simmons, Springfield, Ill., has recently opened an art gallery in that city, which is doing much to imbue his fellow townsmen with a love of the beautiful.

Moore & Warren have got out a specimen card of different sizes of numbers used by them in numbering. The card is nicely varnished and is mounted in a neat frame.

Jacob Seisel has been admitted to the firm of Wolfe & Brother, paper-stock dealers, Macon, Ga. The firm will hereafter do business under the style of Wolfe, Brothers & Co.

Henry Levy & Son are bringing out an entire new line of fancy novelties, both foreign and domestic, for the fall trade. These goods are well worth the attention of buyers, being new in design, fine in quality and reasonable in price.

Sibell & Hyer, stationers, have opened a branch store at 138 Fourth street, Brooklyn, E. D., which will be managed by Joseph Hyer. The firm asks for price lists, &c., from publishers, and particularly book and music lists. The employees of the firm will have their annual picnic on Monday, August 27, at Rockaway.

Leon Isaacs & Co., Philadelphia, manufacturers of the Glucinum pens, have removed their office to 310 Chestnut street, which is a better location, being very central and more accessible to their numerous agents, who visit them constantly. The office has been very nicely fitted up, and is said to be the best of the kind to be found in Philadelphia.

The "Climax" blotting, made by the Richmond Paper Manufacturing Company, is having a big run. Its absorbent quality is excellent. Among the numerous testimonials to its character the following is significant: Chicago, July 21, 1883, Richmond Paper Company. Gentlemen—Your "Climax blotting" has given general and entire satisfaction to our trade, and we believe it to be superior to any blotting manufactured. It sells readily, and our sales are increasing rapidly. Congratulating you on your success, we remain, yours very truly, Bradner, Smith & Co.

Lloyd Brezee, publisher of *Chaff*, Detroit, Mich., has sold out to George M. Chester & Co.

A. F. Monroe, formerly of the firm of Monroe & Co., stationers, 104 Duane street, has entered the employment of the Tower Manufacturing Company, where he will be pleased to see his friends at any time.

De Wilton Robinson, of No. 84 Franklin street, agent for D. Leonhardt & Co., pens, Birmingham, England, made an assignment on Friday to George A. Wick, giving a preference to Joseph A. Robinson for \$3,620.

Edward Todd & Co., dealers in pens, &c., are about to offer to the trade their "Paragon" fountain pen in an improved form. The new Paragon has a rubber tongue with a thumb-screw, together with a valve, by which a continuous flow of ink is secured.

Chas. T. Bainbridge's Sons are about to indulge in another bit of enterprise in producing novelties in the card line for the fall trade. This time it is a New Year calling card, the design of which is exclusively their own idea. This line of goods will be ready for the trade in a few days.

Dodd, Mead & Co., booksellers, have lately introduced a new line of juvenile books, with novel and attractive bindings, decorated with new designs in colored inks. The firm has also brought out a new book by the popular author, Rev. E. P. Roe, entitled "His Sombre Rival"—an interesting narrative embodying scenes and incidents of the late civil war.

James D. Whitmore & Co. report trade very satisfactory in all of their departments. They are now preparing their fall line of papeteries for the fine trade. Some of these designs are among the most exquisite they have ever shown, and no doubt will be fully appreciated by the trade when seen.

A new thing in paper-weights has just been brought out by the Tower Manufacturing Company. These goods are made of stone in the shape of various kinds of fruit, such as the peach, the apple, and the lemon, &c., which they are colored to imitate.

Bookkeepers, accountants and others hail with pleasure the novelty recently introduced in inks. This consists of a chemical preparation for erasing ink marks from paper without defacing its surface. Something of this kind has always been needed.

Addison Kingsbury, manufacturer of paper boxes, South Coventry, Conn., has formed a copartnership with Arthur Kingsbury, and the business will hereafter be conducted under the style of A. Kingsbury & Son.

The following named out-of-town tradesmen have been in town for the past few days : B. J. Kopple, Austin, Tex.; F. F. Hansel, New Orleans, La.; E. Wolf, Cleveland, Ohio; and I. S. West, New Orleans, La.

W. L. Baldwin has purchased an interest in the stationery business of Arthur W. Smith, Stamford, Conn.

FOLEY'S PAT. IMPROVED STYLOGRAPHIC PEN

Great reduction in price : No. 1, \$1.75; No. 2, \$2.50; No. 3, \$2.50; No. 4, \$3. A liberal discount to the Trade. FOLEY'S PATENT STYLUS is the best and only Pen with point, spring and cleaner in air tube. Fully warranted, and exchangeable for gold pens and pencils.

RECENT POSTAL DECISION.

The word "transient" in ruling 426, under the head of "Second-Class Matter, Free Delivery Offices," is used in regard to sample copies. The distinction pointed out is this: Second-class matter, when sent as sample books, at a free-delivery office, is to be prepaid by affixing ordinary one-cent stamps to each paper, without regard to weight.

Third-class matter at free-delivery offices is to be prepaid at third-class rates, one cent for two ounces. Thus, upon a newspaper admitted as second-class matter, sent as a sample at a free-delivery office, the postage would be one cent, although it might weigh six ounces. The postage on a newspaper not admitted to the pound rate of the same weight would be three cents.

Relative to the meaning of the word "periodical," postmasters are advised that what are generally understood as "magazines" seem to come properly within this definition, and upon such matter the postage rate, where it exceeds in weight two ounces, is two cents each.

Postmasters are directed to advise the public that in sending newspapers, books, pamphlets and other articles by mail to foreign countries or to distant points within the United States, the address should always be placed on the articles inclosed as well as on their wrappers. Should the wrappers become detached, as they frequently do, through the friction and movement incident to mail transportation by sea or land, it will still be possible to deliver the articles if this precaution is taken. Persons to whom such packages are regularly sent from Europe, or other places abroad, should advise their correspondents to adopt the above suggestion.—*United States Postal Guide.*

TRANSPARENT CLOTH.

Powdered white resin..... 1 pound.
Bleached linseed oil..... 12 ounces.
White beeswax..... 3 "
Venice turpentine..... 12 "

Heat the first three articles till dissolved, then add the turpentine while hot. A good varnish for curtains. Varnish both sides.

DEVOTED TO THE INTERESTS OF THE

Stationery and Fancy Goods Trades.

WEEKLY--\$2.00 PER ANNUM.

Single Copies - - - 10 Cents.

NEW YORK, THURSDAY, AUGUST 2, 1883.

Advertisements cannot be received for insertion in the current week later than 12 m. on Wednesday. The charge for advertising is 25 cents a line, each insertion. Special terms for standing and displayed advertisements to be had on application.

This journal aims to be a medium of information for a representative of the interests of every one connected with the stationery and fancy goods trades. It contains a full and trustworthy survey of the market for stationery in this country, in all cases giving the actual prices at which goods can be bought of importers and jobbers in this city, together with a detailed account of novelties in the trade, patents relating to stationery, and current items of interest. A review of foreign markets and accounts of movements abroad will also be furnished, and no pains will be spared to make THE STATIONER a thorough and complete exponent of the trade.

Subscription and postage for Great Britain, per annum..... 12s.

Any information our readers may wish to obtain shall be cheerfully given, and prompt replies will be made to all inquiries addressed to us on any subjects of interest to the trade.

Communications on all trade matters are earnestly solicited. Address

Subscribers to THE STATIONER can be supplied with the best cloth binder in the market. Deliverable at the publication office. Price, fifty cents.

Readers of this paper who avail themselves of the information obtained from its columns, by advertisement or otherwise, are requested to notify their correspondents of the source of their information.

READERS OF THE STATIONER will recall the fact that we referred three weeks ago to the publication of a statement which we said was untrue and garbled. The correspondence in another column, and which we reprint from the *Paper Trade Journal*, sustains, as will be seen, our assertion. We have not yet been told just how the "mistake" occurred.

It is gratifying to observe the cheerful feeling which pervades the stationery trade in general, and to note that there appears to be an assurance of safety within its lines. The careful methods of buying which have been such a distinguishing feature are still in vogue and we trust will continue. Recent large failures in other lines of business are monitions which must not be disregarded, but ought rather to make merchants, in whatever branch of commerce engaged, "go slow" and stop to consider the outcome and probable influence upon their own trade. The conservative principle is just as necessary in practice now as it has been at any time within the past few years, and good judgment will not be led astray by any tempting offers as to easy terms of payment. It is much safer to buy close and only in response to assured wants or a reasonable probability of requirements. This is better for the retailer as well as the wholesale dealer.

THE subject of technical education is taking up greater attention, and the various suggestions that have been made are all in the right direction. It probably requires a great deal of talk before any decided step can be taken in the establishment of schools of industrial art. The start has been made in some lines of mechanical production, but this is due more to private effort and the exertion of a few people who, as in all instances of advanced action, are somewhat ahead of their contemporaries. What is most needed at the outset of the foundation of schools for teaching mechanical principles and processes, is, of course, money. The sympathy of citizens whose public spirit and private means exerted together will help to establish such schools has not been fully aroused. In some of our cities this assertion is broader in its application than it is in others, but, generally speaking, we have not really got fairly started on one of the greatest educational needs of our day. To the class of readers to whom THE STATIONER appeals, we have to say that they, representing as they do very important lines of mechanical as well as artistic production, are as much bound to consider this question as any others. It is a matter of interest to them, not only in adding value to their products, but in defeating foreign competition in domestic as well as foreign markets, that they should aid and encourage the formation of technical schools and in providing for their foundation. To some extent we believe that public aid should be given to insure the success of the educa-

tional methods proposed, but the trades themselves should unite, either through the medium of their organizations or as guilds, to insure the speedy realization and perfection of a thorough system of education in the practices and principles of industrial work.

ANSWERS TO CORRESPONDENTS.

G. L. C. asks for the name of the town where the "Standard" diaries are made.

Ans—Cambridgeport, Mass. The Cambridgeport Diary Company is the manufacturer.

OBITUARY.

WM. E. SEYMOUR.

William Ellis Seymour, a native of Hartford, Conn., aged 73, died at New Orleans on July 29. He had lived in that city forty-three years, and for thirty years had been of the stationery house of Stevens & Seymour.

WILLIAM CLOWES.

Among the recent deaths abroad, that of William Clowes, of London, will excite some attention among the publishing, printing and literary fraternities. He was the head of one of the largest printing establishments in England. Mr. Clowes was the eldest son of William Clowes, who in 1803 laid the foundation of the business known as William Clowes & Sons, and he entered the office in 1823. His father was among the first to commence steam printing, and was called upon to defend an action for nuisance brought by his neighbor, the late Duke of Northumberland. This led to the business in Northumberland court being removed to the present site, in Duke street, Stamford street, whence have emanated some of the most important works which the present century has produced. Specially may be mentioned the appearance of the *Penny Magazine*, which did so much for the cause of cheap, wholesome and popular literature. The *Penny Magazine*, it is believed, was the earliest instance of the successful printing of woodcuts by the aid of steam machinery.

MICHAEL LYONS.

Word has been received of the unexpected death, at the age of seventy years, of Michael Lyons, Town Councillor and Poor Law Guardian, which took place on Wednesday morning, July 4, at his residence, Landare, Rathgar, Dublin. For some time past Mr. Lyons had been in rather delicate health, and the news of the recent death of a beloved son in Algeria, seriously impaired his strength and spirits. Still, he attended assiduously to both his private and public duties, up to a few days of his death, and took a leading part in the municipal affairs of his city. He proved himself an active, intelligent and thoroughly honest business man, and was a sincere and courageous adherent of the liberal cause, his vote and voice being always on the popular side. He was a great favorite, and in private affairs, as well as in politics, all acknowledged him to be an honest foe. The respect and esteem in which he was held by all parties, and the general regret felt for his loss, were strongly evidenced by the great concourse of mourners who attended his funeral. Mr. Lyons, who leaves a widow, three sons and a daughter, realized an ample competence, and for forty years was extensively engaged in business as a wholesale paper merchant and stationer, as also that of hide and skin and paper-stock merchant, trading under the firm of Lyons & Sons.

THAT INCORRECT STATEMENT.

The *Paper Trade Journal*, speaking in reference to the incorrect statement of an agreement between Joseph Parker, Joseph Parker, Jr., and Howard Lockwood has the following to say:

"In last week's *Journal* we called attention to the publication in the columns of a monthly contemporary of what purported to be the text of an agreement between Howard Lockwood, Joseph Parker, and Joseph Parker, Jr., and denounced the same as a false and garbled statement. We offered our contemporary the use of our columns for an explanation, inasmuch as its next issue does not appear until August. We have not heard from it up to the hour of going to press. On the 14th inst. a letter was sent to the Messrs. Parker by Mr. Lockwood, calling attention to the publication referred to. This letter read as follows:

Messrs. Joseph Parker & Son, New Haven, Conn.:

GENTLEMEN—I respectfully call your attention to the publication in the July issue of the *Paper World* of what purports to be the agreement signed by you and by me, under date of April 3, 1883. You know that there were only two copies of the agreement signed by us, one of which has been in my safe in this office since date of signing, and the other one was retained by you.

If you will examine the July *Paper World*, you will see at once that the article as there published differs in a material manner from the original document.

Will you kindly inform me whether you can explain how the *Paper World* obtained the incorrect copy published by it?

While I have not the least objection to the publication of a correct copy of the agreement, I do not, of course, consider it right to either of the parties signing it to allow an incorrect version to go unchallenged.

I await any explanation which it may be in your power to furnish, and remain, gentlemen, yours truly,

HOWARD LOCKWOOD.

"To the foregoing letter the following reply was received:

NEW HAVEN, July 16, 1883.

Mr. Howard Lockwood:

DEAR SIR—Yours, 14th inst., at hand. I sent the copy of our agreement to Messrs. Bryant & Co., after waiting several months and not seeing it in your journals, and supposed it was an exact copy.

Have examined the July number of the *Paper World* particularly for the first time this morning, and find there is a discrepancy from the original article, which I very much regret. Have written the proprietors of the *World*, calling their attention to the matter, requesting them to correct it in the August number, and to send me the copy I sent them, both of which I make no doubt they will do. If the fault proves to be mine, stand ready to correct it.

Very respectfully, yours,

(Signed) JOSEPH PARKER.

It will be seen that Mr. Parker states that he sent a copy of the agreement to our contemporary, and says that "there is a discrepancy from the original article," and adds that "if the fault proves to be mine, stand ready to correct it." We will be pleased to hear further from Mr. Parker when he discovered how it happened that the most important clause of the agreement was changed so as to express exactly the opposite of what appeared in the original document. It is in order for our contemporary to explain why its editor has not availed himself of our offer for the use of our columns."

Considerable interest is felt among stationers just now in the forthcoming report of the committee appointed by the dealers representing the toy trade, for the purpose of taking steps toward organizing a Board of Trade composed exclusively of toy tradesmen. The committee held a meeting on Monday last, at which a recommendation was made, that the toy tradesmen

go into the Stationers' Board of Trade for six months as a sort of experiment. This recommendation is to be submitted to the dealers in the toy trade for their indorsement, but whether it will be approved cannot be ascertained until the next meeting of the committee before mentioned, which will not be for several days, when a report will be made.

Senator Jones, who has been revisiting his native land, "regards Ireland as the land of the past." A horrid suspicion haunts our mind that the intelligent compositor has got in his work again, and that instead of regarding Ireland as "the land of the past"—a supremely senseless proposition—the Florida senator merely spoke of it "as the land of the Pats." A case of transposition, nothing more.—*Boston Transcript*.

Market Review.

OFFICE OF THE AMERICAN STATIONER, {
WEDNESDAY, August 1, 1883.

THE MONEY MARKET.—The money market rules quiet and very easy, with only a limited inquiry for accommodation from borrowers. The discount rates for prime mercantile paper remain at 4@6 per cent., while all loans are 2@3 per cent. The stock market has shown a degree more of vitality and a better tone since our last. But it is still a brokers' market. The general public persistently hold off, and are disinclined to buy either for speculation or investment. Government bonds have been strengthened by the Treasury call for the last of the three per cents. Railroad bonds were quiet and irregular, but generally firm. There were no features to the market. Sterling exchange is very dull, with rates about steady. Continental exchange is generally lower.

THE PAPER MARKET.—While there has been no increase of store trade among the city dealers during the past week, there are some who talk with a degree of more encouragement, the improved feeling being brought about by the receipt of many good-sized orders for paper to be made up and delivered early in the autumn. Stocks throughout the country in dealers' hands are not regarded as large, and notwithstanding the low prices both dealers and consumers have been very conservative buyers during the past six months, and for this reason it is thought by many in the trade that there will be considerable restocking when fall trade opens up. Considering the unrestricted production, prices continue to hold their own very well, particularly manilla wrappings and tissues, and no further signs of weakness are to be noted in any special grade.

THE STATIONERY MARKET.—There is a steady and increasing demand for staple goods and the prospects are that the improvement will continue. City dealers may be said to have just begun to reap the harvest of purchases made by out-of-town buyers, a number of whom arrive in town each day. Wholesale dealers in fine stationery and fancy goods, imported novelties, &c., are still very busy making additions to their stock to meet the demand of the fall trade. Dealers from all parts of the country report trade as being good, and a feeling of confidence prevails in all quarters. Goods offering are of exceedingly fine quality and almost endless variety. In fact the number of novelties has never been greater. The wholesale trade in envelopes is reported to have undergone a marked improvement. Dealers and manufacturers have all they can do to fill orders. The retail trade in stationery is quite fair, and an improvement is looked for. The trade in toys, toy books, &c., has hardly begun yet.

THE PRINTING TIMES AND LITHOGRAPHER,

An Illustrated Technical and Fine-Art Journal of
Typography, Lithography, Paper-Making,
and the Auxiliary Trades.

THE NEW SERIES COMMENCED JANUARY, 1875.

THE PRINTING TIMES AND LITHOGRAPHER is a high class journal, devoted to the Printing and Graphic Arts, in all their various forms. It derives its information from, and circulates in, all parts of the world. No pains are spared to insure the accuracy of its intelligence and to render it in every respect worthy of the support of Letterpress Printers and Lithographers, as well as Artists, Antiquaries, and Literary Men generally.

Published on the 15th of each month, 4to, in wrapper, price 6d. Annual subscription (payable in advance), 8s., post free to the United States. Rates of Subscriptions for foreign countries on application. Post-office orders to be made payable at the West Central District Post Office, High Holborn, of WYMAN & SONS, 74 and 75 Great Queen Street, London, W. C., England.

THE

Paper & Printing Trades Journal

[QUARTERLY.]

Subscription—2s PER ANNUM Post Free

POSTAGE STAMPS RECEIVED IN PAYMENT.

It is simply the best got up and most ably edited journal of the kind which is published. The general reader will find much in it that will amuse at the same time that it instructs, while the printer will be astonished by the great variety and excellence of the type with which it is printed.

The Clerkenwell (London) Press.

Every Printer, Stationer, Paper Maker, Bookseller, Author, Newspaper Proprietor, Reporter, in fact everyone interested directly or indirectly (and who is not?) with Printing and Paper, ought to subscribe.

"I consider this the best paying investment I have entered into this year." (From F. W. TALBOT, Printer, 19 Sussex Street, Cambridge.)

Thousands of letters of this character have been received.

Useful Trade Tables, Trade Information, Heaps of Wrinkles, Sprightly Articles, Amusing Gossip, in every issue.

** OVER 400 APPLICATIONS for goods have been received by an extensive manufacturing firm in London from a single advertisement in THE PAPER AND PRINTING TRADES JOURNAL.

BLACKHALL'S

PATENT POWER

PERFORATING MACHINE

Is now in use in most of the Leading Houses in the Trade.

It will run off a Ream of Medium with Five Lines of Perforating (and two Lifts) in Seven Minutes.
It makes a clean round hole, and will cut from Tissue-Paper to Card-Board.

TRADE OPINIONS.

"After two years' constant use, on all classes of work, we have had to replace but three pins. To-day it is in perfect order."
—LEVISON & BLYTHE, St. Louis.

"After four years' use, on all classes of work, we consider it as good as when we got it. It is the best machine we ever saw."
—BROWN BROS., Toronto.

"By using your machine our perforated work costs almost nothing when considered by the ream."—BOORUM & PEASE, New York.
"We recommend it to the trade. Just the machine long looked for."—SHORT & FORMAN, Cleveland, Ohio.

"Your perforator is very satisfactory. It is very superior in excellence of work and rapidity."—WESTERN BANK NOTE CO., Chicago, Ill.

"It exceeds our expectations. Does splendid work. Is easily attended and durable. We cheerfully recommend it."—Geo. D. BARNARD, St. Louis.

"We are gratified far beyond our expectations. As to the rapidity and accuracy of its working, we could not be better satisfied."—WM. G. JOHNSTON & Co., Pittsburgh, Pa.

"We would not do without it if we had to pay double the price we paid you."—COURIER JOURNAL, Louisville, Ky.

"We recommend it as a first-class machine."—STEPHEN GREENE, Philadelphia.

"We tried four makes of perforators and found none that would do the required work until we got yours; it gives us the greatest satisfaction. We perforate with ease the thinnest tissue and manifold, up to thick card-board—sixty reams per day."—J. S. McDONALD & Co., Chicago, Ill.

"We are working them constantly. We fully endorse everything said in their praise by other firms who have them in use. They very soon repay themselves."—WATERLOW & SONS (Limited), London, May 17, 1883.

Compare the speed, durability and work of these Machines with any other, and note the per centage made on the investment.

BLACKHALL'S RULING ATTACHMENT.

Can be applied to any sort of Striker, doubling the value of the ruling machine. A clear cash profit of 75 to 100 per cent. is gained by this attachment any day it is used (a large profit where now there is little or none). There are twenty-seven used in New York alone.

WHAT THE TRADE SAY OF IT.

"Send us another (the third); your attachment is a big thing and worth all you charge for them."—Geo. D. BARNARD & Co., St. Louis.

"We are satisfied as to their value. Send us another."—BEATTY & STEVENSON, New York.

"Your ruling attachment is equal to another machine. Does all you claim."—CULVER, PAGE, HOYNE & Co., Chicago.

"Your attachment soon pays for itself."—WATERLOW & SONS, London.

"We find one ruling machine, with attachment, does the work of two without it."—BROWN BROS., Toronto.

"With your attachment I can produce work in one half the usual time."—W. C. SMITH, New York.

Blackhall's Double Combined Striker and Lapper.

This simple arrangement will do twice the work of an ordinary Striker, and for ONE HEAD or stock work it will lap the head and run the down lines as fast as feint lining (without striking). It will also work one to five patterns at one time. The favor it has met with is the best proof of its value. Can be applied to any sort of ruling machine.

TESTIMONIALS.

"We can by ONE feeding finish work that required three feedings on the Hickok Striker just displaced by yours."—HALEY & BAKER, Philadelphia, Pa.

"Your Combination Striker does all you claim for it, gives twice the results of the American machine, does better work, and is a great saver of time and labor. It meets our warmest approval for its general merit."—WATERLOW & SONS (Limited), London, England.

"Your Striker is far in advance of anything we have seen; is all you represented, is very accurate, and economizes time to a wonderful degree."—W. G. JOHNSTON & Co., Pittsburgh.

"Yours is the best Striker we have ever used. It gives perfect satisfaction."—WM. B. BURNFORD, Indianapolis, Ind.

"I have stopped the Hickok Striker; find yours does twice the work."—W. H. BOOR, Buffalo, N. Y.

"Your Striker is a most desirable improvement. Does double work."—CAMERON, AMBERG & Co., Chicago, Ill.

The foregoing are a few from the many Testimonials I hold. (Second-hand Strikers of other makes on hand at very low prices.)

I would also call attention to my Defiance Blue Pulp, for making Ruling Ink. It is free from acid, grit or sediment, and will not separate or clog in the pens. Is strong and pure.

N.B.—Blackhall's Patent Marbler does away with the present system. A boy can do as much in a day as would usually take a man a week, without any gum, size or trouble. It is always ready to use, and one roll or pad, costing \$5.00, will marble 100 feet square. So the work costs about one-tenth of the usual plan.

ABOUT CHOICE OF INK.

Ink should always be selected to suit the paper it will be used upon: for cheap paper, cheap ink; for fine paper, fine ink. At least three qualities—book, news, and fine job—should always be kept in stock by a printer who does miscellaneous work. Other qualities will always be needed. The speed of a press will be largely controlled by the ink. If it is oily or gritty, if it dries on rollers, or sets-off, or does not dry quickly, or does not keep its color on paper, it will seriously hinder the pressman. As the finest black inks are usually of stiff body, and distributed with difficulty, they can be used to advantage only on presses that have ample provision for distribution. When ink of this nature is provided for paper of soft stock, the speed of the press must be reduced, to prevent the ink from tearing the paper when the paper leaves the form after impression. Ink tables need frequent cleaning, and the ink fountain should always be covered, to keep out the dust and floating particles of paper.

CARE AND USES OF PATENT BLOCKS.

To prevent warping, patent blocks should never be sent to the washing trough, nor allowed to lie on a wet stone. Where plates have to be cleaned up on press, use no more benzine than is needed; when cleaning is over, sop up with a moist sponge, and make dry with rags or waste. Blocks should be frequently cleaned and oiled, special care being taken to keep the mortises and screw-threads free from dirt. When not in use keep in a dry and close closet, where they will not be exposed to dust or to changes of temperature.

Never order a new set of blocks, nor make up a form of patent blocks for press, until you know the exact size of the chase that must hold the blocks, and the thickness and position of its cross-bars.

Ascertain, also, the exact size of the paper for which the blocks are intended; and whether the leaves of the paper, after printing, are to be cut or uncut, to be sewed or to be stitched.

In making up blocks, if the paper is to be uncut and sewed, allow nothing for loss by waste on the fore edge; if it is to be side-stitched and trimmed, make suitable allowance for the margin that will be cut off or concealed in binding.

Always make up the margins full to the paper that will be used, so that the sheet can be evenly folded by edges, and trimmed, if necessary, after the folding. Never make up blocks with irregular edges that compel the cutting and the waste of paper before folding.

When you can do so, put in every gutter, at every head, and on the sides of every cross-bar, one or two pieces of pica regel, so that the margins can be easily corrected if they are found faulty on the first proof.—*Western Electrotypist.*

JADE.

A correspondent writes to *London Nature*: During the last ten years much has been written on the origin of the jade objects found in America and Europe, no raw materials of the stone having yet been discovered out of which the articles could have been manufactured. Prof. H. Fischer, of Freiburg, in Baden, therefore brought forward the hypothesis, supported by several of his scientific brethren, that the jade objects of America had been transported thither from Asia in prehistoric times, when Mongolian

tribes settled in the New World, and that the intercourse of trade has later acted in the same manner. For Europe, where thousands of those objects have been found, the Aryans had done this service when wandering from the very heart of Asia to the west, the source of the jade objects of both continents being Asia, where deposits of the mineral are known to occur in Siberia, Turkestan and Burmah. Recently Dr. Meyer, of Dresden has energetically opposed these views in a large folio work containing many plates, and has come forward with the opinion that the jade sources of Europe and America yet remain to be discovered. As to America, we are glad to hear that this much simpler and more reasonable explanation of the problem has now been verified, the Smithsonian Institution of Washington lately having received from Louisiana an immense number of objects of jade, among them implements, knives, and other articles, many having an admirably high finish, and with them a considerable quantity of the stone of which the objects were made. We do not doubt that similar discoveries may soon be expected in Europe, especially in Switzerland, and that we shall succeed in ascertaining the exact districts where the mineral is to be found.

BOOK-BINDERS' WIRE-STITCHING MACHINE

Of Largest Capacity and Range. Power and Hand Combined.

SPECIAL STEEL WIRE FOR THEIR USE.

Wire per thousand books costs but one-third that used by any other Stitcher.

Manufactured by CHARLES CARR, Granite St., South Boston, Mass., U. S. A.

GOLD AND SILVER THREAD AND ITS MANUFACTURE.

The art of blending gold and silver with colored silks in the manufacture of textile fabrics is one of great antiquity. It is mentioned by Moses in the Book of Exodus, chap. xxxix., as follows: "And he," that is Ahisamach, a cunning workman of the tribe of Dan, "made the ephod of gold, blue, and purple, and scarlet, and fine twined linen. And they did beat the gold into thin plates, and cut it into wires, to work it in the blue, and in the purple, and in the scarlet, and in the fine linen, with cunning work. And the curious girdle of his ephod that was upon it was of the same, according to the work thereof; of gold, blue, and purple, and scarlet, and fine twined linen." When comparing the ancient practice of the art with that of the most modern, it will be seen that great excellence has been attained in it, but the employment of pure gold wires in embroidery has sunk almost into desuetude. Mention is made by Solomon of the king's daughter whose raiment was of wrought gold. Homer describes the golden net of Hephæstus as being "fine as the filmy web the spider weaves," and Indian traditions point to an early acquaintance with the art by Oriental nations. Pliny also mentions the interweaving of gold into the garments of King Attalus, and the Babylonians are said to have been skilled in the manufacture of gold embroidery.

In mediæval times the art appears to have been practised in India and in France, but it was not known in England until the year 1565, and, indeed, we are not prepared to say with any certainty that the practice of the art commenced at that date as a branch of English manufactures. But in that year a Saxon, Christopher Schultz by name, introduced the draw-plate for wire-drawers, and as wire-drawing must precede the making of gold thread, we may adopt the above date as marking the commencement of the art in England. In the reign of Charles I. the art of wire-drawing had attained great excellence in this country. The honor of being first in the art, is as usual, contested by France and Germany. Some contend that it was first practised at Nürnberg, in Germany, and from thence was introduced to Lyons, in France, from there afterward migrating to Paris. In an article on "Wire Manufacture in Germany," published in the *Mechanical World*, September 3, 1881, it is stated that "the wire trade had its original seat in the neighborhood of the River Ruhr, in Westphalia." It must have existed during the fifteenth century, for when the town of Altena, one of its principal seats in later times, was totally destroyed by fire in 1518, its sovereign, Duke John of Cleves, issued an order forbidding any wire-drawer to leave the place for the purpose of establishing his trade elsewhere. The trade was, like most mediæval crafts, a close monopoly. The right of manufacturing wire and articles made of wire, had to be inherited from one's ancestors or specially granted by the magistrates of the town. On the other hand, France claims the invention of the draw-plate for wire-drawing as being the right of one of her citizens, Richard Archal by name, who introduced it in the year 1350. For many years after its introduction to England some difficulty was experienced in procuring the draw-plates. In 1753 a writer on the subject, contributing to the *London Daily Advertiser*, mentions this difficulty, and says that draw-plates were forbidden to be exported from France, and this exportation was made a capital offense. He mentions the plates as being

made of a "mixt" metal, the composition of which was kept a secret. He says, "yet we find means to procure them," and thus are able to draw wire and make gold and silver threads. The plates were probably sent over from Nürnberg in consignments of wire, this being the means for obtaining them practised in the trade some fifty years ago. German plates are even now preferred to all others for wire-drawing. We have already mentioned India as being one of the first in the art, and this can be proved by the beautiful specimens of gold embroidery exhibited in the Indian Museum at South Kensington. In Sir George Birchwood's treatise on "The Industrial Arts of India," he states that an immense manufacture of gold and silver threads is carried on all over India, and particularly in the old royal cities. He asserts that "the natives of India are far superior to the Europeans in the art of wire drawing." This assertion remains to be proved, for the workmen there and those here labor under diverse conditions. The Indian workman certainly shows great skill in drawing wire with the rough appliances at his command, and could probably do better if he were provided with European machinery; but he rarely ever attempts drawing other than pure silver coated with pure gold, while the European workman has to draw various alloys of the metal, as will be seen as we proceed.

The process of making gold and silver threads in a well-appointed factory commences with melting and casting the silver and copper which form the metallic base of the threads. Some manufacturers delegate this part of the process to firms of professional refiners and metal smelters; but we shall here describe the work as done on the premises of a gold thread factory. Pure commercial silver and pure electro refined copper are the only metals admissible in preparing bars for wire-drawing. Lumps of those metals, as received from metal merchants, weigh from 1,000 oz. and upward. These have to be cut up into smaller lumps of from 10 oz. to 20 oz. each for the convenience of the smelter, and weighed out to him in lots of from 300 oz. to 400 oz., each proportionately mixed with the quantity of pure copper required to the bar. The proportions may vary according to the price offered by customers for the threads or the class of threads required. If a fair price is offered, or a government contract has to be fulfilled, the mixture may be that of the Hall standard alloy, containing 9 dwt. of copper in 1 lb. troy of silver, or it may be 3B alloy, that is, three grains in the ounce better than the Hall standard alloy, or 7 dwt. 12 gr. of copper in 1 lb. troy of alloy instead of 9 dwt. Where the embroidery has to be heavy and soft, and a good price is offered for the thread, a still better alloy is prepared, and sometimes pure silver alone is employed. On the other hand the gradations of heavy alloys proceed by percentages of copper until 50 per cent. has been reached, then the percentage of silver alone is noted until in the lowest priced threads as little as 4 dwt. of silver in 1 lb. troy of metal is found on assaying the thread. The bars are cast in a cylindrical mold, the rough coarse upper ends are cut off, and the bars forged at a red heat under a steam hammer to consolidate the metal. They are next pointed, and drawn by powerful machinery through heavy draw-plates until the rods have a diameter of $1\frac{1}{4}$ in. In this size they are annealed, the rough surfaces shaved and highly polished, and thus prepared for their coating of gold or silver. The gold, or the pure silver, as required, is laid on the polished bar in the form of layers of leaves of pure gold, and

these are carefully weighed and estimated to equally cover the surface of the bar with the requisite proportion of gold to 1 lb. troy of silver, the quantity of gold being carefully calculated to suit the prices offered by customers. Hence, as little as 2 dwt. of gold in 1 lb. may be found on the lower-priced qualities, and 12 dwt. on some of the best. At present, when English manufacturers have to closely compete with their French and German rivals in open market, and those rivals are offering gold threads at the low price of 1s. 5d. per ounce, very little of the precious metals can be expected in those low-priced goods. To produce this class of goods at a small profit, materials and methods have been adopted which were not known to our forefathers in the trade. Copper and cotton herein supersede the silver and silk of the higher-priced threads, and electricity plays an important part in the new methods. Copper wires thinly coated with an electro-deposited coat of silver are flattened and spun around threads of yellow cotton, and the metal covered thread is made to receive a thin coat of electro-deposited gold. This covers the outside of the thread only, and gives it the appearance of rich gold, with a deposit of 1 dwt. of the precious metal on 1 lb. troy, or a circumferential surface of 2,250 millimetres, 1,000 yards long, or over 3,000 square inches of surface, covered completely with two grains of gold! The better classes of threads made in nearly all English factories are coated with gold by the fire-gilding process—that is to say, the gold-coated bar above mentioned is laid on a bed of glowing charcoal, and there heated to redness. It is then supported at the two ends, and burnished, while still hot, with heavy agate burnishers. This causes the coat of gold to firmly adhere to the surface of the silver. Heavily-alloyed silver bars, and also bars of copper, are coated with pure silver leaf in a similar manner to provide wire for silver and imitation silver threads.

The bars of silver thus coated with gold are next smeared with beeswax and drawn through taper holes in a steel draw-plate by heavy and powerful machinery, and thus gradually reduced in size until they assume the form of wire capable of being wound into coils. These coils are then annealed and passed over to the intermediate wire-drawers, who continue the process of drawing by "disgrossing" or passing the wire through a draw plate while it is being transferred from one roll or cylinder to another. In this way it is formed into wire one-sixteenth inch in diameter, and then passed on to the fine wire-drawers. In the early days of the art all the rolls of the "disgrossing," and also the fine wire-drawn benches, were actuated by hand; now they are all driven by steam-power in large factories, and very little wire-drawing is done by the old methods. It may be mentioned that the wire has to be frequently annealed over a charcoal fire while it is being drawn, and in this process much skill and experience are required, for if the wire is over-annealed the gold sinks—that is to say, it alloys itself with the silver or copper beneath, and the wire loses its golden tint. Gold and silver wires for threads are usually drawn down to a size measuring from 1,100 to 1,400 yards to the ounce of metal; but finer sizes are required for fine light threads, the wire for these measuring from 1,800 to 2,000 yards to the ounce of metal. To attain those finer sizes it has been found necessary to abandon the use of draw-plates when the wire has been reduced to .040 of an inch in diameter, and to continue the drawing through perforated jewels held in cir-

cular holders or disks of brass. The practice of drawing fine wire through perforated diamonds, rubies and sapphires, dates only from the year 1819, the date of a patent taken out in England for that purpose. In drawing the wire through these jewels, and also through the old form of draw-plates, it is observed that grooves are cut by the wire, and the gold settles in those grooves, thus gilding the hole and making it rough. It is therefore necessary to keep the holes well polished, and to keep the wire lubricated with beeswax or a mixture of wax and oil.

The fine wire, drawn as above mentioned, has next to be annealed, then flattened, and this part of the process is performed by passing the wire between revolving steel rollers highly polished. Here again, special skill and training are required to produce a ribbon of metal just thin enough, wide enough, and yet strong enough to bear the strain of spinning. It must also have a "face" or polish lustre, and to insure this the surfaces of the steel rollers must be kept bright, and the wire prevented from fouling the flattening mill. The flattened wire is wound by the flatters on small boxwood reels or bobbins, termed "plate quills," and handed to the spinners under the name of "plate." Those "quills" are adapted to the spinning engines, where they loosely fit over a steel pipe with such nicety as to allow the quills to revolve with a freedom commensurate with the tension required on the "plate." In the process of spinning, a thread of dyed silk is passed through the steel pipe above mentioned, and the metal "plate" is passed over an arm of steel wire fitted with a steel roller. This is made to revolve round the end of the pipe, and thus cause the plate to envelop the silk thread with its folds while the silk is being slowly drawn through the pipe. The rate of motion given to each part of the engine is nicely adjusted and balanced to secure a uniform covering of plate on the silk, and this is capable of being altered to suit the class of work in hand. For "tambour" and lace threads, where smoothness is desired, together with a perfect metal coat, the folds of the plate touch each other and entirely hide the silk beneath, while for light braids and cords it is necessary that silk is shown between the folds regularly throughout lengths of thousands of yards. The thread, when spun, is carefully wound on bobbins for the home market and trade, or made into 1 oz. skeins for exportation to the India and China markets.

Silk for the purposes of this trade is required to possess the qualities of smoothness, uniform size and softness. A frequency of knots and "gouts" and other inequalities in the size of the threads renders them useless to the manufacturer of gold and silver threads, since these have to be smooth and of uniform size throughout. The silk is not "doubled" and "thrown," as in other branches of the trade, but made up into threads of the requisite gauge, and spun hard, with an opposite twist to that which it is likely to have in the subsequent spinning on of the metallic "plate." It is boiled, bleached and dyed a silvery white with a slight tinge of blue for silver threads, or dyed in various shades of orange and yellow to suit the home or the foreign markets. Where cotton is used instead of silk, the same qualities of smoothness and equality in size must be secured, together with length and strength of fibre. To insure the requisite smoothness the threads have to be glazed, and, to avoid the risk of having the gold or silver threads tarnished, discolored and otherwise spoiled by exposure to damp, a fast dye must be given to the cotton. In preparing the cheaper kinds of threads—viz., those destined to receive a coat-

ing of gold electro-deposited on the outside only—strict attention must be paid to the choice of dyes, mordants and other substances used in dyeing and glazing the cotton, since these are liable to be acted upon by the acids or powerful alkalies used in the gilding solutions, the dye or mordant being discharged in the solution, and the coating of gold injured. Large quantities of this low-priced, so-called, gold thread are imported from France and Germany, and exported by those countries to the Indian markets of Bombay and Madras. English manufacturers have not yet shown a disposition to closely compete with foreigners in low-priced goods, but confine themselves to a development of a trade in real gold and silver threads, of which there is now a fair demand by Indian merchants.

Gold and silver threads are used in the manufacture of military lace, cord, and braid, and also in fringes and tassels for banners, altar cloths, and similar articles. Imitation gold and silver threads and wires are largely used in theatrical and ballroom dresses and decorations. Much of this is mere tinsel, or Dutch metal imported from Germany, and in most cases does not contain a trace of gold in the gold-like alloy, and only a mere film of silver in the white alloy.—*Textile Manufacturer.*

As the new postal law reducing the rate of postage on letters to all parts of the United States to two cents goes into operation October 1, there is unnecessary discussion about the "redemption" of three-cent stamps and stamped envelopes, which are not used before that date. The three-cent stamp will be useful in a variety of ways after it ceases to be required for the usual single weight letter. It will be convenient to use where three ounces are required, or where triple postage is needed on a letter, or with a two-cent stamp on a foreign letter. Instead of needing to be redeemed as useless, the three-cent stamp is likely to be missed as a convenient denomination with which to make higher combinations in value.

Leisure is sweet to those who have earned it, but burdensome to those who get it for nothing.

J. M. DE BUSSY, General Commission Merchant,

Publisher and Wholesale Bookseller and Stationer, is prepared to

ACT AS AGENT

At the INTERNATIONAL EXHIBITION, to be opened in Amsterdam, on the 1st of May, 1883, for AMERICAN MANUFACTURERS' INVENTIONS, &c., and will guarantee that their interests shall receive careful and personal attention. The following branches will be represented by him.

Publishing Department.

THE INDIA MERCURY, an export journal of world-wide circulation, published in Dutch and English. THE INDIA GUIDE. THE SEA, and THE SHIPPING GAZETTE.

Agency Department.

THE AMERICAN MAIL AND EXPORT JOURNAL. THE PAPER TRADE JOURNAL. THE AMERICAN STATIONER. THE MILLERS' JOURNAL. The East India Daily Papers: ALGEMEEN DAGBLAD VAN NEDERLANDSCHE, INDIE of Batavia. THE LOCOMOTIF of Samarang.

His Export Department Includes—

India, South Africa, East and West Indies, Australia and New Zealand, Egypt, China, &c.

Intending exhibitors should make early application. Every information will be supplied by addressing

J. H. DE BUSSY,
93, Heeregracht, Amsterdam

A SPLENDID BUSINESS OPENING.

My health and other business engagements are such that I will sell my interest (a controlling one) in the stock of the St. Paul Book and Stationery Company (incorporated).

We are doing a large and rapidly increasing business. There is not a better opening for jobbing goods in the Western country. Address

D. D. MERRILL, St. Paul, Minn.

SALESMAN WANTED.

A traveler of good address, now selling the Stationery, Notion and Drug trade, to represent a popular line of Mueilage and Ink on commission; or a man who can give his time to this business exclusively, on commission or salary; must be active and reliable. Address, stating experience, &c., WILLIAM A. DAVIS, Boston, Mass.

FOR SALE.

Stock of Merchandise Tags, Shipping Tags and Gum Labels, together with complete Machinery for manufacturing same. For particulars, address L. J., office American Stationer.

SILL'S Patent BLOTTER HOLDER (IMPROVED).

Soft, elastic pad; convenient handle; snap fastening, highly ornamental, entirely nickel-plated, \$3.50 to \$3.75 per dozen.

H. J. SILL, 918 N. 9th St., Philadelphia.

FOR SALE—THE BUSINESS OF THE LATE Chas. A. Burnham, of Norwich, Conn., who died July 4th. This prosperous first-class Book, Stationery and Paper Hanging Store, to a man with a proper knowledge of the business, is an extraordinary good chance. It is well established and thoroughly known in all the adjacent manufacturing villages in the neighborhood, and bears an enviable reputation. It is now, and has been for years, returning a handsome income. The subscriber wishes to sell it without delay. In the meantime the stock will be kept complete and every endeavor made to keep it up to the high standard of its former owner. For further particulars, address WM. C. LANMAN, Administrator, Norwich, Conn.

STEAM PRINTING WORKS, AMSTERDAM.

When People are Traveling Comfort and Safety are the

TWO PRINCIPAL OBJECTS IN LIFE!

COMFORT!

"The Erie is by far the smoothest road I ever traveled on, either in this country or in Europe; and I consider it the perfection of railroad traveling. With the clean, light and airy coaches, polite attendance, freedom from dust, noise and jar, we reached Chicago hardly realizing what a long journey we had performed. And then such a breakfast as we had the morning after leaving New York, at Hornellsville, is certainly deserving 'honorable mention.' Such a table as they have there, with a full half an hour to enjoy it, is enough of itself to attract passengers."—*Ex. U. S. Minister, E. B. Washburne.*

SAFETY!

"5,491,441 Passengers were carried over the Erie Railway in 1881. Of this vast number, only two were killed—one by falling from the platform of a car on which he insisted on standing, and the other in jumping from a train while in motion."—*New York State Engineer's Report for 1881.*

No better evidence than the above need be wanted that both of these objects are secured to the traveler who purchases his ticket over the

Its **EIGHT Trunk Lines** Traverse the best portions of **NORTHERN ILLINOIS, WISCONSIN, MINNESOTA, DAKOTA and IOWA**.

Located directly on its lines are the cities of **CHICAGO, MILWAUKEE, LACROSSE, WINONA, ST. PAUL, MINNEAPOLIS, MADISON, PRAIRIE DU CHIEN, MASON CITY, SIOUX CITY, YANETON, ALBERT LEA, ABERDEEN, DUBUQUE, ROCK ISLAND, CEDAR RAPIDS, and COUNCIL BLUFFS**, as well as innumerable other principal business centres and favorite resorts; and passengers going West, North, South or East are able to use the **CHICAGO, MILWAUKEE & ST. PAUL RAILWAY** to the best advantage.

Ticket offices everywhere are supplied with Maps and Time Tables which detail the merits of the line, and agents stand ready to furnish information, and sell tickets at cheapest rates over the **CHICAGO, MILWAUKEE & ST. PAUL RAILWAY**.

ARTISTIC HANDKERCHIEFS.

In looking over the pictures that decorate the recently imported fancy linen handkerchiefs we are struck with their artistic excellence, variety, and the unique conceits that many of them present. The colors, too, are in harmony with the subjects, except in some cases where blue pears hang amid clusters of pink grapes, or where a plump maiden, clad in yellow hose, is kissing a youth with green eyes. These and similar errors are isolated, and simply show that the best of printers can make mistakes. The mishaps of the bicycle riding fiend are illustrated on one of the handkerchiefs. He starts out serenely, rides gracefully and without accident. Suddenly he strikes a stout apple-woman and cuts her cleanly and completely in two. The next picture and those that follow around the borders show the arrival of the ambulance corps and the police. The latter pursue the wheelman. He makes a bold dash for the guardians of the peace, cutting them into tiny pieces until portions of their anatomy clog the wheels of the bicycle and throw the rider to the ground. He is finally captured and marched off to the lockup. The trials and tribulations of a man who keeps a monkey are told on another handkerchief. The funniest picture shows the mischievous pet concealed in the coat-tail pocket of his owner's visitor, and driving him almost crazy by his pranks, until the victim discovers the source of his annoyance and shakes his fist in his host's face. The sentimental side of human nature is shown by a series of lovers' scenes, from the old-time serenade to the meeting in the garden and the happy consummation of ardent promises at the altar.

Fruit and flower pieces are shown in abundance, and the sporting pictures are numerous and varied. A feature of the design is the variety of proportions; the pieces appearing in all sorts of shapes and sizes. An extra large handkerchief has a spirited coaching scene; another presents a private box at the opera, the dresses of the ladies being admirably brought out in quiet tints and gorgeous colors. Very striking is a printing representing the race for the grand prize, with lean horses dashing for fat honors, the crowds rising to their feet with ostensibly lusty cheering, gayly dressed ladies waving their handkerchiefs, all faithfully depicted in many colors. Battle scenes, street incidents, school-room episodes, and ludicrous sights in the household are also printed on the handkerchiefs under consideration, the whole making a very striking collection.

In mourning handkerchiefs there are several new things, and we would not be surprised were the pictorial to creep even into these goods. It is not unreasonable to suppose that at no very distant day we will have mourning handkerchiefs with borders illustrating funeral scenes, graveyards and coffins. For instance, if the deceased were a doctor, a death's head and crossbones in black and white would be appropriate. We read once of a widow who had pictures of her husband's face, and an illustration of his monument printed on her mourning handkerchief. At the present writing, however, mourning borders show large and small black spots and lines, running from a hair breadth to an inch wide.—*Gibson's Monthly*.

The Latest Improvement.

THE KERNER.

\$1.

IT is constructed on strictly scientific principles, and being devoid of the complications which exist in old styles is less liable to get out of order. It has no springs to be affected by the action of the ink. The needle is rigidly fixed to a FLEXIBLE air tube extending entirely through the barrel, which when writing is constantly vibrating throughout the entire length of the barrel agitating the ink and causing a perfect flow to the point. It is unequaled by any writing instrument of the kind ever offered for public favor, and gives entire satisfaction to all who use them. It is constructed of the best material throughout, and the point is of platina alloyed with iridium. Prices: No. 1, Plain, \$1; No. 2, Engraved, \$1.25; No. 3, Gold Mounted, \$1.50; No. 4, Entire Gold Cap, \$3; No. 5, Mottled Ruling Pen, \$1.50. Send for Circulars.

CARTER, DINSMORE & CO., BOSTON and NEW YORK

BYRON WESTON,

DALTON, MASS., U. S. A.,

HAS BEEN AWARDED THE

GRAND PRIZE GOLD MEDAL

AND RECOMMENDED THE

Medal of Honor and Perfection

At PARIS, 1878,

This being the HIGHEST and ONLY AWARD given for

LINEN RECORD and LEDGER PAPER

Also, the only Gold Medal given for Ledger Paper at the Adelaide, Australia, Exhibition, 1881.

— A SPECIALTY. —

THIS Paper has received THE HIGHEST PREMIUM over all
others from the Cincinnati Industrial Exhibition, Massachusetts
Charitable Mechanics' Association, Franklin Institute of Philadelphia,
Louisville Exposition, Medal and diploma from United States Centennial
Commission, Medal of Progress American Institute, 1877, and Medal of
Improvement and Progress, Boston, 1878. Its

PRINCIPAL ADVANTAGES

are as follows:—1. It contains more LINEN than any other Ledger
Paper, has a longer fibre, and is, consequently, tougher. 2. Having a
harder and better body, it frays less in erasure, so that by simply using
the rubber after the eraser, the ink is prevented from spreading. 3. It is
more uniform in Weight Color and Finish. 4. It never cockles if properly
bound. 5. Its chemical action upon ink is such that it both writes and rules
up better. For proof of the foregoing, refer to a large number of Sta-
tioners, Bookbinders, Bookkeepers, and Recorders, who have given it,
after a severe test, the preference over all others. This paper is Double
Sized, and will stand any climate or the most acid of fluid inks.

Send for sample sheet, ERASE and REWRITE FOUR TIMES on same spot.
Each sheet is water-marked with name and date.

Correspondence.

LOUISVILLE LOITERINGS.

[FROM OUR REGULAR CORRESPONDENT.]

LOUISVILLE, Ky., August 4, 1883.

The Southern Exposition was on the 1st inst. formerly opened by the President of the United States, who was accompanied by part of his Cabinet and other distinguished people from the North and East. The President in his address said :

I count myself fortunate that I am within the borders of this beautiful city of the South on a day which must be henceforth famous in its history. For a great undertaking, an undertaking of national interest and importance, enters here and now upon its career. I congratulate the promoters and managers of this Exposition that, even at the very threshold of its existence, it gives abundant pledges of success. The zeal and enthusiasm which they have displayed in their labors of preparation and the frequent tidings of encouragement and cheer by which those labors have been lightened and made glad; the splendid triumphs of American genius, activity and skill which are arranged within these walls; the presence of the eager multitudes who throng these hospitable streets, all are tokens that the enterprise here inaugurated will be crowned with brilliant, far-reaching, enduring results. It will multiply the aims of industry, better its operations and elevate its standard of attainment.

By suggesting new wants, it will incite new activities. It will disclose natural resources as yet almost unexplored and point the way to their prompt and profitable development. In countless ways it will promote the arts of peace and help to bring about the works of peace, proclaiming harmony and goodwill and brotherly kindness throughout all the land unto all the inhabitants thereof.

I now declare that the Southern Exposition is open, and may God speed the fulfillment of all its lofty and ennobling purposes.

Prolonged cheering succeeded, in the midst of which the President pulled the cord suspended over his head, and the wheels of the giant engines with all their thousands of feet of connecting shafting, began to revolve.

The display of flags and bunting was very great in all of the business streets, and the city enjoyed a general holiday. It is the intention to keep the decorations intact during the entire 100 days of the big Exhibition, and visitors will see Louisville with all of her banners on the the outer walls. Many exhibits were not in position on the opening day, but they continue pouring in at the rate of twenty-five carloads daily, and all of the space will soon be crowded.

Fall business has opened with animation, and the tone of trade is eminently satisfactory. The weather is bright and cool. Crop reports are

good ; for, although wheat is threshing out light and farmers are holding it back for higher prices, corn, tobacco and cotton are doing finely.

There is nothing new in the book or stationery trades except gradually improving activity. The leading houses have arranged fine displays in the Exposition, which your correspondent will review hereafter.

James A. Hart, variety store, who failed last month, shows assets \$11,000 and liabilities \$13,880. His attorney is now in New York offering to compromise at 40 cents.

Figaro is a new illustrated weekly recently started here. The *Courier-Journal* issued a huge double number describing the Exposition festivities and setting forth the new era of commercial development on which this section has entered.

BOURBON.

CINCINNATI CLIPPINGS.

[FROM OUR REGULAR CORRESPONDENT.]

CINCINNATI, August 7, 1883.

No events of a sensational nature have transpired here in business circles within the past seven days. There are complaints of dullness in some retail houses, while in others the sales are above the average for the season. In the large paper houses the trade is good and the sales have been large. News paper is improving in firmness. Sales of other papers have been steady, large and remunerative.

The general trade in this city has been exceedingly good. A summer reaction follows the spring dullness and all signs of a healthy fall trade abound. In the manufacturing lines of stationery and in the sale of material for mercantile stationery the transactions have run above average in number and volume. Dealers and manufacturers are stocking for a thrifty fall business, and are looking out for a supply of winter goods. Of course, the Christmas card man has been consulted. What the trade in that article will be will depend upon the amount of talent in the designs and brain and skill in their execution. In these luxuries, the best taste and the highest aesthetic invention, super-added to the most conscientious mechanical work, are required by the consuming public. The limit to the demand for them will be set by the limit to the talent and skill in producing the article in brilliant variety.

Snider & Hoole have been furnishing straw board to the government by the car-load. Their July sales to the trade here and in Chicago, but chiefly in Chicago, have been the largest in the history of the house. This firm has become the sole agent for Welch's patent ready-made blank

book cover and has just commenced operations with notifying the trade by splendid circulars printed—not in Cincinnati—but in Chicago. It is in the Chicago branch of the house that the greatest growth in its business this summer has been experienced. It is stocking up now for a good fall and winter trade, to which all signs point.

Your Eastern failures in the shoe and leather trade are exciting interest here not from any hurt they inflict, but as harbingers of a phenomenon anticipated in the industrial history of this country. It was an Eastern bishop who sang in early days from an island in New England:

"Westward the star of empire takes its way."

That is just what sagacious business men here are saying now, in view of these big failures, that the star of empire is still taking its way Westward all the same as in Herbert's time, and that these gigantic failures show that the star of the industrial empire on this continent which has so long hovered over New England, is making a business of packing up to go West and grow up with the country and settle there permanently. I don't want to hurt the feelings of any New Englander, but facts are facts, and the logic of facts is unanswerable. In the light of sundry facts of recent and frequent recurrence, I submit if it doesn't look as if some leading lines of manufacture in New England would have to either move West and become acclimated or give up the ghost and take an everlasting sepulture in the industrial history of New England. There is no getting round the inevitable. You can't even talk round it and bragadocia will not carry you over it. There is nothing left you but to face it and keep before it, or get out of its way or be crushed by it. Take your choice, gentlemen, and be very quick about it.

We have room for enterprise here in Cincinnati. Material, cheap and abundant, out of which wares may be wrought, and we have one of the best distributing points in the nation.

Of course, the Globe Files Company is an immense concern. Go into a banker's office here and you see its wares. You can't get away from them. They are in every counting-room, every lawyer's office. Ministers use them and physicians find them indispensable. Leave Cincinnati and go to the seashore and there you will meet the works of the Cincinnati Globe Files Company. You can no more get away from them on this continent to-day than an offending Roman in the palmy days of the empire could escape the wrath of Caesar. If this thing keeps on, it will soon be that if one goes t

the uttermost parts of the earth he will find the Globe files even there, and the only escape from them will be by the wings of a seraph to some other sphere, and that very soon if one would make a sure thing of it. This company this very day has shipments of goods on their way to Texas, to California, and to Canada, to say nothing of scores of intermediate points far and near. It is doing great things in improving styles and adding to the variety of its products.

The (W. B.) "Carpenter" (& Co.) "shop," on Walnut street, below Fourth street, what with playing base-ball on Saturdays and turning out blank-books, envelopes, mercantile stationery, &c., on week days, and looking very solemn on Sundays, manages, with the assistance of the "boss," to fill in the time. Customers will find the house stocked in its garrets and its cellars, as well as in all the intermediate spaces. Customers will find there men born "sellers," and who, by an ordinance of fate, must remain "sellers" to the day of their death.

George Stevens has his windows gaily decked, and withal so simply, that one marvels at the effect. Here is a veritable old curiosity shop for you. I never saw fish-hooks or anvils in that store, but almost everything else is to be found there. It always seems full of people, but just now Beebe and Johns, two of Stevens' salesmen, complain of dullness. They forget for the moment that they are flanked on both sides with the debris of improvements—a sewer going down on one flank and a huge building going up on the other. General business is good, nevertheless.

PRINCE WILLIAM.

THE METROPOLITAN DAILY PRESS.

II.

In the preceding article under this heading a misstatement was made as to the founder of the *Sun*.

The New York *Sun* was first issued on September 3, 1833, by Benjamin H. Day, who is still alive and residing in the city of New York. In 1838, Moses Y. Beach bought the *Sun* of Mr. Day for \$38,000.

Two more papers are to be added to the list of New York daily papers. These are *Las Novedades* and *Il Progresso Italo-Americano*, the first a Spanish and the latter an Italian paper.

THE TRIBUNE.

There is no journal published in the United States that has had more to do with the shaping of the politics, literature and general intelligence of the American public than the New York *Tribune*. Nor has the influence of this journal been confined to this country; it has been world-wide, and though it has lost some of the power it once had, its opinions are still felt and respected throughout the length and breadth of the land. For many years the *Tribune* was a centre of moral and intellectual influences, which have left a permanent impress on the American people.

The first number of the *Tribune* was issued on Saturday, April 10, 1841, by Horace Greeley, who styled it "A New Morning Journal of Politics, Literature and General Intelligence." The building at 30 Ann street, in which the birth of the paper took place, is still standing, between Nassau and William streets. The quarters of the *Tribune* during its babyhood, though decent, were very modest for that day, but large enough for small things. Two flat presses, which enabled the taking of 3,000 impressions an hour, sufficed for a beginning. Newspapers then used to go to press at midnight and keep their presses running till six o'clock in the morning, and if they were then prepared to issue an edition of

10,000 copies, they were well satisfied with the night's work. The first task which Mr. Greeley set himself to was to print mail advices from Washington only one day old. That was long before the invention of the telegraph, and when he accomplished it he boasted of having beaten his competitors. He has left in his "Recollections of a Busy Life" a curious record of the anxieties of the eventful night when he watched the launching of his enterprise, and the misgivings with which he put the first issue of the *Tribune* on the streets. The entire capital embarked in the venture was only \$1,000, borrowed money at that. But to Horace Greeley \$1,000 in those days was a large amount of money. "Five hundred subscribers," said Mr. Greeley, in speaking of the matter in after years, "had been obtained in advance by giving away all of the copies that had not been sold." The *Tribune* at that time was a little paper of four pages, containing altogether no more matter than is put on a single leaf of the *Tribune* at the present time. This was sold at one cent. The entire receipts of the first week were only \$92, while the current expenses were \$625. In the early days of the paper almost all of the work of writing, editing, compiling, and even reporting, was done by Mr. Greeley and his assistant, Henry J. Raymond, the late George M. Snow taking charge of the financial column. Of the others, who shared in the preparation of the first numbers of the *Tribune*, two survive and still render it valuable service. They are Thomas N. Rooker, who was for many years foreman of the composing room, but who is at present the secretary of the *Tribune* Association, and Patrick O'Rourke, the head engineer. It is not necessary to repeat the oft-told tale of the early life of the *Tribune*. The astonishing industry and courageous enthusiasm of its proprietor carried it triumphantly through the difficulties which beset the first years of all of the metropolitan journals. Its success was never doubted after the first two or three days of its birth. In six weeks its circulation rose from 500 to 11,000, and then it was announced with an air of complacency and pride, at which the modern publisher will be tempted to smile, that "the editor had found it necessary to buy a new press, capable of printing 3,500 copies an hour." Well might Mr. Greeley have said of the *Tribune* in 1841, that it was only a germ of what it might be afterward, for the paper is now four times as large as its first issue, and its new presses are capable of printing 16,000 copies an hour on both sides of the sheet simultaneously—that is to say, of taking 32,000 impressions.

Though the *Tribune* in its early career generally fought on the side of the minority, and was often at war with a prejudiced and vicious public opinion, the forward course of the paper was never seriously impeded. The paper was put in a state of defense in 1842 to repel a threatened attack from a number of Sixth Ward roughs, and in 1863, during the draft riots, it was taken possession of and set on fire by a furious mob.

The old *Tribune* building, at the corner of Spruce and Nassau streets, was for half a century one of the most notable landmarks in New York, and it was not without a pang of regret that the conductors and friends of the paper watched its destruction to give place to the present mammoth structure which it now occupies. This was built in 1875. It is considered one of the most complete newspaper establishments in the world.

The *Tribune* and Horace Greeley prospered journalistically from 1841 to 1872, a long and eventful period in the history of a newspaper.

In 1872 Mr. Greeley resigned his position to accept the nomination for the Presidency of the United States, and Whitelaw Reid assumed the editorial management of the paper and continues to hold this position at the present.

The *Tribune* is owned by a company known as the *Tribune* Association. Its daily circulation is estimated at 45,000, and its weekly issue at about 100,000.

PHOTOGRAPHING THE SOLAR CORONA.

Huggins has succeeded, by the aid of colored glasses and potassic manganate, in photographing the corona. Using a Newton three inch telescope, with a focal distance of three and a half feet, he obtains a very distinct photographic image of the sun, without any perceptible defect. When the exposure is very rapid, there can be seen around the sun, under suitable conditions of illumination, the interior corona, which is more regular in form than the exterior corona, and which extends about a quarter of a solar diameter beyond the sun's image. An exposure a little less rapid produces a reversal of the photographic image of the sun; the interior corona is absorbed in the exterior, which appears black, as in a negative proof. If the exposure is a little longer, the reversal is produced both in the solar image and in the corona, but not in those parts of the plate which are affected by the atmospheric light alone. Afterward the plate represents the corona in white, as in a positive proof, and the atmospheric light in black. Then the straight and curved lines and the other varied forms which characterize the corona, can be easily traced. Captain Abney has carefully compared these plates with those which were taken during the last total eclipse. He does not doubt that Huggins is able to photograph the corona at any time without waiting for eclipses, which occur only fifteen times in a century. The new method will enable observers, especially in southern climates and at high elevations, to make this phenomenon, which is one of so great importance in solar research, the subject of daily study.—*Comptes Rendus*.

CEMENTING LEATHER.

When pieces of leather are to be cemented together, which are not subjected to traction or need not sustain heavy weights, common glue will probably be the best binding substance; for thin leather, ordinary flour paste may also be used. If the leather is subjected to a moderate strain, the following method may be used: Soak equal parts of glue and of isinglass for ten hours with enough water to cover them, then add one-fourth part of tannin, and boil until the mixture becomes sticky. The surface of the leather must first be roughened with some coarse tool; they are then well rubbed with the above mixture, while warm, and firmly pressed together. After a few hours they will be found united. Or glue (eight parts) may be soaked with water until soft, the excess poured off, and the vessel then placed on a water bath until the glue melts. One part of glacial acetic acid is then added, and the mixture transferred to small vials. This liquid glue will also stick leather together very firmly. An Austrian firm manufactures a glue which is said to be made from the entrails (skins?) of cattle, which goes by the name of dermatin, and is reported to be used in England as well as on the Continent. This is said to glue leather together so effectually that the mended place will be as good as new, while it leaves it perfectly flexible.

OLD BERKSHIRE MILLS

CHARLES O. BROWN, President.

DALTON, MASS., U. S. A.

JOHN D. CARSON, Treasurer.

One party writes: "The two hundred RECORD BOOKS, for 83 of the 99 Counties, now on exhibition at the Iowa State Fair, at Des Moines; and all, but four (4) of them, made from your 'OLD BERKSHIRE MILLS LINEN LEDGER,' Medium, 40lb., make a splendid show."

[The above cut is a fac-simile of the wrapper used on the Linen Ledger Paper.]

We will pay for any book rejected on account of fault in the paper. Send for Samples, test them in comparison, and see that your books are made from paper thus water-marked.

Being Triple Sized (a process entirely our own) and Loft Dried, can be erased and written upon the fifth time distinctly. None genuine without the water-mark, thus—Old Berkshire Mills Linen Ledger, and date.

CARSON & BROWN CO., Manufacturers.

Extra Fine Papers

Manufactured by

Z. CRANE, JR., & BRO.,

DALTON, MASS., U.S.A.

These Goods, which are acknowledged to equal the finest foreign manufactures, are presented in the following styles and qualities:

SUPERFINE QUALITY.

In handsome Light Blue Boxes containing one-quarter of a ream of Note Paper each, and bearing in blue letters description of contents.
In separate Boxes of uniform size, are one-eighth of a thousand Envelopes corresponding in tint and quality to the paper.

EXTRA SUPERFINE QUALITY.

In attractive Lavender Colored Boxes containing one-quarter ream of Extra Fine Paper each, with contents printed in red. Corresponding to this, in like Boxes, are Envelopes to match.
All this Stationery may be relied on to be according to representation.
It is suited to the tastes of the most select trade.

In addition to the above lines, our other Specialties are put up with care, in attractive and substantial form. Goods can be seen at the Mill, or at our New York General Agency, GEO. B. HURD & CO., 79 Beekman Street.

SEASON 1883-1884.

SEASON 1883-1884.

L. PRANG & CO.'S

Christmas and New Year Cards.

YE beg to express our thanks to our patrons and friends for the kind and flattering appreciation of our past efforts, and feel a pardonable pride at the very emphatic endorsement which our Cards have received from the American, English, German and Australian press. With one accord these exponents of public taste have given our Cards the first rank over all similar productions in the market. We are bound to maintain this superiority; and we have, as heretofore, spared no expense to create, with the aid of our enlarged experience, a Series of Novelties for the Christmas Season, which, we have no doubt, will meet the expectations of the Trade. We have been singularly fortunate in procuring the assistance of, we may say, **REPRESENTATIVE AMERICAN TALENT** in the preparation of designs, and besides have secured the coöperation of some of the most **EMINENT EUROPEAN ARTISTS**.

OUR LINE IS NOW COMPLETED, and our agents are on the road to call on our patrons and friends. An inspection of the Sample Books will convince them that in regard to **ORIGINALITY AND VARIETY OF DESIGN, EXCELLENCE AND RICHNESS IN EXECUTION**, it far exceeds our last year's efforts. To give an idea of the high artistic order of the line, we would say that it comprises:

FIGURE DESIGNS by Miss DORA WHEELER, Miss ROSINA EMMET, Miss L. B. HUMPHREY, Miss L. B. COMINS, ELIHU VEDDER, WALTER SATTERLEE, A. F. BROOKS, and others.

LANDSCAPE DESIGNS by W. HAMILTON GIBSON, THOMAS MORAN, F. L. SMITH, and others.

ANIMAL DESIGNS by B. E. BENSELL and HARRY BEARD.

FLOWER AND BIRD DESIGNS by Miss FIDELIA BRIDGES, Mrs. O. E. WHITNEY, JEAN ROBIÉ, of Brussels; H. GIACOMELLI, of Paris, and others.

THE LITERARY MATTER in connection with our designs has been carefully attended to—among others, by Mrs. CELIA THAXTER, Mrs. EMILY SHAW FORMAN and JOAQUIN MILLER.

OUR REGULAR LINE of Christmas and New Year Cards will comprise plain cards, fringed cards, and double fringed cards, varying in price from 30 cents to \$60, per set of 12.

PROTECTORS are furnished with all fringed cards, and also **ENVELOPES** for all series costing \$1.80 per set and more.

Besides our **REGULAR LINE**, we would call special attention to the following

NOVELTIES AND SPECIALTIES:

ALADDIN'S LAMP. This is one of the most elaborate and elegant Christmas Gift Cards we have ever offered to the trade. It is a large folding card, heavily fringed, and provided with a leatherette protector. The front outside page is a design of peacock feathers on satin; the left inside page contains a poem specially written for this gift by JOAQUIN MILLER, also on satin, and surrounded by a delicate border of Oriental design; the right inside page presents Aladdin bearing his lamp, after a painting by the eminent American artist, ELIHU VEDDER; and to complete the whole, the back is embellished with a most unique, artistic design of high order.

RUSKIN CALENDAR FOR 1884. At the solicitation of some of our business friends, we have this year decided to bring out a Calendar, and are happy to be able to announce that we shall issue **A CALENDAR FROM JOHN RUSKIN, FOR 1884**. This consists of an artistic mount with a block calendar, having suitable selections from JOHN RUSKIN's works for each day of

the year. The selections have been made by a lady well-known for her cultivated taste and judgment. The mount has been designed by a well-known Boston artist, and, coming from her thought and tasteful skill, the form and decoration will be a fitting accompaniment to the words within. This Calendar will be a source of pleasure to all who love and appreciate RUSKIN, that they may have every morning a jewel from the treasure of his noble and earnest thought.

"THE CHRISTMAS SHEAF." A folding card, with inside pages, in color, stamped out in the shape of a sheaf of wheat. Tied with silk cord and tassels.

"THE CHRISTMAS BOOK." A surprisingly natural representation of an open book, with floral designs by Mrs. FISHER, and original poems by JOAQUIN MILLER.

CHRISTMAS ART PRINTS ON SATIN.

The great success attending our efforts in this line has induced us to bring out a number of new Series, consisting of Flowers, Landscapes and Figure Designs. These are elegantly finished in several styles, in fringed tinted mats, with cord and tassels; on mounts, with silk fringe and cord; in book form, richly fringed and with leatherette protectors, and on rich Plush mounts. Prices vary from \$1.50 to \$3.50 each.

We have made large additions to our **BIRTHDAY** line, comprising Plain Cards, Fringed and Double Fringed Cards and Art Prints on Satin. Numerous Series at popular prices have been added to our list of **SCRIPTURE TEXT CARDS**. New **FLOWER PIECES** in Mats, &c. **THANKSGIVING CARDS**,—Our line will also be shown now.

Descriptive Price Lists of our **CHRISTMAS** and **NEW YEAR CARDS** are now ready, and will be sent on application.

AUTOMATIC-FEED RESERVOIR PEN.

Herewith are given illustrations of the Lewis Automatic-Feed Reservoir Pen, which is what its name indicates, a reservoir pen, with a perfect automatic-feed. The inventor, recognizing the defects which have proved fatal to the use, for general business purposes, of so-called fountain or self-feeding pens, which have been placed before the public, has entirely abandoned their principle of construction and worked out an automatic-feed which places the flow of ink entirely under the control of the user. The pen case is of hard rubber, the feeding springs and adjusting bolt of gold; the entire interior of pen case is utilized as an ink reservoir, from

A
THE LEWIS AUTOMATIC-FEED RESERVOIR PEN.

Sectional View, showing the internal working of the parts.

which the ink is carried to the pen by the vibration of the feeding springs, which pass through a slotted tube and rest on the nibs of the pen; the flow of ink is governed by the extent and frequency of these vibrations, which are caused by the bending of the pen in the act of writing. A slight touch of the pen on the paper will produce a hair-line, while a heavier stroke increases the flow, so that the finest or broadest line can be produced in the ordinary manner of writing, and no ink flows from the reservoir unless pumped from it by the action of the pen itself. One principal feature is that the user is not tied down to an arbitrary pen which is made for and is a part of the complete article, as any ordinary gold or steel pen can be used at will, for a change of pen in no way affects the perfect working of the feeding springs, thus insuring one's individuality of writing. Any ink, from the thickest copying ink to the lightest writing fluid, can be used with the same results. It is always ready for instant use. It will never clog or get out of order. By its use inkstands are dispensed with. The Lewis automatic-feed reservoir pen complete is furnished with a No. 4 pen, warranted solid gold, with irridium points, packed with filler and printed directions for its care and use. The Automatic Pen Company, Norwich, Conn., is the manufacturer.

A novelty that is likely to become very popular with the trade is a toy safe or bank. The material is iron. A large ape sits in the branch of a tree, at the foot of which is a lion. A monkey is seated in the tree at the back of and in close proximity to the ape, whose open palm is extended toward the lion in a somewhat threatening attitude. By placing a coin in the open palm of the ape, and touching a spring, the monkey leaps upon the ape's back and knocks the coin from the latter's hand, and the lion opens his mouth to catch the coin, and swallows it.

NOVELTIES IN TOYS.

Among the novelties noticed in the toy trade this week are a "Japanese bank," "Captain Kidd's Castle" and "Mother Goose." These goods are being introduced by Selchow & Righter. The bank has a cabinet, with apartments for various denominations of coin and a book slate for keeping account of deposits. "Captain Kidd's Castle" is a castle constructed of building blocks. A little wooden cannon, operated by a spring and provided with a rubber ball, opens fire on the castle and knocks it to "smithereens." The rather complex nature of the adjustment of the parts is intended to tax considerably the ingenuity of the juvenile mind in its efforts to reconstruct the demolished castle. In the last named toy "Mother Goose" and a part of her numerous progeny (there is not room for all) are represented by a number of wooden figures, which are placed on springs and which are hidden behind a partition. Several knobs attached to each of the several

1883-4.

RAPHAEL TUCK & SONS' Artistic Xmas and New Year Cards.

PRICE LIST NOW READY.

RELIEFS (SCRAP PICTURES).

The constant growing demand for Reliefs has impressed upon us the necessity of an improvement of the present way dealers are obliged to keep their stock, and we are pleased to say that we are now able to offer the trade a complete solution to the matter in the form of a

— RELIEF CABINET, —

of which the cut herewith given is an exact illustration. This Cabinet will hold 5,000 to 6,000 Reliefs (according to the sizes desired), and will be presented to every retailer who purchases that number of sheets, amounting to at least \$100 net.

The assortment may be made up of one hundred each of fifty kinds, or fifty each of one hundred kinds. This Cabinet is a solidly built, durable piece of work, in black walnut, and an ornament to any store.

"LANGUAGE OF FLOWERS." — A beautiful packet of twelve sheets of the most popular flowers mounted, with the sentiment of each printed below.

CHICAGO.

THE PARSONS PAPER COMPANY,

— HOLYOKE, MASS., —

In addition to their already extensive establishments at Holyoke (which rank among the largest mills in this country), have recently built a separate mill, specially constructed and equipped for the production of the Best Grades of Linen Papers, and are now manufacturing all the various sizes and weights of BOND, PARCHMENT, BANK-NOTE, AND LEDGER PAPERS. They have already demonstrated their ability to produce of these papers a quality EQUAL TO THE BEST ESTABLISHED BRANDS IN THE MARKET.

Having great strength of fibre (an essential requisite in all Legal, Government and Commercial Papers), they are recommended for use in Bonds, Deeds, Certificates, County and State Records, etc. They are thoroughly sized to stand writing upon with fluid inks, and will permit of repeated erasures and re-writing thereon, when required. Great care is exercised to produce uniformity of color, strength and finish, and to do this, they have the latest improved machinery, specially adapted to the manufacture of Linen Papers.

They would call the attention of the Trade to the following brands, which are their trade-marks, viz.: In all Bond, Bank Folio, and Parchment appears the water-mark

"PARSONS PAPER COMPANY, HOLYOKE, MASS."

The Ledger Papers, of which they manufacture two Brands, are water-marked

"PARSONS LINEN LEDGER."

"SCOTCH LINEN LEDGER."

It is the intention of the Company to maintain the quality of these brands equal to any in the market.

IN answer to frequent inquiry made about our Novelties, we will furnish a

Trade Gossip.

All new goods and designs which are not, strictly speaking, "Novelties" will be noticed under this head. The trade are requested to forward descriptions with samples in order to secure proper notice.

Frank Roehr, printer, Chicago, Ill., has been partly burned out; insured.

Elias Benner, fancy goods dealer, Galesburg, Ill., is closing out his business.

F. M. Deacon, bookseller and stationer, Blenheim, Ont., has sold out to Arkell & Son.

Dempsey & Carroll, stationers, &c., New York, have been burned out. Loss, \$5,000.

Egbert & Reid have bought out the printing business of M. C. Harris, Walla Walla, W. T.

H. C. Kuppert has bought the fancy goods business of Freeland Brothers, Bloomington, Ill.

A dissolution of partnership has taken place in the firm of Moulton & Lincoln, publishers, Boston, Mass.

Milton C. Johnson has just returned from a European trip through England, France, Germany, Belgium and Italy.

The creditors of the Ohio Law Publishing Company, Columbus, Ohio, have asked for the appointment of a receiver.

A dissolution of partnership has taken place in the firm of Davies & Walsh, printers, Cleveland, Ohio. John H. Davies continues the business.

Albert Eyrich, bookseller and stationer, New Orleans, La., who has been in town since Monday last, sailed for Europe on Wednesday, where he expects to remain until September.

A large number of traveling salesmen and dealers in wall-paper, from the West, have been in town for several days past, collecting samples of goods preparatory to the opening of their regular fall trade on September 15.

Phil Hake has now the finest sample-room in the trade. Among the novelties just introduced by Mr. Hake is a fancy stationery box for the holiday trade. This has movable compartments, is very beautiful in design, and is made of the finest materials.

J. H. Bufford's Sons are introducing several new things in advertising novelties, among which may be mentioned the "Three Friends," "Kittens in a Basket," the "Elk's Head," &c., all of which are printed in beautiful colors. This firm has some of the handsomest advertising novelties in the market, and not content with its already complete stock it is constantly securing other new designs.

Earl & Thompson's mill, Broad Albin, N. Y., was totally destroyed by fire on August 3. The fire was caused by the explosion of a kerosene lamp in the rear portion of the building. The structure was of wood, and burned like a tinder-box. No effort was made to save the building or its contents. The total loss is \$9,000, on which there is an insurance of \$3,000.

Among the out-of-town members of the trade visiting the city during the past week were: Mr. Grosvenor, of Grosvenor & Harger, Dubuque, Ia.; Augustus Maxwell, of S. A. Maxwell & Co., Chicago, Ill.; Mr. Hull, of Brown, Eager & Co., Toledo, Ohio; Mr. Eaton, of Eaton, Lyon & Co., Grand Rapids, Mich.; Mr. Nelson, of Nelson Brothers & Co., Grand Rapids, Mich.; F. M. Spaulding and H. N. Cotton, Boston.

One of the most complete and varied lines of scrap and "year" books, autographic and "Ideal" albums ever shown to the trade are now on exhibition at the New York salesroom of the Powers Paper Company, 62 and 64 Duane street, J. L. St. John, agent. This line comprises over six hundred styles, and many of them are noticeable as being extremely novel and unique. The covers are of the finest leathers, plush and cloth, handsomely embossed in color, the leather and plush having the word "Album" in silver. The leathers used are morocco, alligator and calf in all tints; the plush and cloth are in all of the fashionable shades. The "year" book has some of the choicest specimens of the lithographic art ever issued in bound form, being typical representations of the seasons and months, the workmanship rivaling the finest card work published. These goods are worthy of the closest inspection and attest the statement of the manufacturer that they are the finest goods that it has placed on the market in many years.

Charles W. Wright, the well-known representative of Ph. Hake, is in the city this week, and expects to remain for a week or ten days. Any of his out-of-town friends will receive a hearty welcome by calling on him at 155 William street.

J. E. Linde has got out some new shape designs, which are very taking as to form and color. One of them represents a pail of water with birds perched on the rim. Others are of a boy and girl. These novelties are likely to sell well.

The Esterbrook Pen Company has just brought out a new style of steel pen, called the "Attorney's Pen," and numbered 347. It is an engrossing pen, with a medium point, a little finer than No. 161.

F. M. Spaulding, lately with the Russell Paper Company, has started a commission business for the sale of news and book papers, selling for the manufacturers. He is located at 40 State street, Boston.

Max C. Reefer, publisher of the *Jewish Tribune*, St. Louis, Mo., has been succeeded by the *Jewish Tribune* Publishing Company, which has been incorporated with a capital stock of \$5,000.

The Metropolitan Fancy Box and Leather Goods Manufacturing Company, New York, has been dissolved. George W. Granier settles up the business affairs of the concern.

An entire new line of imported novelties in stationery and fancy goods will be introduced in a few days by B. Ilfelder & Co.

The firm of Mann & Bass, stationers, Central City, Dak., has been dissolved. Mr. Bass continues the business.

Dr. L. C. Cox has purchased the *Republican*, until lately published by Harry St. George, at Pomeroy, W. T.

M. J. Kelly, publisher, Hubbard, Ia., has been succeeded by a new firm under the style of Kelly & Frey.

The stationery business of W. L. Harvey, Minneapolis, Kan., has been bought by T. E. Hurley.

Daniel W. Gelwicks has bought out the printing business of Butler & Bowman, Oakland, Cal.

E. M. Taintor, manufacturer of paper boxes, Middletown, Conn., has sold out to R. Burdick.

Paccand & Bell, stationers, Napa, Cal., have sold out their business to Smith & Wilson.

H. C. Lanphear, dealer in novelties, Philadelphia, Pa., has been sold out by the sheriff.

J. B. Lippincott & Co.'s August bulletin is ready for the trade.

P. D. McAndrews, publisher, Storm Lake, Ia., has disposed of his business.

An attachment has been issued against F. C. Morris, stationer, St. Louis, Mich.

Evans, Plummer & Co. have got out a very neat catalogue of their specialties.

Alexander S. Arnold, printer, formerly of Lincoln, R. I., has removed to Valley Falls, R. I.

Brooks & Sussman, dealers in fancy goods, Colusa, Cal., have been burnt out. Loss, \$15,000; fully insured.

The stock, &c., of R. Jellyman, paper box manufacturer, Montreal, Can., is advertised for sale by his trustee.

William Terry, stationer, Galveston, Tex., who has been East for the past two or three weeks, left for Galveston on Tuesday.

A dissolution of partnership has taken place in the firm of Quell & Witte, proprietors Cincinnati Book and Bible House, Cincinnati, Ohio.

Ed. Huber, the genial superintendent for Eberhard Faber, has his hands full of business just now in consequence of an unusually lively trade.

William Brown, bookseller and publisher of the *Herald*, Walkerton, Ont., has sold the *Herald*, but will continue the bookselling business.

R. L. Durant & Co., Bismarck, D. T., have lately started in business as paper dealers, book-sellers, stationers, &c. They ask the trade to forward price lists.

The "Phonographic Dictionary," just published, contains the reporting outline for more than 30,000 words, fully engraved, with the parallel key in ordinary type.

Those troubled with penman's paralysis and nervousness may find relief in the electromagnetic penholder, one of the recent devices for the cure of the difficulties mentioned.

The Yale automatic marking brush is a self-feeding fountain brush, intended to supersede the common pot and brush, and will be found a very useful article to shippers of all classes.

The Acme Company, of Hartford, Conn., has applied for articles of association for the manufacture of all kinds of small wares, including stationery and printed publications—capital stock, \$2,000, in shares of \$25 each.

Henry Levy & Son have this week received many new and novel additions to their already well assorted stock, among which may be mentioned a great variety of busts and figures, which are said to be superior to bisque or china, being remarkably strong and their colors being more tastefully blended.

An elegant combination of useful fancy articles, that no stock of stationery is complete without, was noticed this week in the trade, in a new and unique design. It embraces a satin-lined jewel or watch case, with a bottle of perfumery and one of smelling-salts, each of which rests in a socket on either side of the case. A silver handle of artistic design completes the set.

The Kerner Stylographic Pen Company is about to increase its manufacturing facilities, the demand for its pen being much larger than it can fill for some time. This company has taken "a new departure" by the introduction of a "natural system of teaching writing, spelling, English grammar, punctuation, &c." This system consists of a chart with a compend and illustrations, and twenty-four cards or booklets.

These are supplied with the pen without additional cost.

The newsdealers of New England will have their annual harbor excursion under the auspices of the Newsdealers and Stationers' Union on August 15.

Bradner, Smith & Co.'s paper mill at Three Rivers, Mich., was destroyed by fire on Tuesday morning, August 7. Loss, \$30,000; insurance, \$22,000.

Robert D. Richardson, stationer and printer, Winnipeg, Manitoba, forwards his business card, which is a very creditable specimen of printing in tints and colors.

Koch Sons & Co. have just issued a miniature catalogue of their goods for the season 1883-84. It is bound in flexible imitation russa and is a handy thing to carry about.

The Sanford Manufacturing Company, 151 Monroe street, Chicago, is manufacturing a "French" copying ink. This is a new article and is so called because it has qualities which enable it to compete with favorite inks of foreign origin.

The National Publishing Company, Philadelphia, has issued some very handsome Bible designs and side dies during the spring, and is prepared to promptly fill all orders received, as it claims to have the largest facilities for Bible manufacturing in the United States.

Iverson, Blakeman, Taylor & Co. are introducing an entire new series of Swinton's school reading books. This firm reports trade in school books as being very good. It is closing out a large number of novelties in stationery and other articles, having found staple goods better adapted to its class of trade.

The following named out-of-town tradesmen were in the city during the past few days: F. Zweifel, Galveston, Tex.; Gustav Goelitz, Belleville, Ill.; Louis Reinach, Chicago, Ill.; Mr. Robinson, of Robinson Brothers, St. Joseph, Mo.; George Weikert, Kansas City, Mo.; T. Chaffin, Columbus, Ohio; Alexander Gottid, Wilkesbarre, Pa.; G. A. Whitaker, Washington, D. C.; E. H. Cook, Eagle Pass, Tex.; B. J. Cooper, Austin, Tex.; Mr. Quinn, Milwaukee, Wis.; M. H. Dickinson, Grand Rapids, Mich.; Fred. Spencer, Galveston, Tex.

Mr. Foster's practical references to the "Editions of Shakespeare," in the July-August number of the *Monthly Reference Lists* (Leypoldt), is one of the most important contributions to the Shakespeare bibliography of to-day. Not only have the entries been prepared with great care

and research, but the whole has passed under the scrutiny of six of the most distinguished Shakespearean scholars in this country, who have themselves added notes and memoranda in the course of their revision. Such a guide, indicating, as it does, the most ancient and the most modern, the most sumptuous and the most moderate-priced, the best "single-volume" editions, the best "single play" editions, and the best in other forms, cannot fail to be widely appreciated by the young student, as well as by the Shakespeare scholar and collector of rare editions. The other topics in this number of the *Monthly Reference Lists* are "Early Social Life in New England," and "Madison's Administrations, 1809-17."

Hart & Co., stationers, Toronto, have purchased from N. Ure & Co. the good-will and entire stock of blank forms and blank books, known as their blank-form department. This addition to their own well-organized department makes this part of their business the most complete in that city.

E. C. Brockman, publisher of the *Message*, Mount Sterling, Ill., died a few days ago.

The Tower Manufacturing Company announces another novelty in paper weights this week. This is a glass bulb or vase containing a stone or metal figure colored to represent nature. This company is also introducing a fine line of domestic and imported porcelain plaques, the paintings on which are very beautiful.

Carter, Dinsmore & Co. are introducing a new article in mucilage. This is a superior article, from the fact that in the process of its manufacture, all of the waste material contained in its ingredients is extracted, whereby it is given greater adhesive power. A new thing in Carter's inks has also been brought out. It consists of a "fast red," which is warranted to hold its color in any climate.

A handy pocket combination consists of a neat leather case, containing a looking-glass, comb, button-hook, toothpick, &c.

H. M. Clement & Co., dealers in fancy goods, Ildale, Mich., have made an assignment to I. W. Donovan.

J. T. Buckley, stationer and bookseller, Augusta, Ga., is dead.

AGREEMENT SIGNED BY TOY IMPORTERS.

The steps which have recently been, taken toward the organization of a board of trade composed exclusively of dealers in toys, have resulted in the promulgation of the following agreement, comprising regulations for the government of the class of tradesmen named :

"All outside cases, crates and barrels on assorted lots of goods shall be charged, with cartage on the same, at the market value at point of shipment ; original cases may be given free, with cartage charged at cost ; free delivery to city and suburban dealers optional.

"All claims must positively be made within ten days after receipt of goods to be recognized ; no allowance made for damage in transit, all transportation companies being responsible after receipting in good order.

"On all goods for Christmas trade, settlements must be made not later than early part of January following ; special terms optional with seller for shorter time and for cash. Notes should be given for all purchases on longer time than sixty days. No bills dated ahead.

"Every member to report to the secretary of the association any purchaser refusing to abide by the regulations of the association as adopted. Chronic complaints, and unreasonable demands and deductions by purchasers also to be reported."

G. D. Tallman, secretary of the Executive Committee, which has the matter in hand, said to a representative of THE AMERICAN STATIONER :

"This agreement is the first agreement that has ever been entered into or considered by the toy importers. It has been signed by all of the leading importers in New York, Baltimore, Cincinnati, Chicago, and St. Louis, and is being circulated among leading toy importers in other cities for their signatures. Besides the circulation of this agreement considerable correspondence is going on among those in the trade, and it is very likely that we will be able in a short time to form a temporary association, until after the beginning of the new year, without a general meeting of the toy importers.

THE STATIONER.

DEVOTED TO THE INTERESTS OF THE

Stationery and Fancy Goods Trades.
WEEKLY---\$2.00 PER ANNUM.

Single Copies - - - 10 Cents.

NEW YORK, THURSDAY, AUGUST 9, 1883.

Advertisements cannot be received for insertion in the current week later than 12 m. on Wednesday. The charge for advertising is 25 cents a line, each insertion. Special terms for standing and displayed advertisements to be had on application.

This journal aims to be a medium of information for and a representative of the interests of every one connected with the stationery and fancy goods trades. It contains a full and trustworthy survey of the market for stationery in this country, in all cases giving the actual prices at which goods can be bought of Importers and jobbers in this city, together with a detailed account of novelties in the trade, patents relating to stationery, and current items of interest. A review of foreign markets and accounts of movements abroad will also be furnished, and no pains will be spared to make THE STATIONER a thorough and complete exponent of the trade.

Subscription and postage for Great Britain, per annum..... 12s.

Any information our readers may wish to obtain shall be cheerfully given, and prompt replies will be made to all inquiries addressed to us on any subjects of interest to the trade.

Communications on all trade matters are earnestly solicited. Address

Subscribers to THE STATIONER can be supplied with the best cloth binder in the market. Deliverable at the publication office. Price, fifty cents.

Readers of this paper who avail themselves of the information obtained from its columns, by advertisement or otherwise, are requested to notify their correspondents of the source of their information.

THE toy trade have taken steps which will be found reported in another column. They seem disposed to keep their interest apart from the influence and operations of the Stationers' Board of Trade. Probably their reasons are substantial, although, as yet, we do not see why they cannot ally themselves with that organization and add strength to it, as well as secure the prestige and benefits which it is able to confer.

GERMANY has not had an international exhibition. The alleged reason has been that the prudent Germans have distrusted the financial results of such a competition, and have not looked beyond its possible cost and income. Now, it is proposed to carry out something of the sort on a limited scale, confining the exhibits to the products of the industrial arts of the German empire and Austria-Hungary. That the expense likely to be incurred in such an exhibition will be reimbursed is about as doubtful as if the affair was to be broader in its character. The real cause for hesitation in promoting a world's fair at Berlin is better given in the suggestion that German manufacturers have been more unwilling to exhibit beside foreign manufacturers since their experience of the "cheap and nasty" judgment pronounced upon their wares by one of their own household.

THE French Government has established a department of "Commercial Intelligence," which is to collect and publish for the use of French manufacturers and merchants information that may be of service to them. A government commercial agency of this sort is not a bad idea, even if it is expensive. Our own consular reports are something in the same way, but not nearly so full and exhaustive as this is expected to be. The French propose to take advantage of consular reports and of information from special agents and correspondents, whose communications will be published fortnightly. Perhaps they will also add lists of the principal merchants in different countries and statements as to their standing, thus adding a regular mercantile agency business, as well as commercial information bureau, to the work of the department. The French plan is good, even should it prove to be expensive. Nations are only big business houses after all, and ought to look after their trade in a business way.

A CORRESPONDENT of one of the daily papers suggests the use of an international postage stamp. He is not the first one to whom this idea has come, but there is, seemingly, such a course of procedure to be gone through with that it has always appeared to be too vexatious a reform to undertake. Of course, such a stamp should be current wherever used, no matter by what country it may be issued. It should confer the right of reclaiming a certain proportion of postage upon the government forwarding mail matter prepaid with the stamp issued by another government. If such a plan of

international postage cannot be made to work advantageously, the different countries in the postal union ought to arrange to accept foreign stamps of equivalent value in exchange for their own, and make exchanges at stated intervals. We really need some means of reimbursing people to whom we apply for information or kindly service the cost of the postage that they may be called on to defray. This is one of the things in postal reform which deserve thought and early action.

CLARK W. BRYAN & Co., of Holyoke, in the August number of their monthly paper, try to make light of the fact that in their July issue they printed what purported to be a copy of an agreement between Joseph Parker, Joseph Parker, Jr., and Howard Lockwood, which was incorrect in several material points. They now reprint the incorrect version side by side with a certified copy of the original, and to any one of common understanding and at all familiar with the record the points of difference will be apparent. The only explanation that they offer is that "*the insertion of a # mark where none should have appeared and the omission of 'lbs.' in another place*" occurred through an oversight in printing. Now, in what part of this false statement did this *insertion* and this *omission* occur? Why, just in the *only* place where it was of greatest importance, and where the printer's oversight could be of advantage to the Messrs. Parker. "*The insertion of a # mark where none should have appeared and the omission of 'lbs.' in another place*" happened to be in the *most important sentence*—a sentence which, as it reads in the original agreement signed by the Parkers, is a *direct admission* by them of the *truth* of the chief claim, made years ago, that the retail trade to a greater or less extent understood that "*Treasury*" blotting contained 60, 80, 100 and 120 *pounds to the ream*, just as we had always quoted it, and just as the jobbers quoted it in their catalogues and billed it in their invoices. This was the *whole gist of the controversy* which THE STATIONER has had with the Parkers, and it is *this* that Messrs. Bryan & Co.'s printers so stupidly set up as to make it express a directly opposite meaning. The unlucky compositor inserted a # mark and omitted "lbs." just where it would do the most good, and Messrs. Bryan & Co. tell us that it was done through an "*oversight*." The remarkable coincidences of *insertion* and *omission* which alter and reverse the meaning of a sentence are something beyond the ordinary freaks of "typographical errors." Can Messrs. Bryan & Co. expect us to accept this as a final and satisfactory explanation of a perversion of fact? We reprinted a week ago from the *Paper Trade Journal* some correspondence which passed between Mr. Lockwood and Joseph Parker. The latter wrote: "Have written the proprietors of the *World* calling their attention

to the matter, requesting them to correct it in the August number, and to send me the copy I sent them." On reading the letter from the Parkers to Bryan & Co., printed in the August number of our contemporary, we cannot find any request to "return the copy" first sent to them by Joseph Parker. Is this another printer's "oversight," or did Joseph Parker say that he had done something which he really had not done? Now, did Mr. Parker ask for the return of the "copy" and was it returned to him? In any case, Mr. Parker owes it to himself to show that he at first furnished Bryan & Co. with a correct copy and not with a false and garbled statement. We shall probably recur to this subject again. Time and space forbid further discussion of it now.

ANSWERS TO CORRESPONDENTS.

Marston wants to know: 1. If a certain paper is patented? 2. Who is the patentee? 3. Who makes it?

Ans.—We have not seen the patent, but believe that it is. 2. Can't say. 3. Don't know.

We will say further that we will inaugurate a search through the indexes of the Patent Office and see if the information desired can be found there.

OBITUARY.

STEPHEN B. IVES, SR.

Stephen B. Ives, Sr., of Salem, Mass., died on July 31, at the age of eighty-two years, four months. He was born in Salem, and has long been one of her most honored citizens. He and his brother William were the original proprietors of the Salem *Observer*, which paper they started January 6, 1823. He withdrew from the paper in 1844, and continued the book trade with his brother at the old corner stand now occupied by his son. He withdrew from the book firm April 17, 1853, but continued in the bindery business, and also became a member of the firm of D. P. Ives & Co., of Boston. He retired from business some fifteen years ago. He served in the Legislature two years, one of which was when Otis P. Lord was Speaker. He was a member of the Salem Common Council in 1840, '41, '52 and '53, being president the last named year. He was a member of the Board of Aldermen in 1855-56-57-66-67-68. He leaves a widow, who was his second wife, and a large family of sons and daughters. Among the sons are Stephen B., Jr., the lawyer; Henry P. Ives, the book dealer in Salem, and D. P. and George, the stationers, in Boston.

LOUISE REID ESTES.

Louise Reid Estes, whose death has been announced, was born in 1844, and was married in 1867 to Dana Estes, of the firm of Estes & Lauriat, Boston. She had rare literary abilities, combined with excellent judgment, and several successful volumes of compilation are from her hand. Among her literary acquaintances and correspondents was the late George Eliot. Mrs. Estes was warmly beloved by a very wide circle of friends, who fully recognized her high intellectual and womanly qualities, and who sincerely mourn her loss. She leaves three children, the youngest a babe only eight months old.

ANDREW J. HOLMAN, JR.

Announcement is made of the death of Andrew J. Holman, Jr., on Sunday, August 5, at his residence in Philadelphia. Mr. Holman had been spending some few weeks at Asbury Park,

N. J., where he contracted typhoid fever, which terminated fatally in five or six days. He had been engaged in the book business for about twenty-five years, and was the third son of A. J. Holman, the head of the house of A. J. Holman & Co. He was well and favorably known throughout the trade, and in his death will be a great loss to his immediate friends.

Thomas Parry, of the firm of T. & J. W. Johnson & Co., publishers and importers of law books, Philadelphia, Pa., is dead.

Market Review.

OFFICE OF THE AMERICAN STATIONER,
WEDNESDAY, August 8, 1883.

THE MONEY MARKET.—Money is literally a drug in the market, indicated by the fact that it is loaning on call at $1\frac{1}{2}$ to 2 per cent., while prime mercantile paper is readily discounted at 4 to 6 per cent. The government is paying off its $3\frac{1}{2}$ per cent. bonds, owing to an overflowing treasury. The stock market is dull and depressed, despite the endeavors of leading operators to sustain prices. There is scarcely any outside demand, nor will there be any to speak of until public confidence, which has received a rude shock from recent happenings, has been restored. Railroad mortgages are depressed, in sympathy with the share list. Government bonds are quiet and steady. Foreign exchange is unchanged and quiet.

THE PAPER MARKET.—As compared with the earlier days of August of last year, the signs of reviving activity in the paper trade are more numerous than a year ago. The signs of restocking and fall purchases increase, and a year of what is said to be much worse business has reduced all stocks in the hands of dealers and consumers, although the manufacturing capacity of the paper mills throughout the country remains large and may be in excess of demands. A general concert of testimony exists that buyers are more numerous in the large centres of trade, and salesmen are meeting with greater success than a year ago, and although profits are much more slender, the sales are in larger volume. Prices show little or no variation, but manufacturers are now paying more for chemicals and domestic rags than they have been. The straw board trade is doing a little better, business having revived considerably during the past week.

THE STATIONERY MARKET.—The stationery trade indicates little improvement over last week. Business, however, is steady and prices are firm. Sales in most cases bring cash, showing a healthy state of trade in all sections. The heavy failures in the leather trade during the past week has had no effect on the trade in fine leather goods. The book trade was never in a more healthy state, and it is expected to remain active during August and September. Blank books, fine stationery, steel pens, envelopes and staple articles generally are commanding a fair amount of trade. Buyers are a little cautious, and are holding back orders for future developments. The trade in toys, toy books and other novelties has not fairly opened up yet, but the prospects are that it will be unusually good.

When People are Traveling Comfort and Safety are the

TWO PRINCIPAL OBJECTS IN LIFE!**COMFORT!**

"The Erie is by far the smoothest road I ever traveled on, either in this country or in Europe; and I consider it the perfection of railroad traveling. With the clean, light and airy coaches, polite attendance, freedom from dust, noise and jar, we reached Chicago hardly realizing what a long journey we had performed. And then such a breakfast as we had the morning after leaving New York, at Hornellsville, is certainly deserving 'honorable mention.' Such a table as they have there, with a full half an hour to enjoy it, is enough of itself to attract passengers."—*Ex. U. S. Minister, E. B. Washburne.*

SAFETY!

"5,491,441 Passengers were carried over the Erie Railway in 1881. Of this vast number, only two were killed—one by falling from the platform of a car on which he insisted on standing, and the other in jumping from a train while in motion."—*New York State Engineer's Report for 1881.*

No better evidence than the above need be wanted that both of these objects are secured to the traveler who purchases his ticket over the

PHILADELPHIA,

— MANUFACTURERS OF —

**GLUCINUM PENS.**

NOTICE TO THE TRADE.—We call attention to our circular letter, dated June 10 1883, which has been directed to our patrons and principal stationers in this country, containing some very important information to consumers of our celebrated Glucinum Pens. We confidently claim that they are the best series of writing pens ever placed before the public. The demand for them is constantly increasing on account of the uniformity, smoothness of points, and durability over all other steel pens. This

Trade-Mark and the word Glucinum are copyrighted and registered at the Patent Office, at Washington, D. C., United States of America, and every box has a fac-simile of our signature, so beware of unscrupulous parties misrepresenting us.

EGYPTIAN DISCOVERIES IN ROME.

The Via di S. Ignazio is a short, narrow lane which leads from the Collegio Romano to the tribune of S. Maria sopra Minerva, crossing a portion of the ground formerly occupied by the "Iseum et Serapeum" of the ninth region. Every time excavations have been made on either side of the lane, to build or to restore the houses which line it, some beautiful specimens of Egyptian workmanship have been brought to light.

Considering that no excavations had ever been made underneath the public ground, and considering there was no reason why, in the very centre of such promising land, other relics of the famous sanctuary should not exist, I asked the Archaeological Municipal Commission to try the experiment, and my proposal was accepted at once. The works began on Monday, the 11th—hard and difficult works, because we had to dig to a depth of twenty feet between houses of very doubtful solidity, propping everything on every side. First to appear, at the end of the third day, was a magnificent sphinx in black basalt, the portrait of King Amasis. It is a *chef d'œuvre* of the Saitic period, brought to perfection in the smallest details, and still more interesting for its historical connection with the conquest of Egypt by Cambyzes. The cartouches bearing the King's name appear to have been hammered, although not so completely as to render it unintelligible. The nose, likewise, and the *ureus*, the symbol of royalty, were injured at the same time. The explanation of such circumstances is given by Herodotus. When Cambyzes occupied Sais, Amasis had just been burned. The conqueror caused the body to be removed from the tomb, to be flogged and otherwise insulted, and finally to be burned, the maximum of profanation from an Egyptian point of view. His name was erased from the monuments which bore it, a natural consequence of the "memoriae damnatio." This sphinx is the surviving testimonial of that eventful catastrophe. When, six or seven centuries later, a

Roman governor of Egypt, or a Roman merchant from the same province, singled out this work of art to be shipped over to Rome as a votive offer to the Iseum Campense, ignorant of the historical value of its mutilations, he had the nose and *ureus* carefully restored. Now both are gone again; there is no danger of a second restoration. I may remark, as a curious coincidence, that as the name of Amasis is erased from the sphinx, so the name of Hophries, his predecessor, is erased from the obelisk of Minerva found in the same Iseum. In these two monuments we possess a synopsis of Egyptian history between 505 and 526 B. C.

The second work, discovered on June 17, is an obelisk of red granite, inscribed with hieroglyphics. The lower portions only appear on the side of the trench, and we are still anxious to ascertain whether it is broken or not. If the monolith is entire, it will be of the same size as the one in the Piazza della Rotonda. The cartouches show the name of Ramses II., the Sesostris of the Greeks. We thought at first that the obelisk, like that of the Pantheon, was a Roman imitation, but Professor Schiaparelli, the eminent Egyptologist, who came over from Florence at the first notice of these extraordinary findings, considers it to be an original work, which would belong, accordingly, to the fourteenth century before the Christian era.—*Rodolfo Lanciani, in the Athenæum, June 30.*

SCIENTIFIC APPLICATION OF PHOSPHORESCENCE.

The property possessed by certain metallic sulphides and other phosphorescent bodies of absorbing light when exposed to its influence, and giving out the same when brought into a darkened room, has long been known to scientists, but it is only quite lately that efforts have been made to utilize such properties. Of these, the most striking consisted in spreading a sulphide of this nature upon a flat tablet and exposing it to a strong light for a few seconds under an ordinary photographic negative. Upon removing the tablet thus impressed into a dark room, the picture on it will be found to be glowing in quite a mysterious and wonderful manner, and it will continue for some minutes to radiate the light which it absorbed. It has occurred to an ingenious physicist, A. L. Henderson, to mix one of the most sensitive of these phosphorescent metallic sulphides with the bromide of silver, now so generally employed in the preparation of photographic dry plates, and after emulsifying this mixture with gelatine, spreading it upon the surface of glass plates and treating the same as ordinary ones, except in so far as regards the exposure, which must be momentary. He appears to have reasoned in this way. With even the briefest exposure capable of being given, a certain modicum of change will be produced on the sensitive bromide of silver, although manifestly such as will be incapable of yielding a properly developed image. But the light also falls upon the atoms of the phosphorescent powder incorporated in the films; and as these in turn radiate such light, it follows that they will complete the imperfect exposure set up in the bromide by the direct action of the light. This reasoning has been found correct, and the result at present stands that plates have been prepared having such exceeding sensitiveness as to be well impressed by what Mr. Henderson designates "the flash of a match." Phosphorescent sulphides may easily be prepared by heating the carbonate of lime, of barytes, of

strontia, or other carbonate found most suitable, in a covered crucible with half its weight of sulphur. After an hour's exposure to heat, the preparation is complete, and phosphori are obtained which, upon being briefly exposed to light and then withdrawn into a dark room, will be seen to glow brightly, the color of the light emitted depending upon the nature of the carbonate originally selected. This application of a well-recognized fact in phosphorescence is so novel, and calculated to be of so much use, that we have no doubt its progress toward development will be rapid.—*Scientific American.*

—ROUTE!—

THE GREAT THROUGH ROUTE

Between the **EAST, WEST, NORTH** and **SOUTH**.
This Great Through Route is now completed and
in full operation, **RUNNING THROUGH PASSENGER
TRAINS DAILY** as follows:

Three solid trains each way between Columbus
Indianapolis and Peoria; two trains each way between
Columbus, Indianapolis and Decatur; two trains each
way between Sandusky, Indianapolis, Peoria and
Decatur; two trains each way between Sandusky,
Dayton and Cincinnati; three trains each way between
Sandusky, Springfield and Columbus; four trains
each way between Columbus, Springfield, Dayton
and Cincinnati; two trains each way between Colum-
bus, Springfield, Indianapolis and Chicago—with
Sleeping and Reclining Chairs on Night Trains, and
elegant Parlor and Modern Day Coaches on Day
Trains.

Its track is laid with **HEAVY STEEL RAILS**,
thoroughly ballasted, with easy grades and few curves.
Traversing, as it does the heart of the three great
States of Ohio, Indiana and Illinois, uniting in close
business relationship the capital cities of the first and
second, with the second city of the third, and passing
through a large number of the most important cities
and towns in each, and with all its central location
makes it the **Shortest and Most Desirable Route**
between the East and West.

THROUGH TICKETS AND BAGGAGE CHECKS
to all principal points, **NORTH, SOUTH, EAST**
and **WEST**, can be obtained at any ticket office of
the I. B. & W. R'y; also via this Route at all railroad
offices throughout the country. Rates always as low
as the lowest.

Don't purchase tickets to any point without first
consulting the Agents of the I. B. & W. R'y.
Particular advantages offered to Western Em-
igrants. **LAND and TOURIST TICKETS** to all points
reached by any line.

SILICATE BOOK SLATES, BLACK DIAMOND SLATING, REVOLVING BLACKBOARDS, LAPILINUM (Slated Cloth).

THESE GOODS are in constant use by the **BOARD OF EDUCATION** of the City of New York (in every Public School), and have been for the past twelve years, which is a sufficient guarantee as to their durability and perfection. They are also in use by a large number of the **BOARDS OF EDUCATION**, Colleges and Schools throughout the country. The Private Schools have also adapted our Book Slates in preference to slate or paper pads—finding them more economical and more advantageous to the pupil. They are handsomely bound in fine black cloth, attractive in appearance, and finely finished. The **BLACKBOARDS** are well seasoned, and will last for years, slated on both sides with the celebrated **BLACK DIAMOND SLATING**. For sale by all the leading Houses throughout the United States and Canada. **SEND FOR CATALOGUE**. Patented and manufactured only by the

TO THE TRADE.

GENTLEMEN :—Annually, since 1867, we have offered our New Samples of CHRISTMAS CARDS, and yearly have we been encouraged to renewed efforts.

Our permanent staff in the Designing Rooms has been steadily increasing, and every issue of New Patterns is greater in number than that of the previous year.

Competitions in design among unskilled amateurs, and lavish advertising of cards produced from their drawings, have only resulted in

MARCUS WARD'S CARDS

BEING MORE IN DEMAND THAN EVER.

Again we have to announce the completion of our DESIGNS for the NEW SEASON, all printed at OUR OWN WORKS. We think our artists have surpassed themselves in novelty and beauty of design. The quality of our work is well-known, and the variety and value leave nothing to be desired. Sample-Books now in our Travelers' hands.

Yours respectfully,

MARCUS WARD & CO.,

A NEW ALLOY.

The great attention which has been given for some years past to the manufacture of alloys has brought many of them into the market which for durability and economy are unsurpassed, when applied to the particular purpose for which they are made. An addition to them has now been made in the "delta" metal, which promises to replace ordinary brass in a large number of cases. Delta metal appears to be, practically speaking, a fine quality of yellow metal, hardened and toughened with iron, the result being a fine gold-colored brass of really beautiful appearance. The copper and zinc alloys have always enjoyed a high reputation, but the introduction of iron into them, although successful enough experimentally, has always been wanting in uniformity and reliability when manufactured on the commercial scale. It is this obstacle which the inventor has succeeded in overcoming by first alloying the iron in definite and known proportions with the zinc, and then adding the copper. When ordinary wrought iron is introduced into molten zinc the latter readily dissolves or absorbs the former, and will take it up in proportion of 5 per cent., or in some cases somewhat larger proportions. The exact point of saturation, or the proportion dissolved or absorbed, is found to vary with the temperature at which the molten zinc is kept during the process, and unless the temperature be ascertained and controlled the resulting products will be uncertain in their character. To secure the desired uniformity he uses gas or other furnaces that can be made to work at the same uniform temperatures for heating the crucibles; and he finds that, by keeping the crucible at as high a temperature as possible without the volatilization of the zinc—that is to say, not exceeding about 1200° Fahr.—he is able to produce alloy containing a definite and known proportion of iron, and by adding the zinc and iron alloy thus formed of ascertained and known character to the requisite amount of copper or copper and zinc, he is enabled to introduce any definite quantity of iron up to about 5 per cent. of the zinc contained in the alloy to be produced. The results of experiments made to ascertain the elastic and ultimate tensile strength of the delta metal were very satisfactory. Bar No. 1 of 1¼ inch diameter was tested as drawn; it was first turned to 1.128 inch diameter, or one square inch area and bore an elastic stress of 49,600 pounds, or 22.1 tons per square inch, and an ultimate stress of 75,235 pounds, or 33.6 tons per square inch, the ratio of the elastic to the ultimate strength being thus 65.9 per cent. The contraction of the area at fracture, which was granular and silky in appearance, was 15 per cent., and the stress per square inch of fractured area was 88,511 pounds. At 50,000 pounds, 60,000 pounds, and 70,000 pounds per square inch the extension set in 10 inch were 0.11, 0.82, and 3.73 per cent., respectively, the ultimate being 2.8 per cent. Bar No. 2 was of similar diameter, but annealed, and it was turned to similar area, it bore an elastic stress of 19,800 pounds, or 8.8 tons per square inch, and an ultimate stress of 61,130 pounds, or 27.2 tons per square inch, the ratio of the elastic to the ultimate strength being 32.3 per cent. The contraction of area at fracture, which was granular and silky in appearance, as in the other case was 19.9 per cent., and the stress per square inch of fractured area was 76,317 pounds. At 50,000 and 60,000 pounds per square inch, the extension set in 10-inch was 10.80 and 16.90 per cent. respectively, the ultimate being 17.5 per cent. Comparing the tensile strength of delta

ILLINOIS IRON AND BOLT CO., 30 to 36 Main St., Carpentersville, Kane Co., Ill.

metal with that of iron, brass and gun-metal, the results were: delta metal cast in sand (green) showed a breaking strain of 21.6 tons per square inch; ditto, rolled hard, $1\frac{1}{2}$ -inch bars, 33.6 tons; ditto, rolled and annealed, $1\frac{1}{2}$ -inch bars, 27.2 tons; ditto, drawn into wire of No. 22 W. G., 62.5 tons; wrought iron, 22.0 tons; brass cast, 8.0 tons; brass wire, 22.0 tons, and gun metal, cast, 16.1 tons per square inch; so that there can be no question as to the superiority for many purposes of the new alloy. The comparative cheapness of the new alloy will undoubtedly be one of its greatest recommendations. The inventor certainly appears to have full justification for claiming that, although delta metal is an improved brass, it is as much superior to it as phosphor bronze is to ordinary gun-metal, and as steel is to iron. It can be made as tough as wrought iron and as strong and hard as mild steel; it can be forged and rolled hot, and will stand being worked and drawn into wire when cold. When melted, delta metal runs very freely, and perfectly sound castings of very fine, close grain can be produced from it; its color resembles that of gold alloyed with silver; it takes a high polish, and when exposed to the atmosphere will tarnish less than brass.—*Hardware.*

THE LATHE.

The oldest machine tool known is the most valuable. It contains the germs of all others, whether rotary or reciprocating, and can be made to take the place and do the work of any one of them at a time, and all of them as desired. Its origin is lost in the mist of prehistoric times. It is as old as the loom, and was used by the oldest nations. As constructed in these times, it has reached great perfection, and is made in various special forms; there are boring and chucking lathes, turning lathes, screw-cutting lathes, drilling lathes and polishing lathes. But a screw-cutting lathe with rack or friction feed, and the other ordinary appliances of a complete lathe, comprehends in its capabilities almost all the offices of the other special tools used in the machine shop.

Take a single instance of its capabilities, the production of a screw tap. The lathe will cut a piece from the steel bar; it will drill its centres and countersink them; turn the tap, whether straight or taper; cut the thread on it; score the tap, either by a cutter in the tool post while the tap is suspended on the centres of the spindles, or by means of a rotary cutter or milling tool on the spindle centres while the tap is held on temporary centres on the tool carriage. Even the top end of the tap can be squared, by similar means, for the reception of the tap wrench. Now, all this work represents the cutting-off machine, the drilling lathe, the turning lathe, the screw-cutting lathe, the planer, or the milling machine. And unlike many combination tools, the lathe can be made to do all this work well.

With a cheap attachment the lathe can be made to cut gears, making the teeth with practical accuracy, and the lathe itself can be used to produce the index plate that insures this accuracy. A job of planing—or surfacing—where the work will swing in the lathe, can frequently be better and quicker done on the lathe chuck than on the planer platen. The rapidity is much greater because the surface to be worked is continually under the action of the tool, instead of having more than one-third of the time wasted in the running back of the platen for the return chip.

In short, all the other machine tools, either of

a rotary or reciprocating character, are simply modifications of the lathe; and with the lathe and its convenient appliances and necessary tools, the mechanic can by the exercise of his taste and skill perform almost any ordinary job in the working of metals possible on machine tools. The possession of a screw-cutting slide-rest foot lathe and a common bench vise, with their accompanying hand tools, is an excellent outfit for the amateur.—*Scientific American.*

A PRIZE ENGRAVING.

The competition among artists under twenty-five years of age for the prize of \$3,000, offered by Harper Brothers for the best illustration of Alfred Domett's "Christmas Hymn," ended on August 1. The name of the successful competitor will not be announced until the publication of the illustration in the December number of *Harper's Magazine*. The following named gentlemen have been appointed a committee of judges to decide which engraving among those contributed is entitled to the prize: R. Swain Gifford, N. A.; F. D. Millet, A. N. A.; and Charles Parsons, A. N. A. Should other drawings submitted be found suitable second, third and fourth awards will be made, and if the judges decide that no one of the drawings is entitled to the prize, Harper Brothers reserve the right to reopen the competition.

A SPLENDID BUSINESS OPENING.

My health and other business engagements are such that I will sell my interest (a controlling one) in the stock of the St. Paul Book and Stationery Company (Incorporated).

We are doing a large and rapidly increasing business. There is not a better opening for jobbing goods in the Western country. Address

D. D. MERRILL, St. Paul, Minn.

SILL'S Patent BLOTTER HOLDER

(IMPROVED).

Soft, elastic pad; convenient handle; snap fastening, highly ornamental, entirely nickel-plated, \$3.50 to \$3.75 per dozen.

H. J. SILL, 918 N. 9th St., Philadelphia.

FOR SALE—THE BUSINESS OF THE LATE Chas. A. Burnham, of Norwich, Conn., who died July 4th. This prosperous first-class Book, Stationery and Paper Hanging Store, to a man with a proper knowledge of the business, is an extraordinary good chance. It is well established and thoroughly known in all the adjacent manufacturing villages in the neighborhood, and bears an enviable reputation. It is now, and has been for years, returning a handsome income. The subscriber wishes to sell it without delay. In the meantime the stock will be kept complete and every endeavor made to keep it up to the high standard of its former owner. For further particulars, address WM. C. LANMAN, Administrator, Norwich, Conn.

FOR SALE,

Book and Stationery Store, in a town of 1,800 inhabitants; only store of the kind in the place. Reasons for selling, change of business.

Address F. L. INGMAN,

Villisca, Iowa.

A Revolution in Stylographic Pens. }
The Latest Improvement.

\$1.

It is constructed on strictly scientific principles, and being devoid of the complications which exist in old styles is less liable to get out of order. It has no springs to be affected by the action of the ink. The needle is rigidly fixed to a FLEXIBLE air tube extending entirely through the barrel, which when writing is constantly vibrating throughout the entire length of the barrel agitating the ink and causing a perfect flow to the point. It is unequalled by any writing instrument of the kind ever offered for public favor, and gives entire satisfaction to all who use them. It is constructed of the best material throughout, and the point is of platina alloyed with iridium. Prices: No. 1, Plain, \$1; No. 2, Engraved, \$1.25; No. 3, Gold Mounted, \$1.50; No. 4, Entire Gold Cap, \$3; No. 5, Mottled Ruling Pen, \$1.50. Send for Circulars.

THOS. DE LA RUE & CO.'S

Christmas and New Year Cards

FOR THE SEASON 1883-4.

Now ready, Pattern Books of the above Fine Art Publications, containing a rich profusion of choice and elegant patterns, Chromo-Lithographed in the highest style of Art, after original designs by eminent Artists. N. B.—Shown by Leading Jobbers in the States

EMBROIDERY SERIES.—CHROMO-LITHOGRAPHED ON THE FINEST WHITE SATIN. These Satin Chromos, which have now for many years enjoyed a high reputation, this year surpass all previous productions in the same line. The large Satin, No. 646, "BIRDS AND FLOWERS," is a veritable work of art, and would form an excellent centre-piece in the most costly embroidery. In the case of the smaller Satin pictures, the prices have been reduced with the view of extending their use by ladies for every purpose of ornamental needle-work.

THE ANTI-STYLOGRAPH.

(Hearson's Patent, U. S. A., January 10, 1882.)

A SELF-FEEDING RESERVOIR PENHOLDER, FITTED WITH A NON-CORRODIBLE NIBBED PEN.

Pocket Size (4¼ in. long), \$1.00 Retail; Desk Size (6 in. long), \$1.50 Retail.

THE ANTI-STYLOGRAPH is a Pen which requires no dipping, but is ready for instant use without adjustment, and may be carried in the pocket with perfect safety. It writes with a nibbed pen, renewable at pleasure, with fine, medium or broad point, to suit all writers. It is easily refilled, and holds sufficient ink for several days' use. Any ink may be used.

N. B.—It is not a Stylograph or point-writer, but a true Pen, and preserves all the usual characteristics of the handwriting; it may, therefore, be used for short-hand and signatures.

Pens for Refilling, with Fine, Medium or Broad Points, 40 cents per Box, Retail.

FITTED WITH IRIDIUM-POINTED PALLADIUM PEN. Pocket Size, \$2.50 Retail; Desk Size, \$3.00 Retail.

The Palladium Pen is as flexible as Steel and as durable as Gold; and, like the latter, is specially adapted for use with acid copying inks.

N. B.—To prevent delay, all applications for Pattern Books should be made to Mr. Pulsford, as above.

INDELIBLE INK WITHOUT SILVER.

To a concentrated aqueous solution of chloride of copper add solution of caustic potash as long as a precipitate is produced. Allow to settle, decant or siphon off the supernatant liquid and dissolve the precipitate in the least possible quantity of water of ammonia. Finally add about 6 per cent. of dextrin. After the writing made with this ink is dry, it must be gone over with a hot iron before being washed.—*After Drug. Circ.*

A PEN MANUFACTURER'S EXPERIMENT.

The owner of a steel pen manufactory in Berlin has applied steam in a practical way to the extinction of fires. In his drying rooms for penholders he had been greatly troubled by fire, which he found in some instances very hard to suppress, owing to the combustibility of the penholders. The idea finally occurred to him that such fires might be checked in their early stages by the introduction of steam pipes into the rooms directly connected with the steam boilers and having their ends projecting into the rooms sealed in such a manner that the steam could only escape when, by the action of heat, the solder on the ends of the pipes melted. Pipes were accordingly laid, and the end of each was closed with a short piece of pipe made of an alloy of lead and tin, which would melt quickly should fire break out. To prevent the steam inside the pipes from hindering the melting of the ends the latter were filled with resin. Recently a fire broke out in one of the drying-rooms and was quickly extinguished by the automatic working of the device without the aid or knowledge of anyone about the works. The sound of escaping steam finally drew the attention of the stoker, and when he entered the room he found it full of steam and smoke and in one end of it a partially consumed pile of penholders.

HOW CELLULOID IS MADE.

A roll of paper is slowly unwound, and at the same time saturated with a mixture of five parts of sulphuric acid and two of nitric, which falls upon the paper in a fine spray. This changes the cellulose of the paper into fine pyroxyline (gun cotton). The excess of acid having been expelled by pressure, the paper is washed with plenty of water until all traces of acid have been removed; it is then reduced to pulp, and passes on to the bleaching trough. Most of the water having been got rid of by means of a strainer, the pulp is mixed with from 20 to 40 per cent. of its weight of camphor, and the mixture thoroughly triturated under millstones. The necessary coloring matter having been added in the form of powder, a second mixture and grinding follows. The finely divided pulp is then spread out in thin layers on slabs, and from twenty to twenty-five of these layers are placed in a hydraulic press, separated from one another by sheets of thick blotting paper, and are subject to a pressure of 140 atmospheres until all traces of moisture have been got rid of. The plates thus obtained are broken up and soaked for twenty-four hours in alcohol. The matter is then passed between rollers heated to between 140° and 150° Fahr., whence it issues in the form of elastic sheets. Celluloid is made to imitate amber, tortoiseshell, coral, malachite, ebony, ivory, &c., and besides its employment in dentistry, is used to make mouth pieces for pipes and cigar-holders, handles for table knives and umbrellas, combs, shirt fronts and collars, and a number of fancy articles.

BLACKHALL'S

PATENT POWER

PERFORATING MACHINE

Is now in use in most of the Leading Houses in the Trade.

It will run off a Ream of Medium with Five Lines of Perforating (and two Lifts) in Seven Minutes. It makes a clean round hole, and will cut from Tissue-Paper to Card-Board.

TRADE OPINIONS.

"After two years' constant use, on all classes of work, we have had to replace but three pins. To-day it is in perfect order."—LEVISON & BLYTHE, St. Louis.

"After four years' use, on all classes of work, we consider it as good as when we got it. It is the best machine we ever saw."—BROWN BROS., Toronto.

"By using your machine our perforated work costs almost nothing when considered by the ream."—BOORUM & PEASE, New York.

"We recommend it to the trade. Just the machine long looked for."—SHORT & FORMAN, Cleveland, Ohio.

"Your perforator is very satisfactory. It is very superior in excellence of work and rapidity."—WESTERN BANK NOTE CO., Chicago, Ill.

"It exceeds our expectations. Does splendid work. Is easily attended and durable. We cheerfully recommend it."—GEO. D. BARNARD, St. Louis.

"We are gratified far beyond our expectations. As to the rapidity and accuracy of its working, we could not be better satisfied."—WM. G. JOHNSTON & CO., Pittsburgh, Pa.

"We would not do without it if we had to pay double the price we paid you."—COURIER JOURNAL, Louisville, Ky.

"We recommend it as a first-class machine."—STEPHEN GREENE, Philadelphia.

"We tried four makes of perforators and found none that would do the required work until we got yours; it gives us the greatest satisfaction. We perforate with ease the thinnest tissue and manifold, up to thick card-board—sixty reams per day."—J. S. McDONALD & CO., Chicago, Ill.

"We are working them constantly. We fully endorse everything said in their praise by other firms who have them in use. They very soon repay themselves."—WATERLOW & SONS (Limited), London, May 1st, 1883.

Compare the speed, durability and work of these Machines with any other, and note the per centage made on the investment.

BLACKHALL'S RULING ATTACHMENT.

Can be applied to any sort of Striker, doubling the value of the ruling machine. A clear cash profit of 75 to 100 per cent. is gained by this attachment any day it is used (a large profit where now there is little or none). There are twenty-seven used in New York alone.

WHAT THE TRADE SAY OF IT.

"Send us another (the third); your attachment is a big thing and worth all you charge for them."—GEO. D. BARNARD & CO., St. Louis.

"We are satisfied as to their value. Send us another."—BEATTY & STEVENSON, New York.

"Your ruling attachment is equal to another machine. Does all you claim."—CULVER, PAGE, HOYNE & CO., Chicago.

"Your attachment soon pays for itself."—WATERLOW & SONS, London.

"We find one ruling machine, with attachment, does the work of two without it."—BROWN BROS., Toronto.

"With your attachment I can produce work in one half the usual time."—W. C. SMITH, New York.

Blackhall's Double Combined Striker and Lapper.

This simple arrangement will do twice the work of an ordinary Striker, and for ONE HEAD or stock work it will lap the head and run the down lines as fast as feint lining (without striking). It will also work one to five patterns at one time. The favor it has met with is the best proof of its value. Can be applied to any sort of ruling machine.

TESTIMONIALS.

"We can by one feeding finish work that required three feedings on the Hickok Striker just displaced by yours."—HALEY & BAKER, Philadelphia, Pa.

"Your Combination Striker does all you claim for it, gives twice the results of the American machine, does better work, and is a great saver of time and labor. It meets our warmest approval for its general merit."—WATERLOW & SONS (Limited), London, England.

The foregoing are a few from the many Testimonials I hold. (Second-hand Strikers of other makes on hand at very low prices.)

I would also call attention to my Defiance Blue Pulp, for making Ruling Ink. It is free from acid, grit or sediment, and will not separate or clog in the pens. Is strong and pure.

N.B.—Blackhall's Patent Marbler does away with the present system. A boy can do as much in a day as would usually take a man a week, without any gum, size or trouble. It is always ready to use, and one roll or pad, costing \$5.00, will marble 100 feet square. So the work costs about one-tenth of the usual plan.

SEND FOR CIRCULARS, CONTAINING FULL DETAILS, TO

EDWARD W. BLACKHALL, 83 Wood Street, Toronto, Ont., or 11 West Swan Street, Buffalo, N. Y.

THE AGE OF INVENTION.

The number of inventions that have been made during the past fifty years is, perhaps, unprecedented in the history of the world. Of course, inventions of benefit to the human race have been made in all ages since man was created; but, looking back for half a hundred years, how many more are crowded into the past fifty than into any other fifty since recorded history! The perfection of the locomotive, and the now world-traversing steamship, the telegraph, the telephone, the audiphone, the sewing-machine, the photograph, chromo-lithographic printing, the cylinder printing press, the elevator for hotels and other many-storied buildings, the cotton gin and the spinning jenny, the reaper and mower, the steam thresher, the steam fire engine, the improved process for making steel, the application of chloroform and ether to destroy sensibility in painful surgery cases, and so on through a long catalogue. Nor are we yet done in the field of invention and discovery. The application of coal-gas and petroleum to heating and cooking operations is only trembling on the verge of successful experiment, the introduction of the steam from a great central reservoir to general use for heating and cooking is foreshadowed as among the coming events, the artificial production of butter has already created consternation among dairymen, the navigation of the air by some device akin to our present balloon would also seem to be prefigured and the propulsion of machinery by electricity is even now clearly indicated by the march of experiment. There are some problems we have hitherto deemed impossible, but are the mysteries of even the most improbable of them more subtle to grasp than that of the ocean cable or that of the photograph or the telephone? We talk by cable with an ocean rolling between; we speak in our own voices to friends a hundred miles or more from where we articulate before the microphone. Under the blazing sun of July we produce ice by chemical means, rivaling the most solid and crystalline production of nature. Our surgeons graft the skin from one person's arm to the face of another, and it adheres and becomes an integral portion of his body. We make a mile of white printing paper and send it on a spool that a perfecting printing press unwinds and prints and delivers to you, folded and counted, many thousands per hour. Of a verity this is the age of invention, nor has the world reached a stopping place yet.

—Transcript.

A WONDERFUL MACHINE.

At last the Farnham type-setter, which for the past eight years has been in process of construction in private quarters at Colt's works, has been perfected, and is now on exhibition. It is certainly a wonderful machine, doing the work, as its inventor claims, of five men. It is about the size of an ordinary piano, with lettered keys, which the operator touches, when the types take their places with unfailing regularity. The work of distribution is done simultaneously with the type-setting and even more rapidly, so that the cases are always full of type. The chief difficulty heretofore has been in the justifying, but this has now been overcome, and is done with twice the rapidity of the ordinary mode. The inventor, Mr. Page, believes every obstacle has been overcome, and that the machine is now ready for the trade.

If it really proves to be successful, as it seems

to be, it will take rank with the great labor-saving inventions of the century.—*Hartford Courant.*

INDELIBLE MARKING INK.

Mix intimately eight parts of cinnabar (red sulphide of mercury) and one part of sulphate of iron (ferrous sulphate), and triturate the mixture thoroughly with enough boiled linseed oil to make a thin paste.

This is applied to the fabric in the usual manner. It may be used before the stuff is bleached, as the marks will remain unaffected by the bleaching process.

For marking fabrics after bleaching, use a mixture prepared by triturating chrome green or Prussian blue with boiled linseed oil.

HAS BEEN AWARDED THE

GRAND PRIZE GOLD MEDAL

AND RECOMMENDED THE

Medal of Honor and Perfection

At PARIS, 1878,

This being the HIGHEST and ONLY AWARD given for

LINEN RECORD & LEDGER PAPER

Also, the only Gold Medal given for Ledger Paper at the Adelaide, Australia, Exhibition, 1881.

— A SPECIALTY. —

THIS Paper has received THE HIGHEST PREMIUM over all
others from the Cincinnati Industrial Exhibition, Massachusetts
Charitable Mechanics' Association, Franklin Institute of Philadelphia,
Louisville Exposition, Medal and diploma from United States Centennial
Commission, Medal of Progress American Institute, 1877, and Medal of
Improvement and Progress, Boston, 1878. Its

PRINCIPAL ADVANTAGES

are as follows:—1. It contains more LINEN than any other Ledger
Paper, has a longer fibre, and is, consequently, tougher. 2. Having a
harder and better body, it frays less in erasure, so that by simply using
the rubber after the eraser, the ink is prevented from spreading. 3. It is
more uniform in Weight Color and Finish. 4. It never cockles if properly
bound. 5. Its chemical action upon ink is such that it both writes and rules
up better. For proof of the foregoing, refer to a large number of Sta-
tioners, Bookbinders, Bookkeepers, and Recorders, who have given it,
after a severe test, the preference over all others. This paper is Double
Sized, and will stand any climate or the most acid of fluid inks.

Send for sample sheet, ERASE and REWRITE FOUR TIMES on same spot.
Each sheet is water-marked with name and date.

Correspondence.

CINCINNATI NOTES.

[FROM OUR REGULAR CORRESPONDENT.]

CINCINNATI, August 14, 1883.

Not a bank has weakened in Cincinnati. Indianapolis and Lawrenceburg, Ind., have both been shaken up during the last week, but Cincinnati is solid, sound, unscathed, reports to the contrary in New York and Chicago notwithstanding. There were such reports in both of these rival cities, and there is no accounting for them on any other hypothesis than that of rivalry and envy. When Chicago takes snuff it expects Cincinnati to sneeze. New York under similar conditions looks for the whole country to go into nasal spasms. So it must have been a surprise to these self-satisfied municipalities when yesterday the Wall-street hubbub did not set the whole country into a tremor. There wasn't a responsive shiver in Cincinnati. Chicago, not to be behind in anything, had to emulate New York and let the hog, its staple, have a drop, too, yesterday; but the whole earth outside the windy city didn't respond with any remarkable quake. Not the slightest respect was paid here to these momentous events in the East and West.

To come down to business, there was a little feeling in Cincinnati last Saturday when Indianapolis and Lawrenceburg, both in Indiana and not far away, exhibited the spectacle of banks in an embarrassed condition. But it was only a sentiment. Not a particle of alarm or apprehension was mingled with it. The fact is, the Cincinnati banks have for weeks been characteristically fortifying themselves for the possibility of such a conjuncture. As a further measure of precaution, they have called in a portion of their balances in New York and Chicago, and before the end of this month their strength will be reinforced. The Indiana banks at Indianapolis and at Lawrenceburg, as has already been shown, will pay dollar for dollar and will have plenty left. The circumstances which embarrassed them were so peculiar, that they are not likely to recur to them in the next quarter of a century. As to pork speculation, those engaged at it in Cincinnati are a group of wealthy men, members of a family who have amused themselves in this way for forty years without even once getting a fall. They have received blows that hurt, including this last one, but never a blow that staggered them. If Chicago should burn up to-morrow, as it did once, they could without feeling it match the hundred thousand

dollars which the city of Cincinnati offered the Lake City when it did burn in 1871.

As to general business here, transactions during July and August have been larger than they were during the corresponding months last year. This is true in all lines of business not of the nature of luxuries. In luxuries there has been within the past three weeks a perceptible retrenchment. Collections are difficult and money is light, but it is in strong demand. A favorable indication and at the same time an exhibition of Cincinnati conservatism is the fact of the liquidation of outstanding paper here during the past ten weeks. A loan broker says that not more than ten weeks ago there were outstanding a million and a half dollars of loans which he had negotiated and that now there are not more than half a million of that description negotiated through his office. There is and has been a great deal of investment in government bonds and local securities. This is still going on. A peculiarity of Cincinnati capitalists is their preference for local securities. The bonds of an outside town or city and the stock of outside concerns find but little sale here. Outside investments are generally made for the whole concern or not at all. Many gas works in towns in Ohio and adjacent States are owned wholly by Cincinnatians, while there is but small investment in the gas stock of foreign companies. So with the coal fields of West Virginia and Eastern Kentucky, they are in a great measure owned bodily by Cincinnati capitalists. The city has not obtained a reputation for conservatism without earning it. Money can be had in any desirable quantities on good paper. But the paper must be good. Call loans bring 5 per cent., and short time loans bring from 6 to 7 per cent., according to the sum and the character of the security.

But the barometer of business and of the confidence of business men in Cincinnati, and in the region tributary to it, shows well for the feeling for the immediate future. That barometer is the trade of the manufacturers of mercantile stationery and of the dealer in it. That trade has been good, and continues good. Another week will show through that gauge whether the general business public have looked on the business situation with distrust on account of the events of last week.

One feature of interest as a sign of the times is that the railroads running through this point have been a trifle disappointed at the smallness of grain freights they have been called on to carry to the seaboard. Whether this is due more to a short crop than to the growth of a local consumptive demand which is stopping the grain in the West, a few weeks will reveal.

Among the trade visitors here during the past fortnight were L. A. Lipman, of Boorum & Pease; Phillips, of Ilfeldler; Geo. A. Freeman, American Lead Pencil Company; Frank L. Landers, Tower Manufacturing Company; H. Birrell, of Ivison, Blake, Taylor & Co.; George Freeman, for Charles Zinn & Co.; Ed. J. Gumpert, for Kahn & Halzinger; T. L. Johnson, of Keuffel & Esser; F. S. Hasbrouck, of F. S. Hasbrouck & Co.; Herbert Minor, of H. L. Judd & Co.—all of New York; Mr. Clagston, of Powers Paper Company, Springfield, Mass.; Mr. Turner, of Langfeld, Turner & Andrews, Philadelphia; P. T. Bayes, of J. G. Ditman & Co., Philadelphia; W. A. Sanders, of Brooklyn Rubber Works; James Wallace, of Southworth Company, Springfield, Mass.; "Our Mr. Classon," of Plimpton Manufacturing Company, Hartford, Conn.; "Our Mr. Wallace," of Southworth Company, St. Louis; R. C. Chapin, of Judd Paper Company, Holyoke, Mass.; Mr. Dewey, of Holyoke, Mass.; Mr. Clagston, of Powers Paper Company, Springfield, Mass.; Oliver Braden, of L. L. Brown Paper Company; Mr. Foote, of L. H. Thomas, Chicago; M. L. Raymond, of Baker, Pratt & Co. [PRINCE WILLIAM.]

THE METROPOLITAN DAILY PRESS.

III. THE TIMES.

In the fall of 1851 the New York daily *Times* was launched forth upon the metropolitan public. Though the fourth journal mentioned in these sketches it was in reality the third paper in importance among the journals of that day, and at the present time may be said to occupy the second place in this respect. The founders of the *Times* were George Jones and Henry J. Raymond. Seven gentlemen whose names it is not necessary to mention here contributed the capital stock of the new journal. This was \$100,000. Mr. Jones became the publisher and Mr. Raymond assumed the editorial management of the paper.

The first intimation of the intended appearance of the rival to the *Tribune* and the *Herald* produced a flutter of excitement in the offices of those journals. It was characteristic of the management of the *Tribune* that as soon as Mr. Raymond made public his intention to start the *Times*, a bitter feeling found expression in the following entry upon the carrier's book in the *Tribune* office:

"A new daily is to be issued in a few days, and any carrier of the *Tribune* who interests himself in said paper in getting up routes, &c., prejudicial to the interests of the *Tribune*, will

forfeit his right to property in the *Tribune*. We give this notice now that all who do so may know that they do it at the peril of losing their routes on the *Tribune*."

The *Times* was well received, for the public was prepared to welcome a journal which was pure in tone and prompt in the collection of news. These conditions the new paper sought to fill. On the night of September 17, 1851, the first number of the *Times* was made up. It is needless to say that the paper was a success from the start, and in the new adjustment of things which occurred it was found that there was room for all of the rival journals. The whole number of printers required to put the first number of the *Times* in type was only eighteen. The number of printers employed in the same office to-day is from sixty to one hundred.

One of Mr. Raymond's qualities was pluck. In 1864, when during the draft riots the metropolis was in partial possession of a mob and his journal was threatened with demolition, he, in order to resist the attack of the mob, placed in front of the *Times* office two pieces of artillery, one of which he took charge of himself. On each night of the riot, in order to show that the *Times* was prepared for any assault, the whole establishment was brilliantly illuminated.

Mr. Raymond died on June 18, 1869. George Jones, who had been the business partner and cherished friend of Raymond from the origin of the *Times*, on the death of the latter, assumed entire management of the establishment, and under him various distinguished journalists have assumed, from time to time, the editorial chair of the *Times*, which is now occupied by Charles R. Miller.

Very early in its career the *Times* put on record its aversion to slavery as an institution of this country. To an unqualified disapproval and hatred of slavery this journal added a firm opposition to the enlargement of the area of slavery. It insisted that under no circumstances should the boundary of slave territory be widened.

On the other hand, the Constitution, the *Times* held, recognized slavery, and by no action of the government could it be set aside. On the opening of hostilities in the war of the rebellion, on the part of the Slave States, the *Times*, however, was among the first to give the national government support.

During 1870-1, the *Times* waged, almost single-handed, war against the celebrated Tammany Ring, and in 1881, after the inauguration of President Garfield, the *Times* began a fight against the Star Route thieves, and has continued the same up to the present time. The circulation of the paper is estimated at 45,000 for the daily and 50,000 for the weekly edition.

FANS AND FAN PAINTING.

No one has yet been able definitely to prove when fans were first invented. There can be no doubt, however, of their existence 3,000 years ago, for representations of these familiar articles have been discovered on the tombs at Thebes. The Chinese, according to one of their old legends, claim to have been the inventors, as indeed they claim to have first originated the manufacture of pottery and of porcelain. Hebrews and Egyptians recognized the advantages of fans, which were common among them; but to the Grecians must be conceded the palm where grace and elegance of form are concerned. In the art of fan-making, as in everything else that demanded the presence of artistic taste, they excelled; awkward curves and un-

gainliness of outline were unknown. Naturally enough, the custom of using these articles spread from one country to another, and was handed down from generation to generation. All that is required by the fan-painter is a box of water-colors, a bottle of Chinese white, some sable brushes, a china palette, a bottle of gum, a bottle of ox-gall, a firm drawing-board and a table easel for the copy unless the painter is also the designer, in which case she will need no copy. But our advice to an amateur is to obtain, if possible, a fan executed by a well-known artist, and to reproduce it; more might thus be learned in a few hours than if double the number were spent in making trials and experiments which often prove failures, for a good copy is as good as a lesson to anyone who has acquired some knowledge of painting.—*Harper's Bazar*.

EDUCATED (OR ASSISTED) INDUSTRY.

Germany and France, under the advantages of fine technical schools, are, in some respects, leading Great Britain in textile manufactures, while in the United States there is a growing desire to equal the productions of other countries, if not an urgent commercial necessity for entering into competition with them in the world's markets. There is a much wider application of the subject here than elsewhere, for not only does the manufacturer at the East need to produce finer and more artistic goods than ever before, because of the successful competition in the cheaper fabrics which is springing up in other parts of the country, but also because the expansion itself of these industries over the country creates a demand for more skilled operators and managers.

It cannot be questioned but that there are room and opportunity for such technical schools in the United States. The only trouble in this, as in other cases, is that when there is a new want in the community, we fly at once to the State to supply the demand. Whatever may be thought of certain phases of industrial education as an extension of the kindergarten idea, there is no doubt that the most appropriate places for technical education are the great centres of industry, and that schools for that purpose should be the outcome of private enterprise, either directly or indirectly. This is decidedly the sentiment in England, where education is more thorough in every way than it is here, and where, when such an enterprise is to be started, public spirited citizens interest themselves in obtaining the necessary funds by subscription.

Quite recently one of these institutions was established on a liberal scale at Manchester; that is, the old Mechanics' Institute has been converted to such a purpose and equipped wholly by private contributions. Some of the functions of technical education are also performed by Owens College of that city. It prepares a certain class of persons for the higher positions, as managers, &c., but the new school is intermediary between that and the elementary schools. It will prepare youths for entering upon specific trades, by giving them some technical and theoretical instruction before entering the workshop. Several distinct schools are here brought under one system and management. Thus, there are two sections for boys, one comprising those from eleven to thirteen years of age, the other those above thirteen years. The latter section is divided in two schools, the one strictly commercial, the other technical. The technical department is again subdivided, one branch being a school of applied science, with special reference to mechanical en-

gineering, building, cotton manufacture (including bleaching and dyeing), telegraphy, carriage building, &c., and the other a school of art design, as applied to decorations, furniture, printed cottons, &c. In all departments there are or will be libraries, laboratories and mechanical appliances. In mechanical engineering the studies will embrace fuel, iron and steel, pattern work, foundry, machinery, &c.; in the construction department will be joinery, brick-laying, plumbing, &c.; in textiles will be taught the theory of weaving and spinning, designing, &c.; while the commercial department will embrace the modern languages, commercial arithmetic, short-hand writing, correspondence, political economy, &c. Similar schools have been opened also in London, Leeds and Bradford, which have commended themselves to artisans and manufacturers alike. Their value depends largely upon their being properly equipped for carrying on actual work in all the branches taught. If the subject is cotton manufacture, the pupil is made to spin the yarn, to weave the cloth on the loom, to bleach, dye and print the fabric, while the chemical theories are learned from the text books.

We have in this country several important centres of industry where such schools might be established with profit, and probably no one place combines so many industrial advantages as New York city. The Cooper Institute is an important feature in the general scheme, but it is readily seen from the mere outline of what a technical school should be that it is far from meeting the necessary requirements. If schools on the Manchester plan were started on a small scale, say at Newark, Paterson, Providence, Fall River, and other industrial centres, where the manufactures could be utilized by pupils, the growth of such institutions would be natural and easy, if they should prove to be a necessity.

We notice that there is a gentleman, Mr. Wm. Mathews, from Manchester, now traveling in the United States in the interests of English technical education, having been sent over by the Royal Commission, which was some time ago appointed to examine the subject on the Continent. It would seem that there was but little to be learned in this quarter on that subject, except how our public-spirited citizens are disposed to tax the people at large for everything that ought to be done; in other words, that they are more inclined to call upon Hercules than to put their shoulders to the wheel in cases where self-help would be infinitely better than any Hercules—that is Uncle Sam—could render.—*Bulletin*.

LACQUER.

A lacquer, said to be of great elasticity, perfectly supple and not liable to peel off, is made in the following manner: About 120 pounds of oil varnish are heated in one vessel, and thirty-three pounds of quicklime are put into twenty-two pounds of water in another. As soon as the lime causes an effervescence, fifty-five pounds of melted india-rubber are added. This mixture is stirred, and then poured into the vessel of hot varnish. The whole is then stirred so as to be thoroughly mixed, then strained and allowed to cool, when it has the appearance of lead. When required for use, it is thinned with the necessary quantity of varnish and applied with a brush, hot or cold, preferably the former. This lacquer is useful for wood or iron and for walls; it will also render waterproof cloth, paper, &c.

Wit is sometimes like a sword, keen and cruel; sometimes like a sunbeam, bright and genial.

OLD BERKSHIRE MILLS

CHARLES O. BROWN, President.

DALTON MASS., U. S. A.

JOHN D. CARSON, Treasurer.

One party writes: "The two hundred RECORD BOOKS, for 83 of the 99 Counties, now on exhibition at the Iowa State Fair, at Des Moines; and all, but four (!) of them, made from your 'OLD BERKSHIRE MILLS LINEN LEDGER,' Medium, 40lb., make a splendid show."

[The above cut is a fac-simile of the wrapper used on the Linen Ledger Paper.]

We will pay for any book rejected on account of fault in the paper. Send for Samples, test them in comparison, and see that your books are made from paper thus water-marked.

OLD
BERKSHIRE
MILLS.

LINEN LEDGER PAPER

Will stand the severest
test of COLOR, CLIMATE
INK OR WEAR.

Being Triple Sized (a process entirely our own) and Loft Dried, can be erased and written upon the fifth time distinctly. None genuine without the water-mark, thus—Old Berkshire Mills Linen Ledger, and date.

CARSON & BROWN CO., Manufacturers.

Extra Fine Papers

All this Stationery may be relied on to be according to representation. It is suited to the tastes of the most select trade.

In addition to the above lines, our other Specialties are put up with care, in attractive and substantial form. Goods can be seen at the Mill, or at our New York General Agency, GEO. B. HURD & CO., 79 Beekman Street.

SEASON 1883-1884.

SEASON 1883-1884.

L. PRANG & CO.'S

Christmas and New Year Cards.

WE beg to express our thanks to our patrons and friends for the kind and flattering appreciation of our past efforts, and feel a pardonable pride at the very emphatic endorsement which our Cards have received from the American, English, German and Australian press. With one accord these exponents of public taste have given our Cards the first rank over all similar productions in the market. We are bound to maintain this superiority; and we have, as heretofore, spared no expense to create, with the aid of our enlarged experience, a Series of Novelties for the Christmas Season, which, we have no doubt, will meet the expectations of the Trade. We have been singularly fortunate in procuring the assistance of, we may say, **REPRESENTATIVE AMERICAN TALENT** in the preparation of designs, and besides have secured the coöperation of some of the most **EMINENT EUROPEAN ARTISTS**.

OUR LINE IS NOW COMPLETED, and our agents are on the road to call on our patrons and friends. An inspection of the Sample Books will convince them that in regard to **ORIGINALITY AND VARIETY OF DESIGN, EXCELLENCE AND RICHNESS IN EXECUTION**, it far exceeds our last year's efforts. To give an idea of the high artistic order of the line, we would say that it comprises:

FIGURE DESIGNS by Miss DORA WHEELER, Miss ROSINA EMMET, Miss L. B. HUMPHREY, Miss L. B. COMINS, ELIHU VEDDER, WALTER SATTERLEE, A. F. BROOKS, and others.

LANDSCAPE DESIGNS by W. HAMILTON GIBSON, THOMAS MORAN, F. L. SMITH, and others.

ANIMAL DESIGNS by B. E. BENSELL and HARRY BEARD.

FLOWER AND BIRD DESIGNS by Miss FIDELIA BRIDGES, Mrs. O. E. WHITNEY, JEAN ROHIE, of Brussels; H. GIACOMELLI, of Paris, and others.

THE LITERARY MATTER in connection with our designs has been carefully attended to—among others, by Mrs. CELIA THAXTER, Mrs. EMILY SHAW FORMAN and JOAQUIN MILLER.

OUR REGULAR LINE of Christmas and New Year Cards will comprise plain cards, fringed cards, and double fringed cards, varying in price from 30 cents to \$60, per set of 12.

PROTECTORS are furnished with all fringed cards, and also **ENVELOPES** for all series costing \$1.80 per set and more.

Besides our **REGULAR LINE**, we would call special attention to the following

NOVELTIES AND SPECIALTIES:

ALADDIN'S LAMP. This is one of the most elaborate and elegant Christmas Gift Cards we have ever offered to the trade. It is a large folding card, heavily fringed, and provided with a leatherette protector. The front outside page is a design of peacock feathers on satin; the left inside page contains a poem specially written for this gift by JOAQUIN MILLER, also on satin, and surrounded by a delicate border of Oriental design; the right inside page presents Aladdin bearing his lamp, after a painting by the eminent American artist, ELIHU VEDDER; and to complete the whole, the back is embellished with a most unique, artistic design of high order.

RUSKIN CALENDAR FOR 1884. At the solicitation of some of our business friends, we have this year decided to bring out a Calendar, and are happy to be able to announce that we shall issue **A CALENDAR FROM JOHN RUSKIN, FOR 1884**. This consists of an artistic mount with a block calendar, having suitable selections from JOHN RUSKIN's works for each day of

the year. The selections have been made by a lady well-known for her cultivated taste and judgment. The mount has been designed by a well-known Boston artist, and, coming from her thought and tasteful skill, the form and decoration will be a fitting accompaniment to the words within. This Calendar will be a source of pleasure to all who love and appreciate RUSKIN, that they may have every morning a jewel from the treasure of his noble and earnest thought.

"THE CHRISTMAS SHEAF." A folding card, with inside pages, in color, stamped out in the shape of a sheaf of wheat. Tied with silk cord and tassels.

"THE CHRISTMAS BOOK." A surprisingly natural representation of an open book, with floral designs by Mrs. FISHER, and original poems by JOAQUIN MILLER.

CHRISTMAS ART PRINTS ON SATIN.

The great success attending our efforts in this line has induced us to bring out a number of new Series, consisting of Flowers, Landscapes and Figure Designs. These are elegantly finished in several styles, in fringed tinted mats, with cord and tassels; on mounts, with silk fringe and cord; in book form, richly fringed and with leatherette protectors, and on rich Plush mounts. Prices vary from \$1.50 to \$3.50 each.

We have made large additions to our **BIRTHDAY** line, comprising Plain Cards, Fringed and Double Fringed Cards and Art Prints on Satin. Numerous Series at popular prices have been added to our list of **SCRIPTURE TEXT CARDS**. New **FLOWER PIECES** in Mats, &c. **THANKSGIVING CARDS**,—Our line will also be shown now.

Descriptive Price Lists of our **CHRISTMAS** and **NEW YEAR CARDS** are now ready, and will be sent on application.

Trade Novelties.

[We will be glad to receive samples of all novelties issued in the trade, and will notice all such which possess merit free of charge. It is desirable to accompany descriptions with cuts whenever possible.]

UNIQUE INKSTANDS.

A want that has been felt for a long time in the stationery trade has at last been filled by the introduction of several unique designs in inkstands, two of which are illustrated in the accompanying engravings. These goods are made of hard white metal, equal to the finest electro-plated ware. Their cost is probably about one-third of that for which the same goods would be made up in fine French bronze. They are handsomely finished in steel, silver, gold and other desirable metals. In the smaller design represented, the leaves are green, the cherries have a natural tint, the rustic branches are true to nature and the bird is life-like in appearance. The design represented by the other cut is made of oxidized steel, finished with gold, and embraces, as will be seen, a pen-rack, inkstand and sponge-holder. These designs are from the factory of the Meriden Silverplate Company.

NEW PATENTS.

No. 279,936. Automatic Advertising Device.—Frank F. Gokey, Winoski, Vt., assignor of one-half to James C. Platt, same place.

No. 279,961. Map Holder.—Charles Marlin, New Point, Ind.

No. 279,972. Paper Box.—Albert L. Munson, New York, N. Y.

The box is folded from a flat blank without pasting, and is provided with end flaps, which close over the ends and tuck between the tubular slide and the bottom of the box.

No. 279,976. Sectional Picture.—Albert Operti, New York, N. Y.

No. 279,991. Device for Fastening Envelopes, &c.—Daniel E. Sweet, Chicago, Ill.

A fastening device, consisting of a tag, adapted to be secured to an envelope or other article, and provided with an elastic cord or strap and a securing hook.

No. 279,992. Paper Vessel.—Albert R. Tiffany, Dayton, Ohio.

No. 280,010. Handled Paper Vessel.—Samuel M. Bixby, New York, N. Y.

No. 280,057. Picture Bracket.—Charles Megow, San Francisco, Cal.

No. 280,077. Electrical Type-Writer.—John A. Parks and George V. Sheffield, New York, N. Y., assignors of one-third to Erastus Hayes, same place; said Sheffield assignor to said Parks and Hayes.

The type are T-shaped in vertical section, a

number of each denomination resting with their ears in cases or ways composed of two parallel bars each. From these ways they are removed one by one, as required, by the teeth of wheels entering notches in their contiguous sides, said wheels being actuated by pawls engaging with ratchets attached to them. These pawls are actuated by electro-magnets. The type so removed are dropped into shutes conveying them to a galley, constructed like the above ways, where they are inked, and transfer the impres-

sion by the instrumentality of platens impelled by magnet-actuated toggle-levers.

No. 280,081. Hammock.—George W. Rich, Chicago, Ill.

No. 280,278. Easel Attachment.—Delbert K. Woodward, Lordstown, Ohio.

No. 280,279. Easel.—Delbert K. Woodward, Lordstown, Ohio.

No. 280,286. Paper Fabric or Matting.—John Bray, Washington, D. C., assignor of one-half to Charles H. Longley, Hartford, Conn.

A matting or carpet for covering floors, composed of a woven or knit fabric made from strands or threads of paper.

No. 280,313. Pencil Case.—William S. Hicks, New York, N. Y., and Henry Isley, Jersey City, N. J.

No. 280,318. Method of and Means for Advertising.—Frank Marquart and Will P. Hooper, New York, N. Y.

No. 280,375. Game-Counter.—David K. Horton, Boston, Mass.

No. 280,380. Machine for Molding Book-Backs.—Dennis J. Kane and James E. Kane, New Bedford, Mass.

No. 280,390. Dividers or Compasses.—William H. Mitchell, Boston, Mass.

No. 280,418. Inkstand.—Stephen Ustick, Philadelphia, Pa., assignor of one-third to Thomas J. Bewley, same place.

No. 280,432. Drawing Apparatus.—William S. Worden, Kearney Junction, Neb.

No. 280,417. Printer's Inking and Distributing Roller.—Andrew Campbell, Brooklyn, assignor to John McLoughlin and Edmund McLoughlin, New York, N. Y.

No. 280,500. Rendering Manuscripts, &c., Incombustible.—Gaspard Meyer, Paris, France.

No. 280,556. Picture Exhibitor.—Judson L. Bassett, Franklin W. Bassett and Alphonso E. Hutchings, Coldwater, Mich.

No. 280,568. Inkstand.—Isaac Brooke, Royers Ford, Pa.

No. 280,583. Tumbler Motion for Grippers for Printing Presses.—Calvert B. Cottrell, Westerville, R. I.

No. 280,584. Delivery Apparatus for Printing Presses.—Calvert B. Cottrell, Westerville, R. I.

DESIGNS.

No. 13,993. Printing Type Ornaments.—Henry H. Thorp, Cleveland, Ohio, assignor to the H. H. Thorp Manufacturing Company, same place. Term of patent, 14 years.

No. 13,996. Inkstand.—Lawrence B. Gray, Boston, Mass. Term of patent, 14 years.

No. 14,011. Movable Type.—James A. St. John, St. Louis, Mo. Term of patent, 3½ years.

No. 14,016. Puff-Box.—William H. Brownell, Brooklyn, N. Y. Term of patent, 7 years.

No. 14,026. Calendar.—Clarence S. Nathan, New York, N. Y. Term of patent, 7 years.

No. 14,027. Calendar.—Clarence S. Nathan, New York, N. Y. Term of patent, 7 years.

No. 14,028. Calendar.—Clarence S. Nathan, New York, N. Y. Term of patent, 7 years.

No. 14,043. Desk Rule.—Deloss H. Stephens, River-ton, Conn. Term of patent, 7 years.

ENGLISH HAND-MADE PAPERS

ORIGINAL
EYNSFORD
MILLS,

WATER-MARK:
FELLOWS

KENT,
ENGLAND.

These papers, made from the purest fibre, without any foreign admixture, each sheet separately formed by hand in a mold, couched by vertical pressure and slowly dried by air, possess a toughness, hardness and strength unapproachable by any machine-made papers. For Legal use, for Scrip or Bonds, and for all purposes demanding great durability, these hand-made papers are invaluable.

The heavier sorts are double sized, and they will bear repeated erasure and constant handling beyond all other makes, so that for Ledger and Account-Book purposes none can compare with them.

Proprietor: JOSEPH ARNOLD, Eynsford Mills, KENT, ENGLAND.

FAMILY AND PULPIT BIBLES

PUBLISHED BY THE
NATIONAL PUBLISHING CO.

724, 726 & 728 Cherry Street, Philadelphia.

We claim the following advantages for the "National Contrasted Editions":

THE PARSONS PAPER COMPANY,

— HOLYOKE, MASS., —

In addition to their already extensive establishments at Holyoke (which rank among the largest mills in this country), have recently built a separate mill, specially constructed and equipped for the production of the Best Grades of Linen Papers, and are now manufacturing all the various sizes and weights of BOND, PARCHMENT, BANK-NOTE, AND LEDGER PAPERS. They have already demonstrated their ability to produce of these papers a quality EQUAL TO THE BEST ESTABLISHED BRANDS IN THE MARKET.

Having great strength of fibre (an essential requisite in all Legal, Government and Commercial Papers), they are recommended for use in Bonds, Deeds, Certificates, County and State Records, etc. They are thoroughly sized to stand writing upon with fluid inks, and will permit of repeated erasures and re-writing thereon, when required. Great care is exercised to produce uniformity of color, strength and finish, and to do this, they have the latest improved machinery, specially adapted to the manufacture of Linen Papers.

They would call the attention of the Trade to the following brands, which are their trade-marks, viz.: In all Bond, Bank Folio, and Parchment appears the water-mark

"PARSONS PAPER COMPANY, HOLYOKE, MASS."

The Ledger Papers, of which they manufacture two Brands, are water-marked

"PARSONS LINEN LEDGER."

"SCOTCH LINEN LEDGER."

It is the intention of the Company to maintain the quality of these brands equal to any in the market.

Trade Gossip.

All new goods and designs which are not, strictly speaking, "Novelties" will be noticed under this head. The trade are requested to forward descriptions with samples in order to secure proper notice.

A Wolff, bookbinder, San Francisco, Cal., has been burned out.

Edwin Scofield, Jr., toy dealer, Stamford, Conn., died a few days ago.

J. M. Place, bookseller and stationer, Bolivar, N. Y., has disposed of his business.

Moses King, printer, binder, bookseller and publisher, Cambridge, Mass., has sold out.

W. L. Richardson, dealer in picture frames, Kingston, Ont., has made an assignment in trust.

A dissolution has taken place in the firm of J. B. Clark & Co., music typographers, Cleveland, Ohio.

George Vesey has bought out the stationery, &c., business of Holsinger & Stewart, La Grange, Ind.

The Dixon Crucible Company has issued an artistic show card, the beauty of which is remarked far and wide.

N. E. Woolman & Co., stationers, &c., Salida, Col., have dissolved partnership, N. E. Woolman retiring.

George P. James, publisher of the *Star of the Valley*, Newville, Pa., is reported to have been sold out by the sheriff.

McMurray & Willard, stationers, Bolivar, Ohio, have dissolved partnership. App & McMurray continue the business.

Mr. Marshall, of Marshall & Bruce, Nashville, Tenn., who was in the city this week, has left for a visit to Hartford, his native city.

Spooner & Brother have succeeded to the business of Dudley Spooner & Co., booksellers and stationers, Leavenworth, Kan., who have dissolved partnership.

H. J. Harding, bookseller and stationer, Wichita, Kan., has admitted Frank Fisher to partnership, and the business will be continued under the style of Harding & Fisher.

Charles Scribner's Sons, publishers, propose to bring out two new books this week, entitled "Among the Lakes," which embraces a set of four volumes, and a new edition of Perry's "Political Economy."

Lawrence & Baxter, 39 Dey street, New York, in addition to their long numerical cribbage board, have one in circular shape, which will be admirably adapted for traveling purposes, as it can be folded up and carried in the pocket. It will be made in several styles of finish, from very cheap to the most expensive inlaid cases.

An object for the attention of business men is the "Portfolio File and Scrap Book," just introduced in the stationery trade. It is intended for the preservation of such small business documents as are constantly accumulating upon one's hands and may need to be referred to at a moment's notice. The file is composed of thirty-one heavy manilla envelopes, substantially bound by means of a strong tape passing through eyelets set in the envelopes and covers. The envelopes, whether empty or full, have the same freedom as the leaves of a book, and insertions can be made on them as easily as when one writes on the pages of a blank book.

Eberhard Faber has just added two new styles to his large assortment of rubber pen-holders. They are numbered 4,075 and 4,317, and are somewhat smaller than Nos. 4,262 and 4,562, which are still in great demand. The new numbers are tapering in form, and very attractive for office use. Mr. Faber has also brought out another line of enameled pen and pencil cases, nickel mounted, in black, blue and red colors, which will be shown to the trade by his representatives on the road this fall, and which promise to be salable articles. The pen-holder and pencil attachment lately introduced by Mr. Faber is giving satisfaction.

Charles J. Cohen, Philadelphia, reports a very active trade in all branches of school stationery. The spacious showrooms and warehouse are taxed to their full capacity, but Mr. Cohen's system is so complete as to facilitate the prompt execution of all orders without confusion or error. The firm received last week twenty-one cases of photograph albums and other leather goods by direct steamers, the first portion of this year's selections on the Continent by Mr. Cohen's resident buyer in Europe.

Paul Mende, dealer in fancy goods, trimmings, &c., has been getting out several new things in his line, one of which is a silver and silk rosette for ornamenting pictures. He has also new designs of card fringes and tassels in gold and silver. His assortment of these goods is large and varied, enabling him to fill orders as soon as received. Mr. Mende reports trade in his line as being good. He is receiving orders for delivery as late as November.

The National Publishing Company, Philadelphia, has had its trade line of family bibles before the public for several months, and it has received orders from every section of the United States, extending as far as Texas and California. This speaks well for the appreciation by the trade of an attractive salable line of family bibles well printed from clear type and on white paper at prices as low as inferior lines.

Thomas Manahan has got a new thing in the way of toilet paper packages. It is called "Tarine," and each package has a disinfecting pad, which falls below the package when it is hung up against the wall.

F. E. Gibbs, of the firm of E. C. Palmer & Co., New Orleans, La., who has been in this city for the past few days purchasing goods for his firm, returned to New Orleans on Wednesday.

Chas. T. Bainbridge's Sons have recently introduced several new designs in stamp paper-teries. This firm takes pride in keeping abreast of the times in its line of business.

The business hitherto carried on by Smith & Knowles, dealers in wall-paper, Denver, Col., will be continued by C. N. Knowles, the old firm having dissolved partnership.

West, Swaney & Jackson, dealers in wall-paper, Pittsburg, Pa., have dissolved partnership. A new firm has been organized under the style of A. A. Jackson & Co.

A new steel pen called the Pratt Bevel-Pointed Pen has lately been introduced in the stationery trade. Its bevel point adapts it to rapid, bold business writing.

Hurst & Co., publishers, New York city, have dissolved partnership, and Thomas D. Hurst continues business under the same style.

E. Blanche Keeler, paper manufacturer, Cambridgeford, Can., has been succeeded by the Northumberland Paper Company.

Edward A. Austing, manufacturer of pocket-books, New York city, has made an assignment.

Charles W. Hazelton, wood engraver, Bridgeport, Conn., is dead.

John A. Littlefield, printer, Boston, Mass., has gone into insolvency.

J. F. Siebert, bookseller, Peoria, Ill., has sold out to Joseph Siebert.

The firm of Carter, Rice & Co., dealers in papers, Boston, Mass., has been incorporated.

An assignment has been made by Catharine Fahly, bookseller and stationer, Geneva, N. Y.

Mrs. A. S. Cameron will continue the business of her late husband Alexander Cameron, at 42 John street.

Stephen Peaslee's straw paper mill, at Canaan, N. H., was burned August 8. Loss, \$5,000; insurance, \$3,000.

Hoag & Heald, publishers of the *Echo*, Petaluma, Cal., have dissolved. Hoag & Towne have succeeded the old firm.

George S. Tolman has succeeded to the business of T. H. Brackett & Co., printers, Boston, Mass., the old firm having been dissolved.

C. A. F. Emery & Co., printers, Boston, Mass., have dissolved partnership. Louis K. Brown and James C. Clark continue the business under the old style.

Yancey, Waddey & Co., dealers in blank-books and stationery, Richmond, Va., will henceforth do business under the style of Yancey, Waddey & New.

The estate of the St. Catharines Pulp and Paper Company (incorporated), St. Catharines, Can., has been sold at sheriff's sale to the Lincoln Paper Mills Company.

Mr. Voorsanger, of the firm of Leon Isaacs & Co., the manufacturers of the "Glucinum" pens, has left Philadelphia for a tour through the Western cities to visit his agents. The "Glucinum" pens have established their reputation.

A new parlor game has just appeared. It is called "Options," and may be played by from one to fourteen persons. The speculative character of the game partakes of the nature of the business of real life, particularly life in Wall street. The players assume the role of bulls and bears, and the fascination they enjoy is very much like that which they would experience if among the real bulls and bears of Wall street speculating in the rise and fall of stocks. F. A. Wright, Cincinnati, Ohio, is the publisher.

James D. Whitmore & Co. report trade in a very flourishing condition. Their lines of super and extra super papers continue to hold their place as among the finest writing papers made, and the increasing volume of business done in these goods bears ample testimony to their superiority. The samples of plush boxes shown by this house are the finest yet produced by it, and fully maintain the firm's reputation for style and elegance. All of the visiting trade would do well to call and look over this line before purchasing.

The great popularity of the Connecticut Valley Mills' line of papers having led to the imitation of the same, the manufacturers, for the protection of the trade, have introduced a new "water-mark," consisting of a coat of arms and the words "Conn. Valley linen" showing in every sheet, and putting up the ruled goods in a new wrapper, artistically lithographed and printed in black and gold on tinted paper. These papers are particularly desirable, embracing as they do over one hundred different weights and sizes in flats and rulings, and special sizes and rulings made to order. All regular lines are carried in stock at the New York

salesroom, 62 and 64 Duane street, by J. L. St. John, agent of the Powers Paper Company.

An attachment has been issued against E. C. Beard, printer, East Portland, Ore.

An assignment has been made by William England, stationer, Marysville, Cal.

Dempsey & Carroll, stationers, &c., New York, have been burned out. Loss, \$5,000.

An attachment has been issued against George By the & Co., publishers *Boomerang*, Palouse City, W. T.

James Grand, dealer in blank books and stationery, Toronto, Ont., has admitted Samuel Faye into partnership.

A company, called the Quincy Morocco Company, has been incorporated at Quincy, Ill., with a capital stock of \$3,000.

W. Irwin Martin, of Samuel Raynor & Co., will return next week from his extended European visit with his daughter.

Tuttle & Co., Rutland, Vt., have just placed in position a \$2,000 Cottrell & Co. patent improved air spring drum cylinder job press. The bed is 24x30 inches, and will take from 1,800 to 2,500 impressions an hour. This is the seventh machine purchased within the last six years. Tuttle & Co. are the official State printers.

The Dreka fine stationery and engraving house, 1121 Chestnut street, Philadelphia, is just completing a fine line of Christmas and New Year novelties which will be ready on September 1, as announced by a beautifully and artistically engraved and illuminated card which it has issued. Louis Dreka is now in Europe purchasing novelties for the coming season, and upon his return, which will be the latter part of this month, Mr. Longhead will visit the trade with a line of Dreka's own make of oddities, chief among which is a Christmas souvenir of plush and silk with hand-painted flowers executed in a manner which is new and only known to that house. The painting stands out in bold relief and is a charming representation of Limges or majolica ware; it is termed "Lustra" decoration. The line will have a number of steel-plate engravings of designs made especially for the coming Christmas, printed in the French tint process on cards and satin. The menu and dinner cards made of satin, plush and silk, are made especially for the finest retail trade. Philadelphians are extremely critical, particular and tasty in matters relative to artistic stationery, and the goods which this house manufactures have to be neat and elegant, and refined taste is shown in each article of the line which the trade should examine, if only to see the many new and charming ideas. The latest devices originated by this house in illuminated stationery, for which it is noted, are numerous, and oddities of the most refined and stylish character are continually being added. Any one visiting Philadelphia can always spend a profitable and pleasant hour examining the interesting specimens of engraving, illuminating and stamping which this house displays.

Henry Levy & Son, 477 Broadway, have just received an elegant variety of new and novel patterns in Vienna gilt goods, consisting of inkstands, ash-trays, card-receivers, smokers' stands, cologne and odor cases, and many other useful and attractive articles, cigar and cigarette cases in Russia, alligator and other leathers. They desire to close out a large line of photographic albums, covered in plush, Russia and other leathers, many handsomely ornamented in silk flowers and other designs, and containing openings for vignette, cabinet and promenade pictures. These albums are well worth the attention of the trade, the price being considerably reduced.

E. D. Irvine & Brother, Macon, Ga., correct the statement that they have sold out their book and job printing office to J. W. Burke & Co. They have only transferred to the last-named firm their stock of "fancy books and art goods," and continue their printing, publishing, stationery and music business at Macon, and their book, stationery and fancy goods business at Eufaula, Ala.

Strong & Holmes, publishers of the *Sullivan Review*, Dushone, Pa., have dissolved partnership. E. A. Strong continues the business.

Bates & Field, booksellers and stationers, Lawrence, Kan., have dissolved partnership. S. T. Field continues the business.

Carl H. Uhler has bought out the publishing business of E. B. Chapin, Tolono, Ill.

G. A. Raisbeck departed on Wednesday for Boston where he will enjoy a well-earned vacation.

J. L. Hormaker & Co. are manufacturing the "Ledger" brand of American Russia leather, which is guaranteed "full measure." The trade are invited to send for samples.

Alexander Agar, who returned temporarily to town a few days ago from Middletown, Vt., where his family are spending the heated term, left for that place again this week.

George A. Freeman, of the American Lead Pencil Company, has just returned from one of the most successful business trips that he ever made in the West. He speaks very encouragingly of the outlook for fall trade in that section, and says that the early buyers have given very good orders.

The copying-presses made by Samuel C. Tatum & Co., of Cincinnati, received the first award at the Chicago Exposition. Their plan seems to be to make only desirable sizes and styles, and to make these well. From their construction, these presses are especially adapted to foreign shipment, being very readily put together, and their system of duplicate parts makes any possible repairs an easy matter. Those accustomed only to the sight of the clumsy presses found abroad, are especially pleased with Tatum & Co.'s designs. Their copying-press stands, which should be used to be fully appreciated, also embody novel features.

HOW DOLLS' HEADS ARE MADE.

In the modeling and casting room we saw how the heads and limbs of dolls are made. At well-lighted benches round the sides of this apartment a number of men and boys were at work, while in boxes and on tables and suspended from the roof were innumerable heads and limbs of various sizes, some formed of wax, some of papier-maché, and others of a combination of the two materials. Following the processes in succession, we saw how a model in clay was made to begin with, how from that a cast was taken in plaster-of-paris, how this cast was used as a mold, into which the wax was poured, and how the castings in wax were finished. We speak of wax, but as a matter of fact the material is a mixture of spermaceti and clarified wax. The wax, when melted, had the consistency of cream, and immediately it was poured into the mold it commenced to solidify. The solidifying process began next the mold, and extended toward the centre. When a layer of sufficient thickness had become solid the workman seized the mold, and turning it upside down poured out the still liquid portion of the wax, and thus obtained a hollow copy of the mold. If you examine the detached or broken head or limbs of a wax doll you will understand what is meant. Heads and limbs cast in wax in this fashion require gentle treatment when the dolls are being played with, because they are easily broken. As a precaution against accidents, however, most dolls have a foundation of papier-maché beneath the wax. In these cases the paper is softened by being soaked in starch, and is then pressed into a mold. When dry the paper is hard and firm, and will stand a good deal of knocking about. To give the parts a presentable appearance they are dipped in wax, and then assume the same appearance as if they were wholly formed of that substance. Following the wax heads and limbs from the caster's bench we saw how they were scraped and trimmed to remove all marks of the joints of the molds and give the surface an even and compact appearance. At this stage the heads presented a strange aspect, and gave little promise of the beauty they would display after being subjected to a few more operations. The smoothing having been completed, the heads were passed to workmen who cut apertures for the eyes, being guided by outlines produced in the process of casting. The next thing was the insertion of the eyes. The latter are globes of glass, with one side colored to represent the eyeball. Warming the eyes slightly, the workmen pressed them into the sockets from the inside, care being taken to adjust them exactly, so as to avoid a squint. Some wax was now poured over the outside of the eyes to fill up any interstices that might be left, and as soon as this is cooled it was trimmed off.

—*Little Folks' Magazine.*

"There is no more powerful apparatus for the conveyance of disease than a book," says the London *Lancet*, a discovery which the *Pall Mall Gazette* thinks will be immensely popular with schoolboys and the opponents of free libraries. A list of the maladies most easily conveyed by means of books is given as follows: "Measles, scarlet fever, diphtheria, sore throat, whooping cough, bronchitis, and perhaps phthisis." The germs of disease "may lie for weeks, months, or perhaps years, between the pages of a bound book, to be dislodged at some unpropitious moment when the volume chances to be handled by a susceptible person." The worst of the *Lancet's* discovery is that no remedy apparently can be provided for this difficulty.

DEVOTED TO THE INTERESTS OF THE

Stationery and Fancy Goods Trades.
WEEKLY---\$2.00 PER ANNUM.

Single Copies - - - 10 Cents.

NEW YORK, THURSDAY, AUGUST 16, 1883.

Advertisements cannot be received for insertion in the current week later than 12 m. on Wednesday. The charge for advertising is 25 cents a line, each insertion. Special terms for standing and displayed advertisements to be had on application.

This journal aims to be a medium of information for and a representative of the interests of every one connected with the stationery and fancy goods trades. It contains a full and trustworthy survey of the market for stationery in this country, in all cases giving the actual prices at which goods can be bought of importers and jobbers in this city, together with a detailed account of novelties in the trade, patents relating to stationery, and current items of interest. A review of foreign markets and accounts of movements abroad will also be furnished, and no pains will be spared to make THE STATIONER a thorough and complete exponent of the trade.

Subscription and postage for Great Britain,
per annum..... 12s.

Any information our readers may wish to obtain shall be cheerfully given, and prompt replies will be made to all inquiries addressed to us on any subjects of interest to the trade.

Communications on all trade matters are earnestly solicited. Address

Subscribers to THE STATIONER can be supplied with the best cloth binder in the market. Deliverable at the publication office. Price, fifty cents.

Readers of this paper who avail themselves of the information obtained from its columns, by advertisement or otherwise, are requested to notify their correspondents of the source of their information.

THE STATIONER, as is well known, has always stood out against "short weights," "short counts," and, in fact, every fiction which was not fully known to the trade and operated to the disadvantage of buyers. We are glad to be able to say that our work in this direction has been useful. It has not only taught people what disguises are used but it has also helped to effect reform. There is no fair reason why fictions in trade should abound, and we are sure that the good sense of the trade will sustain this position. We have been led to this brief line of retrospection by the fact that we have received an announcement from a prominent firm that it guarantees full measure on a brand of leather. We are also told that short measure in leather is not uncommon. The trade interested and not knowing this fact will, we doubt not, be glad to be apprised of it. Let us insist all around upon doing away with short measures of every kind.

THE flurry of the week in stock-jobbing circles is very much like the prelude to the "smash-up" of 1873. But the conditions of to-day are not the same as those of ten years ago, and the ramifications of the stock speculation are neither as deep nor as wide as then. Herein will be the salvation of business interests outside of Wall street, if common prudence is exercised in keeping clear of the shoals upon which trade has in times past run aground. The year 1873 left its impress upon business of all kinds, and it was an uphill fight until tone was regained and confidence re-established. We may reasonably conclude that the next few weeks will bring the culmination of all that is possible in financial disorder, if that limit has not been already reached. From then on we may expect improvement, and it is not likely to be of as slow growth as that of the past decade. One thing must be kept in mind, and that is, that if business complications are no worse, there is no reason why we should relax vigilance.

ONE of the daily papers has lately taken up the consideration of the "expansion of credits," concerning which THE STATIONER has had considerable to say in the past and against which it has, time and again, given its readers warning. The evil complained of has, it seems, run to an extent in the dry-goods trade that has become alarming and has called forth an earnest protest against its perpetuation. It is asked whether business men ought not to organize to discontinue and discountenance the dangerous practice. To this we would answer: Yes. But it ought to have been done long ago, and indeed should never have been encouraged or permitted to reach the limit to which it has extended. We think, however, that the stationery trade have been working quietly in the other direction, and that a sounder principle has underlain their trading for some months past. This would seem to be indi-

cated by the course of our special markets and the very cautious system of buying and selling which has been adopted. But there is still reason for warning and urgent remonstrance against the expansion of credits, and, to quote from the journal which has thus lately sounded the alarm, "if something is not done to suppress it, it will go on expanding and demoralizing trade until, ultimately, we shall be fortunate if we escape its own remedy in the natural way—a sudden and disastrous commercial collapse."

ANSWERS TO CORRESPONDENTS.

Subscriber send sample of French chalk pencil and asks where to get pencils like it, &c.

Ans.—R. J. Waddell & Co., 52 Beekman street, New York, sell them in gross lots, put up in boxes at \$4 per gross. D. M. Stewart, 231 State street, Cincinnati, manufactures them.

Alpha wants to know what russia leather is?

Ans.—The best quality of russia leather is made from the hides of young cattle and the inferior from horse hides, calf, goat and sheep skins. Genuine russia is tanned in willow bark, and also in poplar and spruce fir barks. The hides are treated with birch oil. The staining is done with ordinary dyes. The leather was formerly a Russian specialty, but it is now made in this country and in different parts of Europe.

G. wants addresses of parties selling (1) Hall type writer and (2) stenograph pencil.

Ans.—1. Hall Type Writer Company, Broadway and Fourteenth street, city; 2. American News Company, New York.

M. wants addresses of the best wax paper manufacturers.

Ans.—We don't like to discriminate and have forwarded you some addresses by mail.

J. P. C. wants names of manufacturers of "Old Hampshire" and "Dartmouth" writing papers.

Ans.—The "Old Hampshire" is made, we think, by either the Hampshire Paper Company or by the Southworth Company. We don't know where the "Dartmouth" is made.

OBITUARY.

WILLIAM H. O'GRADY.

William H. O'Grady, who has been identified with the stationery house of M. A. Reay and its predecessors for the past seventeen years, died of consumption at his residence in this city on August 2. Mr. O'Grady had been in ill health for several years. He was about forty years of age, and leaves a widow and three children. He was a man possessed of many good qualities, and was well known to the customers of his house and the trade generally.

ALEXANDER CAMERON.

Alexander Cameron, who died on the 28th ult., was born in Leith, Scotland, in 1837, and went to Canada about 1856, and in 1861 came to New York and took a position with D. Appleton & Co. as salesman. He afterward traveled for Ferdinand Mayer & Sons, and in 1867 went to Pennsylvania, remaining there about two and a half years. Upon his return to New York he became connected with Victor E. Mauger as traveling salesman and afterward joined with M. J. Anderson in forming the firm of Anderson & Cameron. After retiring from this firm he became secretary of the National Blank Form Company, and remained with this company for two years or more. At the time of his death he was traveling for the Forbes Company. He was twice married, and leaves three children by his

first wife and a baby two years old by his widow. Mr. Cameron was a man well known throughout the United States and made friends wherever he went, and was respected for his many good qualities. One of his friends, a well-known man, says of him: "I most deeply deplore his death. He was a man of sterling worth, and such a man is not only a great loss to his friends but to the general public, and the world is poorer to-day at the loss of such a man."

The following named dealers in stationery, from the South and West, were reported in town during the past few days: M. Miller, El Paso, Tex.; E. F. Wills, Memphis, Tenn.; E. J. Goodrich, Oberlin, Ohio; T. J. Kellam, Topeka, Kan.; George E. Cole, of George E. Cole & Co., Chicago; Mr. Goldsworthy, of E. L. Freeman & Co., Providence, R. I.; Mr. Matthews, of the firm of Marshall & Bruce, Nashville, Tenn.; Messrs. Loring and Short, of the firm of Loring, Short & Harmon, Portland, Me.; C. F. Bradley, of C. F. Bradley & Co., Cincinnati, Ohio; William Rothrock, Selma, Ala.; Mr. Watson, of Zion Corporation Company, Salt Lake City, Utah, and Mr. Fischel, of the firm of Fischel & Brother, Deadwood, Dak. Ter.

The second complimentary excursion, given by E. Wells Sackett & Rankin to their employees, will come off on Saturday next. It will, doubtless, be a repetition of the pleasant time of last year.

Market Review.

OFFICE OF THE AMERICAN STATIONER, (WEDNESDAY, August 15, 1883.)

THE MONEY MARKET.—The money market remains extremely easy. Usually at this period money flows to the agricultural districts to aid in moving the crops, but the tide has not yet set in, and the rates for call loans remain 2@3 per cent. and for prime mercantile paper 4@6 per cent. All but gilt-edge paper is slow of sale. There has been an im-

provement in stocks, but it was only of short duration, and proved to be spasmodic, the market having during the past three days been depressed, a sharp decline in the Vanderbilt and Pacific properties carrying the whole list down. The market for sterling exchange is easier, and rates have been slightly reduced, under an increased supply of bills. Continental exchange is also more abundant and weaker.

THE PAPER MARKET.—In the line of writing papers, a few country orders occasionally and some little demand on local account afford about the main basis on which supplies move. Our city dealers, however, do not appear to be very much demoralized by the condition of trade, which is looked upon as a natural result of the season, and the indications are that the fall distribution will be very fair. In book papers, buyers are not plenty, and most of the business done is still of a jobbing character, although a comparatively steady tone is preserved for the moderate quantities that are being sold. Manillas have about the best outlook of any grade on the list. Most of the manufacturers are said to be fairly well engaged on orders, and the advance of $\frac{1}{4}$ c. in price, which we reported a few weeks ago had been made by a large manufacturer, has now been followed by others, and is quite general. The straw-board trade, which had begun to make some headway, has received somewhat of a set-back by the failures in the shoe trade, some of the large box-makers holding back their orders, and others countermanding some already given, and among this class of consumers of straw board an uncertain feeling prevails.

THE STATIONERY MARKET.—The features that have characterized the stationery market for some time past have been perceptible during the past week. Country buyers have been quite numerous, but purchases were made with a great deal of caution. This is due possibly to the fact that the general business of the country has not had time to become settled since the readjustment of the new tariff. A few dealers, however, are doing quite a brisk trade, but business generally is duller than it has been for several weeks. Prices, however, continue firm, and the trade generally is sanguine of a lively fall business. The trade in steel pens has been hardly equal to the average for this season. The same may be said of fine stationery. Dealers in gold pens are doing a fair amount of business, possibly a little better than during this season last year. The trade in books continues brisk, and is expected to remain so during this month and a good part of September. In blank books the trade is quite steady, while in envelopes there is a marked inactivity.

When People are Traveling Comfort and Safety are the

TWO PRINCIPAL OBJECTS IN LIFE!**COMFORT!**

"The Erie is by far the smoothest road I ever traveled on, either in this country or in Europe; and I consider it the perfection of railroad traveling. With the clean, light and airy coaches, polite attendance, freedom from dust, noise and jar, we reached Chicago hardly realizing what a long journey we had performed. And then such a breakfast as we had the morning after leaving New York, at Hornellsville, is certainly deserving 'honorable mention.' Such a table as they have there, with a full half an hour to enjoy it, is enough of itself to attract passengers."—*Ex. U. S. Minister, E. B. Washburne.*

SAFETY!

"5,491,441 Passengers were carried over the Erie Railway in 1881. Of this vast number, only two were killed—one by falling from the platform of a car on which he insisted on standing, and the other in jumping from a train while in motion."—*New York State Engineer's Report for 1881.*

No better evidence than the above need be wanted that both of these objects are secured to the traveler who purchases his ticket over the

**GLUCINUM PENS.**

NOTICE TO THE TRADE.—We call attention to our circular letter, dated June 10 1883, which has been directed to our patrons and principal stationers in this country, containing some very important information to consumers of our celebrated Glucinum Pens. We confidently claim that they are the best series of writing pens ever placed before the public. The demand for them is constantly increasing on account of the uniformity, smoothness of points, and durability over all other steel pens. This

Trade-Mark and the word Glucinum are copyrighted and registered at the Patent Office, at Washington, D. C., United States of America, and every box has a fac-simile of our signature, so beware of unscrupulous parties misrepresenting us.

NEWSDEALERS AND STATIONERS' UNION.

The Newsdealers and Stationers' Union of New England had its annual excursion in Boston Harbor yesterday. Among the entertainments of the day was a "newspaper folding contest," with a handsome gold medal for the first prize. There were also the usual diversions of running and walking matches, sack and tub races, &c. The number of entries for the folding contest was limited to five, and each of the contestants was to fold five hundred papers. The entries were Henry McDermott, South Boston; A. T. De Luce, South Boston; C. E. Goldthwait, Charlestown; D. Carroll, Boston; Hunt's Unknown, Roxbury.

The union embraces in its membership newsdealers and others who carry on the business of buying and selling periodicals and stationery, no matter how small the amount. The union has not long been in existence, the first meeting of officers and members having been held June 15, 1882. But during the time since elapsed it has been a means of conferring advantage on all concerned. It has its organ, *The Newsdealer and Stationer*, a modest but vigorously conducted monthly newspaper. The headquarters are at 186 Devonshire street, Boston, where are also the officers of the union.

AMERICAN MAGAZINES IN LONDON.

It was exceedingly clever, what may, perhaps, be called smart, just at a moment when English authors were placed by a new efflorescence of piracy in a worse position than ever on the other side of the Atlantic, that the American periodical should have invaded our shores. But so it was. It has made, we believe, a successful invasion, and not without deserving its success. For the American magazines which England has accepted with cordiality are excellent in illustration; and if their literary qualities are not the highest they have at least a certain novelty and freshness of flavor. There are, however, certain results of their introduction which are more important than the possibly ephemeral success which a public, more free from prejudices in favor of its own than ever public was before, has awarded to them; and these are, first, the revelation of some American authors little or not at all known in England, and second, a full perception, hitherto possible only to a few, of the claims of America in literature. These claims we have hitherto been very charitable to, as the early clutches of a great literature about to come into being, though as yet somewhat stunted and not of lavish growth, at the laurels of fame. But few, perhaps were aware how little consideration was thought to be necessary, or how entirely sure our transatlantic relations were of having attained a standing-ground of certainty much above that vague platform of hope.—*Blackwood's Magazine*.

E. B. Green, the indefatigable head of A. S. Barnes & Co.'s stationery department, returned home on Monday from a visit of about three weeks at Schraon Lake, bringing with him a large addition to his avoirdupois. One more visit of this kind would qualify him to join the Fat Men's Association. He has improved to such an extent that some of his most intimate friends would scarcely know him.

The printers at London, Ont., have decided upon holding a picnic at Port Stanley early in September, and committees have been named from the different offices to carry out to a successful issue the picnic.

FOR SALE—THE BUSINESS OF THE LATE Chas. A. Burnham, of Norwich, Conn., who died July 4th. This prosperous first-class Book, Stationery and Paper Hanging Store, to a man with a proper knowledge of the business, is an extraordinary good chance. It is well established and thoroughly known in all the adjacent manufacturing villages in the neighborhood, and bears an enviable reputation. It is now, and has been for years, returning a handsome income. The subscriber wishes to sell it without delay. In the meantime the stock will be kept complete and every endeavor made to keep it up to the high standard of its former owner. For further particulars, address WM. C. LANMAN, Administrator, Norwich, Conn.

BRIGHT SILVERING.

Watts gives the following as the *modus operandi* for bright silvering: "Put an ounce of bisulphide of carbon into a pint bottle containing a strong silver solution with cyanide in excess. The bottle should be repeatedly shaken, and the mixture is ready for use in a few days. A few drops of this solution may be poured into the plating bath occasionally, until the work appears sufficiently bright. The bisulphide solution, however, must be added with care, for an excess is apt to spoil the solution. In plating surfaces which cannot easily be scratch-brushed, this brightening process is very serviceable. The operator, however, must never add too much at a time." Gore gives substantially the same advice. Urquhart, however, recommends the following modification: Place a quart of ordinary plating solution (double cyanide of silver and potassium (in a special bottle, add to it four ounces of liquor of ammonia, two of ether and four of bisulphide of carbon; shake well and stir in an ounce or two of this mixture to every twenty gallons of plating solution it is required to "brighten" twice a day. This is done as the bath is working. All the bisulphide must not be added at once; this would spoil the whole solution. As the plating goes on, a little should be stirred in after the day's work as described. It is of the greatest importance to add as little as possible of the "bright" mixture, as too much will be apt to ruin the whole solution. And no solution thus charged with brightening mixture should be used to plate with ordinarily again, as it will be unfit for the purpose. Too much "bright" is indicated by the streaking and discoloration of the work. The action of the brightening solution is slower than that of ordinary plating solutions, and a stronger battery current is required. The proper use of this process demands skill acquired by experience, and this can only be had after some failures. It should be added, in conclusion, that when the articles have come out of the brightening solution they should at once be rinsed free of all traces of the solution by washing in boiling water, as otherwise the surface of the work will discolor.

A novelty has appeared in school stationery. It consists of a six-inch stick or rule with a V-shaped groove in the two sides. The grooves are coated with the purest emery and thus make a most effective and convenient slate-pencil sharpener.

A very noteworthy article in the line of toy games is called the "Goblin Ten Pins" and consists of ten grotesque wooden figures which are substituted for the old style of pins. A toy cannon which shoots a ball by means of a spring comes with the set, making it a very pleasing game for juveniles.

THE HANDY BLOTTER

Is the Most Simple, the Cheapest and by far the Most Popular Blotter in use. It is an article of quick sale and large profit.

Send 25 cts. for sample by mail and please to the Trade.

The above Cut shows the Handy Blotter in use.
ALVAH BUSHNELL,
Manufacturing Stationer,
No. 105 South 4th Street, PHILADELPHIA.

STENCILING.

Stencil designs are used for ceiling and wall decoration.

Stenciling is a most important operation where a large space of wall has to be covered with the same pattern often repeated. It is, perhaps, more suited to oil than to tempera painting; but in either case the color must be as dry as possible; if it is at all liquid it will run, and utterly spoil the work. If the design is to be often repeated, it is quite worth while to have the design cut in tin, as it is so much more easily cleaned than varnished paper, and never gets broken or "messy." It must be remembered that in many patterns it is necessary to leave little bands to connect various parts of the design. These little blanks are filled in afterward with color. Where a stencil-plate will not be very much used, cartridge paper will answer the purpose sufficiently well. Draw the design on it, cut it out with a sharp penknife, leaving the ties (the white spaces referred to). Circles can be punched out, which saves a great deal of trouble, beside which they are much more circular than if cut out. The paper is then varnished with knotting varnish and left for a day or two to harden.

The chief peculiarity of stenciling is the way in which the brush is held. Stenciling brushes have very short, thick, round handles; this handle is grasped in the whole hand as a dagger would be, the top of the brush coming out by the thumb, and the bristles by the little finger. It is dipped slightly into very dry color. The stencil-plate is held firmly against the wall by the left hand; it is hardly necessary to say that one must be careful to hold it in the right place, according to guide marks, which one will have already made on the wall, or that, if it is varnished paper, the varnished side must be kept out, unless it is varnished on both sides, which is the better plan. The left hand is placed flat upon the stencil-plate, with the fingers spread out, so as to hold it as firmly and to get

as little in the way of the brush as possible. The brush, held dagger-wise, conveys the color through the cuts in the stencil-plate on to the wall by a series of quick dabs. Do not attempt to paint with long strokes; stenciling is a knack learned in a few minutes, but one must understand that it is totally unlike ordinary oil-painting. As soon as all the cuts in the stencil-plate are filled in with color, remove the plate carefully, but quickly, taking care not to smudge the edges of the design. The blanks left by the ties must then be filled in. The stencil-plate must be cleaned—if using tempera, it need only be wiped with a cloth; if oils, it will require a little turpentine or crystal soap, unless the plate is a tin one, when the paint can easily be wiped off it. Place the stencil-plate again in position, so that the marks join the design already completed, and proceed as before.

Stenciling, as it is described here, sounds like a long process; in reality it is a very quick one. A large piece of wall can be covered in an afternoon, and if good guiding lines can be marked on the wall at starting and the stencil-plate is a tin one and does not require much cleaning, the operation will be found a pleasant and interesting one. Any details, shadows of foliage, &c., in the dado, may be finished by hand. As a rule, distemper colors are body colors, *i. e.*, opaque being mixed with whitening; but if a clear color is desired, glazing is resorted to. Any transparent color can be used for glazing—sienna, vandyke brown, or damp lake mixed with size.—*Decorator and Furnisher.*

Rufus Adams, of 4 Pine street, is summering in the White Mountains with his family, but although recreating, is keeping informed of his customers' wants. His firm has just received two cases of patent stout buff and thin buff copying papers through the Custom House, and as the demand exceeds his supply he has cabled for more.

W. G. WALKER & CO., Sole Proprietors, Madison, Wis.

THE GROTESQUE IN ORNAMENT.

The introduction of grotesque in decoration springs from the love of the marvelous, and pleases the imagination. In ornament, more even than in painting or sculpture, every subject requires to be idealized, and the introduction of chimerical beings embodying certain attributes is a language entirely legitimate. The figures usually called grotesques are more properly chimerical. The real grotesque is also found in decoration, and the propriety of its introduction has been questioned. If all must be idealized, how can we idealize ugliness and deformity? The true grotesque is a comic element: it is not gay; it touches laughter, compassion, and disdain. Hilarity is associated with pity, and laughter with tears.

If art resides not in the beautiful alone, but in the contrast of beauty and ugliness, of greatness and triviality, as sometimes seen in nature, then the grotesque is admissible. The chimerical, which presents creations capable of existence only in thought, and does not imply ugliness, may also be introduced.

When the car of Thespis amused the Athenians, with bedaubed faces and cloven-footed human divinities, it was an instance of the chimerical and grotesque united.

Morto da Feltro and Giovanni da Udine set the grotesques in fashion; they were assisted by Mariotto and Raffaello Metidoro. Bachiacca, Baldasare, and Peruzzi, of Siena, became celebrated in this line; while Prospero Cesi was called Prospero dalla Grottesche. Pier di Cosimo, Mecherino, Razzi Christoforo Rustici, Giorgio da Siena, and Lomazzo, became known in this specialty.

The impression that Raphael (Raffaello Sanzio) designed for majolica appears to rest on uncertain evidence. It is stated that his father, a painter of ordinary merit, employed him in painting faience before his apprenticeship to Perugino, which began in his twelfth year. Don Vittorio, in his "Osservazione sopra Felsina Pittrice," alludes to a letter from Raphael referring to majolica designs, and supplied by him to a duchess. However this may be, no majolica known to be his remains; and the so-called Raphael ware consists in part of ornamentation in the style of Raphael, and partly of copies from pictures, or from engravings of pictures, painted by him. Neither are these to be confounded with the productions of Raffaele del Colle (Raffaellino), a painter of some power, who, according to Taja, was employed by Raphael on the History of Moses in Horeb; also in the Farnesina, and also by Giulio in the Hall of Constantine. He also decorated the "Imperiale" Palace at Pesaro, and prepared majolica designs for Guidobaldo I. Nor are they to be confounded with the works of Raffaele Ciarla, a potter, and pupil of Orazio Fontana (1530-1560); nor with those of Raffaele Girolamo, at Monte Lupo, in 1639.

Pietro Perugino was the first to reproduce the painted grotesque ancient Roman decoration. His pupil, Raphael, did not decorate the Loggia of the Vatican until after he had worked at the Sala di Cambio and the Library at Siena.—*Pottery Gazette*.

NEW YORK BRANCH: 506 & 508 North St.,
57 Maiden Lane. PHILADELPHIA.
WATSON & PARK. GEO. M. HAYES, Man'r.

SILICATE BOOK SLATES, BLACK DIAMOND SLATING, REVOLVING BLACKBOARDS, LAPILINUM (Slated Cloth).

THESE GOODS are in constant use by the BOARD OF EDUCATION of the City of New York (in every Public School), and have been for the past twelve years, which is a sufficient guarantee as to their durability and perfection. They are also in use by a large number of the BOARDS OF EDUCATION, Colleges and Schools throughout the country. The Private Schools have also adapted our Book Slates in preference to slate or paper pads—finding them more economical and more advantageous to the pupil. They are handsomely bound in fine black cloth, attractive in appearance, and finely finished. The BLACKBOARDS are well seasoned, and will last for years, slated on both sides with the celebrated BLACK DIAMOND SLATING. For sale by all the leading Houses throughout the United States and Canada. SEND FOR CATALOGUE. Patented and manufactured only by the

BLACKHALL'S

PATENT POWER

PERFORATING MACHINE

Is now in use in most of the Leading Houses in the Trade.

It will run off a Ream of Medium with Five Lines of Perforating (and two Lifts) in Seven Minutes.
It makes a clean round hole, and will cut from Tissue-Paper to Card-Board.

TRADE OPINIONS.

"After two years' constant use, on all classes of work, we have had to replace but three pins. To-day it is in perfect order."—LEVISON & BLYTHE, St. Louis.

"After four years' use, on all classes of work, we consider it as good as when we got it. It is the best machine we ever saw."—BROWN BROS., Toronto.

"By using your machine our perforated work costs almost nothing when considered by the ream."—BOORUM & PEASE, New York.

"We recommend it to the trade. Just the machine long looked for."—SHORT & FORMAN, Cleveland, Ohio.

"Your perforator is very satisfactory. It is very superior in excellence of work and rapidity."—WESTERN BANK NOTE Co., Chicago, Ill.

"It exceeds our expectations. Does splendid work. Is easily attended and durable. We cheerfully recommend it."—GEO. D. BARNARD, St. Louis.

"We are gratified far beyond our expectations. As to the rapidity and accuracy of its working, we could not be better satisfied."—WM. G. JOHNSTON & Co., Pittsburgh, Pa.

"We would not do without it if we had to pay double the price we paid you."—COURIER-JOURNAL, Louisville, Ky.

"We recommend it as a first-class machine."—STEPHEN GREENE, Philadelphia.

"We tried four makes of perforators and found none that would do the required work until we got yours; it gives us the greatest satisfaction. We perforate with ease the thinnest tissue and manifold, up to thick card-board—sixty reams per day."—J. S. McDONALD & Co., Chicago, Ill.

"We are working them constantly. We fully endorse everything said in their praise by other firms who have them in use. They very soon repay themselves."—WATERLOW & SONS (Limited), London, May 17, 1883.

Compare the speed, durability and work of these Machines with any other, and note the per centage made on the investment.

BLACKHALL'S RULING ATTACHMENT.

Can be applied to any sort of Striker, doubling the value of the ruling machine. A clear cash profit of 75 to 100 per cent. is gained by this attachment any day it is used (a large profit where now there is little or none). There are twenty-seven used in New York alone.

WHAT THE TRADE SAY OF IT.

"Send us another (the third); your attachment is a big thing and worth all you charge for them."—GEO. D. BARNARD & Co., St. Louis.

"We are satisfied as to their value. Send us another."—BEATTY & STEVENSON, New York.

"Your ruling attachment is equal to another machine. Does all you claim."—CULVER, PAGE, HOYNE & Co., Chicago.

"Your attachment soon pays for itself."—WATERLOW & SONS, London.

"We find one ruling machine, with attachment, does the work of two without it."—BROWN BROS., Toronto.

"With your attachment I can produce work in one half the usual time."—W. C. SMITH, New York.

Blackhall's Double Combined Striker and Lapper.

This simple arrangement will do twice the work of an ordinary Striker, and for ONE HEAD or stock work it will lap the head and run the down lines as fast as feint lining (without striking). It will also work one to five patterns at one time. The favor it has met with is the best proof of its value. Can be applied to any sort of ruling machine.

TESTIMONIALS.

"We can by ONE feeding finish work that required three feedings on the Hickok Striker just displaced by yours."—HALEY & BAKER, Philadelphia, Pa.

"Your Combination Striker does all you claim for it, gives twice the results of the American machine, does better work, and is a great saver of time and labor. It meets our warmest approval for its general merit."—WATERLOW & SONS (Limited), London, England.

"Your Striker is far in advance of anything we have seen; is all you represented, is very accurate, and economizes time to a wonderful degree."—W. G. JOHNSTON & Co., Pittsburgh.

"Yours is the best Striker we have ever used. It gives perfect satisfaction."—WM. B. BRADFORD, Indianapolis, Ind.

"I have stopped the Hickok Striker; find yours does twice the work."—W. H. BOOR, Buffalo, N. Y.

"Your Striker is a most desirable improvement. Does double work."—CAMERON, AMBERG & Co., Chicago, Ill.

The foregoing are a few from the many Testimonials I hold. (Second-hand Strikers of other makes on hand at very low prices.)

I would also call attention to my Defiance Blue Pulp, for making Ruling Ink. It is free from acid, grit or sediment, and will not separate or clog in the pens. Is strong and pure.

N.B.—Blackhall's Patent Marbler does away with the present system. A boy can do as much in a day as would usually take a man a week, without any gum, size or trouble. It is always ready to use, and one roll or pad, costing \$5.00, will marble 100 feet square. So the work costs about one-tenth of the usual plan.

EDWARD W. BLACKHALL, 83 Wood Street, Toronto, Ont., or 11 West Swan Street, Buffalo, N. Y.

ADVERTISING NOVELTIES.

Designs in advertising novelties are without number. The use of colored lithographic engravings by enterprising tradesmen of all sorts to advertise their goods has grown enormously within the past year or two; and with the increasing demand for these novelties has sprung up a large and profitable manufacturing industry. Formerly the profits from this industry were shared by a large number of firms, but gradually a few leading manufacturers acquired a monopoly of the business, and their facilities were such as to drive out of the trade the smaller producers. Notwithstanding, there is a brisk competition in the manufacture of advertising specialties, and the constant effort to produce new designs has called into exercise the skill of the best artists. Although productions in this line are usually cheap, in many cases they are not a little expensive, and are really praiseworthy in an artistic point of view. The use of advertising novelties arose a few years ago from the introduction of advertising cards. After these had run for some time there came a demand for colored engravings for advertising purposes in novel and fantastic shapes.

One of the largest manufacturers of advertising novelties of every description in the country in the well-known firm of J. H. Bufford's Sons. This firm has its factory in Boston, and houses in New York, Boston and Chicago, where samples of its products may be seen. On visiting its salesroom in this city a few days ago, a reporter of THE AMERICAN STATIONER found a member of the firm engaged in the examination of the proofs of several new designs, which are to be introduced to the trade in a few days.

"We are selling more of these goods than ever," he said. "Our artists are constantly getting up new designs, and we employ about 150 persons in our factory. We engage the best artists, and no pains or expense are spared to make our productions really pretty things of art. Look at these proofs and judge for yourself. This is the 'Capture of Santa Claus.' It represents the old fellow with a back-load of toys besieged by several little children. Look how pleased he is. It is of course intended to please and interest the little ones, but nevertheless will amuse older people. Here is a life-like picture of a mastiff drinking from a fountain of water, greatly to the delight of two school boys, who are watching him with interest. And here we have a useful as well as ornamental article called the 'Calendar Plaque.' It is in the shape of an ordinary plaque, as you will see, containing the calendar of the year which is tastefully set off by numerous interesting pictures, representing the different seasons. Each of these articles is made up in the highest style of lithographic art, and will make a pretty gift.

"As fast as we turn out a new thing it is quickly secured by some leading tradesmen in this city or elsewhere. In cards, we sell as high as 1,000,000 at a time, though they are not in such demand as they used to be. Some dealers have special designs made to suit their own taste, and these they have copyrighted in their own names and then struck off in large quantities. Some of our productions are very expensive, costing as high as ten or fifteen cents apiece. From one to fourteen colors are used in the preparation of our goods, and the printing of each color requires a separate impression on the printing press. The articles are printed in large sheets, and after receiving all the colors, are cut out by a die in the shape in which they appear when finished. After being cut out they are embossed in some

cases, mounted on frames, or, if in the shape of fans, handles are fixed to them.

"The effect of these goods on the masses is most beneficial to a tradesman as well as to his customers. The little present is carried home and placed in a conspicuous position on the mantel-shelf, the wall, the centre-table, or the dressing-case, where it attracts the attention of visitors, who, in nine cases out of ten, go and get one like it. Aside from the advantages of an advertisement, the little gift becomes useful as an educator, particularly of the poor, who are unable to buy desirable engravings from the art stores with which to decorate their homes. It cultivates in them a taste for pictures and art,

besides making the home happy and giving it an air of refinement that it would not otherwise possess. But it is not the poor alone who admire and preserve our novelties. The wealthy classes appreciate the finer goods, and frequently wealthy ladies visit our store and take home with them such articles in our stock as may please their taste or fancy. What goods are the most taking? Generally those printed in striking colors. We cannot put too much red and yellow in our productions, and these colors, you will notice, predominate in most goods in our line. But we endeavor to suit all tastes, and therefore can furnish novelties, in which the most delicate pigments are carefully and nicely blended."

PHOTO-MECHANICAL PRINTING.

When a collotypic pictures is transferred to stone for lithographic printing, or to metal for etching into a typographic block, the details are apt to clog during the first inking, owing to fatty matter round the ink becoming pressed out. A recent improvement of Mr. Swan, however, yields a transfer with a grain clearly and sharply defined so as to print well from a stone, or yield a transfer capable of being inked on zinc or other metal. The method consists in inking the collotypic plate before soaking it in water, and as the gelatine softens in parts, the ink is removed by sponging. During this operation the ink breaks up into a clear grain free from the halo of grease referred to above. The process is not patented, and promises to give an impetus to photo-mechanical printing.

IMITATION LEATHER PAPER.

The "Insetu-Kioku," or printing bureau of the Finance Department of the Imperial Japanese Government, is now producing a variety of imitation leather papers.

About fourteen different qualities are enumerated, in various colors, including dark red, green, maroon, black and dark purple. The material is supplied in sheets, measuring 20x30 inches. This Japanese product is said to be the closest imitation of leather to be found in the market. In body, it is soft, and it bears folding without the slightest injury—a point of especial importance. The texture, indeed, is altogether different from the ordinary run of imitation leathers; and the material is a very remarkable example of the marvelous ingenuity of the Japanese in imitation. In some respects it is superior for many purposes to real leather. It admits of shiving, and requires no glaire before being blocked for gold. The toughness is extreme, and continued friction seems to have little effect, the surface being injured only by actual abrasion. It bears damp admirably, and takes paste or glue with the utmost facility. In short, bookbinders and others have a material supplying a long experienced want, and one that they may use with the utmost confidence. The price is very moderate.—*Paper Trade Review.*

BYRON WESTON,

DALTON, MASS., U. S. A.,

HAS BEEN AWARDED THE

GRAND PRIZE GOLD MEDAL

AND RECOMMENDED THE

Medal of Honor and Perfection

At PARIS, 1878,

This being the HIGHEST and ONLY AWARD given for

LINEN RECORD and LEDGER PAPER

Also, the only Gold Medal given for Ledger Paper at the Adelaide, Australia, Exhibition, 1881.

— A SPECIALTY. —

THIS Paper has received THE HIGHEST PREMIUM over all
others from the Cincinnati Industrial Exhibition, Massachusetts
Charitable Mechanics' Association, Franklin Institute of Philadelphia,
Louisville Exposition, Medal and diploma from United States Centennial
Commission, Medal of Progress American Institute, 1877, and Medal of
Improvement and Progress, Boston, 1878. Its

PRINCIPAL ADVANTAGES

are as follows:—1. It contains more LINEN than any other Ledger
Paper, has a longer fibre, and is, consequently, tougher. 2. Having a
harder and better body, it frays less in erasure, so that by simply using
the rubber after the eraser, the ink is prevented from spreading. 3. It is
more uniform in Weight Color and Finish. 4. It never cockles if properly
bound. 5. Its chemical action upon ink is such that it both writes and rules
up better. For proof of the foregoing, refer to a large number of Sta-
tioners, Bookbinders, Bookkeepers, and Recorders, who have given it,
after a severe test, the preference over all others. This paper is Double
Sized, and will stand any climate or the most acid of fluid inks.

Send for sample sheet, ERASE and REWRITE FOUR TIMES on same spot.
Each sheet is water-marked with name and date.

The American Stationer

A JOURNAL DEVOTED TO THE INTERESTS OF THE STATIONERY & FANCY GOODS TRADES

"The Stationer"—Every Thursday—\$2.00 Per Annum.

VOL. XIV.—NO. 8.

NEW YORK, AUGUST 23, 1883.

WHOLE NO. 426.

Correspondence.

SPRINGFIELD SPINNINGS.

[CORRESPONDENCE OF THE STATIONER.]

SPRINGFIELD, Mass., August 21, 1883.

General business here has been, since July 1, unusually quiet, but it is now picking up, and most of the manufacturers and jobbers are daily receiving good, and some of them large-sized orders. All look forward to a busy fall trade at fair prices.

The Powers Paper Company has been quite busy with its line of albums and Christmas cards, and is now receiving large orders daily for its large line of papers, envelopes and blank-books.

The Morgan Envelope Company is now moving from the factory, long since found too small and inconvenient, into its large, well-lighted and well-arranged building just finished, and consisting of five floors and a basement, each about 50 feet wide and 225 feet long, and well adapted to the business which, when well located here, I will endeavor to more fully describe.

The National Papeterie Company is quite busy with its picture frames, plush mirrors and papeteries.

Milton Bradley & Co. are actively engaged with their large line of games, and find their new factory just the place for their extensive business.

J. C. Lutz & Co., the lithographers, are now doing an unusually nice class of work in their line, and are in constant receipt of orders from far-away places.

Springfield, with the "Horse Show" the last of this month, the "Bicycle Tournament" and the "Democratic Convention" next month, will be quite a lively place, and all who favor it with their presence will find the city and its people equal to the occasion.

The retail dealers have been quiet since July, and where business has been done to any extent it has been pushed.

J. D. Gill has had the people guessing on blank-books, and to show you that few can estimate well and many can be easily deceived, the guesses on these fourteen "wooden books" varied from 15 pounds to 1,400 pounds.

The travelers and representatives of different houses throughout the country are beginning to pour in, and, within two days the following named, among others, have paid their respects to the writer: C. H. Brown, of 19 Bond street; Chas. W. Clark, Mr. Kahn, of Kahn, Hanover & Co.; John J. Darcy, J. Marsching & Co., A. Smith & Sons, and Keufel & Esser, of New

York; Samuel Hano & Co., F. P. Baker & Co., and others from Boston, all of whom look forward to a healthy fall trade. D.

CINCINNATI GLEANINGS.

[FROM OUR REGULAR CORRESPONDENT.]

CINCINNATI, August 20, 1883.

Business has been righting up during the last ten days in Cincinnati and the feeling has improved amazingly. There was no alarm for Cincinnati when banks in Indiana were closing and the effect of Wall street and Chicago amounted to not even a perceptible trifle except perhaps on a few brokers who are very small fry here. But in the stationery line sales have been very light indeed, and for a time there was a falling off in some lines of business paper among the manufacturers.

The sale of books this summer has been quite light, but fancy stationery has held its own. It looks now as if August would run out a very dull month. In and about Cincinnati the tone of business has been improving, that is, of general business. Most men say that sales are light now and orders small, but that merchants replenish frequently. Collections are difficult, but they are better than a week ago in nearly all lines of trade. The banks have within the week all fortified themselves against an exigency. High rates of interest have drawn money here for investment and loans can be had easier on lighter rates than those of a week ago, but undoubted security is required. Very little paper is offered for discount and the demand for money is only fair. The local banks have an excellent reputation among business men.

There is not anything whatever in the condition of local affairs in this business centre and its immediate locality to excite distrust. A continuous failing of banks and of business houses in the East on account of the ordinary causes of business failure was watched with interest and weighed as to its probable power to affect the general business of the country, and there the concern in these matters ended. A year ago dry goods and general household supply establishments were selling on time and dating bills weeks ahead. There is none of that now.

Loan brokers are doing a light business. Purchasers are conservative and don't want time on futures in goods. They are allowing their stocks to run pretty low and are working off goods on hand. This is in general business and the methods are provident ones. Nearly all lines of manufacture are running full forces of operatives. One exception to the rule of light

sales is the trade in ready-made clothing in which sales have continued large. If the rest of the country will right up as well as the Cincinnati region seems to have done, and as the most cautious and conservative business men here believe it has done, there need be no fear for the business during the next fall and winter.

There is not much to say about the special lines in the stationery trade. The Globe Files Company continues to prosper as they deserve to do, and to fill orders from all parts of the country and to see their trade expanding with great rapidity.

Traveling salesmen are not so numerous visiting here as they were a fortnight ago. Oliver Braden, of the L. L. Brown Paper Company, was here last week and was very spry in his movements among the dealers.

The Dennison Manufacturing Company has fine rooms here on Walnut street, and it is making them look very attractive both within and from the street.

None of the new enterprises in the stationery and printing lines, for which there is ample room here, have laid hold of this point with capital and appliances. Nearly all the established stationery concerns are setting out their stakes.

Only a few of the stationers' guild here took vacations to the seashore this year, and most of those who did have already returned. John Holland is now absent in the East, but he started late.

PRINCE WILLIAM.

CHICAGO CHIFFONS.

[FROM OUR REGULAR CORRESPONDENT.]

WESTERN OFFICE LOCKWOOD PRESS,
8 LAKESIDE BUILDING,
CHICAGO, Ill., August 20, 1883.

The general impression among the trade here is that there will be a good deal of business done in a quiet way during the coming three months. There is no movement of any importance to chronicle this week, but all seem to be doing fairly well and are satisfied.

Mr. Brown, of Brown, Pettibone & Kelley, says that his firm is enjoying very good prospects. Its August business shows an increase of one-third over the same month last year, its business being generally printing and bank stationery, and it stands well in the trade here. It is selling large numbers of De La Rue's Antistylograph.

Wm. Montgomery, manager of the Livermore pen office here, says that the pens and pencils made by his firm are going like hot cakes, and that the July trade was the largest ever done here. Some new patterns of this pen have just been brought out.

S. D. Childs & Co., fine stationers, have quite

a line of emblematic cards, to which they are constantly adding. When the Masonic pilgrims started to the conclave in San Francisco they took large quantities of these cards with them, and made Childs & Co. quite busy for a time. They are quite large jobbers of fine stationery, and now have their travelers out with a line of high-class Christmas and New Year cards, which are meeting with fair sales.

Birmingham Brothers have a constant window attraction in some bound volumes of *Harpers Weekly*, issued during the rebellion; every day new pictures are exhibited, and draw crowds of spectators.

Gustav Hinstorff, importer of French, German and Spanish books, artists' materials, &c., is a good deal annoyed by continued and persistent calls for French cards. He has never kept them, but the would-be customers are very sure that he has them. Some one in the vicinity must handle the stuff.

Speaking of playing cards, they are now hawked about the street at ten cents per pack. They are miserably printed on poor stock and are the product of some job printers here. A good many stationers are "stuck" with cards bought before the duty was taken off. In some cases the loss is considerable, though few will admit it.

The National Roll Wrapping Paper Company has just been incorporated by J. H. Earl, W. C. and E. F. Westerfield, with a capital of \$24,000. The intention of the company is to place on the market the Earl patent clipper, a device which contains a roll of paper which can be drawn out and torn off at any point. Briefly, it is an improvement upon the perforated wrappers now on the market. The stock is nearly all taken, and the company will soon be ready for business. Its present quarters are at 83 Lake street.

The Knight's Tribune Publishing Company has been incorporated with a capital of \$10,000 to float the organ of the Knights of Honor here. Only half of the stock will be issued at present, and that at half its value.

One of the trade journals here has published a rumor that T. Sinclair & Son are about to open a branch office in Chicago. This is a canard. I am not at liberty to give names, but negotiations are now pending with a jobbing-house here for the exclusive sale of these cards. The next letter may contain further particulars.

The type-founders and dealers in printers' supplies are fairly busy. Harry Hart has just returned from a successful trip Southwest, where he disposed of a considerable quantity of lithographic machinery. Mr. Hart is the head of a company recently organized to float the Clause web press and it is now building two for the *Staats-Zeitung*, the chief German daily here. It is claimed that the Clause will eclipse all other fast presses. If it does it will create something of a sensation.

The Tablet and Ticket Company is now prepared to cut tuck circulars for the trade, after the matter has been printed on the paper. The tuck has been a favorite with the public, as envelopes were not used, but they were difficult to print and expensive. Now that the paper (any kind) may be printed and cut afterward, it is expected that the tuck circular will speedily find its way into public use.

H. McAllaster & Co., jobbers in cards, are now agents for Stevens & Co. (Coventry, England), the valentine manufacturers, and are having success with their venture.

N. W. Taylor, successor to the Geo. H. Taylor Company, has partitioned the store on Monroe street and moved the stock into the east half. Mr. Taylor will in future give special attention

to book, print and cover papers. A new catalogue and sample books will soon be issued by him.

MAN ABOUT TOWN.

THE METROPOLITAN DAILY PRESS.

IV.

THE WORLD.

The New York *World* was established in June, 1860. Alexander Cummings, formerly of the *North American*, and afterward of the *Evening Bulletin*, of Philadelphia, was selected as its manager. His chief assistant was James R. Spaulding, a class-mate of Henry J. Raymond. Mr. Spaulding was a dignified and scholarly editor. All of the arrangements were made and completed, and one bright morning in June, 1860, the *World* made its first appearance. It was a dignified and highly moral paper. Some \$200,000 were spent in an effort to make it a success; but its semi-religious character made it unpopular, and those interested in it became disgusted, and the paper changed hands.

A lamentable episode in the career of the *World* occurred in 1864, during the progress of the civil war, and gave it a marked position with that portion of the community opposed to the war. The *World* and the *Journal of Commerce* were suspended for publishing a forged proclamation of the President of the United States. The two journals, however, were afterward revived, as it turned out that the forged proclamation merely antedated a few weeks a bona fide proclamation of similar import.

The *World* espoused the Democratic cause and took a prominent part in the political controversies of the day. On December 29, 1869, Manton M. Marble became sole proprietor of the paper. Mr. Marble continued as its publisher and proprietor until some two or three years ago, when he sold his interest in the establishment to Jay Gould.

On January 31, 1882, the *World* building, on the corner of Park row and Beekman street, was destroyed by fire, causing a loss of \$1,000,000. Recently the paper was purchased by Joseph Pulitzer, a well-known journalist of St. Louis, who reduced the price from three to two cents, and materially changed its policy.

The paper has never enjoyed prosperity in so great a degree as the other leading morning journals of New York. Its circulation has always been comparatively limited, and is now estimated to be 25,000.

EGYPTIAN LAMPS.

Among recent acquisitions by the South Kensington Museum may be mentioned four enameled glass lamps for suspension in mosques, which Stanley Lane-Poole, in his recent visit to Egypt, obtained on loan for the museum from the Khedive himself. The Arab Art Museum, in the mosque of El-Hâkim at Cairo, contains more than eighty of these mosque lamps, including more than a dozen duplicates. It was from these duplicates that Mr. Lane-Poole received permission to select the four which are now exhibited at South Kensington. They are fine specimens of their class; the coloring of one is especially beautiful; and they all belong to the best period of Arab work. Three of them bear the name and titles of Sultan Hassan (who reigned A.D. 1347-51, and again 1354-61), and came from his great mosque in front of the citadel; and the fourth has the title of Elmelik Ez-Zâhir Barkuk (1382-99), the founder of the dynasty of Circassian Mamelukes, which succeeded that of the Turkish Mamelukes to which Sultan Hassan belonged. The colors of

the enamel are chiefly cobalt and a dark-red, with touches of white and pale-green. An incomplete sentence from the Koran runs round the necks of three of them; it is appropriately taken from the Chapter of Light (xxiv.), and reads: "God is the Light of the Heavens and the earth; His light is as a niche, in which is a lamp; the lamp is in a glass; the glass is as it were a glittering star," &c. The Moslems are as fond of this verse as they are of the celebrated Ayat El-Kursi, or "Throne verse," which meets the eye in almost every mosque and tomb in Cairo. It is to be hoped that this loan, will some day publish a catalogue of the lamps and other objects of Arab art in the Museum of El-Hâkim, many of which are of the highest interest and rarity. At present, however, we learn that he is on his way to England for a well-earned respite from his duties at Cairo.—*Decorator*.

BRUSH FOR LACQUERING.

The best kind of brush for this purpose is one made in the following manner: Take a piece of wood a little broader than the work to be lacquered, and make into the shape of an ordinary whitewash-brush handle. Then cut a slit into it lengthwise with a thick saw; next, take a narrow strip of clean flannel, as long as the wood is broad, and fold it the longest way; then take a piece of white Nankeen cloth and fold it round the outside of the flannel, and put them both in the slit cut in the wood, with their folded edge outward, and fasten the cloth to the wood by means of screws passing through the side. Before fastening tight, however, a piece of straight wire about one-quarter inch thick must be put through the bow of the folded cloth, and the cloth pulled tight against the wire, so as to make it smooth and straight. After the cloth is fastened tight to the wood, the wire is pulled out, and the tool specially fitted to be used as a lacquer brush. The woolen cloth holds the lacquer, while the Nankeen cloth prevents it flowing too freely, and presents a smooth surface to the metal that is to be lacquered, while it also prevents any particles coming off the woolen cloth on to the lacquered surface. This kind of brush must not be dipped into a bowl of lacquer, but the lacquer put on to it by means of a common brush. By means of a brush made in this way, large flat surfaces are lacquered very beautifully.

The benefits of first coating the work with alcohol, or very thin lacquer, become greater in this kind of work, causing the lacquer when it is applied to flow more easily and regularly. The brush must be laid on to the work very light, and with a slight curved motion at the beginning of the stroke, so that it will miss the sharp edge of the work, by which a portion of the lacquer would be pressed out and flow irregularly over the edge. The brush must then be drawn straight and with equal pressure along the surface of the brass, and lifted off the instant it reaches the outer edge. In moderately broad surfaces, a brush the full breadth of the work should be used; but in very large surfaces, and especially where there are a number of large holes in the work, an ordinary brush is not suitable. When work is newly lacquered the lacquer is soft, and the work ought to be exposed to a gentle heat for a short time to evaporate the alcohol and harden the lacquer. Small gas-cooking stoves are very suitable for this purpose, and it will be found that after newly lacquered work has been baked for a short time, any little unevenness in the laying on the lacquer will be much improved.—*Metal Worker*.

OLD BERKSHIRE MILLS

CHARLES O. BROWN, President.

DALTON, MASS., U. S. A.

JOHN D. CARSON, Treasurer.

One party writes: "The two hundred RECORD BOOKS, for 83 of the 99 Counties, now on exhibition at the Iowa State Fair, at Des Moines; and all, but four (!) of them, made from your 'OLD BERKSHIRE MILLS LINEN LEDGER,' Medium, 40lb., make a splendid show."

[The above cut is a fac-simile of the wrapper used on the Linen Ledger Paper.]

We will pay for any book rejected on account of fault in the paper. Send for Samples, test them in comparison, and see that your books are made from paper thus water-marked.

SEASON 1883-1884.

SEASON 1883-1884.

L. PRANG & CO.'S

Christmas and New Year Cards.

WE beg to express our thanks to our patrons and friends for the kind and flattering appreciation of our past efforts, and feel a pardonable pride at the very emphatic endorsement which our Cards have received from the American, English, German and Australian press. With one accord these exponents of public taste have given our Cards the first rank over all similar productions in the market. We are bound to maintain this superiority; and we have, as heretofore, spared no expense to create, with the aid of our enlarged experience, a Series of Novelties for the Christmas Season, which, we have no doubt, will meet the expectations of the Trade. We have been singularly fortunate in procuring the assistance of, we may say, **REPRESENTATIVE AMERICAN TALENT** in the preparation of designs, and besides have secured the coöperation of some of the most **EMINENT EUROPEAN ARTISTS**.

OUR LINE IS NOW COMPLETED, and our agents are on the road to call on our patrons and friends. An inspection of the Sample Books will convince them that in regard to **ORIGINALITY AND VARIETY OF DESIGN, EXCELLENCE AND RICHNESS IN EXECUTION**, it far exceeds our last year's efforts. To give an idea of the high artistic order of the line, we would say that it comprises:

FIGURE DESIGNS by Miss DORA WHEELER, Miss ROSINA EMMET, Miss L. B. HUMPHREY, Miss L. B. COMINS, ELIHU VEDDER, WALTER SATTERLEE, A. F. BROOKS, and others.

LANDSCAPE DESIGNS by W. HAMILTON GIBSON, THOMAS MORAN, F. L. SMITH, and others.

ANIMAL DESIGNS by B. E. BENSELL and HARRY BEARD.

FLOWER AND BIRD DESIGNS by Miss FIDELIA BRIDGES, Mrs. O. E. WHITNEY, JEAN ROBIE, of Brussels; H. GIACOMELLI, of Paris, and others.

THE LITERARY MATTER in connection with our designs has been carefully attended to—among others, by Mrs. CELIA THAXTER, Mrs. EMILY SHAW FORMAN and JOAQUIN MILLER.

OUR REGULAR LINE of Christmas and New Year Cards will comprise plain cards, fringed cards, and double fringed cards, varying in price from 30 cents to \$60, per set of 12.

PROTECTORS are furnished with all fringed cards, and also **ENVELOPES** for all series costing \$1.80 per set and more.

Besides our **REGULAR LINE**, we would call special attention to the following

NOVELTIES AND SPECIALTIES:

ALADDIN'S LAMP. This is one of the most elaborate and elegant Christmas Gift Cards we have ever offered to the trade. It is a large folding card, heavily fringed, and provided with a leatherette protector. The front outside page is a design of peacock feathers on satin; the left inside page contains a poem specially written for this gift by JOAQUIN MILLER, also on satin, and surrounded by a delicate border of Oriental design; the right inside page presents Aladdin bearing his lamp, after a painting by the eminent American artist, ELIHU VEDDER; and to complete the whole, the back is embellished with a most unique, artistic design of high order.

RUSKIN CALENDAR FOR 1884. At the solicitation of some of our business friends, we have this year decided to bring out a Calendar, and are happy to be able to announce that we shall issue **A CALENDAR FROM JOHN RUSKIN, FOR 1884**. This consists of an artistic mount with a block calendar, having suitable selections from JOHN RUSKIN's works for each day of

the year. The selections have been made by a lady well-known for her cultivated taste and judgment. The mount has been designed by a well-known Boston artist, and, coming from her thought and tasteful skill, the form and decoration will be a fitting accompaniment to the words within. This Calendar will be a source of pleasure to all who love and appreciate RUSKIN, that they may have every morning a jewel from the treasure of his noble and earnest thought.

"THE CHRISTMAS SHEAF." A folding card, with inside pages, in color, stamped out in the shape of a sheaf of wheat. Tied with silk cord and tassels.

"THE CHRISTMAS BOOK." A surprisingly natural representation of an open book, with floral designs by Mrs. FISHER, and original poems by JOAQUIN MILLER.

CHRISTMAS ART PRINTS ON SATIN.

The great success attending our efforts in this line has induced us to bring out a number of new Series, consisting of Flowers, Landscapes and Figure Designs. These are elegantly finished in several styles, in fringed tinted mats, with cord and tassels; on mounts, with silk fringe and cord; in book form, richly fringed and with leatherette protectors, and on rich Plush mounts. Prices vary from \$1.50 to \$3.50 each.

We have made large additions to our **BIRTHDAY** line, comprising Plain Cards, Fringed and Double Fringed Cards and Art Prints on Satin. Numerous Series at popular prices have been added to our list of **SCRIPTURE TEXT CARDS**. New **FLOWER PIECES** in Mats, &c. **THANKSGIVING CARDS**,—Our line will also be shown now.

Descriptive Price Lists of our **CHRISTMAS** and **NEW YEAR CARDS** are now ready, and will be sent on application.

THOMAS NELSON & SONS

Have made arrangements with Messrs. ROMANET & Co., of Paris and London, which enables them to offer a Superb Line of New and Elegant Designs. Great care has been taken in selecting subjects, and every effort made to make this new line THE most popular.

Our Travelers are now on the road with Samples, and it certainly will be to the advantage of the Trade to see this line before placing orders.

— No. 42 ELFECKER STREET, NEW YORK. —

Trade Novelties.

[We will be glad to receive samples of all novelties issued in the trade, and will notice all such which possess merit free of charge. It is desirable to accompany descriptions with cuts whenever possible.]

THE "HALL" TYPE WRITER.

The introduction of the "Hall" type-writer, which is illustrated in the accompanying cut, marks a new era in the development and use of writing machines. It was invented by Thomas Hall, of Brooklyn, N. Y., and in the autumn of 1881 it was exhibited at the Semi-Centennial Fair of the American Institute, New York, and was awarded the medal of superiority.

The merits of this machine may be briefly stated as follows: It prints directly from the face of the type, and thus makes on the paper perfectly clear, unblurred impressions. The finest work of the printing press can be done on this machine. Any class of type can be used interchangeably on the same machine. Type forms representing every variety of style are manufactured by the company which makes the machine, and can be used, one for the other, in a few seconds, simply by removing two screws.

These type forms embrace not only the various styles of English alphabets, suitable for so-called and business correspondence, but also an equal variety in French, Spanish, German, Italian and other foreign languages, with all the marks and accentuations peculiar to each. Special signs adapted to special trades are also furnished.

The mechanism of the machine is exceedingly simple. It has less than one-tenth of the number of parts to be found in either of its rivals. Being manufactured of the best of materials and with the finest of tools, it will last a lifetime. It will stand rough usage, and is particularly recommended for the household and the school-room. Children five years of age use it at sight. In their hands it is an invaluable aid to learning to spell, punctuate and compose sentences. The machine is very portable, weighing less than four and a half pounds. A lady can carry it in her hands without inconvenience. When using the machine, the paper lies before the operator in the same position as when writing with the pen. Only one letter can be printed at a time, and thus a fertile source of errors with other writing machines is avoided. Paper of any width not exceeding twelve inches can be used without special adjustment. The speed of the machine is said to be from thirty to fifty words per minute, according to practice. The natural position of the paper and the ease with which it is manipulated, as well as the immunity from errors that require correction, especially commend it to those desiring rapid and accurate work.

A new stylographic pen has recently entered into competition with the numberless pens of this description with which the stationery trade is already crowded. It is called the "Perfect Stylograph," though what it has to merit its title has not been learned. A full description of this pen will be given in THE STATIONER in a future number.

NEW PATENTS.

No. 280,604. Machine for Pasting Paper Boxes, &c.—George W. Glazier, Salem, assignor of one-half to Albert G. Potter, Lynn, Mass.

No. 280,630. Stylographic Fountain Pen.—Marion H. Kerner, New York, N. Y.

No. 280,652. Type-Holding Attachment for Hand-Stampers.—Lionel H. Moise, San Francisco, Cal.

No. 280,683. Bill and Letter File, &c.—Joshua Smith, Chicago, Ill.

No. 280,699. Type Making and Arranging Machinery.—Frederick Wicks, Glasgow, County of Lanark, Scotland. Patented in England April 4, 1881, No. 1,462; in Belgium October 23, 1881, No. 56,042; in Germany October 27, 1881, No. 18,022, and in France November 8, 1881, No. 145,723.

No. 280,745. Press or Mold for Coating Articles with Celluloid, &c.—John W. Hyatt, Newark, N. J.,

THE "HALL" TYPE-WRITER.

assignor to the Celluloid Manufacturing Company, New York, N. Y.

No. 280,772. Percentage Calculator.—Sylvester J. Tucker and Edmund F. Kelly, Richmond, Va.

A percentage calculator, consisting of a graduated base, having several series of numerals arranged thereon in horizontal, transverse and quadrantal orders, respectively, which bear such relation to each other that an arm pivoted to the base shall be adapted to indicate a number in each of the series, of which one shall represent a sum total, another a fractional part thereof, and the third the percentage the part bears to the whole.

No. 280,807. Croquet Set.—Alfred D. F. Farley, Leavenworth, Kan.

An improved croquet set, consisting of balls, mallets, wickets and stakes, the surfaces of which are luminous in whole or in part.

No. 280,817. Charm Compass.—Joseph R. Hawley, Hartford, Conn.

A compass, consisting of a cylindrical case, forming a narrow chamber, combined with the needle arranged on a pivot longitudinally in the chamber, the needle free to vibrate between the sides of the chamber, the case provided with a device for attachment to the chain.

No. 280,818. Protective Pad for Picture Frames.—George S. Hazard, Newport, Ky.

No. 280,831. Dividers.—Carl Johnsen, Christiania, Norway.

No. 280,851. Christmas Tree Stand.—Gustav Pannster.—Plagwitz, near Leipsic, Germany, assignor to Modes & Brauer, same place. Patented in Germany July 16, 1881, No. 17,800.

No. 280,878. Sliced Picture.—Walter Stranders, New York, N. Y., assignor to Ezra H. Snow, Orange, N. J.

No. 280,922. Combined Stopper and Tube for Inkstands.—John Felt, Clayton, N. Y., assignor to Harriet A. Felt, same place.

||A combined stopper and tube for inkstands

and bottles, composed of rubber and other elastic material, and provided with an open upper end and a slitted or valved lower end.

No. 280,965. Map Drawing.—John M. B. Sill, Detroit, Mich.

No. 280,986. Doll.—Lucinda B. J. Wishard, Indianapolis, Ind., assignor of two-thirds to Harry E. Drew and Robert E. Springsteen, same place.

A doll consisting of a flexible body, having within stiffening wires, twisted to form a loop in the head and in each hand and foot, the wires also forming knots at the shoulders and hips, and a knot at each elbow and knee, the wires extending between the knots and drawn together and twisted upon each other to form the back and neck of the same.

No. 281,006. Check, Draft, Note, &c.—Howard Bodey, Norristown, Pa.

A bank check or similar instrument, having a schedule of figures in units and combinations, occupying the major part of either face thereof, and adapted to be punched to denote the commercial value thereof, and having a key adapted to be punched to denote the amount of defacement to the schedule.

No. 281,034. Machine for Winding Paper.—Louis Dejonge, Jr., Stapleton, N. Y.

As an improvement in paper-winding machines, the combination, with suitable guide-rollers and tension-rods, of a drawing-drum and gravity-

roller, which holds the paper in contact therewith, and of a winding-up roller, the drawing-drum and winding-up roller receiving rotary motion independently of each other from the driving-shaft.

No. 281,062. Bill File.—Avery Henderson, Upper Sandusky, Ohio.

No. 281,101. Bookbinding.—Andrew J. Megee, Philadelphia, Pa., assignor to the Miller Bible and Publishing House, Limited, same place.

No. 281,102. Album.—Andrew J. Megee, Philadelphia, Pa., assignor to the Miller Bible and Publishing House, Limited, same place.

No. 281,112. Blackboard.—Otis M. Mitchell, Marathon, N. Y.

A frame consisting of two vertical strips, a cross strip or strips secured upon their outer faces near the top, and a cross-shelf joining their lower ends, in combination with a blackboard having a hole in each side edge near its upper end and a pair of springs secured to the upper cross-piece of said frame, and having studs or pivots projecting from them, adapted to enter the holes in the edges of the board, whereby the same is removably suspended to swing.

No. 281,143. Picture Exhibitor.—Morris Schleissner, New York, N. Y.

RAPHAEL TUCK & SONS'

Artistic Xmas and New Year Cards.

PRICE LIST NOW READY.

RELIEFS (SCRAP PICTURES).

The constant growing demand for Reliefs has impressed upon us the necessity of an improvement of the present way dealers are obliged to keep their stock, and we are pleased to say that we are now able to offer the trade a complete solution to the matter in the form of a

— RELIEF CABINET, —

of which the cut herewith given is an exact illustration. This Cabinet will hold 5,000 to 6,000 Reliefs (according to the sizes desired), and will be presented to every retailer who purchases that number of sheets, amounting to at least \$100 net.

The assortment may be made up of one hundred each of fifty kinds, or fifty each of one hundred kinds. This Cabinet is a solidly built, durable piece of work, in black walnut, and an ornament to any store.

"LANGUAGE OF FLOWERS."

CAUTION.—Beware of imitations claiming to be "the same thing" or "just as good."

THE PARSONS PAPER COMPANY,

— HOLYOKE, MASS., —

In addition to their already extensive establishments at Holyoke (which rank among the largest mills in this country), have recently built a separate mill, specially constructed and equipped for the production of the Best Grades of Linen Papers, and are now manufacturing all the various sizes and weights of BOND, PARCHMENT, BANK-NOTE, AND LEDGER PAPERS. They have already demonstrated their ability to produce of these papers a quality EQUAL TO THE BEST ESTABLISHED BRANDS IN THE MARKET.

Having great strength of fibre (an essential requisite in all Legal, Government and Commercial Papers), they are recommended for use in Bonds, Deeds, Certificates, County and State Records, etc. They are thoroughly sized to stand writing upon with fluid inks, and will permit of repeated erasures and re-writing thereon, when required. Great care is exercised to produce uniformity of color, strength and finish, and to do this, they have the latest improved machinery, specially adapted to the manufacture of Linen Papers.

They would call the attention of the Trade to the following brands, which are their trade-marks, viz.: In all Bond, Bank Folio, and Parchment appears the water-mark

"PARSONS PAPER COMPANY, HOLYOKE, MASS."

The Ledger Papers, of which they manufacture two Brands, are water-marked

"PARSONS LINEN LEDGER."

"SCOTCH LINEN LEDGER."

It is the intention of the Company to maintain the quality of these brands equal to any in the market.

In answer to frequent inquiry made about our Novelties, we will furnish a

Trade Gossip.

All new goods and designs which are not, strictly speaking, "Novelties" will be noticed under this head. The trade are requested to forward descriptions with samples in order to secure proper notice.

An attachment has been issued against George F. Bryant, printer, Danville, Ill.

Ketchum & Wanamaker, electrotypers, Indianapolis, Ind., have dissolved.

Whitman & Mills, publishers of the *Pittsfield Journal*, Pittsfield, Mass., have dissolved.

W. B. Burke, bookseller and stationer, Atlanta, Ga., has been burned out. Insured.

The Meriden Patent Novelty Company, Meriden, Conn., is reported to have made an assignment.

Davidson & Malone, printers, Metropolis, Ill., have dissolved. E. D. Malone continues the business.

An assignment in trust is reported to have been made by G. M. Franklin, stationer, Hamilton, Ont.

Isaac Newall, manufacturer of paper boxes, Plainville, Conn., has admitted G. L. Goodsell to partnership.

A dissolution of partnership has taken place in the firm of Heinz & Gerbing, dealers in wall-paper, Burlington, Ia.

A. L. Wright & Co., dealers in wall paper, &c., Indianapolis, Ind., have dissolved, A. L. Wright continuing the business.

A. M. Schneider & Co., printers, Evansville, Ind., have dissolved partnership. The business will be continued by A. M. Schneider.

A dissolution of partnership has taken place in the firm of Robson & Co., dealers in fancy goods, Minneapolis, Minn. F. S. Harms retires.

The fifteen-cent edition recently issued of the Waverly novels is commanding a large sale and it is destined to become one of the most popular articles in the fall trade.

A dissolution of the firm of Kennedy, Strome & Co., wholesale and retail stationers, &c., Winnipeg, Man., has taken place. The business will be continued by Alexander Kennedy.

The latest novelty in the musical line is a musical box with zithern attachment. The addition of the zithern to the ordinary musical box has a most pleasing effect, and it will be gratifying to all buyers of musical ware to know that the increased cost is very slight.

Mr. Kitchen, of the firm of Cline & Kitchen, stationers, Lincoln, Neb.; L. M. Butterfield, of the Detroit Paper Company, Detroit, Mich.; Amos Pettibone, of Culver, Page, Horn & Co., Chicago, are among the visitors reported in town for the past few days.

Fire was discovered issuing from the top floor of the white marble building No. 53 Warren street, New York, on Wednesday morning. An alarm was immediately sent out, and, running a line of hose up the stairs, the firemen soon had the fire under control. The building was occupied by C. F. Lauer, manufacturer of toys and fancy articles, whose loss is about \$5,000. The flames were confined to the fifth story. After they were extinguished the firemen threw down a mass of rubbish, among which were several boxes of large-sized fire-crackers. On striking the ground they were set on fire by the burning rubbish and exploded, sending the crowd that had gathered flying in every direction.

The police are making search for James E. Walker, a commercial traveler, who has been missing from his home, No. 247 East Thirty-fifth street, New York, for several days. His wife is in great distress at his absence. Walker is forty-three years of age and a native of the north of Ireland. He was employed as a commercial traveler by a stationery house, where he received a salary of \$3,000 a year. On the morning of the 11th inst. Walker left home as usual to go to his place of business. He did not return that night, and his wife has not seen him since. She found that on the day of his disappearance he had called upon a friend in Brooklyn. The same afternoon he called upon an acquaintance in Ann street, this city. From this person Mrs. Walker learned that her husband had been drinking. When he left his home he had no extra clothing with him, and very little money. There is apparently no reason for his absence, as he was not financially embarrassed, and he has money to his credit with his employers and other firms in this city for whom he sold goods on commission. He is five feet seven inches in height, has dark hair mixed with gray, light, sandy mustache, and light-blue eyes. When he left home he wore a blue diagonal coat, white vest, white and black checked trousers and high white hat.

E. & H. T. Anthony & Co., photographers, are about to issue a new catalogue of their novelties. This firm has lately introduced what is called a "new patent novel chair" for the use of photographers. It supplies a long-felt want of the photographer, as it can be readily adjusted and adapted to any subject whether young or old, giving a firm support and securing ease of position. The back can be used as arm rests for full-length portraits.

George A. Raisbeck has just returned from the New Jersey coast, where he has been enjoying himself hunting, fishing, &c. He looks as hardy and sun-burned as a sailor, which is evidence that his vacation has done him good. He is happy to think that his hunting and fishing expedition were invariably successful.

Fred. Ernst, of the firm of Ernst & Brill, dealers in fancy goods, stationery, &c., St. Joseph, Mo., who has been in town for several weeks past, will not return South for some days yet. Mr. Ernst has canvassed pretty well the business outlook in the East as well West, and is quite hopeful of a lively fall trade.

Max Fishel, of the firm of Max Fishel & Brother, stationers, &c., Deadwood, D. T., has just returned from Europe, and will spend a few days in New York before he leaves for the West. He is looking well and happy, and says he enjoyed his European trip first-rate.

The mill of the Eau Claire Pulp and Paper Company, at Eau Claire, Wis., took fire on the 16th inst. and a loss of \$2,000 was caused by the flooding of the building by the firemen.

A partnership has been formed at Providence, R. I., by Charles W. Read and John J. Harley, who will do business as paper hangers under the style of Charles W. Read & Co.

E. S. Davis & Co., paper-stock dealers, Vallejo, Cal., have dissolved partnership, E. S. Davis having retired. The business will be continued by H. J. Ford.

A fire broke out in the pencil manufactory of Burnshiem & Co., New York city, on Thursday morning, 16th inst., and did \$3,000 damage to the stock.

R. F. Spencer, of Kenney, Ill., will discontinue the publication of the *Gazette* on September 1.

Mrs. C. H. Bent, stationer, Amherst, Nova Scotia, has sold out.

Rison & McGee, printers, Paris, Tenn., have dissolved partnership.

Colby & Stendel, printers, St. Louis, Mo., have dissolved partnership.

Geo. E. Frothingham, printer, Ann Arbor, Mich., has sold out to Kittridge.

Frederick Weibergall, photographer, Chicago, Ill., was burned out. No insurance.

Thomas Strine, one of the publishers of the *Miltonian*, Milton, Pa., died a few days ago.

Charles A. Delphin left town a few days ago for the East, where he will spend his vacation.

A. W. Gray, of the firm of Reitz & Gray, publishers of the *Item*, Glen Rock, Pa., is dead.

C. H. Bevans, Decatur, Ill., has succeeded J. A. Wallace in the book and stationery business.

A judgment has been found against F. H. Millard & Co., booksellers, Altoona, Pa., for \$350.

Thomas W. Rogers, photographer, Carmichaels, Pa., has sold out his business to Charles S. Frank.

G. D. Morse, printer, Boston, Mass., has failed. The settlement of his affairs will be effected in insolvency.

Robert Grix will hereafter conduct the business of Richards & Grix, stationers, Butte City, Mon., the old firm having dissolved.

A company called the Midland Publishing Company has been incorporated at East St. Louis, with a capital stock of \$25,000.

McDowell & Son's Centennial paper mill, Lambertville, N. J., was burned on Sunday morning, August 19. Loss \$50,000; insured for \$10,000.

Mr. Longhead, with Dreka, Philadelphia, is preparing his samples and will visit the trade immediately after the return of Louis Dreka next week.

Bisler Brothers, manufacturers of paper boxes, Philadelphia, Pa., have lost one of the members of their firm, Emil H. Bisler having died a few days ago.

Charles H. Eihle, traveler for the firm of Loeb & Brothers, returned from the South and West a few days ago. He will remain here during the week before starting out on another Western and Southern trip.

Harry S. Baker, formerly connected with his father, Jacob Baker, Philadelphia, Pa., and buyer of the house, has gone West and opened an umbrella, stationery, leather and fancy goods store at 451 West Madison street, Chicago, Ill. He has best wishes for a successful future.

The Clough Manufacturing Company, Newark, N. J., manufacturer of wire goods, has called a meeting of creditors. The company was incorporated in March, 1882, with an authorized capital stock of \$100,000, virtually owned by W. R. Clough, the patentee of a process of manufacturing various articles, such as tacks, hooks, pins, nails, &c., from wire. The company has been laboring under the difficulty of a want of cash capital.

John B. Davids & Co. are experimenting with a new indelible ink which they are to bring out in a short time. When the preparation is perfected it will be submitted to the government chemists at Washington in the hope that it will be awarded the \$50,000 prize which the government offers for the best stamp-canceling ink. John B. Davids & Co. are now putting up their copying inks in dark amber bottles, which pre-

vents the light from affecting the color of their contents.

Thomas Job, bookseller, Hazleton, has been closed out by the sheriff.

Patterson & Watson, publishers of the *Mirror*, Meaford, Can., have been burned out.

J. H. Clingan, bookseller, Delaware, Ohio, has disposed of his business to other parties.

Henry Bidwell, manufacturer of binders' boards, &c., Springfield, N. J., has been burnt out.

The improved dictionary holder sold by French & Choate is taking exceedingly well with the trade.

H. Buchman, photographer, Tucson, Arizona, has admitted into partnership with him F. A. Hartwell.

P. Scholz, dealer in picture frames, &c., St. Louis, Mo., has made an assignment to William F. Wernse.

Erberhard Faber is introducing an unusually fine and full line of carved and fancy pencil holders this fall.

A judgment in the sum of \$48 has been found against F. J. Werzberger, manufacturer of frames, New York city.

Suider & Hoole, Cincinnati and Chicago, are sole agents for Welch's patent ready-made blank-book covers, which the trade are invited to examine. Send for circular price list.

Schlicht's standard indexes, published by Clague, Wegman, Schlicht & Co., Rochester, N. Y., and now used extensively in the departments at Washington, are meeting with great favor from all quarters.

Last week mention was made of Paul Mende as a dealer in fancy goods. This gentleman only makes a regular line of fringes, cards, cords, tassels and novelties in trimmings, of which he has an exquisite line at his office, 16 Howard street, this city.

The family bibles published by the National Publishing Company, Philadelphia, are having an extensive sale. Some of the best jobbers are pushing them largely, and the trade generally acknowledge the superiority and cheapness of the styles.

J. B. Lippincott & Co., Philadelphia, are selling more stationery goods for the fall than during any previous season. This firm's stationery department, which is one of the most important of its business, has grown so much that more room has been given to it. It now occupies two entire floors of the firm's immense building.

Schedules in assignment for the benefit of creditors were filed on Thursday in the Court of Common Pleas by Isaac Feinberg, dealer in wall-paper, at 60 Mott street, to Mitchell Hershfield, showing liabilities of \$19,692.97; nominal assets, \$13,217.79, and actual assets, \$9,143.62; and by Morris A. Feinberg, also dealer in wall-paper at 78 Mott street, to Mitchell Hershfield, with liabilities of \$18,014.74; nominal assets, \$15,200.70, and actual assets, \$4,749.86.

H. Bidwell's paper mill, at Springfield, N. J., was burned on Thursday night, August 16, and with the contents, paper, machinery, &c., is a total loss. This is the second time this mill has been destroyed by fire. The former mill was of wood and this was of brick, and quite a fine building. The cause of the fire is not known. It is supposed to have originated in the stock room. The loss is estimated at \$30,000. The mill was known as the Springfield Board Mill, and was chiefly engaged in making trunk and binders' boards.

J. H. Bufford's Sons have just published some handsome novelties. One of them is a figure of a young girl bathing, and who has gone in among the water-lilies to pick the flowers. A gigantic lily-pad forms a background, and curls over the head of the girl very gracefully. The figure and flowers are embossed. Another is an embossed head of a water-spaniel, on a plaque mounted in a gilt tile. Both of these, as well as numerous other conceits lately published by the firm, are very pretty.

The Elite engagement and correspondence cards and calendars for 1884, designed by Charles A. Burkhardt, are now ready for the trade, having been published by George B. Hind & Co. These complete the Elite series of goods of this character thus far designed, and will probably sell readily. The calendars are made in velvet, russia, imitation alligator and canvas frames, and will make a beautiful holiday gift for ladies. Dealers should secure samples of these Elite cards in making up their holiday stock.

The Merriam Manufacturing Company, Durham, Conn., makes a nice line of tin toys, &c., and the trade can get its list by applying for it. This company also makes an extensive line of stationers' tin goods.

The Richmond Paper Manufacturing Company, Richmond, Va., is making a granite blotting which is of nice color and excellent quality. It is of the well-known "Climax" brand.

Clark & Edward, Chicago, printers, failed on Wednesday. Their liabilities are \$7,000; assets not known.

J. C. Hart, stationer, &c., and owner of Hart's Printing Company, Laredo, Tex., has bought out the business of R. Pasehal.

A. G. Carley, Northampton, Mass., has been getting out a number of interesting photographic views of Northampton and vicinity.

The jobbing trade are purchasing largely of the Shannon files and cases. It is said to be difficult for the manufacturers to fill their orders.

Arthur Christey, Buffalo, N. Y., has just published a "condensed" calendar. This is a good thing and is intended as an advertising medium.

Alexander, Clare & Cable, Toronto, Ont., forward samples of steel engraved cards of their own production. These are good specimens of steel-plate work.

The new C. C. Cover (Clague Compressor Cover) for the Shannon file is a marvel of utility and simplicity. It can be used on any Shannon file. It compresses the papers, thereby increasing the capacity of the file.

In last week's "Gossip" mention was made of full measure "ledger" brand of American russia leather. By a typographical mistake the name was wrongly given. It was meant for J. L. Shoemaker & Co., the well-known Philadelphia house.

The paper mill of J. Howard Lewis, at Oakdale, Pa., was destroyed by fire at an early hour on Wednesday morning, August 22. While the fire was burning a boiler in the mill exploded, killing one man, John Morrison, aged forty-five years, and seriously injuring two or three others, including Mr. Lewis, the proprietor. The loss is about \$80,000, and is nearly covered by insurance. The cause of the fire is supposed to have been spontaneous combustion of rags.

A NEW METHOD OF FINISHING WOOD-WORK.

Many processes have of late been applied to the finishing of woodwork, such as staining in various colors, fumigating and other methods. A new finish is now cultivated in the Continental market, and is known as the Rubenic process. It is used for giving a metallic surface to wood, and consists in first immersing the wood in a bath of caustic alkaline lye, in which it is allowed to remain for two or three days, according to the degree of permeability of the wood, at a temperature of 167° to 194° Fahr. From this bath the wood passes to another of hydrosulphate of calcium, to which is added, after twenty-four or thirty-six hours, a concentrated solution of sulphur. Here it remains for about forty-eight hours at a temperature of 95° to 122° Fahr., and lastly, for from thirty to fifty hours the wood is immersed in a solution of acetate of lead at the same temperature. The timber thus pickled is allowed to dry, when it is said to be susceptible, after burnishing, of a high polish, and even metallic lustre, which is more brilliant if the surfaces of the wood have been previously rubbed with lead, tin or zinc plates, and then polished with a glass or porcelain burnisher. Treated in this way the wood may assume the appearance of a metallic mirror, being at the same time hard and very strong.

DIXON PENCIL PRIZE-DRAWINGS.

The system of awarding prizes for drawings, inaugurated two years ago by the Dixon Crucible Company, Jersey City, N. J., under the sole condition that drawings should be executed by pupils from public, private or art schools in the United States and wholly with the Dixon American graphite pencil, has met with most gratifying success. Some 354 drawings were received this year, 228 from female and 126 from male pupils, representing twenty five States of the Union. Josephine Locke, supervisor of drawing in the public schools of St. Louis, and Henry Hitchings, director of drawing in the Boston schools, were judges. Seventy-eight cash prizes, aggregating \$596, and ninety prizes, consisting of beautiful cases of artists' pencils, were awarded for various classes of drawings.

WANTED.

A Salesman in a Book and Stationery Store in St. Louis. Address P. O. Box 2459, St. Louis, Mo., stating where previously employed.

FOR SALE—THE BUSINESS OF THE LATE Chas. A. Burnham, of Norwich, Conn., who died July 4th. This prosperous first-class Book, Stationery and Paper Hanging Store, to a man with a proper knowledge of the business, is an extraordinary good chance. It is well established and thoroughly known in all the adjacent manufacturing villages in the neighborhood, and bears an enviable reputation. It is now, and has been for years, returning a handsome income. The subscriber wishes to sell it without delay. In the meantime the stock will be kept complete and every endeavor made to keep it up to the high standard of its former owner. For further particulars, address WM. C. LANMAN, Administrator, Norwich, Conn.

COUNTER SLIP. SALES BOOKS.

I have a patent machine for manufacturing sales books, that perforates, prints numbers, cuts and folds at one operation, and will turn out from three to four hundred books per day complete. Territory and machine for sale. Can be seen in operation at my office, or sample sheets will be sent on application. P. L. HANS COM, 106 Madison St., Chicago, Ill.

THE STATIONER.

DEVOTED TO THE INTERESTS OF THE

Stationery and Fancy Goods Trades.

WEEKLY--\$2.00 PER ANNUM.

Single Copies - - - 10 Cents.

NEW YORK, THURSDAY, AUGUST 23, 1883.

Advertisements cannot be received for insertion in the current week later than 12 M. on Wednesday. The charge for advertising is 25 cents a line, each insertion. Special terms for standing and displayed advertisements to be had on application.

This journal aims to be a medium of information for and a representative of the interests of every one connected with the stationery and fancy goods trades. It contains a full and trustworthy survey of the market for stationery in this country, in all cases giving the actual prices at which goods can be bought of importers and jobbers in this city, together with a detailed account of novelties in the trade, patents relating to stationery, and current items of interest. A review of foreign markets and accounts of movements abroad will also be furnished, and no pains will be spared to make THE STATIONER a thorough and complete exponent of the trade.

Subscription and postage for Great Britain, per annum..... 12s.

Any information our readers may wish to obtain shall be cheerfully given, and prompt replies will be made to all inquiries addressed to us on any subjects of interest to the trade.

Communications on all trade matters are earnestly solicited. Address

HOWARD LOCKWOOD, Pres. and Treas.
American Stationer Association,
74 DUANE STREET, NEW YORK.

Subscribers to THE STATIONER can be supplied with the best cloth binder in the market. Deliverable at the publication office. Price, fifty cents.

Readers of this paper who avail themselves of the information obtained from its columns, by advertisement or otherwise, are requested to notify their correspondents of the source of their information.

It is again reported that Commissioner of Patents Marble is about to resign. There is no definite basis for the rumor, but it has proved enough to awaken interest as to his possible successor. It is the avowed belief of many familiar with the work of the Patent Office that the present Commissioner cannot be adequately replaced except by the appointment of some one trained by long experience within the office. So long as excellent material may be found in the Patent Office officials it would seem invidious to pass them by in the selection of a new head of the office.

THE New York *Herald* says: "High tariff makes low wages." We want to know how. It asserts that the cheapening of raw material enables the manufacturer to pay higher wages. England gets her cotton free of duty and pays the factory hands who work it up lower wages than are paid here. Were we to dispense with the duty on manufactured cottons neither the *Herald* nor anyone else would believe that our manufacturers would so widen their markets that they could afford to advance the wages of their help. We can increase our cotton goods trade, and are increasing it, without the intervention of free trade. If we had to dispense with protection we would be likely to find out that our cotton goods trade, domestic or foreign, would be of less importance. We have cited only one branch of industrial production. We could go farther and fill up the evidence. If "high tariff makes low wages" is true, and if the converse, as claimed by the *Herald*, is true, the proposition should be sustained by facts. Is it?

So much has been said in THE STATIONER about the importance of looking abroad for a market for our manufactured products that it is fair to suppose our readers have attained appreciation of the desirability of extending our foreign trade, even if they hesitate to take steps which lead them on in that direction. But if Americans are halting and thinking what may be best to be done, it is obvious that the manufacturers of other countries do not occupy the same attitude of indecision or of passive acquiescence in things as they are. The foreigners are coming over to see if they cannot take America. As proof of this we draw attention to the action of the commercial organizations of Vienna in connection with Austrian representation at the Boston exhibition simply as a fine example of business comprehension, which is in such marked contrast to the manner in which American industries and business organizations avail themselves of foreign expositions for the advertisement of our manufactures and their introduction thereby into new markets. In response to the invitation of the agents of the exhibition, about one hundred of the leading business representatives of Vienna met about the 23d of May for the purpose of making arrangements for Austrian representation at

Boston. According to a report from our consul-general in that city, a local committee under the auspices of the Export Verein was formed, and a resolution was passed to send out two delegates to Boston. It was hoped that they might so far receive the recognition of the government that the minister of commerce would name from his department at least one member of the Vienna committee, and that the government might authorize their consul at Boston to act with the delegates sent out, and thus give an official character to the commission at Boston. At all events, comparative success has been secured, and a very respectable exhibit will be made by the leading firms of Vienna, to the number of possibly one hundred.

Communications.

[Correspondents are requested to write on only one side of their paper. No responsibility for the opinions of correspondents attaches to this paper.]

A Suggestion.

BROOKLYN, N. Y., August 20, 1883.

To the Editor of *The Stationer*:

If you approve, I have a suggestion to make to the manufacturers of fine stationery represented in your columns. The American Pharmaceutical Association will meet in Washington on September 11, and will be in session four days. In connection with this meeting there will be an exhibition of drugs, chemicals, perfumery, apparatus, &c., in Smithsonian Institute. There will be probably three hundred druggists present from all parts of the Union and Canada.

Now, many of these gentlemen sell stationery, and would enjoy seeing the new designs of the best houses; and my suggestion is that one or more of them should arrange to send an exhibit with a competent representative. Particulars as to space may be obtained from Charles Becker, 1,367 Thirty-second street, West Washington, D. C. THOMAS D. McELHENIE.

ANSWERS TO CORRESPONDENTS.

G. H. C. wants to know if the Japanese imitation leather paper mentioned in THE STATIONER of August 16 is to be had in this country. The same inquiry is made by B. and Sub.

Ans.—We think not. It is offered for sale in London, and we have not heard that it has yet reached this market.

R. & Co. want to know who handles the grooved ruler described in THE STATIONER last week.

Ans.—This ruler is a very late introduction. We believe that it is controlled by Charles H. Strong & Co., Chicago.

G. O. wants to know: 1. A good house from which to buy, in large or small quantities, silk fringes and tassels. 2. Where to get card mounts (mats) for fancy cards.

Ans.—1. Paul Mende, 16 Howard street, New York. 2. J. G. Bufford's Sons, 293 Broadway, and A. Komp, 114 Walker street, New York.

W. asks: What constitutes a case of paper? How many reams of 6, 5, 4 or 3 lb. note, or of legal cap in 10, 12 or 14 lbs.?

Ans.—A case of paper generally runs 450 to 500 lbs.; 100 reams of note, 50 reams of letter, foolscap or legal cap constitute a case, except with heavy cap papers—14 to 16 lbs.—40 reams of which go to the case. In flat caps and folios 24 and 32 reams constitute a case, according to the weight.

MORTGAGES, ETC.

LACQUERING BRASS.

When properly lacquered brasswork will retain its color and resist the action of the atmosphere for a long time; hence the necessity of always lacquering work which should retain a good appearance. The process is rather difficult to execute properly, especially on large surfaces, where the tyro will find the lacquer continually getting a smeary look. Before applying the lacquer the brass must be heated to a certain degree, and the difficulty is to know the exact degree best suited to the particular lacquers and materials used, and the effect to be produced; this kind of knowledge cannot be attained but by experience. If you do not feel disposed to prepare the surfaces of your work by means of filing, &c., another plan, far easier and equally effective, though not producing such a workmanlike job, is the following: Put the brasswork, having previously taken it to pieces as much as possible, into a pickle made of nitric acid and water; this will eat away the outer coat, all the corrosion and all lacquer, leaving a surface of pure brass. The time required to effect this and the strength of the pickle can be soon ascertained by trial. The work must be carried on in the open air, as the fumes given off are very baneful to health. Thoroughly wash the articles to remove all traces of acid, and then dry them in hot sawdust; they will then be ready for lacquering. Use a camel's-hair brush to lay on the lacquer with; heat the articles as hot as may be held in the hand; be careful not to touch the bright surface with anything that will stain it, and lay on the lacquer as thinly as possible, to prevent smears. If the work is too hot, it will burn the lacquer, and if too cold this will not set hard. Small thin articles part with a large proportion of their heat in laying on the lacquer, but bulky work is comparatively unaffected; so small articles must be made somewhat hotter than large before lacquering. Only experience will enable you to judge correctly.

Don't forget that the third annual exhibition fair of the New England Manufacturers and Mechanics' Institute will open on September 5

at Boston. A large representation will be present from foreign houses.

A leading St. Louis house wants a good salesman and advertises accordingly. See advertisement in another column.

Market Review.

OFFICE OF THE AMERICAN STATIONER.
WEDNESDAY, August 22, 1883.

THE MONEY MARKET.—The money market is unchanged and featureless, being plentifully supplied and steady at $2\frac{1}{2}$ per cent. for call loans on stock collateral and 2 per cent. on United States bonds. The improved tone of the stock market noted in our last issue has not been sustained, and the renewed hope of a general and substantial upward movement in prices seems to have been once more deferred. Government bonds are firm, and railroad mortgages in close sympathy with the share list. Sterling exchange remains steady, but francs are lower.

THE PAPER MARKET.—Very nearly the same features that have ruled the paper market for some time past have been shown during the past week. The production, although large, is not so great but that most manufacturers keep fairly well employed on orders and have little difficulty in marketing their product. This is done in very many instances at some sacrifice, yet prices have touched such a low level that most large consumers and buyers do not expect much in the way of any further concession. It might be an advantage to the manufacturers to have to pay more for their paper stock, as they could then have an opportunity to make an advance. If any change has been developed during the week it has been toward a better tone. The straw wrapping mills which have been shut down since June 15 started up again last week to run on half time only for the ensuing thirty days. The market, although dull, is in very good shape so far as prices are concerned.

THE STATIONERY MARKET.—There was a little more activity noticed in the trade generally during the past few days, but it was more spasmodic than permanent, as the influx of out-of-town dealers into the city has not reached its limit. One reason for this is that the crops in certain sections are belated, and orders from Western buyers are consequently very backward, while purchasers who come to town are extremely cautious. An offset to this is the fine condition of the Southern crops. Dealers from the South are more liberal in their purchases, and have been prompt in coming forward. In fine stationery there was a little more activity during the past week, though more business could have been done. The trade in ink and pens is expected to revive with the opening of the schools on September 1. Many country buyers have purposely kept back their orders so as to get the advantage of the September trade before paying their bills. Not much business is yet doing in novelties and fancy goods. Dealers in these lines are thoroughly prepared for the fall opening, as in point of quality, elegance, or variety, the goods they are offering are said to have never been equaled.

When People are Traveling Comfort and Safety are the

TWO PRINCIPAL OBJECTS IN LIFE!

COMFORT!

"The Erie is by far the smoothest road I ever traveled on, either in this country or in Europe; and I consider it the perfection of railroad traveling. With the clean, light and airy coaches, polite attendance, freedom from dust, noise and jar, we reached Chicago hardly realizing what a long journey we had performed. And then such a breakfast as we had the morning after leaving New York, at Hornellsville, is certainly deserving 'honorable mention.' Such a table as they have there, with a full half an hour to enjoy it, is enough of itself to attract passengers."—*Ex. U. S. Minister, E. B. Washburne.*

SAFETY!

"5,491,441 Passengers were carried over the Erie Railway in 1881. Of this vast number, only two were killed—one by falling from the platform of a car on which he insisted on standing, and the other in jumping from a train while in motion."—*New York State Engineer's Report for 1881.*

No better evidence than the above need be wanted that both of these objects are secured to the traveler who purchases his ticket over the

DECORATED SCREENS.

Most convenient articles are screens, whether large or small, and they hold a position of importance in the household furniture of the present day, as they can be used for various purposes, some to shield from view the passage-way from one apartment to another, or to act as draught-screens, while others are used for fire-screens, and small ones of various shades are made to set upon the table before a lamp, which, while comfortably shielding the light from the eyes of those who do not require it, still allow it to be shed on the books or work of those who are more industriously inclined. A large folding screen of three panels or leaves is very odd and pretty when made of common white matting. The frame can be made by any carpenter from wood of whatever description is preferred. White pine answers very well, but must be very smoothly finished. It can then be oiled, or it is prettier still to stain it either black walnut or mahogany and give it two or three coats of copal varnish, letting it dry thoroughly between each coat. The panels are to be joined by means of small brass hinges. The frame is then ready for the matting. This must be tacked smoothly to the back of the woodwork of each panel, placing the tacks quite closely to hold the matting well in place. The design is then traced rather lightly on the matting of each panel with crayon or charcoal in outline, and afterward painted also in outline with oil paint. Burned amber or burned sienna are very pretty shades of brown to use, and Winsor & Newton's tube oil-colors are the best. The back should be covered with brown silesia or any shade that may be fancied, leaving a space of the woodwork beyond, and the edge of the silesia is finished by tacking a braid over it. Fire-screens can also be made in this shape, but would require a more elaborate frame. The ordinary-shaped firescreen with swinging panel is prettiest, however, and the metal frames now so much in vogue, though expensive, are very beautiful. Old gold or cardinal silk are pretty colors, the design to be worked in outline with brown embroidery silks, though colored silks suitable for the coloring in the pattern may be used with pretty effect. Still another pretty idea for a firescreen is a mirror set in an ebony or handsome metal frame, and a painting in oil-colors of water lilies and lily pads upon the glass, also a bird or butterfly hovering just above. The effect is very beautiful; for the flowers, being reflected in the mirror, seem as if really floating upon water. Table-screens should be exceedingly dainty in every point, and satin, silk, plush or velvet, the materials used for the purpose. The setting for these small screens should be dainty, to correspond with the material which they are to frame. Thus, for old gold, silk or satin, a slight framework of ebonized wood, the smallest hinges of brass or gilt used to join the panels, or a light blue or pale green satin with frame of gilt for the setting. Should blue satin be used, red field lilies may be substituted for sweet flag, and will form a prettier contrast with the background. Small banner screens are also pretty for table use, and are easily made, as the frames are already prepared and may be purchased for \$1.25 in almost any store where materials for fancy work are sold. A piece of satin is cut the width of the crossbar, and long enough to extend down three-quarters the length of the rod. The satin is then to be fringed quite deeply across the lower edge and a design painted or embroidered upon it. A piece of the same, or some contrasting color, is cut to correspond exactly with that intended for

the face of the screen, and fringed in the same manner. The edges of the sides and across the top are then neatly blind stitched together. The piece is then suspended from the cross-rod by sewing it securely to the little rings with which it is furnished for this purpose. Bows of satin ribbon may be placed at either end of the rod. This may be used on large or small folding screens, whether painted or embroidered. For a large screen it should be executed as already described, the design painted in outline with the colors named. For a small screen, should it be of gold-colored satin, first trace the design faintly with lead pencil, and embroider in color, using light and dark shades of violet silks for the sweet flag, green for the leaves, grasses and lily pads, brown for the birds and cat-tails. Long stitches of green to indicate the water, and white for the water-lily. Many other ideas may be carried out in the manufacture of these decorative and useful articles, and the labor bestowed upon them will not seem lost, for they will prove themselves a comfort as well as ornament, if properly made.

The new postal notes will be ready for circulation on September 3.

Some recently imported novelties in toys, &c., have been shown during the past week. Toy sets embrace many new designs. Some new things in bisque figures, musical photograph albums, &c., are also remarkable.

Official advices from Mr. Foote, the newly-appointed United States Minister to Corea, state that he has taken up his residence in the capital of that little known country, but that life there is attended with many discomforts and privations. The only house he has been able to obtain is a rude one of wood and paper with paper windows, and is situated in an undesirable location in the midst of hovels and filth. The climate is one marked by great extremes of heat and cold, and everything in the shape of food, except the simplest necessities of life, has to be brought from abroad.

F. G. Bufford, of the well-known art-publishing firm of J. H. Bufford's Sons, has just patented a novelty in the way of a show-case. It is shaped very much like any ordinary show-case, but its utility consists in the succession of drawers or slides, on which any line of goods can be shown, thus increasing the capacity of the case for display. The top of the case is covered with plate-glass. By pulling out the top drawers, samples displayed on the bottom drawers can be readily seen through the glass, which keeps the contents free from dust and obviates the necessity of handling the goods. The uses to which such a show-case can be put to would seem to be almost endless.

A Revolution in Stylographic Pens. }
The Latest Improvement.

THE KERNER.

\$1.

It is constructed on strictly scientific principles, and being devoid of the complications which exist in old styles is less liable to get out of order. It has no springs to be affected by the action of the ink. The needle is rigidly fixed to a FLEXIBLE air tube extending entirely through the barrel, which when writing is constantly vibrating throughout the entire length of the barrel agitating the ink and causing a perfect flow to the point. It is unequalled by any writing instrument of the kind ever offered for public favor, and gives entire satisfaction to all who use them. It is constructed of the best material throughout, and the point is of platina alloyed with iridium. Prices: No. 1, Plain, \$1; No. 2, Engraved, \$1.25; No. 3, Gold Mounted, \$1.50; No. 4, Entire Gold Cap, \$3; No. 5, Mottled Ruling Pen, \$1.50. Send for Circulars.

GOLD PENS.

Pens of some kind have been in use from very ancient times and have been of various kinds, adapted to the material upon which the written characters were to be impressed. Upon stone or metallic plates, graters of steel served for writing, and such are referred to by Job in speaking of an iron pen. For the waxen tablets of the ancients, a metallic stylus was employed, one end of which was sharpened for marking and the other end was flattened for erasing the marks and smoothing the wax. It was also the practice in ancient times, as among the Chinese at the present day, to paint the letters with a fine hair pencil. Pens of reed were made at a very early date for the use of a fluid ink upon papyrus. The reed for these pens was found in Egypt, and it is still used in Oriental countries. The introduction of paper in Europe made necessary pens of a finer character, and quills of the goose and swan next came into use, and for extremely fine writing those of other birds, as of the crow, were found well adapted. A great trade grew up in these pens and continued for several centuries, chiefly in Poland and Russia. In a single year St. Petersburg sent to England over twenty-seven millions of quills. The immense consumption of quills and the loss of time, and the difficulty in making and keeping them in order, finally created the necessity for a more durable substitute. In the year 1803, Mr. Wise, an Englishman, made the first steel pen. This invention was followed up by other English manufacturers, until about the year 1825, when the production was largely increased, and the cost was greatly reduced. The manufacture was chiefly confined to Birmingham, England.

The gold pen was the invention of John Isaac Hawkins, who experimented with it for thirty years, until he succeeded by the use of iridium in making the so-called diamond point, which is the great characteristic feature of the gold pen. Some of Mr. Hawkins' earlier experiments were made with rubies, set in gold sockets, but these nibs were too clumsy and could not be wiped clean, and all of the elasticity that could be given to the pens was too far from the point, so that the best of them felt hard in the hand while writing. This seemed a difficulty not to be overcome. He cemented diamond powder, some coarse and some fine, inside of the points of quill pens, but the particles of diamonds were by degrees dragged out of the cement by the paper, and thus caused a feeling of roughness while writing. The quill pen, too, was subject to be warped by the alternations of wet and dry air, and thus rendered useless. In 1834, Mr. Hawkins began to experiment with iridium. From that time the manufacture of gold pens steadily increased, for such was the degree of perfection attained in them, that they answered all of the purposes of a writing implement.

(To be continued.)

M. Juncker, of Paris, has invented a drawing paper which is said to present great facilities where rapidity of execution is desired. It is a paper enameled with a preparation of stearine and wax. On this surface the work may be done with lamp-black or bistre, or any tone desired, mixed either with oil or essence. As regards the drawing, it may be executed either with a lithographic crayon or fine brushes, but for rapid working—recording, for instance, an impression of nature, an effect of light and shade, the composition of a landscape, &c.—the paper may be covered with a coat of the pigment, and the light obtained by scraping or wiping out with a rag, and attenuating or strengthening the tones as required. The enameled surface of the paper permits the working and reworking of the same study *ad infinitum*.

SILICATE BOOK SLATES, BLACK DIAMOND SLATING, REVOLVING BLACKBOARDS, LAPILINUM (Slated Cloth).

THESE GOODS are in constant use by the BOARD OF EDUCATION of the City of New York (in every Public School), and have been for the past twelve years, which is a sufficient guarantee as to their durability and perfection. They are also in use by a large number of the BOARDS OF EDUCATION, Colleges and Schools throughout the country. The Private Schools have also adapted our Book Slates in preference to slate or paper pads—finding them more economical and more advantageous to the pupil. They are handsomely bound in fine black cloth, attractive in appearance, and finely finished. The BLACKBOARDS are well seasoned, and will last for years, slated on both sides with the celebrated BLACK DIAMOND SLATING. For sale by all the leading Houses throughout the United States and Canada. SEND FOR CATALOGUE. Patented and manufactured only by the

TOOLS USED IN BUILDING THE PYRAMIDS.

During a residence of two winters in a tomb at Gizeh, W. M. Flinders Petrie collected evidence showing that the tools used in working stone 4,000 years ago were constructed with a jewel as the cutting edge. He stated his reasons for coming to this conclusion in a paper read before the Anthropological Institute, a résumé of which is published in a recent issue of *Engineering*, of London. Solid and tubular drills, straight and circular disk saws, and lathe tools were made with jewels set in metal. The lines of cutting on a granite core made by a tubular drill form a continuous spiral, the grooves being of a uniform depth and width throughout, showing that the cutting point was not worn as the work advanced. The regular taper of the core would indicate that jewels were also set upon the outside and inside of the drill, thereby facilitating its removal. In some specimens of granite the drills sank one-tenth of an inch at each revolution, and the pressure necessary to do this must have been from one to two tons. The skill of the workmen and the capacity of the tool are illustrated by the clean path through both soft and hard material—no difference in the groove being perceptible, although it passes from a soft substance into quartz, subjecting the tool to an enormous strain. In plane surfaces the depth and width of the cuts indicate the successive stroke of a saw, and the use of the circular saw is proved by the regularly curved lines. The forms of the tools were the same that experience has sanctioned at the present time. The scarcity of the diamond and the lack of strength in the sapphire and beryl lead to the consideration of corundum. Nothing has been found about the metal of which the tool was made or the method of setting the jewel.

ADVANCE IN THE PRICE OF IVORY.

"Ivory," says the *Manchester Examiner* of July 31, "continues to get dearer on account of its scarcity. At the ivory sales in London last week, 120 tons were offered, and all with the exception of about five tons were bought at considerably advanced prices. Sheffield ivory has advanced from £1 to £4 per cwt. and defective ivory has in some instances risen still more in price. The stock in the market at the present time is not half the amount that was offered six years ago. The cholera epidemic in Egypt has greatly interfered with the sale of African ivory, and it is very probable there will be no supply from Egypt this year. Competition is keen notwithstanding these drawbacks, and it is now under consideration whether to advance the price of ivory handles or not."

A pencil-sharpening machine invented by Bennett Williams, Boston, Mass., consists of the combination of the following elements: A bevel-edged grinding or abrading wheel adapted to be rapidly rotated; an endless carrying belt passing over suitable supporting pulleys; means for slowly rotating the pulleys; a fixed support or table under the upper portion of the belt adjacent to the grinding-wheel; and a yielding soft-surfaced pad or block immovable in the direction of movement of the belt, and adapted to exert a yielding pressure on one or more pencils, supported on the belt over the fixed support, and cause the pencils to rotate, this pad or block being adapted by its soft and yielding nature to act on different sizes of pencils and exert a sufficient pressure on the pencils without danger of breaking them.

BLACKHALL'S

PATENT POWER

PERFORATING MACHINE

Is now in use in most of the Leading Houses in the Trade.

It will run off a Ream of Medium with Five Lines of Perforating (and two Lifts) in Seven Minutes.
It makes a clean round hole, and will cut from Tissue-Paper to Card-Board.

TRADE OPINIONS.

"After two years' constant use, on all classes of work, we have had to replace but three pins. To-day it is in perfect order."
—LEVISON & BLYTHE, St. Louis.

"After four years' use, on all classes of work, we consider it as good as when we got it. It is the best machine we ever saw."
—BROWN BROS., Toronto.

"By using your machine our perforated work costs almost nothing when considered by the ream."
—BOORUM & PRAISE, New York.

"We recommend it to the trade. Just the machine long looked for."
—SHORT & FORMAN, Cleveland, Ohio.

"Your perforator is very satisfactory. It is very superior in excellence of work and rapidity."
—WESTERN BANK NOTE CO., Chicago, Ill.

"It exceeds our expectations. Does splendid work. Is easily attended and durable. We cheerfully recommend it."
—GEO. D. BARNARD, St. Louis.

"We are gratified far beyond our expectations. As to the rapidity and accuracy of its working, we could not be better satisfied."
—WM. G. JOHNSTON & Co., Pittsburgh, Pa.

"We would not do without it if we had to pay double the price we paid you."
—COURIER-JOURNAL, Louisville, Ky.

"We recommend it as a first-class machine."
—STEPHEN GREENE, Philadelphia.

"We tried four makes of perforators and found none that would do the required work until we got yours; it gives us the greatest satisfaction. We perforate with ease the thinnest tissue and manifold, up to thick card-board—sixty reams per day."
—J. S. McDONALD & Co., Chicago, Ill.

"We are working them constantly. We fully endorse everything said in their praise by other firms who have them in use. They very soon repay themselves."
—WATERLOW & SONS (Limited), London, May 17, 1883.

Compare the speed, durability and work of these Machines with any other, and note the per centage made on the investment.

BLACKHALL'S RULING ATTACHMENT.

Can be applied to any sort of Striker, doubling the value of the ruling machine. A clear cash profit of 75 to 100 per cent. is gained by this attachment any day it is used (a large profit where now there is little or none). There are twenty-seven used in New York alone.

WHAT THE TRADE SAY OF IT.

"Send us another (the third); your attachment is a big thing and worth all you charge for them."
—GEO. D. BARNARD & Co., St. Louis.

"We are satisfied as to their value. Send us another."
—BEATTY & STEVENSON, New York.

"Your ruling attachment is equal to another machine. Does all you claim."
—CULVER, PAGE, HOYNE & Co., Chicago.

"Your attachment soon pays for itself."
—WATERLOW & SONS, London.

"We find one ruling machine, with attachment, does the work of two without it."
—BROWN BROS., Toronto.

"With your attachment I can produce work in one half the usual time."
—W. C. SMITH, New York.

Blackhall's Double Combined Striker and Lapper.

This simple arrangement will do twice the work of an ordinary Striker, and for ONE HEAD or stock work it will lap the head and run the down lines as fast as feint lining (without striking). It will also work one to five patterns at one time. The favor it has met with is the best proof of its value. Can be applied to any sort of ruling machine.

TESTIMONIALS.

"We can by one feeding finish work that required three feedings on the Hickok Striker just displaced by yours."
—HALEY & BAKER, Philadelphia, Pa.

"Your Combination Striker does all you claim for it, gives twice the results of the American machine, does better work, and is a great saver of time and labor. It meets our warmest approval for its general merit."
—WATERLOW & SONS (Limited), London, England.

"Your Striker is far in advance of anything we have seen; is all you represented, is very accurate, and economizes time to a wonderful degree."
—W. G. JOHNSTON & Co., Pittsburgh.

"Yours is the best Striker we have ever used. It gives perfect satisfaction."
—WM. B. BURFORD, Indianapolis, Ind.

"I have stopped the Hickok Striker; find yours does twice the work."
—W. H. BOOR, Buffalo, N. Y.

"Your Striker is a most desirable improvement. Does double work."
—CAMERON, AMBERG & Co., Chicago, Ill.

The foregoing are a few from the many Testimonials I hold. (Second-hand Strikers of other makes on hand at very low prices.)

I would also call attention to my Defiance Blue Pulp, for making Ruling Ink. It is free from acid, grit or sediment, and will not separate or clog in the pens. Is strong and pure.

N.B.—Blackhall's Patent Marbler does away with the present system. A boy can do as much in a day as would usually take a man a week, without any gum, size or trouble. It is always ready to use, and one roll or pad, costing \$5 00, will marble 100 feet square. So the work costs about one-tenth of the usual plan.

CARTER, DINSMORE & CO., BOSTON and NEW YORK

BYRON WESTON,

DALTON, MASS., U. S. A.,

HAS BEEN AWARDED THE

GRAND PRIZE GOLD MEDAL

AND RECOMMENDED THE

Medal of Honor and Perfection

At PARIS, 1878,

This being the HIGHEST and ONLY AWARD given for

LINEN RECORD & LEDGER PAPER

Also, the only Gold Medal given for Ledger Paper at the Adelaide, Australia, Exhibition, 1881.

—A SPECIALTY.—

THIS Paper has received THE HIGHEST PREMIUM over all others from the Cincinnati Industrial Exhibition, Massachusetts Charitable Mechanics' Association, Franklin Institute of Philadelphia, Louisville Exposition, Medal and diploma from United States Centennial Commission, Medal of Progress American Institute, 1877, and Medal of Improvement and Progress, Boston, 1878. Its

PRINCIPAL ADVANTAGES

are as follows:—1. It contains more LINEN than any other Ledger Paper, has a longer fibre, and is, consequently, tougher. 2. Having a harder and better body, it frays less in erasure, so that by simply using the rubber after the eraser, the ink is prevented from spreading. 3. It is more uniform in Weight Color and Finish. 4. It never cockles if properly bound. 5. Its chemical action upon ink is such that it both writes and rules up better. For proof of the foregoing, refer to a large number of Stationers, Bookbinders, Bookkeepers, and Recorders, who have given it, after a severe test, the preference over all others. This paper is Double Sized, and will stand any climate or the most acid of fluid inks.

Send for sample sheet, ERASE and REWRITE FOUR TIMES on same spot.
Each sheet is water-marked with name and date.

FLOATINGS FROM THE OHIO.

[FROM OUR REGULAR CORRESPONDENT.]

CINCINNATI, August 27, 1883.

What a charming summer resort Cincinnati has been to its inhabitants who could not wander up and down on the earth seeking coolness at the expense of comfort and cash! There has scarcely been a day when there have not been delightful breezes. Cool nights have given perfect rest to tired brains. The hilltop resorts, with picnics, symposiums, fireworks and concerts, have afforded amusement to all who depend on other places than home for excitement. The drives through Cincinnati suburbs are not equaled on the Continent for beauty of landscape and architecture. If one could only learn to banish business care without running away from it, there is no place where a reasonable man could find better recreation than here in Cincinnati with such a summer as this one. That if fills the trains with flying wretches who must get away from work by putting leagues between them and its torments.

With such a summer, and with such advantages, Cincinnati has been far from a dull place. Business has kept a fairly steady pace when all the drawbacks are considered. The telegraph strike was a factor of dullness, but it was not so powerful as people generally thought it would be. Most lines of real business do not depend on the telegraph wholly. There is a line of business, however, that has increased greatly of recent years which was prostrated. But the public did not suffer, and if the telegraph was annihilated, and that business with it, there would be people who would rejoice. It is the gambling in futures which gives employment to so many brokers, and undermines so many well-established business firms.

It is more than hinted that want of success in managing grain deals brought down three old houses here last week. They were interlaced so as to be practically one, though three firm names were employed. Their failure is attributed to misfortunes attending the establishment of a sheep ranch in Texas and to other causes, but there is a supposition that margin after margin disappeared in the brokers' offices as grain declined. The failure referred to has not brought down any one else.

The distrust which it has engendered, along with other failures, makes money hard to get, except on gilt edged paper. The effect is wholesome rather than otherwise.

In the line of books and stationery there has

not been a ripple. No bookseller or stationer has exhibited a sign of weakness and none is expected. The general report for the month of August is that it has been unusually brisk. Some dealers have an opposite experience, but the majority claim that business is better than usual at this season. Local dealers are industrious and enterprising, keeping their stock in the most attractive appearance. Pounsford & Co. and Geo. E. Stevens will be annoyed during the summer with the obstruction and debris of buildings going up next door. W. B. Carpenter & Co. are cheerful and busy. J. R. Mills & Co. have their presses humming and their salesroom is always inviting. So through the list, even to Grandpa Hawley, who welcomes everybody and never knows how to refuse doing a service for others, the interiors of the stationery houses indicate fair business.

Among the newspapers there is a lack of harmony. The political campaign has arrayed them one against the other, and already the distinguished editors are beginning to argue by the use of personal epithets. Two of the editors of an evening paper have been charged by a city officer with libel, and he is about to punish them with a criminal prosecution. All of this will not diminish the consumption of news paper, and the pending campaign will not be without an influence in the consumption of the product of the paper mill.

John E. Blaine (a relative of the Maine statesman), formerly revenue collector and bookseller at Maysville, Ky., passed through this city on his way to Peoria, Ill., where he and his former Maysville partner have embarked in the book and stationery business.

Visitors during the week were: F. Aikenhead, representing John Gibson, New York; George Rothgeiser, of Baum Brothers, New York; Will F. Park, of Watson & Park, New York; W. A. Sanders, Brooklyn Rubber Works, New York; E. Walter Giles, of the Esterbrook Steel Pen Company, and F. J. Swain, representing the Porter & Platner Manufacturing Company.

PRINCE WILLIAM.

OUR LONDON LETTER.

[FROM OUR REGULAR CORRESPONDENT.]

5 LUDGATE CIRCUS BUILDINGS,
LONDON, E. C., August 4, 1883.

Were it possible for our old-fashioned forefathers to come to life, and revisiting the scenes of their former labors, to see the manner in which trade is now conducted, their astonishment would probably be too much for them, and they would shake off the dust of a degenerate world in disgust. In many respects they

would see a complete revolution in the methods of doing business, but in none more than in the effacement of the lines of demarcation which of old separated one business from another. In the old days a trader was content to confine his business to the sale of goods properly belonging to his trade, and if he showed a disposition to encroach upon the domain of his neighbor he generally met with a sharp rebuff for his temerity and returned to his old grooves again. Now, however, it would be rather difficult to determine to what trade a man belongs from the nature of the article in which he deals. Thus it is no uncommon thing for the windows of a man calling himself a draper to contain a larger proportion of articles which are supposed to be among the stocks of the stationer, the perfumer, the chemist, and the china and glass dealer, than of those things which properly belong to the trade which the enterprising shopkeeper professes to represent. Last week some of us were rather surprised to hear that a "city swell," having during his travels on the Continent fallen in love with a French beauty and won her consent to an immediate marriage, had written to a London draper instructing him to furnish a house in a fashionable locality for immediate occupation, and that the draper had not found it necessary to go outside of his own warehouse for any article whatever that was required to complete the habitability of the mansion which he had let from his own house list. Every requisite was supplied by this universal purveyor, even to the food which was to be cooked in the utensils that he had provided, the coals by means of which they were to be cooked, and the flowers to adorn the dinner-table.

This case illustrates the changed conditions under which trade is being conducted at the present time, and it is not surprising that with such rivals as the enterprising draper above alluded to the ordinary stationer or other tradesman finds it no easy matter to "make ends meet." Things may "right themselves" in the end, but in the meantime this is one of the problems that grow out of the system of modern trading.

Charles Goodall & Son have just brought out their sample stock of office and pocket calendars for 1884. They are both chromo and steel plate and are in every way worthy of the high reputation which this firm enjoys for the quality of the goods emanating from its manufactory on Great College street, London, N. W. In the chromo-lithographed calendars there are a number of designs, each of which is executed on cards of several kinds, and they embrace several distinct orders of subjects, such as picto-

rial, decorative, masonic, &c. Among those printed from steel plate there are some admirably executed lake and forest scenes, bits of landscape, and views of valley and waterfall. The pocket calendars consist of similar subjects and also of views of well-known buildings in European cities. These are made both single and folding.

Among calendars of an entirely different character are those of Taylor Brothers, of Leeds. These are intended for a less artistic class, and are therefore showy and pronounced in style and popular in subject. They are printed on thick paper, and sticks are supplied with them. The colors are remarkably good, and the prices are low. Among them is one design, "The Last Token," that is really a clever and admirably executed work.

J. F. Schipper & Co., of King street, Covent Garden, London, have a remarkably fine series of chromo calendars in both office and pocket sizes. The subjects are landscapes, floral devices, and imaginative designs, all of which are well drawn and carefully printed, the coloring being rich but harmonious, and the finish is also excellent.

The Artistic Color Company, of Hatton Wall, London, has introduced some new liquid colors for painting on china which require no firing. These are in all respects effective and permanent so long as hot water is avoided in cleaning the articles to which they are applied. They are, moreover, especially suitable for painting on glass, as they are remarkably transparent, and to all intents permanent. They are called the "Sevres," having been invented by an artist in the establishment of that name.

The "Trading" parchment note is the name given to a rough note-paper of capital quality for the price at which it is supplied by Marlborough, Gould & Co., of Old Bailey, London. Envelopes both square and oblong-shaped are supplied to match and papeterie boxes fitted with forty-eight sheets of the paper and forty-eight envelopes are ready for retailing at 1s. Among numerous other articles supplied by this firm may be mentioned the requisites for hand-painted cards, *i. e.*, the cards for painting on and the necessary implements employed. The work-card, moreover, must be understood to include such substances as ivory, porcelaine-ivory, gelatine, terra-cotta, &c.

Charles Reynolds & Co., of Milk street, London, keep a large assortment of fancy goods of every description by various makers. Their illustrated catalogue, recently issued, gives some idea of the extent and variety of stock they have on hand, which includes leather goods, metal goods, cutlery, ornaments, greeting cards, stove screens, &c. Of the last mentioned articles they have a special line of folding screens of their own make, which are very attractive and handsome.

The Printing and Stationery Trades Exhibition opens on the 30th of this month at the Agricultural Hall, and although many persons in the trades interested are doubtful as to the propriety of holding an exhibition at all, just now, in view of the dullness which has prevailed generally in business for some time past. Great efforts are being made to render the show a success, and in view of the popularity of exhibitions of all kinds just now, it is quite possible that, in a financial sense at any rate, they may succeed. W. F. C.

Letter openers and folders made of buffalo horn, highly polished, are said to be superior to those made of bone or ivory, as to shape, size, strength and beauty, as well as cheapness.

LETTERS PATENT FOR INVENTIONS.

BY JAMES A. WHITNEY, COUNSELOR-AT-LAW.

XX.

THE SPECIFICATION.

A patent being in fact a bargain between the public on the one hand and the patentee on the other, that the patentee shall, at the expiration of his patent, place in possession of the public an improvement in arts or industries, the protection given during the interval is the price paid by the public for this subsequent advantage. But it is, of course, clear that this contract, like any other, can be best defined and enforced by written instruments. This proposition, plain from a common-sense standpoint, lies at the foundation of modern patent practice, but it required the lapse of several generations before the plan was actually adopted of causing a description of the invention to be filed as a prerequisite to and a part of the letters patent themselves.

As I have heretofore had occasion to remark, our American patent system is, in a certain sense, derived from the English. The earlier English patents were granted without any disclosure of the invention on the part of the inventor. From this it happened that very frequently the patentee, after enjoying the exclusive right during the term of his patent, afterward obtained the description, and thereby gave no real equivalent for the protection which the public had given him. This was not removed in England by statute until long after the separation of the colonies from the mother country and the formation of the American as a distinct system of patent law. Long before this, however, it had been ratified by the simple order of a magistrate, the Master of the Rolls, who directed that specifications, setting forth the invention, should be filed in the proper government office, as a part of the proceedings incident to the granting of the patent. This principle was embodied in the first United States patent law, and with various modifications designed to increase its efficiency, still remains. The present regulations on this head are comprised in sections 4,884, 4,888 and 4,889 of the Revised Statutes, and are as follows:

Section 4,884.—"Every patent shall contain a short title or description of the invention or discovery, correctly indicating its nature and design, and a grant to the patentee, his heirs and assigns, for the term of seventeen years, of the exclusive right to make, use and vend the invention or discovery throughout the United States and the Territories thereof, referring to the specification for the particulars thereof. A copy of the specifications and drawings shall be annexed to the patent and be a part thereof."

Sec. 4,888.—"Before any inventor or discoverer shall receive a patent for his invention or discovery, he shall make application therefor in writing to the Commissioner of Patents, and shall file in the Patent Office a written description of the same and of the manner and process of making, constructing, compounding and using it, in such full, clear, concise and exact terms as to enable any person skilled in the art or science to which it appertains, or with which it is most nearly connected to make, construct, compound and use the same; and in case of a machine, he shall explain the principle thereof and the best mode in which he has contemplated applying that principle, so as to distinguish it from other inventions; and he shall particularly point out and distinctly claim the part, improvement or combination which he claims as his invention or discovery. The specification and claim shall be

signed by the inventor and attested by two witnesses."

Sec. 4889.—"When the nature of the case admits of drawings, the applicant shall furnish one copy signed by the inventor, or his attorney in fact, and attested by two witnesses, which shall be filed in the Patent Office, and a copy of the drawing to be furnished by the Patent Office shall be attached to the patent as a part of the specification."

It will be seen from this that an ordinary specification is composed of three essential parts: the written description embraced in the specification proper; the drawings which graphically depict the apparatus, in order to render the written specification more clear, and which are to be taken in connection therewith, and, lastly, the claims. These form the specification, using the latter term in its broadest sense. The claim constitutes a portion of the description, but differs from the descriptive portion and the drawings in this, that while the latter may describe and include matters only collaterally related to the specific invention for which the patent is granted, the claim itself is the gist and core wherein lies the whole vitality of the patent. It is a condensed and brief description of the invention and a definition of what the patentee desires to have protected, and whatever does not come within the scope of the claim, either directly or by necessary implication, is to all practical intents and purposes outside of the patent. Therefore, no matter how carefully drawn the description or how elaborate the drawings if the claim be defective, the patent itself is to a proportionate degree imperfect.

It is difficult to define anything with exactness by the use of broad, general terms, and the foregoing must not be taken in a strictly rigid or literal sense, although to all practical intents and purposes it is a correct statement of the statutes, and of relative values of the different portions of a specification. There are certain legal principles of interpretation which in this, as in many other matters, tend to soften somewhat the rigor of strict and literal rules. Thus, for example, where the prior state of the art shows clearly that the invention itself is broad, although in one sense the claim itself may be comparatively narrow; yet if it be possible without violence to language or the ordinary meaning of words, to give a broad effect to the claim, this, on recognized authorities, may be done. But this qualification, although sometimes available in the trial of a patent case, is, in its nature, uncertain, for the qualification cannot be stretched to cover those instances where the language of the claim is inconsistent with a broad meaning. In other words, no matter how broad or valuable the invention may be or how well set forth in the drawings and descriptive portions of the specification, if the claim is in language that is inconsistent with a corresponding breadth of interpretation of the claim itself, the patentee will be held by the limitations of the latter. Thus, for example, if it should appear on a trial that an invention really consisted of a broad combination of three parts only and the claim set forth specifically that it consisted of four parts, no rule of interpretation could be found which would authorize a decree declaring the use of the three parts to be an infringement of a claim which set forth the invention as consisting specifically in the combination of the four parts. So also in like manner in the case of a process; as, for example, one consisting in three successive steps, even although it should be shown that the value of the process lay in the use of two successive steps in the manner indicated by the patent, no use of two of the steps would constitute an infringement of the claim, although the use of two only might in practice be a valuable improvement in the art to which it related.

OLD BERKSHIRE MILLS

CHARLES O. BROWN, President.

DALTON, MASS., U. S. A.

JOHN D. CARSON, Treasurer.

One party writes: "The two hundred RECORD BOOKS, for 83 of the 99 Counties, now on exhibition at the Iowa State Fair, at Des Moines; and all, but four (!) of them, made from your 'OLD BERKSHIRE MILLS LINEN LEDGER,' Medium, 40lb., make a splendid show."

We will pay for any book rejected on account of fault in the paper. Send for Samples, test them in comparison, and see that your books are made from paper thus water-marked.

[The above cut is a fac-simile of the wrapper used on the Linen Ledger Paper.]

Being Triple Sized (a process entirely our own) and Loft Dried, can be erased and written upon the fifth time distinctly. None genuine without the water-mark, thus—Old Berkshire Mills Linen Ledger, and date.

CARSON & BROWN CO., Manufacturers.

Extra Fine Papers

Manufactured by

Z. CRANE, JR., & BRO.,

DALTON, MASS., U. S. A.

These Goods, which are acknowledged to equal the finest foreign manufactures, are presented in the following styles and qualities:

SUPERFINE QUALITY.

In handsome Light Blue Boxes containing one-quarter of a ream of Note Paper each, and bearing in blue letters description of contents.

In separate Boxes of uniform size, are one-eighth of a thousand Envelopes corresponding in tint and quality to the paper.

EXTRA SUPERFINE QUALITY.

In attractive Lavender Colored Boxes containing one-quarter ream of Extra Fine Paper each, with contents printed in red. Corresponding to this, in like Boxes, are Envelopes to match.

All this Stationery may be relied on to be according to representation. It is suited to the tastes of the most select trade.

In addition to the above lines, our other Specialties are put up with care, in attractive and substantial form. Goods can be seen at the Mill, or at our New York General Agency, GEO. B. HURD & CO., 79 Beekman Street.

SEASON 1883-1884.

SEASON 1883-1884.

L. PRANG & CO.'S

Christmas and New Year Cards.

WE beg to express our thanks to our patrons and friends for the kind and flattering appreciation of our past efforts, and feel a pardonable pride at the very emphatic endorsement which our Cards have received from the American, English, German and Australian press. With one accord these exponents of public taste have given our Cards the first rank over all similar productions in the market. We are bound to maintain this superiority; and we have, as heretofore, spared no expense to create, with the aid of our enlarged experience, a Series of Novelties for the Christmas Season, which, we have no doubt, will meet the expectations of the Trade. We have been singularly fortunate in procuring the assistance of, we may say, **REPRESENTATIVE AMERICAN TALENT** in the preparation of designs, and besides have secured the coöperation of some of the most **EMINENT EUROPEAN ARTISTS**.

OUR LINE IS NOW COMPLETED, and our agents are on the road to call on our patrons and friends. An inspection of the Sample Books will convince them that in regard to **ORIGINALITY AND VARIETY OF DESIGN, EXCELLENCE AND RICHNESS IN EXECUTION**, it far exceeds our last year's efforts. To give an idea of the high artistic order of the line, we would say that it comprises:

FIGURE DESIGNS by Miss DORA WHEELER, Miss ROSINA EMMET, Miss L. B. HUMPHREY, Miss L. B. COMINS, ELIHU VEDDER, WALTER SATTERLEE, A. F. BROOKS, and others.

LANDSCAPE DESIGNS by W. HAMILTON GIBSON, THOMAS MORAN, F. L. SMITH, and others.

ANIMAL DESIGNS by B. E. BENSELL and HARRY BEARD.

FLOWER AND BIRD DESIGNS by Miss FIDELIA BRIDGES, Mrs. O. E. WHITNEY, JEAN ROBIE, of Brussels; H. GIACOMELLI, of Paris, and others.

THE LITERARY MATTER in connection with our designs has been carefully attended to—among others, by Mrs. CELIA THAXTER, Mrs. EMILY SHAW FORMAN and JOAQUIN MILLER.

OUR REGULAR LINE of Christmas and New Year Cards will comprise plain cards, fringed cards, and double fringed cards, varying in price from 30 cents to \$60, per set of 12.

PROTECTORS are furnished with all fringed cards, and also **ENVELOPES** for all series costing \$1.80 per set and more.

Besides our **REGULAR LINE**, we would call special attention to the following

NOVELTIES AND SPECIALTIES:

ALADDIN'S LAMP. This is one of the most elaborate and elegant Christmas Gift Cards we have ever offered to the trade. It is a large folding card, heavily fringed, and provided with a leatherette protector. The front outside page is a design of peacock feathers on satin; the left inside page contains a poem specially written for this gift by JOAQUIN MILLER, also on satin, and surrounded by a delicate border of Oriental design; the right inside page presents Aladdin bearing his lamp, after a painting by the eminent American artist, ELIHU VEDDER; and to complete the whole, the back is embellished with a most unique, artistic design of high order.

RUSKIN CALENDAR FOR 1884. At the solicitation of some of our business friends, we have this year decided to bring out a Calendar, and are happy to be able to announce that we shall issue **A CALENDAR FROM JOHN RUSKIN, FOR 1884**. This consists of an artistic mount with a block calendar, having suitable selections from JOHN RUSKIN's works for each day of

the year. The selections have been made by a lady well-known for her cultivated taste and judgment. The mount has been designed by a well-known Boston artist, and, coming from her thought and tasteful skill, the form and decoration will be a fitting accompaniment to the words within. This Calendar will be a source of pleasure to all who love and appreciate RUSKIN, that they may have every morning a jewel from the treasure of his noble and earnest thought.

"THE CHRISTMAS SHEAF." A folding card, with inside pages, in color, stamped out in the shape of a sheaf of wheat. Tied with silk cord and tassels.

"THE CHRISTMAS BOOK." A surprisingly natural representation of an open book, with floral designs by MRS. FISHER, and original poems by JOAQUIN MILLER.

CHRISTMAS ART PRINTS ON SATIN.

The great success attending our efforts in this line has induced us to bring out a number of new Series, consisting of Flowers, Landscapes and Figure Designs. These are elegantly finished in several styles, in fringed tinted mats, with cord and tassels; on mounts, with silk fringe and cord; in book form, richly fringed and with leatherette protectors, and on rich Plush mounts. Prices vary from \$1.50 to \$3.50 each.

We have made large additions to our **BIRTHDAY** line, comprising Plain Cards, Fringed and Double Fringed Cards and Art Prints on Satin. Numerous Series at popular prices have been added to our list of **SCRIPTURE TEXT CARDS**. New **FLOWER PIECES** in Mats, &c. **THANKSGIVING CARDS**,—Our line will also be shown now.

Descriptive Price Lists of our **CHRISTMAS** and **NEW YEAR CARDS** are now ready, and will be sent on application.

THOMAS NELSON & SONS

Have made arrangements with Messrs. ROMANET & Co., of Paris and London, which enables them to offer a Superb Line of New and Elegant Designs. Great care has been taken in selecting subjects, and every effort made to make this new line THE most popular.

Our Travelers are now on the road with Samples, and it certainly will be to the advantage of the Trade to see this line before placing orders.

No. 42 BLICKER STREET, NEW YORK.

THE METROPOLITAN DAILY PRESS.

V.

THE STAR.

The New York *Daily Star* was established in 1868 as a Democratic newspaper, and after several years of mixed fortune and diverse management it was purchased in 1876 by a number of capitalists, chief among whom was John Kelly, and a company known as the *Star News-paper Company* was organized with a capital stock of \$250,000. In 1877 the paper was enlarged from a twenty-four to a twenty-eight-column daily. It continued to grow in prosperity from the commencement of its present management in 1876, until now it ranks in circulation and influence among the more important of the metropolitan dailies.

The *Star* has always adhered to what are called Jeffersonian principles of politics, applying them to new issues from time to time. It has been very prompt in agitating questions of public interest and in fighting deep-rooted evils, often undertaking this work alone. In 1881-82 it gave impetus to the anti-monopoly movement, which resulted in the formation of a State and national anti-monopoly organization and became a leading issue in the politics of the State at that period. In 1878-79 it refused to support the Democratic candidate for Governor, and was the means, in a large measure, of the election of the Republican candidate. Its aggressive and liberal policy brought it prominently before the masses, which were prompt in giving it support. Since the paper went into the hands of the present management it has enlarged its business premises, and new presses of the most approved pattern have been secured for it, giving it a capacity of 28,000 impressions per hour. George H. Sanderson, who became its editorial manager in 1876, holds that position still, while its leading editorial writer is W. T. Clark. The circulation of the *Star* is about 40,000 for its daily edition, except on Sunday, when it is much larger.

ENGLISH HAND-MADE PAPERS

ORIGINAL
EYNSFORD
MILLS,

WATER-MARK:
FELLOWS

KENT,
ENGLAND.

These papers, made from the purest fibre, without any foreign admixture, each sheet separately formed by hand in a mold, couched by vertical pressure and slowly dried by air, possess a toughness, hardness and strength unapproachable by any machine-made papers. For Legal use, for Scrip or Bonds, and for all purposes demanding great durability, these hand-made papers are invaluable.

The heavier sorts are double sized, and they will bear repeated erasure and constant handling beyond all other makes, so that for Ledger and Account-Book purposes none can compare with them.

Proprietor: **JOSEPH ARNOLD, Eynsford Mills, KENT, ENGLAND.**

THE PARSONS PAPER COMPANY,

— HOLYOKE, MASS., —

In addition to their already extensive establishments at Holyoke (which rank among the largest mills in this country), have recently built a separate mill, specially constructed and equipped for the production of the Best Grades of Linen Papers, and are now manufacturing all the various sizes and weights of BOND, PARCHMENT, BANK-NOTE, AND LEDGER PAPERS. They have already demonstrated their ability to produce of these papers a quality EQUAL TO THE BEST ESTABLISHED BRANDS IN THE MARKET.

Having great strength of fibre (an essential requisite in all Legal, Government and Commercial Papers), they are recommended for use in Bonds, Deeds, Certificates, County and State Records, etc. They are thoroughly sized to stand writing upon with fluid inks, and will permit of repeated erasures and re-writing thereon, when required. Great care is exercised to produce uniformity of color, strength and finish, and to do this, they have the latest improved machinery, specially adapted to the manufacture of Linen Papers.

They would call the attention of the Trade to the following brands, which are their trade-marks, viz.: In all Bond, Bank Folio, and Parchment appears the water-mark

"PARSONS PAPER COMPANY, HOLYOKE, MASS."

The Ledger Papers, of which they manufacture two Brands, are water-marked

"PARSONS LINEN LEDGER."

"SCOTCH LINEN LEDGER."

It is the intention of the Company to maintain the quality of these brands equal to any in the market.

IN answer to frequent inquiry made about our Novelties, we will furnish a

Trade Gossip.

All new goods and designs which are not, strictly speaking, "Novelties" will be noticed under this head. The trade are requested to forward descriptions with samples in order to secure proper notice.

C. Quinlan, paper-stock dealer, Port Hope, Ont., is dead.

J. H. McNamara, publisher of the *Lynx*, Quorn, Ia., has sold out.

The *News*, Sheldon, Ia., published by J. A. Ford, has changed hands.

H. E. & C. M. Knox, dealers in wall-paper, Auburn, N. Y., are reported assigned.

William F. Whitcomb, dealer in paper hangings, Keene, N. H., has been burned out.

John Wymond, dealer in wall-paper, Evansville, Ind., has been sold out by the sheriff.

J. C. Wise, publisher, Mankato, Minn., has admitted Charles C. Wise into partnership with him.

Clark & Edwards, printers, Chicago, Ill., have failed and their business is in the hands of the sheriff.

The *Mercury*, hitherto published by Jasper Carter, Moline, Kan., has been bought by W. C. Goodwin.

A dissolution of the firm of Lon F. Chapin & Co., publishers of the *Index*, Pattersonville, Ia., recently took place.

A dissolution of partnership has taken place in the firm of S. A. Perry & Co., dealers in pictures, frames, &c., San Francisco, Cal., E. E. Perry having retired.

The firm of Curtiss & Dunton, dealers in wall-paper, &c., Grand Rapids, Mich., has been dissolved. A new firm has been formed under the style of Curtiss, Dunton & Co.

Palmer & Co., dealers in books, stationery, &c., Gardiner, Me., who failed several weeks since, have compromised with their creditors at about thirty-five cents on the dollar.

J. H. McKinnon, of the firm of H. N. Brooks & Co., stationers, &c., Meriden, Conn., has removed to Waterbury, and will open a stationery store there under the firm-name of J. H. McKinnon & Co. Mr. McKinnon is thoroughly experienced in the stationery business and is expected to make a success in his new location.

The William Street Stationery Base-Ball Nine met the Paper Trade Nine at Prospect Park on last Saturday afternoon and played a well contested game, resulting in the defeat of the Stationery Nine by a score of 12 to 14. Game was called at the end of the seventh inning, as it was too dark to play longer. A few weeks ago the Stationery Nine beat the Paper Trade Nine, so that there is a tie, and it will become necessary for the nines to play off to decide the championship.

Henry Levy & Son, 477 Broadway, have received, by late arrivals from Europe, a choice assortment of hanging wall time-pieces in china and brass relief, which are very elegant and inexpensive; also a large variety of mantel and wall ornaments of elegant taste. Their line of stationers' sundries is very complete, consisting of chess, dominoes, dice, writing sets, photographic and scrap albums, wallets, ladies' hand-bags, carry-alls, &c., and will be found of first-rate quality. Jobbers and the trade generally will find it to their advantage to give this house an early call.

C. F. Rumpp, Philadelphia, has ready for the fall trade an extensive assortment of novelties in leather goods of his own manufacture. The photo screen in plush or alligator skin is an elegant article which is in great demand. Among the cigar cases, of which he keeps always a large stock, some new models will certainly have a great success. The sale of tourist cases is said to be remarkably good this year. The novelty of the next season will be a music box adapted to work boxes, odor cases or jewel cases, which will be a very elegant present for the holidays. Mr. Rumpp has also imported a great many fine Vienna inkstands of the best designs manufactured in Austria.

In addition to the original schedule, William A. Davis, Boston, has already received duplicate orders from the Treasury Department, at Washington, for his justly celebrated United States Treasury mucilage and "Treasury" brilliant crimson fluid. The few of the stationery trade who have never handled these goods are requested to give them a trial and be their own judges of the excellent quality claimed for this reliable brand of goods. They are shipped from the main office at Boston, or from the Western branch office, at 155 Wabash avenue, Chicago.

W. H. Wells, of the firm of Marcus Ward & Co., has just returned from Europe, where he has been since the middle of June last. His trip was taken for both business and pleasure, and he enjoyed it hugely. He returns much improved in health and strength and with a noticeable degree of vitality, which will give him the necessary vigor to withstand the wear and tear consequent upon the large volume of business that will be under his supervision until his next European voyage.

T. V. Kraft, for twelve years with the late Willy Wallach, and G. Hussenetter, who has been his assistant, both having continued with Mr. Wallach's successor, are now in business on their own account and have formed a copartnership to carry on a general jobbing and manufacturing stationery business under the style of T. V. Kraft & Co., at 140 Chambers street, New York.

The patent pencil back memorandum books, recently introduced by Kiggins & Tooker, are proving a very salable article. The firm is extending these into all grades of fancy bindings. Kiggins & Tooker also report a large and increasing demand for their "Excelsior" diaries.

Mr. Chain, of the firm of Chain & Hardy, Denver, Col., returned from Europe a few days ago where he has been for several weeks recuperating his health. He will remain in town a short time, in order to secure a stock of holiday novelties for his firm.

Hastings, Todd & Co. have just introduced an entire new line of folding cards tastefully ornamented with figures in silver and gold bronze. This firm claims to carry the largest stock of these goods in the country.

Aikin, Lambert & Co. are about to issue a new catalogue of their large and varied line of goods. This catalogue will contain several novelties, which the firm will introduce about the first of October.

The firm of Leighton & Brown, booksellers and stationers, Lincoln, Neb., has been dissolved. The business will hereafter be carried on under his own name by H. W. Brown, at the old stand.

The stationery business hitherto conducted by James W. Daniell, at Mobile, Ala., will henceforth be done under the style of James W. Daniell & Co.

John Frederick Finkeldey, lithographer, Philadelphia, Pa., is dead.

Charles A. Robertson, Mapleton, Ia., has sold out his publishing business at that place.

Willy Wallach has an exceedingly fine line of Christmas goods, and reports a brisk trade.

Wm. M. Allison, publisher of the *Juniata Herald*, Mifflintown, Pa., has been burned out.

Miller & Arrowsmith, booksellers and stationers, Greenville, Ohio, have dissolved partnership.

A. F. Yetter, of the firm of Jones & Yetter, paper hangers, Nanticoke, Pa., is reported to have left town.

The Lindsay Paper Mill Company (incorporated), Lindsay, Can., has gone out of business, having failed.

Daniel Slote & Co. have just prepared a new catalogue of their line of Mark Twain and other popular scrap books.

Among the Southern tradesmen who arrived in town during the present week was J. W. Webb, of Dallas, Tex.

Amos Rowe, of the *Winnipeg Times*, has purchased the plant of the *Brandon Mail*, Brandon, Man., and the paper has been resuscitated.

The September number of "Our Little Ones" has been received. It is of unusual interest both in the text and engravings, and is sure to please the children.

A dissolution of partnership has taken place in the firm of Walker & May, printers, Winnipeg, Man. A. D. May continues the business under the same style.

The lustra decoration of Dreka, Philadelphia, will, it is said, be the success of this year. Mr. Longhead is ready to start on his trip to show this article to the trade.

Amos Pettibone, of the firm of Culver, Page, Hoyne & Co., of Chicago, Ill., who has been in town for a week past transacting business for his firm, returned to Chicago on Monday.

George A. Olney, who formerly did business as a stationer at No. 45 John street, and was for some time with B. Lawrence & Co., has entered the establishment of Henry T. Bainbridge & Co., in the capacity of salesman.

F. H. Drake & Co., booksellers and stationers, Toledo, Ohio, request manufacturers, publishers and the trade to direct all circulars, letters, &c., to them at 168 Summit street, Toledo, Ohio, instead of Detroit, Mich., as heretofore.

The Seaman's Bank for Savings, on Wall street, this city, has recently purchased Schlicht's "Standard" index, manufactured by Clague, Wegman, Schlicht & Co., of Rochester, N. Y., for 50,000 names, as an index to its depositors.

A novelty in the way of target toys was noticed in the trade this week. It consists of a target with several comic figures which fit into the target and are shot from their positions by a wooden cannon springing a rubber ball. Another novelty in toys is a horse with a clown on its back. On winding the toy up the clown begins to dance and cut up various antics. It is very amusing, and will undoubtedly take well.

Henry Levy & Son started their traveling salesmen out this week on their regular fall trips in the West, South and Southwest. A. C. Veiller goes West, and will take orders for the plush leather and gilt goods manufactured by the firm. Frank Raudnitz goes to the West with samples of imported goods and other novelties manufactured by the firm. Henry Steiner, who goes to the South and Southwest will

carry with him a full line of both imported and manufactured stock.

George W. Edwards, publisher, Ione, Cal., has disposed of his business.

A. M. White, publisher of the *Herald*, Florence, Kan., has disposed of his business.

A. A. McArthur, publisher, Victoria, British Columbia, has sold out to Monroe Miller.

McCormick & Co., Franklin, Pa., want latest catalogues of publishers and dealers in fancy goods, &c.

J. F. Creighton, bookseller and stationer, Owen Sound, Ont., has sold out his business to W. J. Creighton.

The business of Arthur Sands, fancy goods dealer, Lewiston, Me., has been purchased by Oswald & Lawrence.

The Dixon Pencil Company has got out a new pencil for short-hand writers, called "Dixon's American Graphite Stenographer." Experts say that it is the "boss."

J. Baird, 61 Essex street, Boston, reports that he is having a good many Christmas orders this year, very much larger than those of last season. He also says that business is quite promising for the fall.

Hard & Parsons have several new designs in their hand-stamping and illuminating department now ready for the market which the trade will find available. They have also a new idea for a birthday book, which will be out in about four weeks, and is likely to be very taking. They report a good demand for Christmas novelties.

T. H. Payne, of the firm of T. H. Payne & Co., Chattanooga, Tenn.; Mr. Hutchinson, of Etzel & Hutchinson, St. Louis; L. T. Noyes, Houston, Tex.; George W. Weingart, New Orleans, La.; August Koenig, New Orleans, La.; L. M. Mansford, Memphis, Tenn.; J. W. Grove, Pittsburg, Pa.; G. S. Beckwith, Richmond, Va.; W. H. Lawrence, Denver, Col., and Henry Snider, Cincinnati, Ohio, were among the out-of-town dealers who have been in town during the past few days.

W. B. Blackhall, 13 West Swan street, Buffalo, N. Y., is introducing a new process of his own invention for marbling paper, the edges of books, &c. This process is said to entirely do away with the old method—the grinding of colors, dissolving of size, tying up of the books to be marbled, and the making of a pattern for each edge; the dipping, and finally the washing off of the edges; the time drying, and size running inside of the books making an unsightly mark. Books to be marbled are simply placed on the edge of a table, the edges damped with a sponge, the marbler rolled over, and the work is done, saving time, labor and money. The edges burnish like glass and need not be placed in a press, but can be burnished with a folder. The color does not rub, and is indelible. The books are dry instantly and ready for binding.

James E. Walker, the commercial traveler, who suddenly disappeared several days ago, has not been heard from as yet. He has been connected with a number of leading firms in this city and was well known to the trade. Since May of this year he has been selling on commission for Marcus Ward & Co. A member of this firm said to a reporter of THE AMERICAN STATIONER that he could assign no reason for Walker's continued absence, but he thought that he would turn up again sooner or later. Walker has the reputation of being one of the best salesmen on the road, but he is a man addicted to intemperate habits, and in this and other respects his employment with some houses has not been of a most satisfactory character to the firms represented by him. Some few years ago he sold on commission for the well-known pen dealers, Edward Todd & Co., who, becoming alarmed at some of his acts, sent out a circular to the trade, giving notice of his exact status with the firm.

Samuel Parsons, of the firm of Hard & Parsons, is on his way home from Europe, and is expected to arrive by the Arizona on Sunday.

The Weaver Mail Packet Manufacturing Company, 176 Fulton street, New York, is making a patent protector for book corners.

W. Breck, fancy goods dealer, Orange, Mass., has disposed of his business, Fisher & Stone, having bought the same.

M. P. O'Brien, newsdealer, &c., Terre Haute, Ind., has sold out to J. B. Ewart.

Franzen & Co., paper-stock dealers, Milwaukee, Wis., have been burned out. Loss estimated at \$1,000.

E. O. Robinson & Co., publishers of the *Sentinel*, Waterville, Me., have sold out to J. D. Mansfield.

The business of J. A. Sammers, bookseller and stationer, Albuquerque, N. M., has been bought by Whitson & Nicols.

ARTIFICIAL IVORY.

An artificial ivory manufactured from cellulose compounds, is a composition chiefly of such substances as zylonite or those elements which are formed chiefly of pyroxyline, and a new article is produced by forming the zylonite or its equivalent substance of different densities, and in some cases of slight differences in color, and then cutting the same into sheets, as by any of the well-known processes for such manufacture, and then combining them in the sheet form, as by rolling them or pressing them together under great pressure, so as to compact the several sheets into one entire mass, but in such a manner as to preserve the peculiar characteristics of the structure of each separate sheet, and at the same time make such a compact body as that when cut into thin sheets the various sections in the sheets will show the different characteristics or grain of the original sheets of which the mass was composed, and thereby imitate the various growths or laminated character of the ivory.

FOLEY'S PAT. IMPROVED STYLOGRAPHIC PEN.

Great reduction in price: No. 1, \$1.75; No. 2, \$2.50; No. 3, \$2.50; No. 4, \$3. A liberal discount to the Trade. FOLEY'S PATENT STYLUS is the best and only Pen with point, spring and cleaner in air tube. Fully warranted, and exchangeable for gold pens and pencils.

We, the subscribers, who know the value of FOLEY'S PENS from constant use of them for a number of years, cheerfully recommend them to those who wish for the best and most perfect Gold Pen ever made.

Signed by the following gentlemen and over 1,000 others: G. S. Coe, Pres. Am. Ex. Nat'l Bank; J. A. Beardsley, Cashier Nat'l Bank of North America; Wm. A. Fall, Pres. Corn Exchange Bank; E. H. Lowry, Pres. Nat'l Bank of the Republic; F. D. Tappan, Pres. Gallatin Nat'l Bank; C. F. Timpson, Cashier Continental Bank; I. G. Ogden, Cashier New York Co. Nat'l Bank; Chas. Dennis, Vice-Pres. WEIDMANN, A., 306 Broadway, N. Y.

APPLICATION OF PLATINUM ON
GLASS AND PORCELAIN.

The process of Professor Böttger for the above purpose (described in the *Keramik*) has been found from Herr Gräger's personal observations to afford a means of producing on porcelain or glass coatings of platinum, very brilliant and perfect in their character. To arrive at this result, it is essentially necessary to employ a bichloride of platinum as dry and free from defects as possible.

In combining the suitable preparation of platinum the dry bichloride of platinum is placed in a small porcelain mortar, and rosemary oil (*Oleum Anthos*) is sprinkled over it. It is kneaded with a pestle (the oil being renewed about three times) until the brownish red mass of the bichloride has become a soft, pitchy, black-looking substance in which no particles of the chloride in a non decomposed state are discernible. The rosemary oil is said to assume a more or less yellowish tinge by a partial taking up of the chlorine from the bichloride. After the removal of the oil, the black mass is continuously rubbed together with about five times its weight of lavender oil, so that a thin and perfectly homogeneous fluid is formed, which is let stand about half an hour before being used, and is then applied with a soft brush to the objects requiring it. The coating must be uniform, and the subsequent brilliancy of the platinum covering is in proportion to the thinness of the layer. The objects are subjected during several minutes to the action of a muffled furnace, during which time the temperature should not exceed that of a just perceptible red heat. If the right temperature has been observed, the objects after this operation have a beautiful lustre, resembling silver in its brilliancy.

The active agent in the platinum fluid is a salt of platinum in conjunction with a peculiar acid, which is formed in the treatment of the bichloride of platinum with the ethereal oils referred to. According to Böttger's observations, this combination becomes decomposed if kept, and loses its special properties. It is therefore recommended not to prepare at any one time a greater quantity than is necessary for one day's consumption.—*Pottery Gazette*.

The British "parcel post" is proving an immense success. It is, in fact, the most popular thing the Post-Office Department has yet done. Though but a month or so in operation, and notwithstanding the pressure upon the department, the *London Times* says that no serious hitch has occurred either in the delivery, collection or dispatch of parcels. It is stated by the officials that the parcels coming from the provinces, chiefly the villages, are the worst made up; but, generally speaking, not much trouble has been experienced on that score. Among the articles sent the other day were a number of small coffins, crutches, ducks, fish and silk hats, and an enormous quantity of fruit. The *Times* advises persons sending leeches in boxes that it would save much inconvenience if they would see that their *protégés* are well secured, "as yesterday a large number found their way out."

THE STATIONER.

DEVOTED TO THE INTERESTS OF THE

Stationery and Fancy Goods Trades.
WEEKLY--\$2.00 PER ANNUM.

Single Copies - - - - 10 Cents.

NEW YORK, THURSDAY, AUGUST 30, 1883.

Advertisements cannot be received for insertion in the current week later than 12 M. on Wednesday. The charge for advertising is 25 cents a line, each insertion. Special terms for standing and displayed advertisements to be had on application.

This journal aims to be a medium of information for and a representative of the interests of every one connected with the stationery and fancy goods trades. It contains a full and trustworthy survey of the market for stationery in this country, in all cases giving the actual prices at which goods can be bought of importers and jobbers in this city, together with a detailed account of novelties in the trade, patents relating to stationery, and current items of interest. A review of foreign markets and accounts of movements abroad will also be furnished, and no pains will be spared to make THE STATIONER a thorough and complete exponent of the trade.

Subscription and postage for Great Britain, per annum..... 12s.

Any information our readers may wish to obtain shall be cheerfully given, and prompt replies will be made to all inquiries addressed to us on any subjects of interest to the trade.

Communications on all trade matters are earnestly solicited. Address

HOWARD LOCKWOOD, Pres. and Treas.
American Stationer Association,
74 DUANE STREET, NEW YORK.

Subscribers to THE STATIONER can be supplied with the best cloth binder in the market. Deliverable at the publication office. Price, fifty cents.

Readers of this paper who avail themselves of the information obtained from its columns, by advertisement or otherwise, are requested to notify their correspondents of the source of their information.

NEXT Monday we are promised the new postal notes. It is probable that they will be quickly taken up. Their convenience will facilitate business in many ways.

ALMOST every line of trade is "going in" to form a board of trade or exchange. It strikes us that this commercial organization business is being overdone. Interests which are closely identified ought to be kept together to keep up and sustain one harmonious whole. When they split up and branch off the effect is weakening all around.

THE paper makers are at work laying plans to extend their export trade. Why do not the stationery trade join with them. The combination would be so natural that no one could object, and if agencies are to be established and travelers sent forth both interests could work harmoniously in meeting the cost of pushing the missionary effort. What do the trade say?

WE believe that placing the telegraph system of the country under government control has not hitherto met with that favor from the public which is necessary to create the impulse which would carry such a project into effect, but the events of the telegraphers' strike, superadded to the annoyances and frequent impertinences so often experienced from the telegraph companies and their agents have certainly put the proposition in a stronger position for success. Public sentiment generally is against an increase of public servants to be fed out of the public crib, but this sentiment has been materially changed within a few weeks and may be expected to become one of the issues of political reform and a rallying cry or shibboleth for party purposes. But while yielding assent to the plan of government administration of telegraph lines which could be made important and profitable adjuncts of our postal service, we do not see the need of buying up the lines already constructed or of paying for the plant the extravagant figures which would be set upon it. The government can build a cheaper, more convenient and less objectionable series of lines, which would be fully equal to the demands of the country and be capable of indefinite extension for much less money than it can buy those already constructed. There is nothing which is now done by the telegraph companies which cannot be accomplished under official management, and when the spoils system and public patronage strife are divested of their influence upon appointments, as they are likely to be, we can rely upon a good and efficient service under government control. The Legislature of New Hampshire has set the example of invoking national legislation for the establishment of a postal telegraph system. Other legislatures will be called on to act in the same direction, and the public temper is such that, if they fail to respond to this demand, those responsible therefor will

find themselves between the millstones of public opinion and corporate influence. The result of such grist can be foreseen.

ROUNDABOUTS.

BY THE TRADE LOUNGER.

When every stationer is busy and doing his best to please customers, fill orders and make money, it is rather hard to have a fellow lounging around. Isn't it?

Perhaps your readers will want to know why I come lounging into your columns. If they do I will reply that I want to talk to them about serious things. I'm a bit of a gossip, too, and, picking up a point here and there, feel that it is my duty to "give it away."

One house, young and energetic, is plumbing itself upon the fact that it is making shipments to London. Well, why shouldn't it? While older houses are laying off and waiting for business, this firm is pushing its trade with a view that should and will command success.

This leads right up to the subject of the export trade, of which you have had so much and doubtless will have still more to say. In my rambles around the trade I have found many who talk earnestly about it and seem to want to make a start, but who are waiting for somebody else to get in first. This is slow business, waiting for somebody to do something which all ought to be doing.

But to change the subject. I was led to remark the other day about the enormous growth of the chromo business. F. G. Bufford told me that popular taste is not what it was, but that where once cheap advertising cards and chromos could be sold the demand is now for something finer and more costly. This fact shows the growth of artistic feeling and aesthetic impulse. It is true, too. What F. G. B. doesn't know about this trade isn't worth knowing. He is a regular trade barometer.

Running through some of the so-called trade papers the other day, I had my attention attracted to some peculiarly-worded announcements. Why people should claim all the world, the planets and the entire firmament for their goods I cannot understand, and how anyone who undertakes to run a paper can say that one man's line is the best in the market, and that his manufactory is the largest, and on the same page say the same thing of that man's competitor, is more than I can understand.

Such splurges are diabolical as well as hyperbolic and only lead the observer to shake his head and remark that they are two attenuated.

There is, as "the Count" would say, a *juste milieu* in paragoning and advertising. Intelligence must be exerted to make either effective. Slobber and Swellhead are not the firms to do the most business. Don't you forget it!

Now that I have got on to the advertising theme, I want to say that it is an art which has underlying principles which must be observed to make it effective. It was Robert Bonner, I think, who observed that if you introduce yourself to a busy man once, it is probable that he may not recollect you, but if you call two or

three times and keep on introducing yourself he comes to know you and in time becomes friendly, and that it is just so with advertising. An "ad" inserted once may not suffice. It must be persisted in and it must be introduced with just as much good taste as if you were bringing yourself to the attention of a man whom you particularly wished to know.

A certain prominent importer on Broadway has been doing something in the line of practical joking lately. But he has discovered, I presume, that he is not as much of a success as a practical joker as he is at importing.

His failure has one significance. It shows that the best way to get the benefit of an advertisement is to pay for it, and not to try to get it gratis by means of a practical joke.

It is reported that a salesman in the stationery trade is missing. Mysterious disappearances are common nowadays, but the greater mystery is how the missing ones turn up. Is it an uncommon thing for a commercial tourist to go off on a "hoodoo"? The lost one in this instance is expected to return.

Business cares are enough for most men without taking to heart additional anxieties. But John B. Davids thinks otherwise, and is therefore spending many sleepless nights in an effort to secure a \$50,000 prize, which "Uncle Sam" offers for the best cancelling ink.

I have been told several times, and by as many different people, that our friend Green, at A. S. Barnes & Co.'s, has been opening a great deal of wine of late. Sorry I didn't happen to drop in at the right moment. Never mind, if Green will send up a basket to THE STATIONER I may, perhaps, get an invitation to look at the bottles. My well-known abstemious habits would prevent me from doing more.

A few weeks ago the base-ball nine representing the New York stationery trade were proclaiming the fact that they had played, *veni, vidi, vici*, with the paper and paper-stock nine. It has leaked out that a second game has been played, and that the boys in the stationery trade are not disposed to talk about it. Why? Is it because the other "gang" scooped them? "I should smile."

I met a bootblack on the street the other day selling chromos. Naturally surprised at this, I inquired, "Wherefore?" I was told that the goods were taken in trade. Isn't this going quite too far? The horse that takes its "shines" at the rate of six chromo cards for five cents, the goods to be afterward retailed at "three for five," is setting a dangerous example. No wonder that stationers growl because of promiscuous competition.

Henry Snider, of Cincinnati, who has been on to take a whiff of salt air, was not much inclined for business, I am told. In fact, he looked around, did little, if any, buying, but got the gauge of the market. He promises to make the boys happy when they reach him this fall. He can do it.

One feature which struck me on strolling around through an extensive blank-book establishment the other day was the number of men

with little or no hair who were busy around. There were enough to organize a champion bald club.

As I looked at these old young men, I could not but remark what a strain upon their vitality such hard work must be. But I know that they are the standbys of a house which does not forget good service, and appreciation is mutual. I would like to see them out on a bit of a lark, though. Can't you give 'em a picnic, Mr. President?

By the way, I understand that the retail trade of the city are on the *qui vive*, expecting the return of William Cole, city salesman for Boorum & Pease. Mr. Cole has been in the Catskills on a trouting expedition for the last month, and I suppose that the quantity of trout promised to customers will require a train of refrigerator cars at least two miles long, filled with "three-pounders." No wonder that Chester and Philip went away. Some people always are jealous.

I have heard that Charley P—— has taken to wearing alligator leather under-breeches. Now, I should like to know why!

A Boston paper says that a fortune awaits the man who will invent (1) a penholder that you can't stick into the mucilage bottle, and (2) a mucilage brush that won't go into the inkstand. Yes!

These things can be done. Give us a harder one. Faber can attend to one part of the proposition and Stafford to the other; but I can lay them both out. Do you want to know how?

Invent a man who doesn't want to use either a penholder or a mucilage brush. I have filed a caveat on this.

The New Hampshire Legislature has passed a joint resolution in favor of a government postal telegraph. This is only the beginning of the end.

People have got tired of the exactions and indifference of the telegraph companies. I have a friend whose telegram from St. Louis announcing his expected arrival in New York was received by the person to whom it was addressed three weeks after they had got over their hugging.

This is probably not an isolated instance. It didn't occur during the strike, but a year ago when everything was "serene."

If such things happen in the green wood, what could have been the condition of the telegraph business in the dry—when the operators were out.

Corporations, like bees, get too fat to be kept alive.

Stop! this is a mixed metaphor, and I make it a rule—just the same as Alec—not to mix mine, preferring to keep it straight.

I said fat. Shouldn't I have said drop-sical? Where there is too much water it is necessary to get rid of it. One puncture will sometimes do it. Will not a government postal telegraph be the proper instrument?

♦ ♦ ♦ ♦ ♦

The newest shade is the "Crushed African."

ANSWERS TO CORRESPONDENTS.

Several subscribers who inquired last week if the "Japanese imitation leather," previously described in THE STATIONER, can be had in this country, are informed that Gane Brothers, 106 Duane street, New York, can supply it.

H. C. H. asks if there is a book published giving the trademarks of different wares, such as "Dresden," "Haviland," &c.

Ans.—Yes. Beckwith's "Trade-marks on Pottery and Porcelain" is probably what you want. D. Van Nostrand, 21 Murray street, New York, has it.

C. C. P. wants to know who is the manufacturer of or dealer in rubber erasers with brushes attached, which were formerly made by the Providence Inkstand Company.

Ans.—We think that French & Choate, 4 Bond street, New York, can "fill the bill."

W. G. T. & Co. say: Please inform us through THE STATIONER which is considered the finest blank-book paper—that made by Byron Weston or the finest grades of English manufacture?

Ans.—It is, we believe, generally conceded that Weston's is equal to, if not superior, to any made abroad. We think that it is better than the English.

S. Brothers want the names of several parties dealing in second-hand job-printing presses.

Ans.—Goodwillie-Wyman Company, 16 Chambers street; National Printers' Warehouse, 18 Vesey street, and American Printers' Warehouse, 78 Murray street, all in New York.

F. H. D. & Co want to know who makes pocket albums for cabinet-size cards, &c.

Ans.—Kiggins and Tooker Company and Koch, Sons & Co., New York.

When People are Traveling Comfort and Safety are the

TWO PRINCIPAL OBJECTS IN LIFE!

COMFORT!

"The Erie is by far the smoothest road I ever traveled on, either in this country or in Europe; and I consider it the perfection of railroad traveling. With the clean, light and airy coaches, polite attendance, freedom from dust, noise and jar, we reached Chicago hardly realizing what a long journey we had performed. And then such a breakfast as we had the morning after leaving New York, at Hornellsville, is certainly deserving "honorable mention." Such a table as they have there, with a full half an hour to enjoy it, is enough of itself to attract passengers."—*Ex. U. S. Minister, E. B. Washburne.*

SAFETY!

"5,491,441 Passengers were carried over the Erie Railway in 1881. Of this vast number, only two were killed—one by falling from the platform of a car on which he insisted on standing, and the other in jumping from a train while in motion."—*New York State Engineer's Report for 1881.*

No better evidence than the above need be wanted that both of these objects are secured to the traveler who purchases his ticket over the

GOLD PENS.

WRITTEN FOR THE STATIONER.

(Continued.)

Gold pens are made of alloyed gold. The gold is fine bar gold and the quantity of alloy added is prepared with much care from pure copper and silver. Pure gold being too soft, the alloy is added to make it hard and durable and of a uniform elasticity. The alloyed gold is put into a sand crucible and placed in a charcoal fire in a forge adapted to the purpose, and is melted to a liquid and then poured into an iron ingot or mold, which produces a bar of the required width and thickness, according to the size of the pen it is intended for. After the bar is cooled it is removed from the ingot, the rough edge is filed smooth and hammered, and it is then ready for the rolling or stock mill. This is a machine which has two rollers between which the bar of gold is run, and thereby reduced to a ribbon about one-thirty-second of an inch thick. The rolling machine is operated by steam or hand power. It is complicated, very heavy, made and finished in the finest and most expensive manner and regulated by two screws on each end. Each time that the bar passes between the rollers, the screws are turned down until the required thickness is obtained.

The ribbon-shaped bar of gold next goes to the blank press, or die. This is a machine for cutting flat pen blanks. It is a lever press, with die set. The blank as it is cut from the ribbon of gold drops through into a drawer underneath. The blanks go to the burring machine, which is used to mill out a recess across the points or nibs, so as to enable them to receive the iridium or diamond point. The diamonds are put on the pens by placing a number of blanks in a row on a strip of wood made for that purpose. A small pencil brush is dipped into liquid borax, and with it the points are picked up and set into the recess. The workman uses a microscope to enable him to place the points properly. When this is done the blank is sent to the next man, who fixes the points permanently. A lot of blank pens are placed in rows on a flat piece of charcoal, and held under a gas jet. A blow-pipe is used to direct the flame steadily upon the blank points, until the gold is thoroughly melted around the diamond or iridium point. This is called the sweating process. It requires much care and experience, for if the heat is a moment too long, the whole is melted and made useless.

The point of the pen is next applied to a copper lathe and brought to a square, even face upon both sides and the end. It is then ready for the blank rolls. These are two rolls, the under one of which has a recess, which protects the point, while the body of the pen is stretched to the proper length. The nib of the pen is then hammered on an anvil or stake of curved surface until the required spring or elasticity is secured.

The next operation is to place the pen blanks into a second cutting and die press, which takes off of them a narrow strip all around and gives the pen its proper even form in the flat state, when it is ready for the stamping press, which stamps the name of the maker, &c., on it. The pen is now ready to have the sides raised into shape, and this is done with a screw press of great power. With this the pen from its flat shape is bent into the round or partially cylindrical form. To insure perfect shape and permanent set to the new curve, only a press of great power and dies of extreme exactness can be used successfully. The press is very heavy and complicated with many parts and very ex-

pensive fittings. The principal parts are the half-round bed on which the flat pen rests; and the plunger, half-round also, to fit exactly, which is struck down with great force by the action of the screw. This blow rounds the back and sides of the pen. The plunger is brought up by an eccentric and lever acting on two jaws, one on each side of the machine. This completes the perfect shape of the pen.

(To be continued.)

Market Review.

OFFICE OF THE AMERICAN STATIONER.
WEDNESDAY, August 29, 1883.

THE MONEY MARKET.—The rates of discount have advanced to 5@7 per cent. for prime mercantile paper, while second and third class notes are difficult of negotiation at rates which legitimate business in these days of small profit cannot afford to pay. On call the rates remain 2½@3 per cent., while for time loans 5@6 per cent. is exacted. The stock market continues dull, with a continued decline in prices. Government bonds continue firm and fairly active, but railroad mortgages are generally lower, in sympathy with the share list. Foreign exchange is dull, and with a good supply rates are barely steady.

THE PAPER MARKET.—The reports of the condition of business in the paper trade for the past week are somewhat varying, some houses being favored with an increased number of inquiries and orders for goods to be made up ahead for fall consumption, but the preponderance of expressions on this subject being that business does not extend beyond summer proportions. With the manufacturers there is much less anxiety to secure orders than has been the case during any corresponding month for many years past, notwithstanding that the production this season has not been restricted to any extent by drought. Chemicals, particularly bleach, are very high, and should any advance occur in rags or other paper stock, manufacturers' profit must be narrowed down to a very close figure. Buyers should bear this in mind if they are holding back their orders for any decline in paper, as the tendency is to some advance rather than toward any decline.

THE STATIONERY MARKET.—Quite a marked degree of activity was indicated by the trade during the past week, and the improvement gave evidence of a healthy and permanent character, causing a greater degree of confidence among dealers. The near approach of the fall season, tradesmen regard as a sure stimulus to all branches of business, for they reason that dealers in all parts of the country who want to do business must promptly come forward with their orders or suffer the disadvantage of having the choice crumbs in holiday goods taken by the early birds. Another stimulus to the fall trade is the small amount of business done in the spring. This must, it is thought, very soon have a decidedly quickening effect on the stationery trade generally, as most out-of-town dealers having bought little in the early part of the season, will find their stock very much depleted if they have not done so already. On the whole, dealers generally express themselves confident of a more healthy trade from this time forth. In school stationery and school books business was never better. Large orders are pouring in from the South and West for this class of goods, and this condition of affairs is likely to continue for at least two months. The trade in envelopes is much better than it was a week ago, but prices remain the same. In staple goods generally there is better trade and prices are quite firm.

TESTIMONIALS.

"I am most emphatically pleased with the Prouty. I would not trade it for a C—press (price \$1,000.) It runs *easier*, it is much *simpler*, and does its work as rapidly and well."
J. F. MITCHELL, Greenville, Texas.

"Would not exchange it for any of the 'Big Injun' presses."

J. A. AVERY, Waukeegan, Ill.
C. G. STARKS, Berlin, Wis.

"The Prouty is the 'Boss press.'"

"For the country office, printing 1000 to 4000 circulation, there is no other press worthy to be compared with it."

Waterloo TRIBUNE, Waterloo, Iowa.
"We profess to be a practical pressman, and having had experience with nearly all kinds of presses, believe ourselves to be a competent judge. The Prouty is the simplest and easiest running power press in the market, and will do as good work as any machine made." F. M. HALSEY, Newhampton, Iowa.

ARTISTIC PRINTING.

Notwithstanding all that has been written and said about the art of printing, we fear that comparatively few printers study or care much about art in printing. Take any ordinary handbill, card, advertisement or broadside, and see with what little real art the work is produced. Speakers at public meetings and printers' dinners are eloquent in praise of the Press and Caxton's incomparable handicraft, and yet the very circular of invitation which calls them together, and the card which bears the bill of fare, are, as often as not, but poor examples of typographic display. Strange that, after four hundred years' practice, compositors should know so little about the true principles of display in job-printing, or, possessing the requisite knowledge and taste, should so seldom bring them into practical use. In other callings, the taste of the designer and skill of the workman are seen and valued; in printing, that which will just pass muster is generally deemed sufficient. Errors of judgment and absence of taste are in job-printing the rule rather than the exception. Give a compositor a piece of copy in which the sentences run on a continuous paragraph, and tell him from that to make an attractive poster or advertisement, and what is the result? Much too frequently a batch of lines of nearly similar length, a mass of print without contrast, without atmosphere—so to speak—without evidence of care or brains!

There may be reasons for this lack of artistic training—perhaps there are. It may be that haste and inadequate payment lie at the root of the complaint; or the want of early teaching may have much to do with it; or incompatibility of temper, even, may effect the work; but certain it is that, except in rare instances, the sense of the old proverb is reversed, and what is worth doing at all is *not* worth doing well.

Compositors should know that effective display in job work is a real art. Among the drapers and the fancy stationers there are male and female assistants noted for their taste in window-dressing. Why among compositors are there so few who thoroughly understand and appreciate the proper setting-up, the dressing of a title-page, a card, or a show-bill? It is to be noted, as a rather remarkable fact, that the most prominent bits of good work in the Specimen Exchange come from comparatively small houses, and that the excellence of such work depends not so much on the employment of a large variety of type as in the judicious use of the caps and small caps, the italics and the clarendons, the fancy sorts to be found in nearly every jobbing house throughout the country. London, though pre-eminent in some things, does not stand in the very first rank for ornamental printing. The secret of this may be found in the circumstance that, except in some few houses, the apprentice, so soon as he has become familiar with the boxes, is expected, and in most houses is compelled, to pick up thousands enough to double for his master the wages he gets for himself. This is bad economy. When he has served his time, such an apprentice is not a skilled compositor, but a mere everyday type-lifter. Go into any London office you like, and how many men will you find to whom you can intrust the setting-up of a title-page? Not one in twenty!

All this needs reform. It is in vain to grumble at poor workmanship if we give the apprentice but few opportunities for cultivating his natural taste and desire for distinction; altogether futile to complain of the Americans sur-

passing us in this special and pleasing branch of printing, if we grudge the time and cost necessary for the education—we had almost said the art-education—of the beginner. On more than one occasion we have written on this subject, and always in the same vein, and with the same

intention—the improvement of printing in the printing-office. There alone can eminence in typography be acquired; there alone can we hope to turn middle-class lads into pattern printers, experts in jobbing display, artists in typography.—*Printers' Register.*

THE KERNER.

\$1.

It is constructed on strictly scientific principles, and being devoid of the complications which exist in old styles is less liable to get out of order. It has no springs to be affected by the action of the ink. The needle is rigidly fixed to a FLEXIBLE air tube extending entirely through the barrel, which when writing is constantly vibrating throughout the entire length of the barrel agitating the ink and causing a perfect flow to the point. It is unequalled by any writing instrument of the kind ever offered for public favor, and gives entire satisfaction to all who use them. It is constructed of the best material throughout, and the point is of platina alloyed with iridium. Prices: No. 1, Plain, \$1; No. 2, Engraved, \$1.25; No. 3, Gold Mounted, \$1.50; No. 4, Entire Gold Cap, \$3; No. 5, Mottled Ruling Pen, \$1.50. Send for Circulars.

BYRON WESTON,

DALTON, MASS., U. S. A.,

HAS BEEN AWARDED THE

GRAND PRIZE GOLD MEDAL

AND RECOMMENDED THE

Medal of Honor and Perfection

At PARIS, 1878,

This being the HIGHEST and ONLY AWARD given for

LINEN RECORD & LEDGER PAPER

Also, the only Gold Medal given for Ledger Paper at the Adelaide, Australia, Exhibition, 1881.

—A SPECIALTY.—

THIS Paper has received THE HIGHEST PREMIUM over all others from the Cincinnati Industrial Exhibition, Massachusetts Charitable Mechanics' Association, Franklin Institute of Philadelphia, Louisville Exposition, Medal and diploma from United States Centennial Commission, Medal of Progress American Institute, 1877, and Medal of Improvement and Progress, Boston, 1878. Its

PRINCIPAL ADVANTAGES

are as follows:—1. It contains more LINEN than any other Ledger Paper, has a longer fibre, and is, consequently, tougher. 2. Having a harder and better body, it frays less in erasure, so that by simply using the rubber after the eraser, the ink is prevented from spreading. 3. It is more uniform in Weight Color and Finish. 4. It never cockles if properly bound. 5. Its chemical action upon ink is such that it both writes and rules up better. For proof of the foregoing, refer to a large number of Stationers, Bookbinders, Bookkeepers, and Records, who have given it, after a severe test, the preference over all others. This paper is Double Sized, and will stand any climate or the most acid of fluid inks.

Send for sample sheet, ERASE and REWRITE FOUR TIMES on same spot,
Each sheet is water-marked with name and date.

DAYTON DASHES.

[FROM OUR REGULAR CORRESPONDENT.]

DAYTON, Ohio, September 3, 1883.

The advent of the school days has made trade pretty lively among the book stores for the past week, although the trade in general is very quiet.

Travelers have been quite numerous in the last few weeks. Mr. Wright, with Phil Hake, was here last week, and reports a good trade. Mr. Fleisch, with Kaufman & Strauss, also called, and reports a good trade in his specialties. Mr. Emach, of noiseless slate fame, was also in our city.

If the rival noiseless slates made as much racket as their proprietors among the trade, with their blasts and counterblasts, pandemonium would become a refuge.

We have been expecting it, and it has come—the card fiend has found another day to celebrate, and has issued a line of "Thanksgiving" cards to commemorate that day, even our private birthdays will not be safe much longer if this thing keeps up.

Crane, Jackson & Crane, are about ready to occupy their new room, next door to their present location. It is the handsomest stationery room in the State, and no doubt they will add largely to their trade. There is a pleasant rumor afloat that Mr. Jackson of this firm is so well pleased with two partners—that he has concluded to take a third.

Thomas, Mayer & Van Sant have put in a new front to their store, and added greatly to the appearance of their quarters. They report a good trade.

Reynolds & Reynolds are very busy with their lines of special manufacture, and have sanguine hopes of a good fall business. R. S. Rogers & Co. report trade good in all departments. They are manufacturing a line of school pads that are meeting with a good demand.

The Holden Manufacturing Company is full of orders for school-book covers, and other specialties controlled by it.

Among the paper mills there is a general opinion that prices must advance, and, in fact, the combination among the wrapping mills has effected a small advance. Manillas are very firm, and the general feeling is that prices will advance, on September 15, $\frac{1}{4}$ to $\frac{1}{2}$ c. per lb. There is a lively demand for the product of the paper mills in the

MIAMI VALLEY.

OUR LONDON LETTER.

[FROM OUR REGULAR CORRESPONDENT.]

5 LUDGATE CIRCUS BUILDINGS,
LONDON, E. C., Aug. 11, 1883.

It is an article of popular faith that "when things are at their worst they are sure to mend," and although it would be difficult to determine the exact point at which things are at their worst, and at which, consequently, the mending process may be expected to begin, the believers in the comforting doctrine have certainly the advantage of enjoying that hope which, according to Pope, springs eternal in the human breast. Our old friend, Micawber, waited for things to "turn up," the hopeful individuals referred to are ever longing for things to turn round.

Well, in some respects at any rate the desired process has taken place. We are enjoying an unusually pleasant summer, being neither baked by day nor frozen by night, and as a consequence the London season, although it has certainly not been brilliant, has been lengthier than any we have enjoyed for some years past, and the results in the shape of business have been, in some degree, encouraging, although, at present, the benefits resulting to other traders do not seem to have reached the stationer.

The Third Stationery and Printing Trades Exhibition and Market was duly opened at the Agricultural Hall, Islington, London, on Monday week. The occasion was not a lively one. It has been my lot to be present on many occasions of a melancholy and depressing nature. I have witnessed a review of the household troops in Hyde Park conducted by his Royal Highness, the Commander-in-Chief, from beneath the shelter of his historic umbrella when "the rains descended and the floods came;" I have been present at a performance of "Hamlet" by the distinguished amateurs known as the Euripides Historic Society; I have even sat out an agricultural dinner; but never, no never, have I witnessed anything of a more afflicting character than the opening of the Stationery and Printing Trades Exhibition of 1883.

It is certainly very important for the firms that have exhibited that so little interest has been displayed in the matter, both by the trades and the public. Some of the exhibitors incurred considerable expense in the fitting up of their stalls and the transport of their goods and could only be recompensed by doing good business with the retailers or obtaining a first-rate advertisement with the general public; actual results disprove the notion of the former, while the scanty attendance has rendered the latter an impossibility.

The printing trade exhibits were the most im-

portant and interesting of the displays. Among them the several varieties of platen printing machines afforded opportunities for the comparison of their several merits. Of the newer machines the "Empress" and the Anglo-American "Arab" obtained many admirers.

Newman, Wood & Dyson exhibited their Anglo-American litho machine, which claims to possess the advantage of great strength with steadiness and care in working, comparatively noiseless action and great speed. One of the most interesting machines in the show was undoubtedly the "Windsor" type composing and distributing machine, and its operations always drew an inquiring circle of spectators. It is claimed for this machine that it composes at the rate of nearly 10,000 per hour and distributes at the rate of 6,500 per hour, a result which is obtained by the fact that unlike the majority of composing machines, it admits of all the fingers of both hands being used at one time. The proprietors applied to the managers of the exhibition to be allowed to enter the machine on a type composing competition which was in progress, a prize of £30 being given for "the most expeditiously and accurately distributing and composing a galley (5,000 letters) of solid brevier, 16 ems measure," but they were informed that their offer could not be accepted, so that an opportunity of testing the relative merits of composing by hand and by machine was lost, a circumstance generally regretted.

Sprague & Co. showed a new process by which photographs, oil-paintings or drawings are reproduced in lithography and enlarged or reduced as desired. This process does away with the necessity to line up the effects of the artist's work, while increasing the beauty of the work, greatly lessens the labor of the draughtsman.

"Day's shading mediums" were exhibited by W. O. Felt, and attracted considerable attention. As they are probably much better known in the United States than here, it is perhaps unnecessary to refer to them in detail.

On the same stand the "Hall" type-writer was shown and elicited generally favorable opinions.

Among the stationery exhibits the display of Raphael Tuck & Sons attracted perhaps the most attention, where a very fine show was made of original paintings, chromos, oleographs, engravings, &c., as well as vases and plaques of terra-cotta, and many handsome decorative screens and other articles, not to mention an endless variety of greeting cards, &c.

Jefferies & Sons, of Bristol, had an excellent variety of articles in the stationery line, both plain and fancy. Indeed, the trade would find

the catalogue just issued by this firm an exceedingly useful production, as it would be impossible in a letter to give any idea of the numerous articles which they manufacture. A linen-faced paper of their make is a very novel and pleasing article, with the rough surface now so much in vogue. A combination of note and copying paper, by means of which on writing with black ink on one sheet, a copy of which can be simultaneously obtained on several other sheets, is also decidedly new—at least, to us.

John Walker & Co., of Farringdon street, London, exhibited a splendid collection of hand-painted birthday cards, valentines, wedding cards, and other articles which deserved the high encomiums passed upon them. The designs and the execution of these works of art being alike admirably chaste and harmonious.

A capital collection of stationers' sundries was shown by Partridge & Cooper, of Fleet street, London, such as novelties in pens, pencils, racks, and writing materials generally. As this firm has agencies in nearly all parts of the world its price lists would be found very useful. The "Novelty" paper fastener shown by this house is a really capital little invention.

A new patent safety envelope was exhibited by Mr. Harris, Reading, Isle of Wight, which is made in such an ingenious manner that it seems impossible for the contents when once it is fastened to be interfered with.

Paper Making and the paper-trade journals of all nations were on view at Stand 80, the *Paper Trade Journal* attracting considerable attention, which was, however, rivaled by the admiring surprise with which that splendid journalistic and commercial achievement, the summer number of THE AMERICAN STATIONER, was regarded; the opinion being warmly expressed that it was, in every way, a triumph of business enterprise and technical skill. W. F. C.

CHOPS FROM CINCINNATI.

[FROM OUR REGULAR CORRESPONDENT.]

CINCINNATI, September 3, 1883.

The event to-day in this city was the burning of Henry Dremar & Co.'s rag warehouse on Walnut street, east side, just south of Sixth street. It was formerly the house of McCall & Dremar. The concern is well known here and is a highly respectable concern. It dealt in twines and brown papers in a commission way, as well as in rags. Two five-story buildings of brick, fronting on Walnut street, were filled with rags from ground to cellar. In the third story were twenty-five girls at work sorting rags, and there were half-a-dozen other persons on the several floors above the ground when the fire broke out. In the business room on the first floor were proprietors and porters. It was three o'clock in the afternoon when the fire broke out. Accounts differ as to its origin. Some say that a burning gas jet was accidentally brought in contact with a pile of greased rags, others tell the story that the greased rags burst into flames from spontaneous combustion. No matter. The fire started, and in less time than it takes to count a score, the building was filled with smoke and hot air, and its inmates were frantically rushing from the building. To-night the whole building lies a mass of charred ruins, in which rest in the sleep of death five human beings, while with wakeful eyes and aching hearts, anxious friends and relatives pace the streets near the ruins where

their dead darlings lie imprisoned in the black grime and gloom of that dismal heap. With windows, doors, and hatchways open the flames shot from cellar to roof, and quicker than thought filled every floor with scorching air, and blinding, suffocating smoke. Mary Flynn jumped from a third story window to the street and was carried home seriously hurt. Dora Menken and Stella Meiers sprang from the second story window to the brick sidewalk and were unhurt. But they told of a girl they left behind them who would not venture to jump and must have perished in the flames. Parents and friends to-night have sought in vain everywhere for Nelly Kelly, Rosa Liddie, Mary Burke and Annie Lynch. Old Mrs. O'Donnell failed to come home and has not been seen. All of these were in the building at work when the fire started and none of them have been seen since. There is only one inference as to their fate. "Gus" Huber, a packer, rushed from the third floor to escape by the stairway. He got to the sidewalk and fell unconscious, fearfully burned. A man on the street was struck by a hook-and-ladder wagon and killed. The wall of the building fell out into the street on two ladders on which were three firemen fighting the flames. One fireman saw the danger in time and slid from the ladder to the ground, but knocked a companion off on his way down. Another clung to the upper half of the ladder which the walls had snapped in twain, leaving the part with the man on it dangling from the corner of a window sill. He climbed to the tottering window sill, sat on it, waved his hat to the cheering crowd, descended in safety a ladder raised for him, only in time to escape another crash of falling walls which crushed the ladder that saved him, and filled the street with dust and debris.

The money lost by the fire to Dremar & Co. is put at \$35,000 and it is supposed to be well covered by insurance. The *Times-Star*, office next adjacent, was damaged from \$10,000 to \$15,000, chiefly in its composing room. The presses are intact. Insurance covers their losses. The damage to the *Times-Star* building will not be less than \$5,000, perhaps \$10,000. The *Times-Star* had run off one edition and was preparing the work of its last. Its editorial rooms, library and counting-rooms were drenched with water. This is enough casualty for one letter.

A much more pleasing theme is that of a newspaper enterprise just started here. It is a weekly illustrated journal, the same size and form as *Harper's Weekly*. "*The Week Illustrated*" is its title. It made a good first impression in typography and in illustrations. Some of the illustrations were not good, but they were not very bad, and some of them were excellent. The paper was good and the typography very fine. McDonald & Eick do the printing. If the paper improves steadily it will not be long in taking rank as a first-class illustrated paper. Percy Proctor, city editor of the *Commercial Gazette*, is its editor and proprietor.

General business is fairly good. Confidence has not been shaken by failures here and elsewhere. The feeling for an improved fall trade is good. On the 5th the exhibition opens, and that always makes business lively while it lasts.

The stationers are not complaining. Just now the school-book trade is lively. Another week will tell better what the prospects are for a good solid autumn's business. PRINCE WILLIAM.

Mere bashfulness without merit is awkward, and merit without modesty insolent. But modest merit has a double claim to acceptance.

THE METROPOLITAN DAILY PRESS.

VI.

IL PROGRESSO DE ITALO AMERICANO.

Il Progresso de Italo Americano, the first Italian daily paper published in this city, was started on September 29, 1880, under the title of *Il Progresso de Italo*. On December 13, 1880, the name of the paper was changed to the title which it now bears. The founders of this journal were C. Barsotti and V. Polidori, who are its present publishers and editors. Its circulation, at present, is about 3,050, which is distributed throughout every part of the country. The capital invested in the concern is about \$30,000. The paper is independent in politics and very liberal in the discussion of political affairs. It is the organ of the Italians in the United States and is ably managed and edited. It is sold at three cents.

LAS NOVEDADES.

The Spanish journal known as *Las Novedades* is now in its eighth year, having been established in 1875. Considering the important foreign element it represents, it deserves more than a passing notice. The founder of *Las Novedades*, on the death of José Ferrer de Conto, purchased from the latter's widow the good will and type of the *El Cronista*, then the Spanish government organ in this city. The proprietor and founder of the *Las Novedades*, José G. Garcia, retained the title of this journal, as he very properly felt that it would be impossible for him to adopt the name of *El Cronista*, because, through hostility to the Cubans during the Cuban insurrection, that journal had become unpopular among Spanish-Americans, and because he desired to maintain a strictly neutral standpoint in Spanish and Spanish-American politics. This he has done greatly to his credit.

Las Novedades is the daily Spanish paper, not only of New York but of the United States, and is most ably edited by Juan L. Tribas, a Cuban by birth, who was educated at Madrid, Spain, where he received a fine college education and obtained the degree of *Licenciado*. Since 1867 there has been a large Cuban-Spanish element in New York, refugees with their families, together with large numbers of Spanish-American merchants, clerks, &c., so that at the present time the Spanish-American element in this city is, next to the German element, the most important element, socially and financially, in the metropolis, being larger than the French, and though not as large as the Italian, is of far greater importance, the latter being mostly composed of the laboring classes. It will be seen, therefore, that the circulation of *Las Novedades* is very large, and growing.

TRADE-MARKS.

By a recent decision of the Commissioner of Patents concerning trade-marks it is declared that a word merely descriptive of an article of trade, of its qualities, ingredients or characteristics, cannot become a lawful trade-mark by virtue of a change in its orthography to that of a foreign language in which it possesses the same meaning. This decision will have the effect of terminating several important trade controversies, and will doubtless prevent much controversy in the future. The commissioner says that the office has no right to register alleged trade-marks which have been declared by the courts to be invalid, and hereafter it will not do so.

Pleasure is the reward of moderation.

OLD BERKSHIRE MILLS

CHARLES O. BROWN, President.

DALTON, MASS., U. S. A.

JOHN D. CARSON, Treasurer.

One party writes: "The two hundred RECORD BOOKS, for 83 of the 99 Counties, now on exhibition at the Iowa State Fair, at Des Moines; and all, but four (!) of them, made from your 'OLD BERKSHIRE MILLS LINEN LEDGER,' Medium, 40lb., make a splendid show."

[The above cut is a fac-simile of the wrapper used on the Linen Ledger Paper.]

We will pay for any book rejected on account of fault in the paper. Send for Samples, test them in comparison, and see that your books are made from paper thus water-marked.

LINEN LEDGER PAPER

Will stand the severest
test of COLOR, CLIMATE,
INK OR WEAR.

Being Triple Sized (a process entirely our own) and Loft Dried, can be erased and written upon the fifth time distinctly. None genuine without the water-mark, thus—Old Berkshire Mills Linen Ledger, and date.

CARSON & BROWN CO., Manufacturers.

Extra Fine Papers

Manufactured by

Z. CRANE, JR., & BRO.,

DALTON, MASS., U. S. A.

These Goods, which are acknowledged to equal the finest foreign manufactures, are presented in the following styles and qualities:

SUPERFINE QUALITY.

In handsome Light Blue Boxes containing one-quarter of a ream of Note Paper each, and bearing in blue letters description of contents.

In separate Boxes of uniform size, are one-eighth of a thousand Envelopes corresponding in tint and quality to the paper.

EXTRA SUPERFINE QUALITY.

In attractive Lavender Colored Boxes containing one-quarter ream of Extra Fine Paper each, with contents printed in red. Corresponding to this, in like Boxes, are Envelopes to match.

All this Stationery may be relied on to be according to representation. It is suited to the tastes of the most select trade.

In addition to the above lines, our other Specialties are put up with care, in attractive and substantial form. Goods can be seen at the Mill, or at our New York General Agency, GEO. B. HURD & CO., 79 Beekman Street.

SEASON 1883-1884.

SEASON 1883-1884.

L. PRANG & CO.'S

Christmas and New Year Cards.

WE beg to express our thanks to our patrons and friends for the kind and flattering appreciation of our past efforts, and feel a pardonable pride at the very emphatic endorsement which our Cards have received from the American, English, German and Australian press. With one accord these exponents of public taste have given our Cards the first rank over all similar productions in the market. We are bound to maintain this superiority; and we have, as heretofore, spared no expense to create, with the aid of our enlarged experience, a Series of Novelties for the Christmas Season, which, we have no doubt, will meet the expectations of the Trade. We have been singularly fortunate in procuring the assistance of, we may say, **REPRESENTATIVE AMERICAN TALENT** in the preparation of designs, and besides have secured the coöperation of some of the most **EMINENT EUROPEAN ARTISTS**.

OUR LINE IS NOW COMPLETED, and our agents are on the road to call on our patrons and friends. An inspection of the Sample Books will convince them that in regard to **ORIGINALITY AND VARIETY OF DESIGN, EXCELLENCE AND RICHNESS IN EXECUTION**, it far exceeds our last year's efforts. To give an idea of the high artistic order of the line, we would say that it comprises:

FIGURE DESIGNS by Miss DORA WHEELER, Miss ROSINA EMMET, Miss L. B. HUMPHREY, Miss L. B. COMINS, ELIEU VEDDER, WALTER SATTERLEE, A. F. BROOKS, and others.

LANDSCAPE DESIGNS by W. HAMILTON GIBSON, THOMAS MORAN, F. L. SMITH, and others.

ANIMAL DESIGNS by B. E. BENSELL and HARRY BEARD.

FLOWER AND BIRD DESIGNS by Miss FIDELIA BRIDGES, Mrs. O. E. WHITNEY, JEAN ROBIE, of Brussels; H. GIACOMELLI, of Paris, and others.

THE LITERARY MATTER in connection with our designs has been carefully attended to—among others, by Mrs. CELIA THAXTER, Mrs. EMILY SHAW FORMAN and JOAQUIN MILLER.

OUR REGULAR LINE of Christmas and New Year Cards will comprise plain cards, fringed cards, and double fringed cards, varying in price from 30 cents to \$60, per set of 12.

PROTECTORS are furnished with all fringed cards, and also **ENVELOPES** for all series costing \$1.80 per set and more.

Besides our **REGULAR LINE**, we would call special attention to the following

NOVELTIES AND SPECIALTIES:

ALADDIN'S LAMP. This is one of the most elaborate and elegant Christmas Gift Cards we have ever offered to the trade. It is a large folding card, heavily fringed, and provided with a leatherette protector. The front outside page is a design of peacock feathers on satin; the left inside page contains a poem specially written for this gift by JOAQUIN MILLER, also on satin, and surrounded by a delicate border of Oriental design; the right inside page presents Aladdin bearing his lamp, after a painting by the eminent American artist, ELIEU VEDDER; and to complete the whole, the back is embellished with a most unique, artistic design of high order.

RUSKIN CALENDAR FOR 1884. At the solicitation of some of our business friends, we have this year decided to bring out a Calendar, and are happy to be able to announce that we shall issue **A CALENDAR FROM JOHN RUSKIN, FOR 1884.** This consists of an artistic mount with a block calendar, having suitable selections from JOHN RUSKIN's works for each day of

the year. The selections have been made by a lady well-known for her cultivated taste and judgment. The mount has been designed by a well-known Boston artist, and, coming from her thought and tasteful skill, the form and decoration will be a fitting accompaniment to the words within. This Calendar will be a source of pleasure to all who love and appreciate RUSKIN, that they may have every morning a jewel from the treasure of his noble and earnest thought.

"THE CHRISTMAS SHEAF." A folding card, with inside pages, in color, stamped out in the shape of a sheaf of wheat. Tied with silk cord and tassels.

"THE CHRISTMAS BOOK." A surprisingly natural representation of an open book, with floral designs by Mrs. FISHER, and original poems by JOAQUIN MILLER.

CHRISTMAS ART PRINTS ON SATIN.

The great success attending our efforts in this line has induced us to bring out a number of new Series, consisting of Flowers, Landscapes and Figure Designs. The cards are elegantly finished in several styles, in fringed tinted mats, with cord and tassels; on mounts, with silk fringe and cord; in book form, richly fringed and with leatherette protectors, and on rich Plush mounts. Prices vary from \$1.50 to \$3.50 each.

We have made large additions to our **BIRTHDAY** line, comprising Plain Cards, Fringed and Double Fringed Cards and Art Prints on Satin. Numerous Series at popular prices have been added to our list of **SCRIPTURE TEXT CARDS**. New **FLOWER PIECES** in Mats, &c. **THANKSGIVING CARDS**,—Our line will also be shown now.

Descriptive Price Lists of our **CHRISTMAS** and **NEW YEAR CARDS** are now ready, and will be sent on application.

Paper & Printing Trades Journal

[QUARTERLY.]

Subscription—2s. PER ANNUM, Post Free.

POSTAGE STAMPS RECEIVED IN PAYMENT.

IT is simply the best got up and most ably edited journal of the kind which is published. The general reader will find much in it that will amuse at the same time that it instructs, while the printer will be astonished by the great variety and excellence of the type with which it is printed.

The Clerkenwell (London) Press.

Every Printer, Stationer, Paper Maker, Book-seller, Author, Newspaper Proprietor, Reporter, in fact everyone interested directly or indirectly (and who is not?) with Printing and Paper, ought to subscribe.

"I consider this the best paying investment I have entered into this year." (From F. W. TALBOT, Printer, 19 Sussex Street, Cambridge.)

Thousands of letters of this character have been received.

Useful Trade Tables, Trade Information, Heaps of Wrinkles, Sprightly Articles, Amusing Gossip, in every issue.

* * OVER 400 APPLICATIONS for goods have been received by an extensive manufacturing firm in London from a single advertisement in THE PAPER AND PRINTING TRADES JOURNAL.

Trade Novelties.

[We will be glad to receive samples of all novelties issued in the trade, and will notice all such which possess merit free of charge. It is desirable to accompany descriptions with cuts whenever possible.]

LIBRARY BASKET.

Decorative taste has been frequently expended on the waste baskets used in the library or office, but the effort to make these useful articles has been somewhat circumscribed by the fact that there has been little variety of form or material. The disposition to seek finer goods and more elegant forms for the appurtenances of the office or library has become so pronounced that the line of invention has been particularly directed to every useful article. An example of this is shown in the Library Basket, of which an illustration is given. Baskets of this design are made from selected woods in walnut, ash and mahogany. The elegance of their design and finish makes them a desirable addition to a finely furnished office or library, and as they are substantially made they are expected to outlast several ordinary willow baskets. The size is 11 inches square, 16 inches high. R. R. Watson, New York, is the agent.

THE GAME OF BOMBARDMENT.

One of Milton Bradley & Co.'s latest novelties in the line of toys is shown in the accompanying illustration. It will probably be a very taking game. This is a toy and game combined, and may be played by one or more. The box inverted forms the base of the fort. The larger block and two of the smaller ones have dowel pins, by which the two smaller may be secured to the box near the front side and the larger to the two others, joining them at the top and forming the central opening. One of the cannons and the base of the flagstaff have dowel pins by which they are secured to the box. Having set up the three blocks, the cannon and flagstaff securely, the other four blocks are set up, two at each end, loosely, as shown in the cut. The blocks marked 10 may be placed at the top or bottom, at pleasure. If shooting at short range it may be better at the bottom instead of at the top. This completes the fort. The redoubt is formed of the two parts of the cover set into small supports or feet, behind which the siege gun is placed on its carriage, as shown in the cut. To commence the game, the red flag is run up and secured by engaging the small ball on the halyards with the pins on the trip at the bottom of the staff. In order to render the game harmless, the cannon on the fort is a dummy and not to be loaded with a ball, but the loading is represented by drawing back the breech plug and swinging the trip pin into the notch in the piston. If there are two players, one at first becomes the attacking party and the other the defensive, the attacking taking the siege gun and the defensive assuming

charge of the fort. The attack plays by firing a marble from his gun at the fort, endeavoring to knock down the corner blocks, each of which counts 10, or to hit the flag trip and thereby run down the color flag and run up the white flag indicating surrender. The first shot may knock down one corner block, the second may take the other corner block, and the third may hit the flag trip and cause a surrender, thus counting 50 in addition to the two blocks of 10 each, making 70, which is the greatest score for

LIBRARY BASKET.

the three shots constituting a round. If the first or second shot brings down the flag no more shots can be fired in that round. If either shot hits the cannon trip and discharges the cannon,

play, the players may divide into sides, all the members of one side shooting in succession and scoring, then the other side. One player on the defensive must watch to notice if his cannon is discharged, and if so have it deducted from the score of the opposing side. If only two play, three rounds may form a game or siege, and the total is the net amount of the gains, less the losses in the three rounds. If several play on two sides, one round for each player may be a game; and in that case the score of a side is the net sum of all the gains on that side, less the losses of that side.

TYPE-WRITING RULER.

A new device is a type-writing ruler, which is intended to accomplish, by means of a simple ruler, sliding guide-plate, and appropriate type conveniently placed, any work now executed by the more expensive type-writers; also to provide a more convenient means for using all kinds of metal or wood type in printing addresses or other matter upon cards, envelopes, package wrappers, posters or show-cards, and other uses where stenciling or other methods are less practicable or desirable.

The invention consists in a type-writing ruler having a bed-plate, which is made wider than the ruler, so that its side parts will project beyond the side edges of the ruler to serve as a table to support the paper while being operated upon. To the end parts of the bed-plate are attached upwardly-projecting pins to enter holes in the end parts of the ruler, and serve as guides to bring the said ruler into proper position, and as guards or stops to keep the said ruler in position. Along the upper side of the side edges of the ruler are formed raised angular flanges, to serve as ways for the guide-plate to slide upon. The upper part of the sliding plate is bent over at an angle to fit and slide upon the angular edge of the ruler. Upon the end of the plate is formed, at right angles with the plate itself, an outwardly-projecting flange, to serve as an accurate guide in using the types. Upon one or both of the angular flanges is formed a scale of division marks, to serve as a gauge in printing and also to adapt the ruler to serve as a rule when desired alone.

In using the implement the ruler is raised upon or removed from the guide pins, the paper to be printed or marked is placed upon the bed-plate, and the ruler is returned to its place and pressed down or held down with ordinary rubber bands upon the paper. The type of the first letter of the name or other word to be formed upon the paper is in the right angle between the side edge of the ruler and the end flange of the sliding plate, and is pressed down upon the paper. The type is then restored to its place and the type

of the next letter is taken, inked, used, and restored to its place, and so on until the desired name has been formed, the sliding plate being moved forward after each type has been used such a distance, according to the gauging marks that proper space will be left between the letters.

THE GAME OF BOMBARDMENT.

that counts a loss of 25, as indicated on the back of the redoubt blocks. One player having shot one round of three shots (or less if the flag is struck,) the fort is put in order again and the other player shoots. The fort cannon cannot be loaded during a round. If more than two

HAND-CUTTER, WITH STEAM FIXTURE.

THE PARSONS PAPER COMPANY,

— HOLYOKE, MASS., —

In addition to their already extensive establishments at Holyoke (which rank among the largest mills in this country), have recently built a separate mill, specially constructed and equipped for the production of the Best Grades of Linen Papers, and are now manufacturing all the various sizes and weights of BOND, PARCHMENT, BANK-NOTE, AND LEDGER PAPERS. They have already demonstrated their ability to produce of these papers a quality EQUAL TO THE BEST ESTABLISHED BRANDS IN THE MARKET.

Having great strength of fibre (an essential requisite in all Legal, Government and Commercial Papers), they are recommended for use in Bonds, Deeds, Certificates, County and State Records, etc. They are thoroughly sized to stand writing upon with fluid inks, and will permit of repeated erasures and re-writing thereon, when required. Great care is exercised to produce uniformity of color, strength and finish, and to do this, they have the latest improved machinery, specially adapted to the manufacture of Linen Papers.

They would call the attention of the Trade to the following brands, which are their trade-marks, viz.: In all Bond, Bank Folio, and Parchment appears the water-mark

"PARSONS PAPER COMPANY, HOLYOKE, MASS."

The Ledger Papers, of which they manufacture two Brands, are water-marked

"PARSONS LINEN LEDGER."

"SCOTCH LINEN LEDGER."

It is the intention of the Company to maintain the quality of these brands equal to any in the market.

IN answer to frequent inquiry made about our Novelties, we will furnish a

Trade Gossip.

All new goods and designs which are not, strictly speaking, "Novelties" will be noticed under this head. The trade are requested to forward descriptions with samples in order to secure proper notice.

Karl G. Gillig, newsdealer, Peoria, Ill., died a few days ago.

Tilton & Butler, publishers, New York city, have dissolved partnership.

Maynard Brothers, publishers, Moberly, Mo., have sold out to Robert Freeman.

C. T. Tenenrider, publisher of the *Lake County Star*, Tiptonville, Tenn., has sold out.

J. H. Neal, publisher of the *Grant County News*, Cañon City, Ore., has been succeeded by M. H. Abbott.

The establishment of August Dahler, toy manufacturer, Morrisania, N. Y., has been damaged by fire.

S. Langsdorf & Co., manufacturers of velvet frames, &c., New York city, advertise a dissolution of partnership as having taken place on June 4.

A. Orr, of Schenectady, has been in town for several days ordering stock for a large stationery store which he has recently opened in that place.

Hard & Parsons report a lively business in their special line of note papers known as the "Autumn Leaves" and "Paleographic" designs.

Mr. Choate, of the firm of French & Choate, is making an extended business trip through the West. He sends quite an encouraging report of trade.

J. E. Wallace, bookseller and stationer, Paola, Kan., has admitted George Hall to partnership. The new firm will do business under the style of Wallace & Hall.

A dissolution of partnership has taken place in the firm of D. Brugman & Co., publishers of the *Critic*, St. Louis, Mo. The business will be continued by D. Brugman.

John Pincus, stationer, No. 1,396 Second avenue, New York, has placed the management of his business in the hands of his wife, he having other matters to attend to.

A dissolution of partnership has taken place in the firm of Eckstein, Hoffman & Porr, lithographers, New York city, J. H. Hoffman retiring. The business will henceforth be conducted under the style of Eckstein & Porr.

The Eagle Pencil Company has just introduced a new line of pencils to meet the wants of stenographers. They are made in two grades of soft and fine, and are very well adapted for stenographic writing. They are well worth a trial.

E. & H. T. Anthony & Co. have recently added to their stock of household decorations a fine line of panel stork figures composed of papier-maché colored in imitation of bronze. These are very ornamental and will no doubt prove very salable.

F. Klemm, who has been for a number of years the business manager of the art firm of L. Prang & Co., Boston, has been appointed manager of the New York agency of the firm to fill the vacancy caused by the death of Max Greibel. Mr. Klemm's long experience and natural fitness for the position make him a worthy successor of Mr. Greibel.

The rush in the fall trade of the Powers Paper Company has commenced much earlier this season than at any time since the establishment of the house over thirty years ago, and its mills and factories are being run to their utmost capacity to keep up with orders. The New York agent, J. L. St. John, at 62 and 64 Duane street, states that he attributes this state of affairs principally to the fact that the demand for novelties, even in staple lines, has been fully and generally met by his people, not only in the lines of papers, by the introduction of many new and effective tints, but by placing them in the papererie line, and in connection with handsome boxes, in plush and hard-wood, with nickel ornamentation, and to the knowledge among buyers that prices have reached "rock-bottom." The salesrooms here are filled with samples, comprising every grade, size and weight, in flat and ruled goods, envelopes, papereries, diaries of every size and quality, special line of Christmas-cards, imported especially for this trade. Auto-graph albums and year-books in every style, with blank-books of every conceivable pattern. Being manufacturers and importers, buyers are assured of dealing strictly with "first-hands," and that goods are sold only to "the trade." Visiting members of the trade are invited to call and get prices, &c., before placing their orders.

Charles J. Cohen, Philadelphia, sends his price-list, No. 49—twenty-first edition—just issued to meet the recent decline in the prices of envelopes. Mr. Cohen claims for all goods of his manufacture that they are carefully and accurately folded, well tipped and put up in strong boxes with attractive bands and labels. He makes a specialty of furnishing, for the trade only, special sizes of envelopes in either large or small quantities. This price list, with samples, is furnished to the trade on application.

Hergesheimer & Miller, Philadelphia, proprietors of Watson's patent envelope sealer and opener, find a very good sale for this article, which it is expected will certainly have a great success in the trade. This envelope sealer and opener dispenses with the old and unpleasant practice of moistening envelopes with the tongue, which is sometimes very dangerous. It is also said to be the most perfect envelope opener ever offered to the stationery trade.

Henry Levy & Son, 477 Broadway, are manufacturing superior writing-desks, made of thoroughly seasoned wood, and which, it is said, are not liable to warp. They have introduced some unique and novel shapes, utilizing every part of the desk for some useful purpose. These desks can be sold at such prices as to bring them within the purchasing power of all classes of buyers.

The death of Max Greibel leaves a vacancy in the business management of the Palmer Art Company, he having held the position of treasurer of that concern, which was only organized a short time ago. It is expected that a new treasurer will be appointed in a few days. As yet no steps have been taken in that direction.

Firms wanting the services of a lady expert in decorating, either in water or oil colors, can be placed in communication with such a person by applying to the office of this paper.

Edward Groesbeck's printing office, on the second floor of the building No. 93 Maiden lane, New York, was damaged by fire on Monday night to the amount of \$2,000.

Max Cobe, who bought J. H. Lamay's stock of wall-papers at Holyoke, Mass., is holding a "bankrupt" sale of the goods.

William H. Booth, publisher, Perryville, Mo., has sold out.

Wilkins & Co., book agents, Washington, D. C., have dissolved partnership.

Horace Drew, of Jacksonville, Fla., is expected in town within a few days.

The Dixon Pencil Company's erasive rubbers, twenty-four kinds, are having a good run.

W. A. Smith, publisher of the *Sentinel*, Charlevoix, Mich., has been succeeded by Smith & Parmalee.

Charles E. Hynson, of the firm of B. T. Hynson's Sons, dealers in paper-hangings, Baltimore, Md., is dead.

Allen & Molo and Allen, Molo & Watkins, composing the Jockey Toy Company, New York city, have dissolved partnership.

S. M. Halliday, St. Paul, Minn., paper and picture-frame dealer, has made an assignment, and his stock is under an attachment.

J. Myers and Phineas B. Myers, manufacturers of paper boxes, New York city, are doing business under the style of Skidmore & Co.

The paper mills at Fairview, Pa., owned by H. F. M. Watson, Erie, Pa., have been destroyed by fire. Loss estimated at \$60,000; partly insured.

Parsons & Sillers, dealers in paper-hangings, &c., Philadelphia, Pa., have dissolved partnership. Each continues business on his own account.

Ed. Huber, business manager for Eberhard Faber, has been absent in Boston for several days attending to business connected with his house.

C. W. Brown, manager of the Philadelphia branch house, of the Jos. Dixon Crucible Company, reports a very good trade in office and drawing pencils.

J. L. Shoemaker & Co., have got out a very stylish sample card of silk head-bands. The card is in the shape of a fancy letter "S," to which the samples are neatly attached.

Selchow & Richter are introducing two novelties in toy-savings banks, called respectively the Heathen Chinese and the Gymnasts. A description of these toys will be given later.

Samuel Bard, proprietor of the Mansfield Paper Mill, Mansfield, Ohio, has sold out to Frank J. Bard, W. A. Bard and Jacob Stager, who will do business under the style of the Mansfield Paper Company.

Chas. Carr, Boston, sends samples of work done on one of his No. 2 bookbinder's wire stitching machines. In one instance the sheets are stitched one inch in thickness, and the work is effectively done.

Henry Kramer has rented the "Old Dominion" paper mill at Richmond, Va., from James C. Smith who has retired from the paper manufacturing business. Mr. Kramer has heretofore been manager of the mill.

J. E. Mason, Galveston, Tex., forwards a card which is quite taking as an advertisement. One side of the card presents his business compliments and the other side presents the form of a book with an illuminated cover. The design is that of Wolf, of Philadelphia.

C. M. Ward, Eastern Agent of The Globe Files Company, 28 Bond street, New York, reports a constant and healthy demand for all of his numerous specialties, the most prominent of which is the "Leader" letter file, which has found general favor among consumers. The Globe letter filing cabinets have lately received several

improvements which enhance their value for office use.

Scott & Hardy, publishers of the *Chieftain*, Oneida, Kan., have dissolved partnership.

G. M. Franklin, dealer in stationery, &c., Hamilton, Ont., is advertised to be sold out at auction.

Mr. Jones, of the firm of Berlin & Jones, dealers in envelopes, is spending a brief vacation at Lake George.

Thompson & Sons, dealers in sporting goods, New York city, have dissolved partnership; Yerrington & Kellogg continue.

The Powers Paper Company is receiving large orders for its standard diary, and gives a glowing report of its trade in papeteries.

Klaunberg & Gore, booksellers and stationers, Carlinville, Ill., have dissolved partnership. Mr. Klaunberg continues the business.

A novel and extremely neat little thing in desk furnishings has been brought out by the Eagle Pencil Company. It resembles a pencil-case, but in reality contains a knife-blade, which, falling from the case upon pushing a spring, is held by a grip when it has reached the proper limit and the spring is released. The knife returns within the case on relieving the grip by again touching the spring and holding the blade in position to fall back. It is a taking novelty.

The following named tradesmen have been in town during the past week: Mr. Collins, of Collins, Heyl & Co., Pittsburg, Pa.; A. Orr, Schenectady, N. Y.; M. Miller, Lampasas, Tex.; B. Steenbergh, Seagirt, N. J.; Mr. Rowdish, of Rowdish & Gove, Rural Grove, N. Y.; E. E. Marsh, Bloomfield, N. J.; H. Strait, Stockholm, N. J.; George Hughes, Jacksonville, Fla.; Max Elser, Forth Worth, Tex., and W. H. Decker, Scranton, Pa.

James D. Whitmore & Co. are offering some new designs in papeteries and card cabinets; also some late novelties in wedding stock. This firm reports business to be in a very satisfactory condition, and feels much gratified with the reception accorded its fall line of holiday boxes. Dealers who ordered sample shipments only have forwarded their orders for stock, and the firm has its hands full in keeping up with the demands of the trade.

The "Climax" blotting paper, made by the Richmond Paper Manufacturing Company, is pushing its way strictly on its merits. It is an excellent absorbent, and is made full weight. These are characteristics which ought to commend it to every buyer. Miller & Flinn, the well-known paper dealers, write to the manufacturers as follows: "The shipment of 'Climax' blotting in white and colors has come to hand, and we find the paper fully up to the promise made in the samples originally sent us. Accept our congratulations to you for your signal success in turning out so good a blotting—one that, to say the least, is as good as any other."

Rosenbaum & Co., Philadelphia, are now taking orders from the trade, for their beautiful Christmas cards which had such success last year. All of their samples are new. Among them are: A cross beautifully painted, mounted on white satin and plush; landscape, painted by hand on red plush and white satin. A circular card with white satin and plush, surrounded by artificial foliage and embroidered designs will certainly meet with success. Another very tasty card is a combination of panels with two colors of plush, hand painted. Some oval cards of different shapes and designs are in great demand. One of the best articles manufactured by Rosenbaum & Co., is in the form of a satin panel (which comes in different colors) with a slipper in the centre, the slipper containing artificial flowers. This firm has also a great assortment of porcelain, decorative and "arabesque" cards.

W. Irwin Martin, of Samuel Raynor & Co., returned on Saturday from Europe, and made his reappearance at the business offices of the firm on Tuesday. He was met with smiling faces: his desk was decorated with flowers and wreaths, and a committee of young ladies, chosen by the employees, took him in charge and conducted him to the factory, where he was heartily welcomed, and speeches of greeting, with other expressions of regard, not being wanting.

Irvine & Beeson, booksellers and stationers, Eufaula, Ala., have dissolved partnership. The Eufaula bookstore succeeds the old firm.

Joseph Tillman, publisher, Way Cross, Ga., is advertising to sell out.

CASTING STEREOTYPE PLATES.

There are several methods of making wooden or other cores in or through a stereotype or electrotype block, whereby the cores or mounted blocks are partially covered by the metal; but such cores or mount-blocks are constantly liable to warp or swell from the water when forms are washed, and thereby become injured or useless. To avoid this difficulty and with a view to cheapness, special permanence and durability, a new method of preparing a core for casting has been devised.

The wood or other material is placed over the casting-box, where it remains until it becomes sufficiently hot, the ends being previously

scratched, with a gage to indicate where the points of the supports (usually three) are to be set or driven.

When a stereotype is to be made the matrix is placed in casting-box in the usual manner, and the core is set in place by means of the supports, two of which are usually in the lower end of the box and one at the upper end of the box. The inclosing side and pieces being in place between the lid of the casting-box and the molten metal for the block ready to pour, the upper support is covered with stereotyper's paste on the upper side only, to prevent it melting when the metal is poured against it, and so lose the support for the core. This proceeding is had when the stereotype is made and the core covered at one operation.

When a stereotype or electrotype plate is already cast and is ready to be mounted on a block another mode of working is followed. The electrotype is "backed" in the usual manner and "straightened" or "planed," or, if a stereotype, is planed, as is usual, before mounting. Then, laying the face against the bottom of the casting-box, the core is placed on the back, and strips of tin-foil put around the edges, which strips are to be fused when the metal is poured. Then some pieces (two, three, or four), of fusible metal, just thick enough to fill the space between the core and the lid of the casting-box, are placed on the back of the core, and the inclosing side and end bars set as in the first case, when the same is ready to receive the molten metal. If the stereotype or electrotype plates are old or long cast or corroded in any way, the edges around the outside of the core where they are to fuse with the new flow of metal are usually scraped bright and the tin-foil placed in the joint the same as before. If the metals to be joined are similar in alloy, it is not always necessary to use the tin-foil; but any of the common acid fluxes may be used, and the result be the same—a good joint.

A block made in the above way is waterproof, is not affected by the air in any manner, and has other valuable features. These blocks also require less metal than those of partially-inclosed cores with ends or sides open to dampness; and in the case of stereotype and electrotype plates previously made ready for mounting, the inclosing metal may be of a commoner and cheaper sort, and barely thick enough to flow and cover the cores, greatly reducing the expense of such blocks.

GOLD PENS.

• WRITTEN FOR THE STATIONER.

(Concluded.)

The pen next goes to the point-cutting lathe. After the pen is carefully adjusted in a swing frame, the diamond or iridium point is brought centrally upon the edge of a thin copper disk, about three inches in diameter, kept in rapid motion. The edge of the disk is charged with fine emery and oil. The iridium is soon slit into two points, and thus is laid the foundation for the slit of the pen. The pen next goes to the slitting lathe. With this the slit is extended from the points to the full length of the nib. A very fine circular steel saw is used and the skillful workman uses no guide. A fine hand-saw is used to perfect the end of the slit, which must end exactly perpendicular to both sides. This prevents the slit or pen from cracking further up and spoiling the pen. The nibs are next burnished by the use of a hammer, burnisher and stake. The pen is burnished on both sides to remove all unevenness.

After leaving the burnisher the pen is ready to receive the most important part of its construction. This it gets from the grinding lathe, which consists of one large and two or three small copper wheels and one tin slitter, fitted on a steel spindle running on true centres and finely finished. The tin slitter is charged with fine emery and oil. The grinder at once applies the pen to the slitter, so as to make the inside surfaces of the slit and points exactly flat and set them easy together. Unless this is well understood by the workman, and carefully done, a perfect writing pen is impossible, for he will leave it with a crooked or uneven slit. The great object in having the inside edges of the slit square and true is to prevent the nibs from crossing or slipping by each other.

The slit being made perfect, the pen is next fitted into the grinding-holder, made of steel, the diamond point alone projecting from it. It is then applied to the copper wheel in the grinding machine, and the points are ground on the sides, back and end until the proper shape is secured. This is a very difficult operation, requiring much time and skill. A good workman cannot grind and smooth over thirty pens in a day.

The pen is next thoroughly tested, and if it proves satisfactory, it goes to the polishing lathe, which has wheels covered with cloth of felt charged with rotten stone or tripoli. After being polished it is nibbed on the inside of the nibs with Scotch stone. This roughens the nibs so as to make them hold ink and prevent it from flowing too freely. This done, the pen goes again to the grinder, who readjusts and carefully examines it to see if any injury was done to it while in the hands of the polisher. The points are delicately touched up, and the nibs are carefully adjusted so that they will not cross or lap over. The pens are then placed in strong alcohol, which removes the oil and other polishing materials and makes the pen perfectly clean. After drying them in fine boxwood sawdust, the pens are put up in boxes and sent to the office, where each one is carefully examined by the aid of a powerful lens. If the slightest imperfection is discovered, the pen is returned to the factory.

THE STATIONER.

DEVOTED TO THE INTERESTS OF THE

Stationery and Fancy Goods Trades.

WEEKLY--\$2.00 PER ANNUM.

Single Copies - - - 10 Cents.

NEW YORK, THURSDAY, SEPTEMBER 6, 1883.

Advertisements cannot be received for insertion in the current week later than 12 m. on Wednesday. The charge for advertising is 25 cents a line, each insertion. Special terms for standing and displayed advertisements to be had on application.

This journal aims to be a medium of information for and a representative of the interests of every one connected with the stationery and fancy goods trades. It contains a full and trustworthy survey of the market for stationery in this country, in all cases giving the actual prices at which goods can be bought of importers and jobbers in this city, together with a detailed account of novelties in the trade, patents relating to stationery, and current items of interest. A review of foreign markets and accounts of movements abroad will also be furnished, and no pains will be spared to make THE STATIONER a thorough and complete exponent of the trade.

Subscription and postage for Great Britain, per annum..... 12s.

Any information our readers may wish to obtain shall be cheerfully given, and prompt replies will be made to all inquiries addressed to us on any subjects of interest to the trade.

Communications on all trade matters are earnestly solicited. Address

HOWARD LOCKWOOD, Pres. and Treas.

American Stationer Association,

Subscribers to THE STATIONER can be supplied with the best cloth binder in the market. Deliverable at the publication office. Price, fifty cents.

Readers of this paper who avail themselves of the information obtained from its columns, by advertisement or otherwise, are requested to notify their correspondents of the source of their information.

THE business situation is what concerns the community most just now, and there is wide inquiry as to the status and prospects of trade. Whatever may be the condition of other lines of business, there seems to be a consensus of opinion in the stationery trade that, generally speaking, matters are on a satisfactory footing. Purchases may be small, but they are frequent and of late are somewhat fuller. Careful buying and selling seem to prevail, and this fact, in itself, is a strengthening feature.

In its September issue, the *Bankers' Magazine*, discussing the business situation, says: "Traders are indebted, no one knows how heavily, and are to an unknown extent in such a situation that they must sell in order to raise money to pay their obligations. When a trade is in this condition, no matter what other conditions exist, prosperity cannot reasonably be predicted of it." Assenting to the conclusion, we ask if the status of the stationery trade justifies the general assertion above quoted? We have not seen anything as yet to make it certain that such a condition exists with us; but if it does exist, it is none too soon to know it and meet it. It is for the trade to answer.

THE authority which we have quoted says that there is evident desire to push off goods, and that this, with dating bills ahead, sales on memorandum and other devices, gives proof of the anxiety of sellers to realize, and, in many cases, of their necessity. This is a fair statement, although it does not follow that these are absolutely true indications of weakness and need. Accumulated stocks may be disposed of at a sacrifice on first cost, because there may be profit in doing so and buying afresh; and dating bills ahead is an old practice which has become a sort of trade system even in the best of times. But dating bills ahead is a bad practice, which ought to be discouraged—in fact, stopped—and we have before this urged its discontinuance. As one of the incidents of former unprosperous times, it should not be permitted to endure even in the most favorable aspects of trade.

THE different labor organizations in this city made a parade yesterday, which was a demonstration of significance and in some respects of danger. We believe in the dignity of labor and in the payment of the best wages for the best work. We would not degrade the American artisan, even of the poorest capacity, to the level that is occupied by people of his class in foreign countries, but we protest against the principles declared on many of the emblems carried and ostentatiously shown in the procession. Radicalism does not mean socialism, nor the abolition of all rights of property. The suggestion of revolution is not what Americans want, and there is no reason why it should be attempted. Yet the motto "Prepare for Revolution" was displayed yesterday, and the spirit which

dictated it was apparent. What revolution yet untried does this country want? We know of none. Another motto was: "Every man should have a breech-loader and know how to use it." To the spirit in which this is conceived we say no. "Prohibit child labor," and "Down with the wage system," were other examples of misdirected thought. The child must starve and the vicious and lazy must thrive on the labor of others if such ideas are to rule. Perhaps we have given too much importance to these expressions, but we think not. They represent the views of certain people who show that they are of naturally savage instincts, and who would prey on others rather than labor diligently for support. The business community is bound to regard and study such things.

ROUNABOUTS.

BY THE TRADE LOUNGER.

Strolling along William street the other day I was led to reflection upon seeing a display in the window of a well-known house. It has been, and is, a complaint with the stationery trade that everybody has taken to selling stationery, and that the business of the stationer, as a distinct line of trade, has been hurt thereby.

I concede this, and I am free to say that there is positive public *disadvantage* in the combination of trades too widely dissociated, however *convenient* it may be. And in this fact, I might say, lies the *raison d'être* of the trade proper. To go into all of the whys and wherefores of this proposition would take up too much of your space and give me too much bother just now. I state the fact and leave those who feel interested to reason it out.

But all of this seems to have nothing to do with reflections on William street, nor with the nasty little boy on the same avenue of culture, who amused himself by playing on passers-by with a bit of looking-glass and a piece of sunlight. Now, to get back to our Southdown, I was wondering if the stationery trade ever stopped to ask themselves if they ever infringed upon the rights and privileges of other trades. This is a matter of self-communion.

I suspect that it is very difficult to find a man who can afford to throw stones. Diogenes wasn't so far out of the way in his quest, and was probably as big a rogue in his line as any with whom he came in contact. But to our window. All of this "chin-music" is the result of seeing an array of meerschaum pipes nicely displayed in the window of a well-known manufacturing stationery house. I suppose that these pipes were there for sale.

Perhaps they have been bought to give away. This is a very reasonable conclusion. Each customer is presented with a cigar-holder or a pipe. It must be so, and there is no infringement on the rights of others. One may always make a present to a friend. I don't mean to make myself a walking signboard for advertising purposes, but in view of this donation business I may just give a hint as to where the pipes are to be had. One needn't go far from Beekman street to find 'em, and J. D. W. is his name.

Walking into Berlin & Jones' I found

that Mr. Jones was not at home, still indulging in the summer resort as a thing of beauty if not a joy forever. Mr. Berlin is "waiting for his partner" to come back so as to go off on a shooting time. He is an ardent lover of the gun and this disposition leads him to take advantage of the really most enjoyable part of the year. There is nothing like autumn delights.

Mr. B. in the course of conversation brought up the subject of "dating bills ahead." He wished that the practice could be done away with. I suppose that every man in the trade will agree with him and—keep on doing the thing complained of. I beg THE STATIONER to again take up this point. Something has been said by you on this subject, I know, but you want to keep dingling it into the ears of the trade, until, like Jackson Schultz, they "get on their ear" and go the right way to work to stop it.

By the way, our friend Schultz has a great habit of getting off on his auricular appendage. I suppose that he means well, but he doesn't quite make other people comfortable.

Harking back to the envelope trade, I don't believe that they will ever be able to make a combination that will hold together. They cut prices on slight provocation and do not take the benefit of even the ordinary steady requirements of the country. Why don't they help to push the foreign trade more than they do? I believe that a Worcester manufacturer has been doing something in the export way and that he has had some satisfaction therefrom.

A lively competition in calendars is reported to be going on. The travelers in this line have been out a month and they are just plastering the trade with goods. So cheap, you know. Well, there is a demand for calendars.

I hear that George L. Pease is sick. Sorry to hear it, and hope that his illness will not prove serious. I wonder if he got sick fearing lest I might drop in on him and talk him to death.

I think that there must have been some mistake about that little rumor concerning our friend Green at Barnes', and I am satisfied that those who have been circulating the report have let their imagination run riot. It is only another instance of how much of a story can be made out of a bit of gossip. In fact, Mr. Green, equally with me, has a reputation for abstemiousness.

I was much startled to read the funeral notice of Max Griebel. It was sudden and unexpected. He was a man of artistic instincts and of a kindly disposition.

I fear lest "Count" Buchler should leave us. He complains of being ill. One wouldn't think that he was to look at him. He is going down to Florida, and will invest in a plantation and orange grove—to the extent that his means will allow, he says. He must be intending to buy the greater part of the State of Florida.

I wonder why Faber does not manufacture rubber erasers with brushes attached. There has been quite a demand for them lately, but I am told that they are no longer made. What is the reason?

I wonder why Harry — spells crude with the e before the d?

He reminds me very much of the man who, having a wagon that he wished to dispose of, stuck upon it the placard, "This wagon for sail."

When a man is so modest that he does not desire his return from Europe mentioned in THE STATIONER, he ought to be put in a band-box and kept from the gaze of —, well, of the "Trade Lounger."

I tried to see Wm. Irwin Martin two or three times this week and congratulate him on his safe return, &c. But he kept out of sight.

Please to remark that &c. It means a great deal. It means wreaths and roses and pretty girls. Would that I had been in his place. Did you hear about the reception that he got, &c.? Again that &c. It is expressive. It takes it all in.

Leroy W. Fairchild seems to be very full of business nowadays. Yet, curiously enough, he expressed the wish the other day that "he was out of the business." What does he mean?

The playing-card competition continues to keep prices below a profitable figure. Just think of the little game of bluff that the manufacturers are playing. "Pass the age."

HEARD FROM.

St. Louis, August 29, 1883.

To the Editor of The Stationer:

A man by the name of Walker, formerly with Aikin, Lambert & Co., called on us a few days ago. Your description of the Mr. Walker missing does fairly for him. We think that he said he was selling Foley's pens, but don't remember positively.

Geo. D. BARNARD & Co.

OBITUARY.

MAX GRIEBEL.

The funeral of Max Griebel, late manager of the New York house of the art-publishing firm of L. Prang & Co., Boston, was held at his late residence, No. 110 Rodney street, Brooklyn, on Monday last, Dr. Henry D. Walbridge, of the Emanuel Church, Brooklyn, officiating. Owing to the illness of Mrs. Griebel, who is an invalid, the services were of a strictly private character. Notwithstanding this there were many in attendance in addition to the immediate relatives of the deceased, chiefly neighbors and intimate friends. There were also a few present prominently connected with the trade, among whom was L. Prang, who attended, together with a number of employees of the New York house and of the Palmer Art Company, of which Mr. Griebel was treasurer. The services were very brief, and at their close the remains of the deceased were taken to Greenwood Cemetery and interred in the family plot.

Mr. Griebel's death was very sudden. He was known to be suffering from a chronic disease of the stomach, but this was not considered of an alarming character. A few weeks ago, by advice of his physician, he went to the White Mountains and the mountain air seemed to greatly benefit him, but two weeks ago his condition made it necessary for him to return to his home in Brooklyn. From that time up to his death he was confined to his bed. On Saturday morning last he expressed a hope of getting round again, but in the afternoon he suddenly grew worse and expired.

Max Griebel was born at Berlin, Germany, on

December 12, 1841. He received an excellent education, after which he was apprenticed to the large linen house of Goschenhofer & Roessicke, with which he remained four years. He came to New York in 1866. In 1874 he formed the acquaintance of Louis Prang, of Boston, who engaged him as his agent for the sale of Prang's productions. Mr. Griebel opened an agency at No. 29 Broadway for the introduction of Prang's advertising novelties. Success came very slowly, but eventually a large trade was built up. Mr. Griebel's business grew to such an extent that he moved into more commodious quarters, at No. 294 Broadway. After two years the increase of his business caused him to occupy the large four-story house at No. 38 Bond street, where the New York agency of L. Prang & Co. is at present located.

Mr. Griebel was an indefatigable worker, steadfast as a friend, and a man of a genial, liberal nature. He was a member of the Liederkranz Society of this city, and took an active part in social affairs generally.

POSTAL.

The year 1883 should be remembered for its postal reforms. The changes in the money-order system, including the reduction of the fee for orders not exceeding \$10 from 10 cents to 8 cents, have already gone into operation. The new 3-cent postal notes for sums not exceeding \$5 are now in use, and on October 1 letter postage will drop to 2 cents. The next step in the steady improvement of the service should be the reduction of "drop-letter," or city postage, from 2 cents to 1 cent, the extension of the carrier system to smaller cities, and the reduction of the \$10 money-order fee to 5 cents.

When People are Traveling Comfort and Safety are the

TWO PRINCIPAL OBJECTS IN LIFE!

COMFORT!

"The Erie is by far the smoothest road I ever traveled on, either in this country or in Europe; and I consider it the perfection of railroad traveling. With the clean, light and airy coaches, polite attendance, freedom from dust, noise and jar, we reached Chicago hardly realizing what a long journey we had performed. And then such a breakfast as we had the morning after leaving New York, at Hornellsville, is certainly deserving "honorable mention." Such a table as they have there, with a full half an hour to enjoy it, is enough of itself to attract passengers."—*Ex. U. S. Minister, E. B. Washburne.*

SAFETY!

"5,491,441 Passengers were carried over the Erie Railway in 1881. Of this vast number, only two were killed—one by falling from the platform of a car on which he insisted on standing, and the other in jumping from a train while in motion."—*New York State Engineer's Report for 1881.*

No better evidence than the above need be wanted that both of these objects are secured to the traveler who purchases his ticket over the

CHICAGO CHAT.

[FROM OUR REGULAR CORRESPONDENT.]

WESTERN OFFICE LOCKWOOD PRESS,
8 LAKESIDE BUILDING,
CHICAGO, ILL., September 3, 1883.

Although it is a little early, some people claim to have begun what they fully expect to be a good big business during the next three months. Others are not so fortunate, but are confident of an immediate and steady trade. Altogether the outlook is very flattering.

I dropped into Maxwell's, and found that the wall-paper men were busily selecting samples, making up lines for salesmen and preparing generally for an active campaign this fall. They don't advertise it, but Mr. Rhodes informed me that the house "removed the dilapidated linen from the shrubbery on pool business last year." They are not willing to say much about their line at present, but will soon do so. They will carry a line of McCaw, Stevenson & Orr's stained glass, or "Glacier" window decorations. Just at present they are having a rush on school-books and stationery, and they are cramming miscellaneous books for the holiday trade into every nook and corner where stowage can be found.

John J. McGrath has been fixing or altering or rearranging his immense wall-paper store ever since he moved into it. The offices and wholesale department were on the first floor, back of the retail department. They are now moved to the second floor front, giving more room and better light to the offices and leaving more space for the retail trade. Twenty-six men will start on the road with the firm's goods on September 15, and they are now making up samples. Mr. Stone informed me that they are having some special goods in imitation stained glass made from their own designs, by McCaw, Stevenson & Orr, Belfast, Ireland, and that they will be very much more practical than any now in the market. The house has issued to the trade an extremely handsome sheet of working designs in ceiling and wall decorations. There are twelve plates, two of them in seven colors, and the whole will be appreciated by paper dealers. If the reader has not received one he should send his address at once.

Brown, Pettibone & Kelly have received an order for work from Saratoga, N. Y.

I met R. J. Lester, manager of Bufford's Sons here on the street to-day, and he said that he had got out of the store to rest a few minutes. He is selling all of the goods that he can get right along. Sometimes he sells more than he can get, and then there is vexation. The Christmas cards of this house are being well received by the trade, and they are running eight embossing machines on them at present.

MacAllaster & Co. will have a stand in the Exposition, which opens here on Thursday next. They are just south of the Adams street entrance, and their goods will make a fine display, as they handle the best goods of every card publisher of any prominence.

Turk Brothers & Johnson have sold the water motor which they had on exhibition at Santa Fé, to the New Mexico Printing Co., of Santa Fé, and also supplied the St. Albans, Vt., Messenger with a motor, to take the place of a turbine wheel.

W. N. Lancaster was in town recently representing the Lancaster Fountain Pen Company, of New York. What success he had I did not learn.

Charles Pollock, Boston, and 109 Wabash avenue, Chicago, is about to become the agent

of the celebrated Italian photographers, Alarini Brothers, of Florence, Italy.

MAN ABOUT TOWN.

Nothing makes the world seem so spacious as to have friends at a distance. They make the latitudes and longitudes.

Market Review.

OFFICE OF THE AMERICAN STATIONER,
WEDNESDAY, September 5, 1883.

THE MONEY MARKET.—The local money market continues easy for this period, the efflux of currency to the South and West to aid in moving the crops being offset by the Treasury disbursements on account of called bonds. The chances seem to favor a comparatively easy money market all through the active business season. The stock market has shown a stronger tone during the past three days, with some improvement in most of the securities dealt in; but there is no activity, and of features of much interest there are none. Government bonds are steady, and railroad mortgages firmer, in sympathy with the share list. Bankers' sterling exchange is again a fraction lower, as are also German Reichmarks; otherwise the foreign exchange market is steady.

THE PAPER MARKET.—Many indications are shown of a renewal of activity in the paper trade. Consumers and dealers who have been absent abroad or at the home summer resorts for some time past, are beginning to reappear at their places of business and in the street. This home-ward movement, which becomes pronounced about this time, is invariably attended with the quickening activity which ushers in the fall trade. Most manufacturers continue fairly employed on orders. The reports of short water on many of the small streams is some drawback to the production, but to no serious extent. Values throughout the list of grades hold very steadily, no changes being reported in any special grades. Manillas retain the firmness previously noted.

THE STATIONERY MARKET.—Reports of the condition of trade this week are quite encouraging. Dealers are just beginning to get the benefit of the nearby trade, many buyers from this State and New Jersey having been in town during the past week. Moreover, the larger dealers from the western and southern sections continue to come forward, and although they are not buying so heavily as in the early part of the season, more business is being done for the reason that there are a greater number of buyers. Greater confidence prevails than a week ago, although a great deal of caution is evinced by buyers generally. This is far from being regarded as discouraging, as reckless and extravagant dealing is looked upon by all reliable men as a thing which in the end does a great injury to business. Considerable backwardness is still manifested by the smaller trade, who are ordering just enough goods to carry them along. This is because many firms of this character buy on three months' credit, and thus, by delaying orders, will be able to get the benefit of the holiday trade before paying their bills. The envelope trade is a little better than last week, but needs considerable bracing up yet. The trade in blank books is fair in comparison to last season. Toys, toy books, games, &c., are commanding a good demand. In staple goods dealers generally are doing a fair amount of business.

STATIONERY EXPORTS FROM NEW YORK.

FROM AUGUST 29 TO SEPTEMBER 4, 1883.

BOOKS, cases, to Bremen, 1; to Hamburg, 8; to Liverpool, 26; to London, 12; to British Australasia, 18; to Newfoundland, 1; to Cuba, 4; to Barcelona, 10; to Mexico, 8; to Uruguay, 9; to United States of Colombia, 18; to Argentine Republic, 5; to Japan, 4; to Sandwich Islands, 2.

PAPER, to Antwerp, 43 pkgs.; to Liverpool, 33 cs.; to Glasgow, 20 cs.; to London, 5 cs.; to British West Indies, 336 rms., 5 pkgs.; to British Australasia, 1 ca., 18 pkgs.; to Cuba, 1,050 rms., 56 pkgs., 7 cs.; to Barcelona, 22 cs.; to Porto Rico, 287 pkgs., 9,500 rms.; to Brazil, 8,105 rms.; to Venezuela, 3 cs.; to Mexico, 64 pkgs.; to Hayti, 2 cs.; to Santo Domingo, 400 rms., 16 pkgs.; to United States of Colombia, 124 pkgs., 1 cs.; to Argentine Republic, 18 cs.

STATIONERY, cases, to Bremen, 3; to Liverpool, 21; to London, 2; to British West Indies, 2; to Newfoundland, 5; to Havre, 1; to Cuba, 10; to Porto Rico, 5; to Brazil, 13; to Mexico, 4; to Hayti, 1; to Santo Domingo, 4; to Argentine Republic, 2.

PERFUMERY, packages, to Antwerp, 57; to Hamburg, 1; to Liverpool, 27; to Spanish Africa, 6; to Porto Rico, 4; to Brazil, 184; to Hayti, 15; to Uruguay, 5; to Oporto, 59; to United States of Colombia, 22.

PLAYING CARDS, cases, to Bremen, 1; to Liverpool, 3.

PRINTING MATERIALS, cases, to Bremen, 1; to Liverpool, 3; to Havre, 1; to Cuba, 2; to Santo Domingo, 1.

PENCILS, cases, to Hamburg, 1; to Liverpool, 10; to Mexico, 5.

THERMOMETERS, cases, to Liverpool, 3.

MAPS, cases, to Liverpool, 1.

TOYS, SPORTING GOODS, &c., cases, to Liverpool, 16; to British Australasia, 14; to Venezuela, 1; to United States of Colombia, 2.

CALIGRAPHS, packages, to Glasgow, 10.

CARDS, cases, to Glasgow, 1.

TYPE WRITERS, cases, to London, 10; to British Australasia, 1; to Newfoundland, 1; to Brazil, 2.

INK, cases, to London, 2; to Cuba, 74; to Porto Rico, 7; to United States of Colombia, 36; to Argentine Republic, 19.

CELLULOID GOODS, cases, to London, 4.

SLATES, cases, to Hull, 130; to Mexico, 6.

IMPORTATIONS OF PAPER.

FROM AUGUST 29 TO SEPTEMBER 4, 1883.

J. D. Whitman & Co., Jan Breydal, Antwerp, 16 cs.

Vernon Brothers, City of Richmond, Liverpool, 14 cs.

G. J. Kraft, Venetian, Liverpool, 5 cs.

Wilkinson Brothers, Germanic, Liverpool, 8 pkgs.

Hand & Ellsworth, Arizona, Liverpool, 8 pkgs.

E. & H. T. Anthony, Habsburg, Hamburg, 8 cs.

BOOK-BINDERS' WIRE-STITCHING MACHINE

REFERENCES. { Government Printing Office.
Culver, Page, Hoyne & Co., Chicago.

PATENTED.

The Peerless Rotary Perforator and its advantages:

FIRST.—It handles buckled paper as well as flat, and runs the work through straight.

SECOND.—It has the best system for rapid and perfect feed.

THIRD.—It has the best system for gauges, and can be more quickly adjusted.

FOURTH.—The cutters and dies employed are also of the best Crescent Steel—tempered by a secret process known only to the inventor, which renders them more enduring and better capable of retaining their cutting edge.

FIFTH.—The paper is cut by a sharp, thin edge, requiring less room for perforations, thus obviating the necessity of handling the material perforated a second time, in order to remove the "waste" before binding, thus saving at least fifty per cent. in the expense.

SIXTH.—There is little or no "burr" from the cutter, and the catch or "lay-boy" is so arranged as to place the paper in regular packages ready for the binder. When not in use it can be put out of the way instantly.

SEVENTH.—All parts of the machine can be duplicated, to order, and can be sent by mail or express to any part of the country.

EIGHTH.—Each machine has a scoring cutter attached.

NINTH.—The "cams" can be so adjusted in a moment as to perforate a sheet CONTINUOUSLY or in alternate spaces, as may be desired. The machine, while a marvel of mechanical invention, is a model of simplicity.

Price List furnished on application.

HARD SOLDERING.

Probably the most important of the methods for uniting together the more refractory metals or alloys is that known as brazing—that is, the process employed for uniting pieces of iron, steel, copper, &c., by means of a solder consisting of brass or an alloy of copper and zinc in different proportions. The solder is technically termed strong or hard solder. In workshop parlance this is denominated spelter, a name which in commerce is used to designate the bars or ingots of cast zinc, as received by the metal merchant. Although this use of one name to indicate two very different things, is at times confusing to the tyro, there is a little fear that he will be misunderstood in the workshop or by tradesmen if he asks for his hard solder under the name of spelter. It is of far more importance, however, to remember that, for some kind of work, commercial spelter is not so well suited as other brasses; for it ordinarily consists of equal weights of zinc and copper, and in certain cases it is advisable to use a harder solder than is obtained by these proportions. The admixture of copper and zinc produces a series of alloys differing considerably in their qualities; and when tin is introduced, the increase or decrease of the zinc and tin produces a compound metal, the properties of which are widely different according to the relative quantities of the ingredients used in its production. Spelter when home-made is best prepared by melting the copper and zinc in separate crucibles, the copper being in a crucible large enough to hold the zinc as well. When both metals are thoroughly melted, the zinc is poured into the copper crucible, the two being stirred well, so as to insure thorough admixture, when the alloy is poured out on to a bundle of birch twigs, or pieces of coarse basket-work, supported over a tub of water, the object being to obtain the solder in form of fine grains with an irregular crystallization. If, when taken from the water, the spelter is not sufficiently uniform in size of grain, it is sifted through a sieve, and the large particles are crushed in a cast-iron mortar or any suitable appliance, and again passed through the sieve, for fineness and uniformity of size are essential to the accomplishment of some examples of brazing in a thoroughly satisfactory manner. The manufacturers of the hard solder, however, usually cast it into ingots, delaying the cooling in order to develop as much as possible the crystallization, which is found to facilitate the subsequent crushing and sifting of the spelter. The flux used in nearly all the operations performed with hard solder is borax—the biborate of soda—which not only prevents the surfaces of the metals from becoming oxidized, but also exercises the remarkable property of dissolving any oxide already there. In some cases the flux can be dispensed with, but the pieces to be joined must be filed perfectly bright and clean, and care taken to melt the solder as quickly as possible when heat is once applied. The handiest way is, however, to dissolve the borax in water and add the solder, forming a paste which can be easily spread on the surfaces of shapes to which the drier powder would not readily adhere. For many jobs, however, it will be sufficient to merely crush the borax, which contains in its uncalcined state a considerable quantity of water; and for others it will be best to use merely a solution of borax.

The ordinary proportions of the constituents of hard solder are usually stated to be:

	Copper.	Zinc.	Tin.
Hardest.....	3	1	..

	Copper.	Zinc.	Tin.
Hard (spelter).....	1	1	1
Soft.....	4	3	1

and softer still is no longer a brass, but an alloy of tin and antimony (2 to 1). By the rough and ready processes of the manufactories, however, these proportions are probably never very accurately observed; and a variation of a few parts per cent. is, perhaps, of little moment, when copper and zinc alone enter into the alloy. Thus, for solder for iron, the zinc may be present in the proportion of from 33 to 50 per cent., though the harder solder (that with least zinc) is to be preferred. For soldering brass and copper, the ordinary spelter will answer for common work; but where, as in the case of, say, microscope tubes, it is desirable that the solder should be as nearly as possible of the same color as the brass, the proportions of zinc must be increased or decreased, according to the paleness or yellowness of the metal to be soldered. In a similar manner, it is often advantageous or advisable to study the hardness of the solder, and to keep the zinc as low as possible to secure fusibility, without running the risk of damaging the article to be soldered. Thus, for brazing tubes of pure copper, the zinc may be as little as 25 per cent., or even less; or a solder composed of copper 7, zinc 3, and tin 2, may be employed. For uniting brass tubes that are to be afterward bent and hammered over the soldered portions, an alloy of brass 77.5, zinc 22.5, will be found to yield better results than other hard solders; but if the tubes are thin and have to be soldered to flanges or pieces of stouter substance, it will be advisable to add a little tin—from 2 to 5 parts—in place of a similar quantity of zinc. Where, however, a large amount of work has to be done with the same kind of brass, the very best solder that can be had is to take the scraps of the metal itself and add zinc in the proportion of 20 per cent., thus producing an alloy whose fusion point is sufficiently removed from that of the metal to be soldered to avoid risk of damage; and yet it approaches so closely to it as to insure perfect union of the solder and the brass. A fine, hard solder for joining small and thin pieces of copper or brass, consists of copper 86.5, zinc 9.5, tin 4. It is a light yellow in color, and is easily reduced to a fine grain, resembling filings; but it speedily oxidizes when heated, and should be well mixed with borax, unless it is completely surrounded by the fire. A solder for pure copper is made by mixing lead and copper, in proportions varying from 16 to 25 parts of the former to 100 of the latter. These are prepared by first melting the copper, and then the lead in a separate crucible. Add the lead as soon as melted, stir quickly, and pour out, either into ingot molds or on the bundle of birch twigs over the water tub. These solders can be used without borax, for brazing copper.

Solders for gold necessarily vary with the quality of the gold they are required to join. For 18-carat and upward, the usual solder consist of gold (18-carat) 9 parts, silver 5, copper 5, and is best when made from the filings of the components, melted together. Gold solder, termed one-fourth, consists of gold 3, alloy 1; one-third, of gold 2, alloy 1; and one-half, of gold 1, alloy 1. The alloy is generally composed of 2 parts of silver to 1 of copper; but in one-half solder the silver and copper are in equal proportions. A solder for the commoner articles of gold is made by fusing gold 3 parts, silver 2, copper 1½, together, and then adding ½ part of zinc. Stir and cool

immediately. This solder will flow at a comparatively low temperature. A soft gold solder is composed of gold 4, silver 1, copper 1. A solder for articles of 12 to 16 carats is made of gold 24 parts, silver 9, copper 6, and brass 3, the latter being a more convenient way of adding a small quantity of zinc than by putting that metal in its uncombined state into the crucible containing the molten metals. The brass, however, should be added when the others are melted.

A hard solder for silver consists of silver 66, copper 23, zinc 10; being more fusible than "middling hard" solders of copper, it does well for brazing the finer articles in brass and steel. Silver solders are composed of 5, 3, and 2 parts of silver to 1 of brass, and are called respectively one-sixth, one-fourth and one-third. The alloys should be melted several times in order to secure homogeneity, and are best when they are subsequently laminated into thin strips, which are granulated into spangles ready for mixing with the borax. A white solder for silver is made of equal parts of silver and tin. If an article of silver is to undergo several soldering operations, it will be necessary to employ the richer or less fusible solders first, so as to avoid displacement in the subsequent application of heat. There are other silver solders which are found useful in certain kinds of work. One of these is generally used for plated ware, and consists of silver 2 parts, bronze 1; another of silver 4, bronze 3, and arsenic 0.25; or equal parts of silver, bronze and arsenic may be used. A solder consisting of silver 2, Dutch gold 1, and arsenic 0.5, is also found valuable; but in all these the arsenic must be added after the fusion of the other metals. The button is to be drawn out under the hammer or laminated and cut into shreds or spangles for more complete incorporation with the borax. A solder for German silver is easily made by melting scraps of the metal to be soldered, and adding an equal weight of molten zinc to them in the crucible; but this alloy is more ductile the smaller the proportion of zinc is. For general purposes, however, 5 German silver to 4 zinc will be found best. This should be cast into plates, cut into pieces, and pulverized.

For articles of aluminum bronze, three solders may be tried; but the proportions vary with the nature of the work and the number of operations the article has to undergo. A hard solder for aluminum bronze is expensive, containing about 88 parts of gold, 6 of silver, and 6 of copper; a "middling hard," about 54 gold, 28 silver, and 18 copper; and a "soft," 14 parts of gold, 57 silver, 15 copper, and 14 brass—the latter being added for the sake of the zinc it contains.

For soldering platinum, pure gold is generally used, but sometimes about a half per cent. of an alloy of platinum and iridium is added to it.

It should be remembered that all solders deteriorate by remelting; and though waste scraps may be added to a new melting, if the work is of a particular kind, care should be taken that none of the scrap metal has been previously melted. In some cases it is necessary to remelt alloys several times in order to secure homogeneity; but when once that result has been obtained, further remelting will only tend to destroy the properties of the solder.—*English Mechanic.*

No true artist ever yet worked for ambition. He does the thing that is in him to do by a force far stronger than himself. The first-fruits of a man's genius are always pure of greed.

CHICAGO.

A FEATURE IN WESTERN TRAVEL.

The bulk of railway travel between the Atlantic and Pacific States is principally enjoyed by certain lines, because of their superiority of equipment, track, road-bed, time schedule and train service. The road that has received this preference from Chicago, Peoria and St. Louis to Council Bluffs, Omaha, Kansas City, St. Joseph, Atchison and Denver, and all points in Illinois, Iowa, Missouri, Nebraska, Kansas and Colorado, is the Grand Burlington route—Chicago, Burlington and Quincy Railroad—the only line under one management from the first three cities named, through to Denver direct.

The great regiments of the Grand Army of the Republic were carried in elegant style, and with perfect satisfaction, to and from Denver, by the Burlington Route, and now the Associated Press telegrams, and newspapers and newspaper correspondents generally tell us that two-thirds of the Knights Templar, journeying to San Francisco, have gone over this famous line, the New England commanderies specially chartering, and thus journeying from ocean to ocean in trains, that were sent from Chicago to Boston, of the Burlington's own rolling-stock, because of its superlative equipment, making it evident that while it is popular with all classes of travel, the route is given special preference by those choice in taste, desire and favor, and thoroughly competent to discriminate between true worth, excellence and enterprise, and lack of system, energy and progression.

The Burlington system consists of six grand divisions, designated the Chicago, Galesburg, Eastern, Middle, Western, St. Louis, and Kansas City divisions. These six main sections contain in all thirty subdivisions, which are mainly branches and feeders.

"Through the Heart of the Continent," "Summer in Northern Iowa and Minnesota," and "Landscape Wonders of the Western World," are three very interesting little works, exquisitely illustrated, most charmingly written, and fascinating in description, the first of which is largely historical, and graphically descriptive of the wonderful growth of Illinois, Iowa, Nebraska, Missouri, Kansas and Colorado, showing also the advantages these States possess for the business man and home-seeker. The others exhibit in lively effort, and as near the real as word-painting can, their attractions for those in search of health and pleasure resorts, and nature's beauties.

PAPER MATTING.

A novel, efficient, durable and comparatively inexpensive matting or carpet for covering floors consists, essentially in a floor covering composed of a fabric woven or knit from strands or threads of paper in such manner that when laid upon a floor it will serve all the purposes of ordinary straw matting or textile carpets, and can be cleansed by washing when such becomes necessary or desirable.

Any kind of strong paper is taken and cut or formed into strips of the required or suitable size, which are then twisted or spun into strands or threads. If a fine texture is desired, the strips are made smaller than where a coarse texture is preferred; but, in either event, the twisted or spun strands or threads are woven or knit into a fabric by any of the well-known methods practised in weaving or knitting textile material. Before or after the paper strands or threads are woven or knit into the matting or carpet, the paper may be rendered waterproof by saturation or impregnation with any known

waterproofing material; or it may be otherwise chemically treated in order to strengthen it and permit the use of water or other cleansing fluid in washing the floor covering, when desired to cleanse the same and free it from dirt or stains, and it may also be treated with carbolic acid or other material to prevent the ravages of insects.

If the strips of paper are properly and tightly twisted or spun into strands or threads and closely woven or knit, the fabric can be subjected to a moderate amount of washing without injury. The strips of paper may be formed very narrow and spun or twisted with strands of yarn; or the twisted paper strands may be woven or knit with some suitable animal or vegetable matter, the strips of twisted paper forming the warp or the woof and the animal or vegetable matter forming the warp or the woof, as desired. Paper strands or threads produced from differently-colored paper can be used to produce a variety of designs in the fabric during the process of weaving or knitting, as well as the various designs that are produced in ordinary tapestry, and the fabric can be woven or knit into any determined dimensions to be fitted to the floor of an apartment, so that the floor-covering will be in a single piece. The paper preferred is that which is produced from what is known as the "palmetto leaf," as being strong

and durable: but it is obvious that paper produced from other substances can be used.

GAMES.

Dice were known to the Lydians 1,500 years, B. C. Peseus is credited with the invention of quoits, and the Hindoo Tessa with that of chess. Ardschio, King of Persia, invented backgammon; Palamedes draughts; Pyrrhus tennis, and the Greeks the noble game of goose. Loto is a comparative recent discovery, due to an Italian, Celestino Galiani, in 1753. Dominoes owe their name to the piety of a monk who originated them, and who was happy to pronounce a holy word while taking his amusement; and it is a nun who is believed to have invented both the game of battledore and shuttlecock and the catgut tacket used in playing tennis. Excavations at Hissarlik, the presumed site of Troy, have brought earthenware "marbles" to light; and those at Pompeii have yielded a number of jointed dolls in ivory, which prove that the custom of giving costly toys to children is not one of modern development.

A man should never be ashamed to own he has been in the wrong, which is but saying he is wiser to-day than he was yesterday.

LETTERS PATENT FOR INVENTIONS.

By JAMES A. WHITNEY, COUNSELOR-AT-LAW.

[WRITTEN FOR THE JOURNAL.]

XXI.

RECTIFICATION OF INVALID CLAIMS.

When a specification includes a claim which is narrower than the invention, the patentee, as we have seen, loses in a measure the protection of the patent, or, in other words, the patent does not cover all to which he would have been entitled had the claim been commensurate with the actual invention. On the other hand, if the claim is broader than the actual invention, then the patent will be invalid, that is to say, it will be invalid if this defect runs through all of the claims, assuming the patent to have more than one. While, suppose a patent to have only a single claim, if this is broader than the actual invention, the entire patent will be void, just as if the patent has several claims and each one is broader than the actual invention, the patent will be wholly void. If, however, one or more of these claims, considered by itself, covers no more than the actual invention, in such case that claim will be good, although the others are invalid. The idea may be put in other language, thus: The patent will be good for any claim that clear and explicit and does not cover more than is the patentee is entitled to, but at the same time it will not be good as concerns other claims which are broader than the true invention. In such case an action brought upon the patent, so far as concerns damages and accounting for profits, will stand, so far as the infringement may relate to the validity of the claim, but the fact that a portion of the patent is invalid will in some cases bar a complainant in costs.

It is, therefore, frequently an important question as to how and to what extent the defective claim may be remedied. This opens the question of reissues. This is so intricate and important that it must receive distinct attention in a separate article, although it may be properly considered in brief in this immediate connection. It was formerly held that a reissue could be made to cover a claim broader than that originally made, but, as we shall see, this doctrine has been exploded, and to extend the scope of a claim to cover more than the original patent will, with certain exceptions, destroy the validity of the reissue. It is different, however, when the claim remains substantially the same, or is more or less restricted as compared with that of the original. There are many cases, therefore, where a patent, liable to be declared void in whole or in part because of claims broader than justified by the actual invention, may be brought into legal form by reissue. This would be the case where a claim too broad was joined in a patent with a claim narrower than the actual invention; for in such case the broader claim could be narrowed somewhat without bringing it to the specific limitations of the narrower claim. In those cases where the narrower claim, conjoined with a too broad claim, is substantially coextensive with the invention, another remedy is available, namely, that of disclaimer.

The doctrine of disclaimers, as applied to patents, has been to a certain extent misunderstood. Our judicial decisions are uniformly clear as to the extent and manner in which this remedy should be applied. Thus, a disclaimer can in any case be so used as, in fact, to give a broader scope to a claim than it would otherwise have. For example, a disclaimer cannot strike out one of the elements from a combination claim which would in substance make it a claim for a combination of a smaller number of

elements than it previously covered. Neither can a disclaimer substitute a new claim for another, even though the new claim may be narrower than the old, for this latter is one of the clearly defined functions of a reissue. A disclaimer may, in fact, strike out bodily from a specification any matter to which the patentee has no valid claim, but this must be done in such a manner as in no case to broaden the scope of the patent. The most legitimate and manifest use of a disclaimer is to strike out paragraphs, either from the preamble or from the body of the specification, which tend to give a broad construction to the claim or to strike out specific claims, leaving the others intact.

It is true that the same result may be secured in substantially the same manner by a reissue, in which the objectionable matter may be simply eliminated; but, under the specific conditions just mentioned, there will be this difference between the two remedies, that, whereas the reissue would estop the collection of accrued demands for damages or profits, the disclaimer does not affect such demands. Therefore, a patent amended by disclaimer may be good as against infringements of some of its claims when a patent corrected by reissue would not.

There frequently arise cases in which the description or the drawings are more or less defective, while the claim, if supported by a proper specification, including the drawings, would fully

cover the invention. It hardly appears that the recent adjudications which hold reissues to be invalid when the claim is broadened would reach those cases where the claim is rendered capable of broader construction through an amended specification more clearly setting forth the invention. This descriptive portion of the specification may be amended so as to more completely set forth whatever is shown in the original application, including the original specification, drawing and model. Such correction falls within the scope of a reissue, and cannot be reached by a disclaimer. As concerns the drawings in a reissue, they may be corrected to include anything that is shown in the original model. To what extent a drawing could be corrected to show anything which is set forth in the specification, but not shown in the original model, is somewhat of an open question, but it is probable that it would be permitted to the extent of showing anything which the description in the specification, taken by itself, would make clear to a skilled mechanic in the art to which the invention related. But in such case the necessity of an amended drawing is hardly evident, unless it be to satisfy an apparently purely technical objection, viz., that the law requires the invention to be represented by drawings whenever such is possible. This distinction, however, would be thin and would hardly find recognition in a serious argument against the validity of a patent.

THE HISTORY OF STEREOTYPING.

The art of stereotyping was invented by William Ged, an Edinburgh goldsmith, about 1725. He did some work for the University of Cambridge, but very imperfectly, his progress being impeded, it is said, by the prejudices of the pressmen and compositors. On the death of William Ged, in 1749, his son, James Ged, proposed to carry on the business, but was unable to do so for want of funds, and stereotyping was abandoned for nearly thirty years, when Mr. Alexander Tilloch again invented it, not having heard of Ged's system. He took out a patent in partnership with Foulis, printer to the University of Glasgow, in the year 1784. About 1797, Professor Wilson made some improvements in the system, but up to 1800 the art, although it had been twice invented and practised, had fallen into disuse, and might indeed be said to be almost unknown. Earl Stanhope, recognizing its utility, resorted to Tilloch and Foulis, and obtained practical instructions from them, associating himself also with a London printer named Andrew Wilson. The result was that in 1802 the plaster process was perfected, and it has since been followed universally, until the introduction of the French or papier-mâché method.

After the passing of the Reform Bill in 1832, the newspapers of the country made huge strides in regard to circulation, and the mechanical ingenuity of engineers and others was taxed to the utmost to provide greater facilities for producing a large number of copies in the shortest possible time. In 1846 there was introduced into England by an Italian named Vanoni—by trade a maker of plaster casts of statuary—a system of forming molds in papier-mâché. It had been already utilized in France for a short time. Another Italian, James Dellagana, became acquainted with the system in Paris, and came over here to set up a stereotype foundry. He was intrusted with the production of the stereo plates for the *Times*, and soon became the most successful stereotyper of his day. In 1855 he patented an invention for casting solid metal plates type high, and also devised a system for casting these plates hollow inside, but still type high, by the use of a core in the casting-box. In 1861 he patented a rolling press for taking the molds, a great improvement on all previous methods. Between 1856 and 1859 experiments were being made at the *Times* office, which led to the most important and permanent results. By 1860 the change from movable type to stereo plates for newspaper printing had been accomplished. The columns were originally cast type high, and arranged after being planed and finished in a form of four pages. The next step was to adapt type columns to the rotary Apple-gath presses. Subsequently, instead of separately dealing with columns, the matter was taken from the complete page at one operation. This was done originally with brushes, afterward with a roller press. In 1863 the culminating point was reached; plates were cast in a tubular form, cylindrical on the external surface.

In 1864 there was patented a modification of the stereotype process, which, although little noticed at the time, has since given rise to quite a new branch of industry, and has materially enlarged the capabilities of letter-press printing. In that year Mr. Alfred Leighton took out protection for printing surfaces made of india-rubber, and vulcanized when in the molds. The business of producing "rubber stamps" is now very largely carried on in different parts of the country.

Quite recently an innovation has been intro-

duced which may most materially change the future method of the art. It consists in discarding the ordinary metal, in which the plates are cast, and using instead a substance called celluloid. The ingredients of the mold are yellow oxide of lead and glycerine, forming a semi-fluid paste, which is applied to the surface of the type. The matrix is placed with its face upward on the bed of a powerful press, and on this matrix a heated sheet of celluloid about 3-16th of an inch is laid, and the platen of the press brought down, which results in a perfect facsimile being attained upon the celluloid. The plates when taken from under the casting press are ready to be printed from. Whereas a good electrotype from a wood-block, generally requires on an average six hours, a cast in celluloid can be got in less than one hour. The celluloid blocks are said to save time in making ready, to be especially easy to handle, and to be very tough. They are not affected by acids, and colored inks may be used with them. They do not corrode, and are so elastic that they may be bent round small cylinders. Several large printing offices in London and elsewhere have already adopted the celluloid process.—*Br. and Col. Printer.*

HOW GOLD PENCIL-CASES ARE MADE.

"You want to see how we make pencils, do you?" said the superintendent of the largest gold pen and novelty manufacturing establishments in this city to a reporter of *THE AMERICAN STATIONER*, a few days ago. "Very well, come along, and I will show you through our factory."

The reporter was conducted into a room containing from thirty to thirty-five operatives, of whom a few were women and girls. The room was full of curious looking machinery, the noise of which was quite deafening.

"Before going any farther," said the superintendent, "let me say to you that the gold we use in our factory is all procured from the United States mint, and alloyed by us in the different degrees which give it its various grades of fineness. We take pride in being able to say that we do all the work ourselves, and were such a thing practicable [laughing], we would own the gold mines and dig the gold ourselves."

"The gold, after being melted in a crucible is run into bars or plates of the proper thickness, when it is worked down by the rolling or stock machine into thin sheets. It is then ready to be formed into tubes, which are the foundation for the pencil-case. The gold tubes are made by the use of mandrels, which are long steel rods of various degrees of thickness, and a molding plate—that is a heavy steel plate with holes of various sizes through it. The thin plate of gold being pulled through one of the molds with one of the mandrels conforms to the shape of the latter, and, of course, comes out a perfect tube. Its seam is then soldered, after which it is worked down to the size and form necessary to be used in pencil-cases, some of which have the octagonal and other shapes, besides the ordinary tube shape. When the piece of gold tubing is worked down to the necessary size and form, it is cut into various lengths, polished and finished, after which it is ready to receive the pencil movement. This consists of three brass tubes sliding into each other. The inside tube has a slot running lengthwise, while the two outer tubes have each a screw-shaped slot running in opposite directions. These slots, by means of stationary pins, propel the point of the pencil out of or withdraw it into the case.

"Pencil-cases are finished in a variety of

styles. Some are chased so as to make their surface look rough and natural. This appearance is much admired by the wealthy and aristocratic, but the fine workmanship and amount of time required to finish pencil-cases in this style make them very expensive. Some cases have ridges or creases showing the different colors of gold of various degrees of fineness, such as red, white, yellow, green, blue, &c. This will be one of the novel styles of pencils introduced in the fall trade this season.

"The chasing work on gold pencil-cases is the most difficult part of their manufacture. It requires not only tools of very great fineness but the most experienced and skillful workmen to handle them. Innumerable designs are made use of and new styles are devised every now and then. Chasing is done partly by a lathe and partly by hand. The lathe cuts into the surface of the pencil-case, the chasing work on the body of the pencil, but the chasing of the head and bands is all done by the hand of the engraver, which must be guided with the utmost care and skill. A variation of a hundredth of an inch would spoil the whole work.

"Show you some of our novelties for this season? Certainly."

Stepping over to a large cabinet, the superintendent brought forth several cases filled with innumerable styles of gold pencils, watch charms, &c.

"You will see," he continued, "that the chasing on even the ordinary style of gold pencil will be something exceedingly novel and unique. Here we have a pencil, the chasing of which is very much like the scales of a fish. The scales are alternately platinum and gold, making an elegant piece of workmanship. This pencil (showing another style) is engraved with corrugated bands of platinum and gold, while here we have a very fine article of the appliqué design with diamond settings. Another style of pencil will be heavy engraved work of various designs. Then there will be designs in Roman-Etruscan work. There will be styles to suit all tastes. The lover of fine art will have the fine French porcelain enameled pencil decorated with a real hand-painting to please his fancy, while the jockey or sporting man will choose something like this, which has the various emblems of his calling engraved upon it.

"In watch-charms there will be many new things. We are manufacturing automatic cigar cutters, cigar perforators, shoe and glove buttons, miniature lanterns, globes, tea-pots, pistols, tennis bats, owls, fish, &c. In fact, there will be no end of new things. We turn out more goods than any other factory in this country. Our sweepings amount to \$6,000 a year."

Modesty is the appendage of sobriety, and is to chastity, to temperance, and to humility, as the fringes are to a garment.

THE KERNER.

\$1.

It is constructed on strictly scientific principles, and being devoid of the complications which exist in old styles is less liable to get out of order. It has no springs to be affected by the action of the ink. The needle is rigidly fixed to a FLEXIBLE air tube extending entirely through the barrel, which when writing is constantly vibrating throughout the entire length of the barrel agitating the ink and causing a perfect flow to the point. It is unequaled by any writing instrument of the kind ever offered for public favor, and gives entire satisfaction to all who use them. It is constructed of the best material throughout, and the point is of platina alloyed with iridium. Prices: No. 1, Plain, \$1; No. 2, Engraved, \$1.25; No. 3, Gold Mounted, \$1.50; No. 4, Entire Gold Cap, \$3; No. 5, Mottled Rullog Pen, \$1.50. Send for Circulars.

CARTER, DINSMORE & CO., BOSTON and NEW YORK

BYRON WESTON,

DALTON, MASS., U. S. A.,

HAS BEEN AWARDED THE

GRAND PRIZE GOLD MEDAL

AND RECOMMENDED THE

Medal of Honor and Perfection

At PARIS, 1878,

This being the HIGHEST and ONLY AWARD given for

LINEN RECORD and LEDGER PAPER

Also, the only Gold Medal given for Ledger Paper at the Adelaide, Australia, Exhibition, 1881.

—A SPECIALTY.—

THIS Paper has received THE HIGHEST PREMIUM over all
others from the Cincinnati Industrial Exhibition, Massachusetts
Charitable Mechanics' Association, Franklin Institute of Philadelphia,
Louisville Exposition, Medal and diploma from United States Centennial
Commission, Medal of Progress American Institute, 1877, and Medal of
Improvement and Progress, Boston, 1878. Its

PRINCIPAL ADVANTAGES

are as follows:—1. It contains more LINEN than any other Ledger
Paper, has a longer fibre, and is, consequently, tougher. 2. Having a
harder and better body, it frays less in erasure, so that by simply using
the rubber after the eraser, the ink is prevented from spreading. 3. It is
more uniform in Weight Color and Finish. 4. It never cockles if properly
bound. 5. Its chemical action upon ink is such that it both writes and rules
up better. For proof of the foregoing, refer to a large number of Stationers,
Bookbinders, Bookkeepers, and Recorders, who have given it,
after a severe test, the preference over all others. This paper is Double
Sized, and will stand any climate or the most acid of fluid inks.

Send for sample sheet, ERASE and REWRITE FOUR TIMES on same spot.
Each sheet is water-marked with name and date.

Correspondence.

CINCINNATI GOSSIP.

[FROM OUR REGULAR CORRESPONDENT.]

CINCINNATI, September 11, 1883.

There is not much to be said about Cincinnati except as to the general condition of trade. That is not stagnant nor is it buoyant. A hopeful feeling prevails, and not without reason. Business panics heretofore have broken out like a thunder-clap in a clear sky. They are not in the habit of coming after a period of conservatism and liquidation in business. Sales are light but frequent in all lines of merchandise, and there is retrenchment in the purchase of luxuries. Factories are running as usual with full force. Still, the flow of blood in the veins of trade is not exactly unhealthy, though a trifle sluggish. Those who go to the wall are, in nearly every case, men who have been fighting against fate too long—men who have been hanging as it were by a hair for two or three or more years after they should have made an assignment. That is the fact in the case of the half-dozen or more failures here in Cincinnati. They have all been outside of the paper and stationery trade. While business is sluggish except in the retail trade, which has received a temporary impetus from the Exposition, there is no element of general distrust mingled with the extreme caution which characterizes mercantile transactions.

The sale of goods generally during the late summer has been light, and fancy stationery has had only a light run in such lines as one would expect to sell at this season. Staple goods have had a fair run and prices are sustained. But, after all, there is a lull in the trade that savors of waiting for developments.

In the local disasters, the first were among liquor dealers, the next were in the boot and shoe manufacturing, and there has been one in the carriage line and a couple in the grocery line. Of course, several small-fry grain speculators were smashed, but that is all over. Now, in all lines of trade, small dealers seem to be the ones suspected where there is any suspicion.

It was a week ago yesterday that Henry Dremann & Co.'s rag warehouse was burned, with eight human beings. Only two bodies have been recovered up to this morning and it is now quite certain that six more are lying in the ruins. Workmen have been toiling day and night removing the debris, and it will take a

week longer to clear it all away. Fires are smoldering and smoking in the charred mass still.

The following named trade visitors have been the latest to call on Cincinnati: Charles Euthe, of John Krauss, New York; Charles Plummer, of Evans, Plummer & Co., New York; Mr. Cooke, of Cooke & Cobb, New York; T. L. Johnson, of Keuffel & Esser, New York; James T. Watkins, of American Lead Pencil Company, New York; G. H. Graves, of J. D. Whitmore & Co., New York; George Freeman, of American Pencil Company, New York; James S. Shaw, of Nagle & Co., Philadelphia; E. A. Bush, of Continental Manufacturing Company, Philadelphia; F. J. Swain, of Platner & Porter Manufacturing Company, Unionville, Conn.; W. C. Hubbard, of Merriam Manufacturing Company, Durham, Conn.; H. B. Handy, of Morgan Envelope Company, Springfield, Mass.

PRINCE WILLIAM.

TORONTO ITEMS.

[FROM OUR REGULAR CORRESPONDENT.]

TORONTO, Ont., September 6, 1883.

Dear me! is it a fact that more than two months have elapsed since the voice of your regular correspondent has been heard in THE AMERICAN STATIONER? How time flies! I hope you have not suffered in consequence. Of course I understand that the interests of this great Dominion demands closer attention, but the fact is—I tell you in confidence—I have been horribly lazy this summer, and could not pluck up sufficient courage to write a paragraph, and more than that, there was precious little to write about. So I satisfied myself with the reflection that it would be a good thing if we both had a rest.

A few words now about trade and trade prospects. We have had a remarkable season—a long and severe winter, a backward spring and a cool summer. The crops are the gauge upon which our business hinges, and I am glad to say that, so far as can be learned, we shall have altogether a fair average, with the exception of fruit. Apples, which are becoming an important item in this province, are a failure. Through the summer holidays, July and August, the retail trade were disposed to grumble, and not without reason; but within the last few days there has been a much better feeling all round. The reports from the Northwest, where many of our people have large investments, and where things were in a bad shape for some months, are now encouraging, so that altogether

we feel at this moment very much better, and anticipate a satisfactory season's business.

I am not aware of anything special to note respecting our leading firms. Nearly all of them have had an outing in one direction or another, as their inclination led them, and are now back and at work. Copp, Clark & Co. have a fine show of holiday and fancy goods. James Campbell & Son are up in all of their lines, and so are Buntin, Reid & Co., Barber & Ellis Company, William Warwick & Son, and W. J. Gage & Co. The latter will move into their new premises on Front street very soon. Brown Brothers have their diaries ready for delivery, and show a fine line of wallets, pocketbooks, ladies' satchels, &c., of their own make. Richard Brown, of this firm, who has been in Europe this summer, with his daughter, is expected home this week. Mr. Irving, of the Toronto News Company, is pushing on with his well-known vigor. The Methodist Book and Publishing House, Russell & Hutchison, and the Standard Publishing Company are always busy, and James Bain & Son, Willing & Williamson, Robert Marshall, *et al.* It is not usual to hear any grumbling from any of these folk.

James Grand & Co., dealers in office supplies, say that they are busy from early in the morning until late at night. They have probably one of the best stands in the city for that business, and are wide awake. They study the wants of their clients very closely and give their customers the benefit.

Hart & Co. have been appointed sole agents for the Dominion for the Globe Files Company, Cincinnati, and have a fine show of their letter-filing cabinets and miscellaneous files. They have excellent facilities for handling specialties like this, and know how to place them before the public. They have also purchased the blank form department of N. Ure & Co., which, added to their own, makes the assortment one of the largest and most complete in the country.

Our great fair opens here on the 11th, and promises to be far in advance of anything of the sort ever held in Canada. Additional interest will be added by a visit of our Governor-General, the Marquis of Lorne, and Princess Louise, who come to see us for the last time. Other noted persons have signified their intention of honoring the exhibit with their presence. From the programme and the preparations that are being made by the management, we anticipate a big thing and a large attendance.

R. Farran, of Griffith & Farran, London, accompanied by E. C. Swayse, of E. P. Dutton & Co., New York, made a flying visit here this

week. The former was greatly pleased with our city. I had the pleasure of meeting both these gentlemen in Montreal and Ottawa, and shall have occasion to speak about them again in my next. They left here on Tuesday morning for Niagara Falls, and thence to Chicago.

The commercials are abroad in scores. I don't know how many I met down East—a small army—and there are flying detachments here every day; and among them I ran against C. H. McDonald, of the Dennison Manufacturing Company to-day, who is pushing the interests of his house here.

Time's up! I shall try and give you a few jottings of my experiences down East next week.

C. H.

THE COURT CIRCULAR.

"Her Majesty the Queen arrived at Windsor yesterday."

"Their Royal Highnesses the Duke and Duchess of Connaught and the Hereditary Princess of Saxe-Meiningen visited the Queen and dined at the Castle."

"Lord Edward Pelham Clinton is at Windsor as Groom-in-Waiting on Her Majesty."

Every newspaper is familiar with announcements such as these. They appear at greater or less length in every newspaper, mostly under the heading "Court Circular," sometimes under that of the "Court Newsman," and not infrequently merely that of "The Court." These announcements are furnished to the newspapers by a regularly appointed and authorized reporter, who has an office in London and a staff of assistants, and to whom the information is regularly forwarded day by day, by post or telegraph, from the residence of the Queen, wherever that may happen to be. Every statement is authentic, the Queen herself supervising, if not actually penning it with her own hand. Nothing appearing under the heading of "The Court" is allowed to be made until it has received the sanction of Her Majesty, who may thus, it seems, be classed among the newspaper editors of the day; and a very careful and diligent editor she is. The Prince of Wales, some few years ago, set up an opposition journal, or perhaps a sort of supplement to the Court Circular, which he issues daily from Marlborough House, containing an account of his comings and goings, his visits and visitors, and all personal matters he may conclude to be of public interest.

The Court Newsman is not a government official. He is appointed by the Court, but he receives his income from the daily newspapers, each one of which pays him a stipulated sum per annum for what may be called the regular news, and extra payments for lists of personages attending the Drawing-Rooms, the Levées, and other assemblages at the royal palaces. The *Morning Post* and the *Times* are the papers which take the fullest accounts of these Court gatherings, with descriptions of the costumes of the ladies, and tabulated lists of the persons attending the Court. The other daily papers make what selections they choose from the official Court list, and the weekly papers simply "scissor" the news from the dailies, and pay nothing. We may observe, in passing, that the Court gossip paragraphs of *Truth*, the *World*, and the other society papers are but elaborations of Court Circular news. Without the Court Newsman they could not exist.

The Court Circular is not a newspaper, though, as we shall presently see, there is a newspaper of that name, but a circular proper—that is, an intimation, official or personal, sent

round to those who may be supposed to take interest in its contents. In this case the "round" includes the daily and other newspapers—notably among the weeklies the *Observer*, which is published on Sunday morning; and from London it widens and widens, like the circle in a lake from a stone thrown by a schoolboy, till it includes the entire English and colonial press and not a few American and Continental journals.

The custom of publishing Court news originated in the latter part of the reign of George the Third. A Court had been held, at which were present his revered highness the Prince of Wales and several ladies of the highest rank and most unquestionable morals. Some of the newspapers of the period had the audacity to make observations concerning some of these ladies. Complaint was made to the authorities, and the result was the appointment of a privileged reporter. The first gentleman to hold this post was John Doane, in whose family it remained till about twenty years ago, when the present Court Newsman, Thomas Beard, succeeded. In the hands of this gentleman, who is well known, by correspondence, to most journalists, the news assumed its present shape and became a regular feature of the daily and weekly papers. During the lifetime of the Prince Consort efforts were made to keep the Court news as brief and succinct as possible, and the Queen has in this, as in other respects, followed his example with unswerving fidelity. So much so, that soon after the marriage of the Prince of Wales it was found necessary, in order to provide the public with information concerning their royal highnesses, to issue the supplementary circular already referred to from Marlborough House.

Joseph Doane, the immediate predecessor of the present Court Newsman, is still alive, and might, if he chose, furnish curious anecdotes of the Court life and manners of his time. Certain it is that such an account, written with frank courtesy and ability, would be read with great interest; for, though the business of the Court Newsman is mainly carried on at his office in Lancaster Place, Strand, he cannot but have more intimate acquaintance with Court etiquette and Court gossip than falls to the lot of the ordinary journalist.

It was but natural that the avidity with which Court news was received in the reign of the Fourth George should stimulate some daring adventurer to start a newspaper which should devote itself exclusively to Court and fashionable life. Hence it was that in 1829 Henry Colburn, the publisher, started the *Court Journal*, a weekly record of Court and fashion, with Mr. Patmore as editor. Two actions for libel arose out of this engagement. The editor received from an unknown contributor a scandalous paragraph on the Duchess of Richmond, and inserted it in the paper. Thence it was copied into the *Morning Chronicle* and the *Observer*. The Duke proceeded against Mr. Clements, the proprietor, who, notwithstanding the tender of an apology in both his papers, was tried in the Court of King's Bench and fined £100. Thereupon Mr. Colburn, who was called upon to reimburse Mr. Clements, brought an action against his editor, and actually obtained a verdict, with £193 damages—the question for the jury being whether plaintiff or defendant, proprietor or editor, should be made responsible for the insertion of the paragraph. As a matter of precedent the verdict is, perhaps, useless; but as a bit of curious literary history, it may be worth remembering. The *Court Journal*, a reputable and well-edited paper, is still conducted on its original plan,

with a circulation varying according to circumstances—an afternoon tea, an aristocratic archery or lawn-tennis meeting, a Court ball or a fashionable wedding adding hundreds, sometimes thousands, to its weekly sale.

Other papers run on the same lines appeared and disappeared from time to time; but in 1856 the late George Maddick added to his list of daring failures the *Court Circular*, "a weekly record of fashionable intelligence." With nothing of originality or importance in its pages, this paper contrived to hold its own, and to get a fairly good advertising connection. "See how we are quoted," the canvasser would say to the advertisers; "the *Times*, the *Post*, the *Daily News* and all the other papers are indebted to the *Court Circular*!"

This paper has passed through many hands—into those of E. D. Maddick, of Crane Court, printer; Savile Clarke, of Southampton street, Strand, dramatist, song writer and humorist; and lately into those of a Limited Liability Company, with Mr. Clarke as editor and principal shareholder. Its price, like that of its exemplar, the *Court Journal*, is fivepence, and its politics conservative. For a while it was, we believe, the property of its sub-editor, who, about a year ago, started an opposition journal, the *Court Circle*, "an illustrated review of court and fashionable society, art, science, music, drama, literature, on *dits*, &c., conducted by T. Weeks Holmes, formerly proprietor and editor of the *Court Circular*." Price, threepence; politics, neutral. As the name of this paper does not appear in "May's British and Irish Press Guide" for 1883, we may presume that it has ceased to exist. Like several of its fashionable contemporaries, it had little or no real circulation, and derived no small part of its income from puff paragraphs of new shops, new fashions, patent medicines, toys, perfumes, and nostrums generally. Its connection with the court and fashionable life was similar to that of the linkman with the theatre—useful enough to some, no doubt, but by no means intimate.

The Court Circular proper—the announcements of the Court Newsman in the daily papers—has regularly accepted and properly-defined functions; the papers which trade upon its title are—perhaps deservedly—quite unknown to the vast majority of newspaper readers.—*Printers' Register*.

FLEXIBLE GLUE.

A patent has been granted for the preparation of a flexible glue, the constituents of which are of the same character as that once given in THE STATIONER and suggested in an answer to a correspondent. In this instance exact proportions are stated. The formula is as follows:

One pound of ordinary glue is dissolved in five ounces of alcohol, and to this are added four ounces of glycerine and about one tablespoonful of aniline dye of any desired color, preferably, for the sake of appearance, of the same color as the backing or covers of the tablet, where such are used. To this mixture there is added a suitable quantity of water, and the whole is boiled in an ordinary glue-pot until enough of the water has evaporated to make the composition of the requisite consistency, so that it may be readily applied to the squarely-cut edges of a memorandum tablet with a flat paint-brush.

After the glue has dried it will be found to possess great tenacity and flexibility, so that, while the leaves of the tablet may be turned without detaching, like the leaves in a common book, yet they will not readily become accidentally detached.

OLD BERKSHIRE MILLS

CHARLES O. BROWN, President.

DALTON, MASS., U. S. A.

JOHN D. CARSON, Treasurer.

One party writes: "The two hundred RECORD BOOKS, for 88 of the 99 Counties, now on exhibition at the Iowa State Fair, at Des Moines; and all, but four (!) of them, made from your 'OLD BERKSHIRE MILLS LINEN LEDGER,' Medium, 40lb., make a splendid show."

We will pay for any book rejected on account of fault in the paper. Send for Samples, test them in comparison, and see that your books are made from paper thus water-marked.

[The above cut is a fac-simile of the wrapper used on the Linen Ledger Paper.]

OLD
BERKSHIRE
MILLS.

LINEN LEDGER PAPER

Will stand the severest
test of COLOR, CLIMATE,
INK OR WEAR.

Being Triple Sized (a process entirely our own) and Loft Dried, can be erased and written upon the fifth time distinctly. None genuine without the water-mark, thus—Old Berkshire Mills Linen Ledger, and date.

CARSON & BROWN CO., Manufacturers.

Extra Fine Papers

All this Stationery may be relied on to be according to representation. It is suited to the tastes of the most select trade.

In addition to the above lines, our other Specialties are put up with care, in attractive and substantial form. Goods can be seen at the Mill, or at our New York General Agency, GEO. B. HURD & CO., 79 Beekman Street.

SEASON 1883-1884.

SEASON 1883-1884.

L. PRANG & CO.'S

Christmas and New Year Cards.

WE beg to express our thanks to our patrons and friends for the kind and flattering appreciation of our past efforts, and feel a pardonable pride at the very emphatic endorsement which our Cards have received from the American, English, German and Australian press. With one accord these exponents of public taste have given our Cards the first rank over all similar productions in the market. We are bound to maintain this superiority; and we have, as heretofore, spared no expense to create, with the aid of our enlarged experience, a Series of Novelties for the Christmas Season, which, we have no doubt, will meet the expectations of the Trade. We have been singularly fortunate in procuring the assistance of, we may say, **REPRESENTATIVE AMERICAN TALENT** in the preparation of designs, and besides have secured the coöperation of some of the most **EMINENT EUROPEAN ARTISTS**.

OUR LINE IS NOW COMPLETED, and our agents are on the road to call on our patrons and friends. An inspection of the Sample Books will convince them that in regard to **ORIGINALITY AND VARIETY OF DESIGN, EXCELLENCE AND RICHNESS IN EXECUTION**, it far exceeds our last year's efforts. To give an idea of the high artistic order of the line, we would say that it comprises:

FIGURE DESIGNS by Miss DORA WHEELER, Miss ROSINA EMMET, Miss L. B. HUMPHREY, Miss L. B. COMINS, ELIHU VEDDER, WALTER SATTERLEE, A. F. BROOKS, and others.

LANDSCAPE DESIGNS by W. HAMILTON GIBSON, THOMAS MORAN, F. L. SMITH, and others.

ANIMAL DESIGNS by B. E. BENSELL and HARRY BEARD.

FLOWER AND BIRD DESIGNS by Miss FIDELIA BRIDGES, Mrs. O. E. WHITNEY, JEAN ROBIE, of Brussels; H. GIACOMELLI, of Paris, and others.

THE LITERARY MATTER in connection with our designs has been carefully attended to—among others, by Mrs. CELIA THAXTER, Mrs. EMILY SHAW FORMAN and JOAQUIN MILLER.

OUR REGULAR LINE of Christmas and New Year Cards will comprise plain cards, fringed cards, and double fringed cards, varying in price from 30 cents to \$60, per set of 12.

PROTECTORS are furnished with all fringed cards, and also **ENVELOPES** for all series costing \$1.80 per set and more.

Besides our **REGULAR LINE**, we would call special attention to the following

NOVELTIES AND SPECIALTIES:

ALADDIN'S LAMP. This is one of the most elaborate and elegant Christmas Gift Cards we have ever offered to the trade. It is a large folding card, heavily fringed, and provided with a leatherette protector. The front outside page is a design of peacock feathers on satin; the left inside page contains a poem specially written for this gift by JOAQUIN MILLER, also on satin, and surrounded by a delicate border of Oriental design; the right inside page presents Aladdin bearing his lamp, after a painting by the eminent American artist, ELIHU VEDDER; and to complete the whole, the back is embellished with a most unique, artistic design of high order.

RUSKIN CALENDAR FOR 1884. At the solicitation of some of our business friends, we have this year decided to bring out a Calendar, and are happy to be able to announce that we shall issue **A CALENDAR FROM JOHN RUSKIN, FOR 1884**. This consists of an artistic mount with a block calendar, having suitable selections from JOHN RUSKIN's works for each day of

the year. The selections have been made by a lady well-known for her cultivated taste and judgment. The mount has been designed by a well-known Boston artist, and, coming from her thought and tasteful skill, the form and decoration will be a fitting accompaniment to the words within. This Calendar will be a source of pleasure to all who love and appreciate RUSKIN, that they may have every morning a jewel from the treasure of his noble and earnest thought.

"THE CHRISTMAS SHEAF." A folding card, with inside pages, in color, stamped out in the shape of a sheaf of wheat. Tied with silk cord and tassels.

"THE CHRISTMAS BOOK." A surprisingly natural representation of an open book, with floral designs by Mrs. FISHER, and original poems by JOAQUIN MILLER.

CHRISTMAS ART PRINTS ON SATIN.

The great success attending our efforts in this line has induced us to bring out a number of new Series, consisting of Flowers, Landscapes and Figure Designs. These are elegantly finished in several styles, in fringed tinted mats, with cord and tassels; on mounts, with silk fringe and cord; in book form, richly fringed and with leatherette protectors, and on rich Plush mounts. Prices vary from \$1.50 to \$3.50 each.

We have made large additions to our **BIRTHDAY** line, comprising Plain Card, Fringed and Double Fringed Cards and Art Prints on Satin. Numerous Series at popular prices have been added to our list of **SCRIPTURE TEXT CARDS**. New **FLOWER PIECES** in Mats, &c. **THANKSGIVING CARDS**.—Our line will also be shown now.

Descriptive Price Lists of our **CHRISTMAS** and **NEW YEAR CARDS** are now ready, and will be sent on application.

SECTIONAL PICTURE TOY.

Milton Bradley & Co., Springfield, Mass., have for several years issued one or more new sectional pictures, each year surpassing all former efforts, and this season is no exception. It is now the "American Fire Department," consisting of a "steamer," hose carriage, chemical engine, insurance patrol wagon, and hook and ladder truck, all on a dead-run for a fire in true city fashion. This is thought to be the finest sectional picture toy that has yet been published. The drawings have been carefully studied from the most modern machines, and the scenes are full of life and action.

The colors are brilliant and natural, and the background is so designed that the positions of the several machines may be changed at pleasure, without destroying the unity of the design. When entirely reconstructed the whole forms a panoramic street scene seven feet long. The box is of polished wood, ornamented with a bright label representing the typical fireman rescuing the children from the fierce flames of a conflagration.

This work is so far above the mass of cheap trash in the market that it should commend itself to the best class of trade, and find a ready sale to those who wish to put artistic toys in the hands of their children. It will certainly be a great attraction to every child who sees it, exciting a desire for immediate ownership.

COMBINED BOUQUET AND BADGE PIN.

An illustration is given of a new device in the shape of a pin for clasping button-hole bouquets. The pin is made of yellow metal or in gold plate, neatly finished and attractive in appearance. It can be used to pin a badge and hold a bouquet conjointly. It is also a convenient form of pin for ladies' use. The pin is made by the Bouquet Pin Company, 36 North Delaware street, Indianapolis, Ind.

THE "PERFECT" STYLOGRAPH.

Every now and then something new in the line of stylographic pens turns up in the stationery trade. Each innovation claims superiority to all of its predecessors, and its complexity or simplicity, or it may be some other peculiarity of construction, gives it a claim on the public attention. Herewith is given an illustration of what is called the "Perfect" stylographic pen. The material used in the construction of this

pen is of the best quality. The barrel, air tube, point section and point cover are of vulcanized rubber, highly polished, and the barrel is handsomely engraved. The needle and writing point are of platinum alloyed with 10 per cent. of iridium. One feature of the pen is its simplicity of construction, which renders it less liable to

BOUQUET PIN.

get out of order, as it does away with all valves, springs, gravity weights, and other complications heretofore considered necessary in stylographic pens. The pen has a conical point, which is fine and smooth and which it is said

AMERICAN FIRE DEPARTMENT.

can never splutter. It does not leak or blot, and produces a fine uniform line, which dries instantly, thereby rendering blotting paper useless. It carries enough ink to write 15,000 words. The ink flows only when the point touches the paper in the act of writing. It can be used with copying or any ordinary writing ink. It is as convenient as a lead pencil, which is so often indiscreetly used for want of ink. It

"PERFECT" STYLOGRAPH PEN.

can be carried in the pocket or used on the desk, is neat and clean, always ready, and needs no shaking to start it. In writing it can be held at the same angle as an ordinary steel or gold pen, which alone is a commendable point in its favor.

"The Fascinator," a game with marbles, may be played on the dining-table, the carpet or walk. It is new in construction and attractive in its design. A large number of marbles are played either with a cue or by the hand at openings into compartments closed by trap-doors, which securely retain anything entering. It is a game of skill at which the youngster is sure to beat his more mature antagonist. It is made by Milton Bradley & Co.

THE PARSONS PAPER COMPANY,

— HOLYOKE, MASS., —

In addition to their already extensive establishments at Holyoke (which rank among the largest mills in this country), have recently built a separate mill, specially constructed and equipped for the production of the Best Grades of Linen Papers, and are now manufacturing all the various sizes and weights of BOND, PARCHMENT, BANK-NOTE, AND LEDGER PAPERS. They have already demonstrated their ability to produce of these papers a quality EQUAL TO THE BEST ESTABLISHED BRANDS IN THE MARKET.

Having great strength of fibre (an essential requisite in all Legal, Government and Commercial Papers), they are recommended for use in Bonds, Deeds, Certificates, County and State Records, etc. They are thoroughly sized to stand writing upon with fluid inks, and will permit of repeated erasures and re-writing thereon, when required. Great care is exercised to produce uniformity of color, strength and finish, and to do this, they have the latest improved machinery, specially adapted to the manufacture of Linen Papers.

They would call the attention of the Trade to the following brands, which are their trade-marks, viz.: In all Bond, Bank Folio, and Parchment appears the water-mark

"PARSONS PAPER COMPANY, HOLYOKE, MASS."

The Ledger Papers, of which they manufacture two Brands, are water-marked

"PARSONS LINEN LEDGER."

"SCOTCH LINEN LEDGER."

It is the intention of the Company to maintain the quality of these brands equal to any in the market.

Trade Gossip.

All new goods and designs which are not, strictly speaking, "Novelties" will be noticed under this head. The trade are requested to forward descriptions with samples in order to secure proper notice.

A. L. Andrews, photographer, Raymond, Neb., has sold out.

Charles G. Thalman, bookseller, &c., St. Louis, Mo., is dead.

Benjamin Dore & Co., printers, San Francisco, Cal., have sold out.

T. S. Harris, publisher *Standard*, Santa Anna, Cal., has made an assignment.

The store of J. L. Rayner & Son, booksellers, Joliet, Ill., is reported damaged by fire.

The Evansville *Tribune News* Company, publishers, Evansville, Ind., have been sued for \$500.

A judgment has been found against Frederick Turner, stationer, Philadelphia, Pa., in the sum of \$1,574.

W. T. Campbell, publisher of the *Ash Grove Independent*, Ash Grove, Mo., has sold out to Morris & Hall.

A judgment of \$121 has been found against the Byrne's *Dramatic Times* Publishing Company, New York city.

Mills & Abdill, booksellers and stationers, Des Moines, Ia., have dissolved partnership. L. B. Abdill continues the business.

Houghton, Mifflin & Co. will soon publish the first of their holiday books for this season. It will be entitled "Twenty Poems from Longfellow."

Dodd, Mead & Co. announce that E. P. Roe's new novel, "His Sombre Rivals," is completed, and that the first edition of 25,000 copies will be ready soon.

P. H. Rose, Galveston, Tex., one of the most prominent photographers in the country, has been East on a business trip during the past few days. He returned South on Tuesday.

Phil Hake is bringing out an entire new line of programme, dinner and menu cards, &c., and Geo. A. Raisbeck started for the West this week with a full line of novelties for the fall trade.

The drying-room of the Dixon Crucible Works, in Jersey City, which was filled with cedar, was damaged by fire on Tuesday night of last week to the extent of \$2,000. Thomas Leather, one of the firemen, was slightly burned.

The Esterbrook Pen Company proposes to issue a new volume of poems on the Esterbrook pen sometime during the winter. It will contain some fifty poems, one of which will be awarded a prize for especial merit. Judging from specimens already received the new volume will embrace rhymes of a high order of excellence.

Charles J. Cohen, Philadelphia, has just issued a price-list of envelopes of special sizes for inclosing Christmas, New Year, birthday, and all classes of cards. There are twenty sizes comprised in the list, and in addition to being sold by the thousand they are put up in boxes of five hundred—that is, twenty packs of twenty-five envelopes each—every pack being of a different size. This box has been found a great convenience to the retail dealer, as by it he is enabled to at once fit any card he may have in stock. This list—No. 50—is supplied to the trade on application.

The members of the Photographic section of the American Institute, took an excursion to Coney Island on Thursday, the 6th inst. Among the excursionists were Edward Anthony, of E. & H. T. Anthony & Co.; Col. Wilcox, manager of the same firm; T. C. Roche, photographic expert; A. A. Knox, Mr. Kurtz, Mr. Newton, president of the association, and secretary O. G. Mason. During the sail to the Island several instantaneous photographs were taken from the deck of the steamer. The results were very satisfactory. The dry plate, together with a new photographic apparatus, were used. At the beach similar experiments were made, several pictures being taken of the bathers, &c. At five o'clock in the afternoon the party sat down to dinner in the Brighton Beach Hotel. There were several extemporaneous, after-dinner speeches made, and V. M. Wilcox read a paper on the subject of "The Requirements of Photographers from a Trade Standpoint and the Progress of Photography within the last twenty years." Mr. Wilcox's extended experience in the photographing business enabled him to treat his subject in a very able and interesting manner. After the speech-making, &c., the party returned to the city.

Marcus Ward & Co., have just published a new book for juveniles entitled "London Town." It is intended as a companion book to the previously published volumes "At Home" and "Abroad." The new book is a post-quarter volume with specially illustrated board covers. It contains illustrations of the principal buildings, &c., of historic interest in London, as well as pictures of various street scenes and traditional customs. Among the principal illustrations are the Houses of Parliament and the Thames Embankment viewed from the Waterloo Bridge, London Bridge and St. Paul's Cathedral, the Tower of London, Westminster Abbey, the British Museum, the underground railway, Covent Garden, the Zoological Gardens, &c. The pictures, which were designed by Thomas Crane and Ellen Houghton, are in several colors which have been made use of by the artist with admirable taste. The volume is interspersed with numerous gems of poetry, and, on the whole, cannot fail to prove very popular and salable.

E. & H. T. Anthony & Co. are about to introduce a new thing in photographic devices. It is a portable apparatus intended for amateurs and travelers and for taking instantaneous photographs, &c., with the dry plate. The apparatus looks like a beautiful mahogany box. It is provided with a handle, and can be carried about like a jewel-case. The person carrying it can take photographs with it as he is walking along the street without attracting notice from the curious. Moreover, the pictures taken can be selected and arranged on the camera without examining the latter, simply by raising a little lid in the top of the box, where the object covered by the camera is reflected on a glass plate. When the view that the person carrying the apparatus desires is presented, he simply touches a spring in the side of the box and the thing is photographed.

The "Self-Counter and Alphabet Blocks" are a new toy of an educational class, but so attractive in construction and design that the educational features are not too prominent. It is a mechanical primary arithmetic, comprising a set of thirty neat cube blocks with alphabets and numerals and a color chart, all combined in a very beautiful case, and having mechanical features attractive to little folks. It is a very useful and safe toy to buy.

E. H. Shaw, bookseller and stationer, Corning, Ia., has sold out.

J. M. Ward, bookseller, Gifford, N. H., has sold out to John M. Hubbard.

William & R. Tiddy, proprietors paper mills, Lincoln, Neb., have been burned out.

J. W. Oatman & Co., publishers of the *Valley News*, North Adams, Mass., have been attached.

C. Evans, bookseller and stationer, New Tacoma, W. T., has been succeeded by Pendergast & Holt.

Allen Weir, publisher of the *Argus*, Port Townsend, W. T., has taken W. L. Jones as a partner.

F. Klemen has been appointed treasurer of the Palmer Art Company, to fill the vacancy caused by the death of Max Griebel.

Ryder & Beach, dealers in toys, &c., Bristol, Conn., have dissolved partnership, the business being continued by Howard L. Beach.

Tracy & Dietz, newspaper advertising agents, Philadelphia, Pa., have dissolved partnership. The business is continued by Charles A. Tracy.

One of W. & R. Tiddy's paper mills, near Charlotte, N. C., was entirely destroyed by fire on Saturday last, causing a loss of not less than \$25,000.

The \$5,000 mortgage heretofore held against J. P. Le Count, of Le Count Brothers, wholesale stationers, San Francisco, Cal., has been released.

Theodore Coleman, publisher *Journal*, Santa Clara, Cal., has been succeeded by H. G. Wright. The latter, who was publisher of the *Messenger*, has sold out his interests in that paper.

Dreka, Philadelphia, has just returned from Europe, where he bought some of the finest articles which are manufactured there. A great many of these goods are exclusively for the wholesale trade.

O. J. Ramsdell, formerly with Sinclair & Son, has charge of the lithographic department of Alvah Bushnell, Philadelphia. Mr. Ramsdell has made a great many friends in the trade who will be glad to place their orders with him.

The bankers' shears and foil shears, manufactured by Horatio G. Kern, Philadelphia, are in great favor among stationers. These scissors have the ring smaller than others, which permit of making a longer blade, they are made of the best steel and are nickel-plated.

H. P. French, of French & Choate, has just returned from a trip through the West, where he has been taking orders for the Lambic dictionary holder, one of the specialties of this firm. He reports large sales of this novelty, and says that the general condition of trade in towns he visited was good.

The B. B. Hill Manufacturing Company, Philadelphia, is getting out a fine line of copying presses with some new and improved patterns, which should be of special interest to the Philadelphia trade. Blotter baths for copying are selling rapidly as well as various kinds of stamp goods. The company finds it difficult to fill orders and at the same time prepare a stock for the fall trade.

The manufacturers of Caw's black fluid ink report that they never were in as good a shape to fill orders promptly as now, and that they never had as many orders to fill. Since the organization of this business into a joint-stock company, with F. C. Brown as manager, which occurred less than three years ago, Caw's ink has been added to the stock of over twelve hundred stationers who have developed a large trade in

their respective localities where the need was felt for a good black noncorrosive fluid ink.

S. E. Herring, publisher of the *Star*, Wrightsville Pa., has sold out to Jacob Weltzheffer.

W. E. Brewer, bookseller and stationer, Crawfordsville, Ind., has sold out to Lacy & Pontious.

F. Voigtmann, dealer in paper boxes, St. Louis, Mo., has been succeeded by G. F. Voigtmann.

The latest novelty of the Dixon Company is its "No. 845," a first-class soapstone pencil in wood.

L. Hollingsworth & Co., paper manufacturers, Boston, Mass., have dissolved partnership. F. D. White continues the business.

The Cincinnati *Times-Star* Company, Cincinnati, Ohio, has been partly burned out. Loss, \$10,000 to \$15,000; fully insured.

Raun & Merchant, publishers of the *Press*, Manchester, Ia., are reported to have dissolved partnership. H. D. Raun continues.

L. I. Mark & Co., wholesale stationers, San Francisco, Cal., have dissolved partnership. Joseph Goldsmith retires from the firm.

E. G. Locke & Co., Philadelphia, have just imported fresh invoices of plain and embossed gold papers, which are staple articles for stationers.

T. M. Simpson, Philadelphia, has issued for the fall trade some beautiful advertising chromo cards. This firm will send samples free on application by letter, but only and exclusively to the trade.

Mills & Abdill, booksellers and stationers, Des Moines, Ia., have dissolved partnership. L. B. Abdill having bought Mr. Mill's interest will continue the business, settling the accounts of the late firm.

J. R. Ogden, of Ogden Brothers & Rule, Knoxville, Tenn., is in town, and says that trade and trade prospects in the section whence he comes are quite satisfactory.

Henry Levy & Son, 477 Broadway, have just received an elegant line of Vienna gilt and bronze goods, consisting of mantel ornaments, inkstands, ash and match stands, toilet and odor stands, and many other novel and useful articles.

Samuel Carson, San Francisco, lately received in one consignment from New York 119 cases of books. This is said to have been the largest single consignment of its class ever taken to the Pacific coast by one vessel, and the valuation was about \$40,000.

The department of barbotine wares, at Janenski & Co.'s, Philadelphia, has been increased considerably. They have over a hundred different patterns of every kind and shape as; baskets, slippers, plaques, vases of various form and size. The quality of this ware is superior. This firm has also a complete assortment of Christmas and New Year cards, and a full line of fancy letter papers richly ornamented.

A quarrel between the different owners of a piece of property in Washington, D. C., will lead G. A. Whitaker, the well-known stationer in that city, to remove to 1,105 Pennsylvania avenue prior to October 1. Mr. Whitaker, rather than become the victim of pig-headed obstinacy which intended to discommode him in order to gratify a pique, determined to leave the store where he has been located for ten years, and is preparing to move.

Estes & Lauriat, Boston, are publishing the "Meisterschaft System for the Spanish Language," by Dr. Richard S. Rosenthal. This has been called the best system for learning the languages, and a brief examination of the book and of the principles which it sets forth induces the belief that the statement is nothing more than the truth.

J. B. Lippincott & Co. have the sale for a new line of playing-cards now being made in Philadelphia, and have ready two numbers of the first quality steamboats, 36; and the other, 76, which is made from pure linen stock, enameled surface. Both are indexed and round-cornered, with a good assortment of original designed backs.

Payot, Upham & Co., San Francisco, published as a souvenir of the 22d triennial convocation of Knights Templar a directory giving the names of all of the visiting Knights, classified according to commanderies and with the headquarters of each commandery.

THE SEVEN BIBLES OF THE WORLD.

The seven bibles of the world are the Koran of the Mohammedans, the Tri Pitikes of the Buddhists, the Five Kings of the Chinese, the three Vedas of the Hindoos, the Zendavesta, and the Scriptures of the Christians. The Koran is the most recent of these, dating about the seventh century after Christ. It is a compound of quotations from the Old and New Testament, the Talmud and the Gospel of St. Barnabas. The Eddas of the Scandinavians were first published in the fourteenth century. The Pitikes of the Buddhists contain sublime morals, and pure aspirations, and their author lived and died in the sixth century before Christ. There is nothing of excellence in these sacred books not found in the Bible. The sacred writings of the Chinese are called the Five Kings, the word "Kings" meaning web of cloth. They contain the best sayings of the best sages on the duties of life. These sayings cannot be traced farther back than eleven hundred years before Christ. The three Vedas are the most ancient books of the Hindoos; and they are believed to date not beyond eleven hundred years before Christ. The Zendavesta of the Persians is the greatest of the sacred books next to our Bible. Zoroaster, whose sayings it contains, was born in the twelfth century before Christ. Moses lived and wrote the Pentateuch fifteen hundred years before Christ; therefore that portion of our Bible is at least three hundred years older than the most ancient of other sacred writings.

FOLEY'S PAT. IMPROVED STYLOGRAPHIC PEN.

Great reduction in price: No. 1, \$1.75; No. 2, \$2.50; No. 3, \$2.50; No. 4, \$3. A liberal discount to the Trade. FOLEY'S PATENT STYLUS is the best and only Pen with point, spring and cleaner in air tube. Fully warranted, and exchangeable for gold pens and pencils.

PREPARING PAPER FOR COPYING PURPOSES.

A new method or process for treating paper so as to render it permanently moist for copying purposes has been devised.

In preparing the paper, one pound of the salt known as the "chloride of magnesium" is dissolved in a moderate quantity of cold or warm water, and it is ready for use. From one-half a pound to a pound of water to the pound of chloride of magnesium is said to be the most desirable amount, but more or less can be used according to circumstances. The chloride of magnesium may be dissolved in other liquids, but water is said to be equally good. Apply this solution to the sheets of ordinary copying-paper, whether in book form or otherwise, in any usual and well-known manner, and preferably by applying the compound to cloth pads well saturated with the liquids, and then place the pads between any suitable number of leaves; then apply a pressure at first very moderate until the absorption of the paper is complete; then remove the cloth pads and apply under the press a strong pressure, and the books or sheets of paper so treated are ready for copying purposes, the use of the solution of chloride of magnesium being the radical or base of this invention.

In all cases use copying inks or fluids, which are preferable.

Paper prepared by this method will remain permanently moist at any ordinary temperature, and if made dry by any extraordinary heat will regain its moisture upon being subjected to the common temperature.

This method or process is said to have many advantages over and to be a great improvement upon all methods heretofore used for treating paper so as to make it perpetually moist for copying purposes. It is more economical than methods heretofore used, as there is a great saving in cost of materials, time, and labor, it only costing about one-eighth as much to treat paper by this process. Sheets of paper prepared by this method will not adhere to each other, as is frequently the case where the paper is prepared by previously known methods where compounds composed mainly of glycerine are used; and hence paper prepared by the method or process described is more suitable and convenient for copying purposes and will take a very clear and distinct copy. The process is patented.

The rich man, by living as if he were poor, becomes richer; and the poor man who lives as if he were rich, becomes poorer.

COUNTER SLIP. SALES BOOKS.

I have a patent machine for manufacturing sales books, that perforates, prints numbers, cuts and folds at one operation, and will turn out from three to four hundred books per day complete. Territory and machine for sale. Can be seen in operation at my office, or sample sheets will be sent on application. P. L. HANSCOM, 106 Madison St., Chicago, Ill.

THE STATIONER.

DEVOTED TO THE INTERESTS OF THE

Stationery and Fancy Goods Trades.

WEEKLY---\$2.00 PER ANNUM.

Single Copies - - - - 10 Cents.

NEW YORK, THURSDAY, SEPTEMBER 13, 1883.

Advertisements cannot be received for insertion in the current week later than 12 M. on Wednesday. The charge for advertising is 25 cents a line, each insertion. Special terms for standing and displayed advertisements to be had on application.

This journal aims to be a medium of information for and a representative of the interests of every one connected with the stationery and fancy goods trades. It contains a full and trustworthy survey of the market for stationery in this country, in all cases giving the actual prices at which goods can be bought of importers and jobbers in this city, together with a detailed account of novelties in the trade, patents relating to stationery, and current items of interest. A review of foreign markets and accounts of movements abroad will also be furnished, and no pains will be spared to make THE STATIONER a thorough and complete exponent of the trade.

Subscription and postage for Great Britain, per annum..... 12s.

Any information our readers may wish to obtain shall be cheerfully given, and prompt replies will be made to all inquiries addressed to us on any subjects of interest to the trade.

Communications on all trade matters are earnestly solicited. Address

Subscribers to THE STATIONER can be supplied with the best cloth binder in the market. Deliverable at the publication office. Price, fifty cents.

Readers of this paper who avail themselves of the information obtained from its columns, by advertisement or otherwise, are requested to notify their correspondents of the source of their information.

We have had a letter from a member of the book and stationery trade in a distant city, which charges that the publishers of school-books have been selling to the School Board of the place where our correspondent is located for less money than the latter can buy the goods. The question is asked: "Is it right—is it fair for these publishers to give anybody lower prices than they do a regular dealer, and from whom do publishers get the bulk of their patronage if not from the dealer?" This is the old, old story. THE STATIONER has always considered the action of publishers in underselling the regular trade to be ill-advised, unjust and a violation of business comity. The fact is that they cannot resist temptation, but they yield to the seductive blandishments of dollars from any source, so long as they are dollars, even if they are clipped. We do not particularize in this instance, because our correspondent has not given us names, but we think that if the members of the trade whose business interests are thus prejudiced, and who feel that they have substantial reason for complaint, would take pains to perfect the proof and send it to the trade papers for publication over their own signatures, there would be some "boycotting" done which would satisfy the offending parties that there was retribution. No man of sense wants to have anything to do with another who is ready to sell him out at the first opportunity. Exposure is the best way to bring such people into line. We have heretofore said that we will help to do this, but we want details and irrefragable proofs.

THERE is a perceptible increase in the outward movement of goods as to quantity, and it is plain that American merchants and manufacturers are again bestirring themselves to gain foreign markets for their products. At the same time, we are assured from facts within our own knowledge that there is an increasing foreign demand for those products, and that, probably more than ever, there is a disposition to buy American goods if they can be supplied on equal terms and with as much regularity as those from countries which have hitherto had the chief share of the trade. One of the features of this movement, and which sustains our view, is the fact that there is a demand for freight room which the ships at command and belonging to regular lines cannot supply. If this outward movement is not shared in by all lines of trade, there must be some reason why. In the stationery trade it must be attributed to indifference or to the want of energy and push, which are prerequisites to success. We were much struck with an instance of apathy or rather, hopeless indifference, which was exhibited the other day when a manufacturer of a fine line of goods which compete with similar products of foreign origin expressed his disinclination to seek the export trade. He had said that the domestic market, although good, did not afford a

wide enough field for his operations. He did not want to try the European markets because they are filled with similar, cheaper and, as he claimed, inferior articles. And for the South American markets, he thought that his wares were too fine. Now, this is quite provoking! But we assert that the person mentioned has neither tested the markets which he decries nor given them that thought which he ought to have done. We believe that, did he try, he would have a revelation.

ROUNABOUTS.

BY THE TRADE LOUNGER.

"Visiting around" this week I found it somewhat difficult to find somebody to talk to. It was not that those whom I dropped in on would not talk, but it was because they were all busy talking to somebody else, and that "somebody" was a buyer.

Yet some of these same men who find their time so occupied will find business dull. It was so in a fancy goods house that I was in. "Trade has been almost nothing this week. Excuse me for a minute." The salesmen were apparently occupied with customers, and the gentleman who had to break off his remarks was distracted by the necessity of attending to a buyer.

Well, what would some people want? Perhaps they would like to be a newspaper man and work eighteen hours a day.

I was, however, fortunate enough to get a short talk with that veteran of the leather and fancy goods trade, Mr. Wolfe, whose mind is entirely on his business, and constantly trying to produce new ideas and new effects. I like to see a man who is so thoroughly engaged in the study of his business as is Mr. Wolfe.

He takes pride in his productions, and the result is artistic inspirations of novel character and effect. He showed me some charming devices in odor cases, ladies' necessaires, and dressing-cases, and yet he wants to produce something that will excel even these.

One of his remarks amused me, however, and it was, that such things lasted too long, and did not, therefore, give him a chance to bring out his inspirations as frequently as he would like. Perhaps it is a good thing that ambition should be curbed sometimes. Youth needs restraint and Wolfe is young, even if he ranks among the veterans.

By the way, has it never occurred to you what an importance and character the domestic fancy goods business has attained. Vienna once reigned supreme in productions of the class mentioned, but is no longer mistress of the trade.

You have handed me a note anent my remark on pipes last week. It is to the effect that the "Trade Lounger" is a little off in "complaining" of J. D. W. for keeping pipes.

It is remarked that "no man in the trade protects his customers better," and that the "meerschams referred to are cased in fancy leathers and plush" for sale to the trade. Now, I did not complain; but which it is I

would remark: Who protects the unfortunate tradesmen who make a regular business of selling pipes and don't sell stationery?

That's where it comes in. We are all the time hearing complaints about Macy, Wanamaker and others of that ilk, who sell feathers, ribbons, dry goods, &c., and also sell books, toys, games, and stationery at or under cost, much to the disgust of the regular stationery trade. Has the poor tobacconist no ground for complaint?

Quite a number of people have been in the city this week. In every instance where I have had a chance to get in a word edgewise with any of them I have been glad to learn that no despondency is felt and that trade prospects are quite satisfactory.

Of course the visitors like to renew old acquaintance and get chatty over old times and the changes which years have developed. I never try to be an eavesdropper and overhear what is not intended for me; but when St. John and his friend get to exchanging personal notes and congratulations in tones loud enough to be heard by even an involuntary listener, what can one do? That eight months' old boy of St. John's is evidently a joy to his daddy. That's right! I hope that our friend will have occasion to retain this feeling to the latest hour of his life.

There is a wedding on the tapis, I am told. Edward Johnson, in the blank-book trade, is to take unto himself a wife in the person of a young and charming maiden from the Quaker City. Ah, well, I suppose that Johnson knows what he is about; but he should have considered the feelings of a dozen—more or less—Brooklyn girls who are said to be "so mad as never was."

General Jourdan has resigned as Major-General commanding the Second Division N. G. S. N. Y. Of course there are those ambitious to be his successor. General Barnes is talked of in this connection. Wouldn't he be just "nifty" as M.-G.

I was struck with the remark in one of the daily papers that there is a great demand for tramps.

The first thought would be: Who wants them—the police?

But, no, the "tramps" wanted are steamers—vessels which run here, there and everywhere on speculation, and belong to no regular line and pick up cargo wherever they can get it.

I like, therefore, to hear about these tramps and to know that they are in demand. Do you know what that means? Why, that we are exporting and cannot find ships enough just now to carry all of the goods that are going abroad.

I tell you, Mr. Editor, the American export trade is getting bigger and bigger, and people are beginning to look more abroad for markets. Those who fail to recognize this fact are going to "get left, and don't you forget it."

I am happy to be able to report that that genial gentleman and energetic business man who sits on the presidential throne of the Board of Trade is getting better. This is what they tell me where he belongs, and I suppose that it is

true. I am very glad to know that I am not the cause of his sickness.

By the way, I see that the missing Walker is supposed to be perambulating the West. The firm for which he is selling has not heard from him, however, and thus the mystery deepens.

Ed. Huber says that the reason why Eberhard Faber doesn't manufacture rubber erasers with brushes attached is because he made them for the person who controlled the patent, and who took the business out of his hands. Inasmuch as there is a demand for such goods, why are they not properly advertised?

The Teachers' Association of Brooklyn will have an annual picnic and excursion to Roton Point on Saturday, September 29. I understand that there are many attractions in this association and that many of the men in the trade, particularly those dealing in school supplies, will feel it their duty to act as supplies on the occasion.

I haven't anything more to say this week. It has been, as I have remarked, hard work to get to talk with those whom I have dropped in on, and when people are very busy they can neither gossip nor give points. I got around at inauspicious moments, and shall try and pick other hours for my next tour. *Au revoir.*

ANSWERS TO CORRESPONDENTS.

K. A. & Co. want names of manufacturers of oiled board for use in copying presses, and ask if any considerable quantity of it is imported.

Ans.—Henry Bainbridge & Co. prepare it. We have no statistics at hand to tell anything about quantities imported, but do not think that much, if any, is brought from foreign countries.

B. G. wants to know where to buy second-hand bookbinders' machinery.

Ans.—Try John Campbell & Co., 164 William street, New York. We think that T. W. & C. B. Sheridan, 25 Centre street, New York, and Geo. H. Sanborn's Sons, 51 Beekman street, New York, can also supply you to a certain extent.

G. W. G. wants address of manufacturer of paper boxes to do up bottles in.

Ans.—Kiel & Sudhaus, 74 Fulton street, New York; Ernest Fecker, 506 Pearl street, New York; and Henry Meyer, 87 Walker street, New York.

E. & C. ask for addresses of parties controlling typewriter mentioned in THE STATIONER of August 23.

Ans.—Hall Type Writer Company, Domestic Building, Broadway and Fourteenth street, New York.

J. & W. want to know where to get sticks for paper flags.

Ans.—A. Weidmann or Stern & Lyon, New York.

H. P. wants to know where to get a felting paper—figured, not plain color—to put on a room and obviate the necessity of plastering.

Ans.—Joseph Hill, 373 Broadway, New York, will we think, meet your requirements.

The following named members of the trade have been in town during the past few days: George Angel, Detroit, Mich.; Gustar Bode, Milwaukee, Wis.; Brice Cimbric, New Orleans, La.; Mr. Reynolds, of Swinton & Reynolds, East Saginaw, Mich.; Charles Stewart, of the Charles Stewart Paper Company, Cincinnati, Ohio; Mr. Parker, of Parker, Ritter & Co., St.

Louis, Mo.; W. E. Gibbs, of E. C. Palmer & Co., New Orleans, La.; Isaac Hammond, Charleston, S. C.; Mr. Smith, of Smith & Clearwater, Pittston, Pa.; Charles Greene, Brookfield, Mo.; N. H. Strand, Winfield, Kan.

The human mind is like ground, which acquires a quality according to the pains bestowed on its cultivation.

Market Review.

OFFICE OF THE AMERICAN STATIONER,
WEDNESDAY, September 12, 1883.

THE MONEY MARKET.—The money market remains easy, the supply of loanable funds still being ample, notwithstanding the active drain of currency to the West and South, whereby our local banks lost a million and three-fourths of their surplus reserves the past week. The Stock market was lower on Saturday, since when the tone has been strong, in spite of reports of frosts in the Northwest and manifestly exaggerated reports of damage to the corn crop in States where comparatively little corn is grown, viz., in Michigan, and Wisconsin. Government bonds were strong and the 3s advanced $\frac{1}{8}$. Railroad bonds were active and generally strong. Foreign exchange is quiet and unchanged, if we except a slight rise in German Reichmarks. Sterling is quiet at rates slightly above the gold-importing point.

THE PAPER MARKET.—The general condition of business among our city paper dealers has varied but little from that noted a week ago, and if at all changed is on the side of a little improvement, but principally in the line of wrapping papers. Although dealers naturally expected a more active development of trade at about this time, they find some encouragement in the fact that, while depression rules in many lines of general business, notably the dry goods trade, in which large quantities of goods have been forced upon the market and sold much below cost, nothing approaching this state of things is to be seen in the paper market. The production, it is true, is somewhat ahead of the demand on some grades of paper, yet there are no very considerable stocks crowding the market, and although the profit is small, paper is going into consumption at a profit. Complaint of a lack of water is becoming quite general throughout the East, and this is a providential interposition. Two large manilla manufacturers have given notice of an advance of about $\frac{1}{4}$ ¢, making No. 1 light weight 8¢, medium 7 $\frac{1}{4}$ ¢, and heavy weight 7¢. Dealers in straw boards seem to be conducting business on the go-as-you-please principle of selling, getting what they can for their goods. We make an important reduction in our prices current for these in this issue.

THE STATIONERY MARKET.—There is very little to chronicle regarding the general condition of trade beyond what was stated last week. Business is about as usual, neither very active nor very dull, but steady and with a tendency to gain rather than lose ground. Prices are firm, but they are so near bed rock that there is little profit in present figures. Judging from the present indications there is little encouragement for the establishment of new firms in the stationery trade, the chances of building up a profitable trade being decidedly few. Established houses, however, have little cause for uneasiness, for, notwithstanding the fluctuations of trade, the volume of business done by them the year around is sufficient to keep them in a prosperous condition. Just now the volume of home trade is rather light compared with that of last week, but commercial travelers are sending in large orders, and glowing reports of trade are coming from other sections. In blank books, business is not quite as heavy as usual and prices remain low. The trade in envelopes is quite steady; buyers are paying up promptly, but there can be said to be no improvement. Art publications are commanding little trade just now, the business, in fact, being quite depressed. Commercial travelers are sending in few orders from the larger towns whence the largest volume of trade comes.

When People are Traveling Comfort and Safety are the

TWO PRINCIPAL OBJECTS IN LIFE!

COMFORT!

"The Erie is by far the smoothest road I ever traveled on, either in this country or in Europe; and I consider it the perfection of railroad traveling. With the clean, light and airy coaches, polite attendance, freedom from dust, noise and jar, we reached Chicago hardly realizing what a long journey we had performed. And then such a breakfast as we had the morning after leaving New York, at Hornellsville, is certainly deserving "honorable mention." Such a table as they have there, with a full half an hour to enjoy it, is enough of itself to attract passengers."—*Ex. U. S. Minister, E. B. Washburne.*

SAFETY!

"5,491,441 Passengers were carried over the Erie Railway in 1881. Of this vast number, only two were killed—one by falling from the platform of a car on which he insisted on standing, and the other in jumping from a train while in motion."—*New York State Engineer's Report for 1881.*

No better evidence than the above need be wanted that both of these objects are secured to the traveler who purchases his ticket over the

ABOUT PRINTING INKS.

The ingredients of ordinary printing ink are burnt linseed oil, resin and occasionally soap, with various coloring matters. The best quality of linseed oil is used in superior inks, and this is purified by digesting it in partially diluted sulphuric acid for some hours, at a temperature of about 212°, allowing the impurities to subside, and then washing away the acid with repeated additions of hot water. The water, after this treatment, is pale and turbid, and if the freeing from the acid is complete there is scarcely any odor. By rest the oil clarifies, and has then a pale lemon-color. It now dries much more rapidly than before. The purified oil is now partially resinified by heat. For this purpose it is introduced into large cast-iron pots and boiled until inflammable vapors are freely evolved. These are ignited, and allowed to burn for a few minutes, after which they are extinguished by placing a tight cover over the boiler. Ebullition of the oil is continued until, on cooling, a firm skin forms on its surface, known by placing a drop on slate, or other smooth, cold surface.

Red printing ink, according to the *Engineer*, may be made in this way: Boil linseed oil until smoke is given off. Set the oil then on fire and allow it to burn until it can be drawn out into strings half an inch long. Add one pound of resin for each quart of oil, and one-half pound of dry, brown soap cut into slices. The soap must be put in cautiously, as the water in the soap causes a violent commotion. Lastly, the oil is ground with a sufficient pigment on a stone by means of a muller. Vermilion, red lead, carmine, Indian red, Venetian red and the lakes are all suitable for printing inks.

AUTOMATIC NUMBERING MACHINE.

A new multiple numbering machine has been devised that will number a whole sheet of checks, tickets, &c., with ten, fifteen, or more numbers en route through the machine instead of printing one number at a time, as is done by machines now in general use. This machine may be run by steam, hand, or foot power, saves a great deal of time, and is said to be easy to work as compared with the old machine, which the operator runs by a treadle, and in which he must at the same time locate the impression of every number by sight, aided only by a pointer, thus necessarily rendering the work hard, tedious, and slow. This invention obviates these objections by means of a series of circular plates arranged and adjusted laterally on a shaft, and having on their peripheries a series of figure-disks, which may be readily fixed in any position desired by thumb-screw clamps. The figure-disks are automatically operated by spring-actuated stops or fingers, which intercept the ratchet projecting from the units-disks, and urge it forward the desired number of points.

The paper is fed from the feed-board until its edge abuts against the stop, which, when it is raised off the bar upon which it rests, allows the paper to be carried between the tapes over the cylinder, at which point it receives the impression of the number represented by the engaging row of figures, and continues to move onward between the tapes out into the delivery-box. The numbering devices revolve with the circular plates, upon the periphery of which they are fastened, and with each revolution receive a fresh coating of ink, and are urged forward one or more units at a time by the pawls engaging the ratchets attached thereto.

An object lesson in the transmutation of virtues is conveyed in this paragraph from an exchange: "Tennyson can take a worthless sheet of paper, and by writing a poem on it make it worth \$5,000. That's genius. Vanderbilt can write a few words on a sheet, and make it worth \$5,000,000. That's capital. The United States can take an ounce and a quarter of gold, and stamp upon it an 'eagle bird' and twenty dollars. That's money. The mechanic can take the material worth \$5, and make it into a watch worth \$100. That's skill. The merchant can take an article worth 25 cents, and sell it for \$1. That's business. A lady can purchase a very comfortable bonnet for \$10, but she prefers to pay \$100. That's foolishness. The ditch-digger works ten hours a day, and shovels out three or four tons of earth for \$2. That's labor."

A consciousness of having faithfully discharged the duties of the day softens the pillow for the night's repose.

NEW GOODS FOR FALL TRADE.

Our assortment for Fall and Winter Trade, while comprising the usual line of STAPLES, has received many ADDITIONS in NEW Goods, that are ARTISTIC and NOVEL, and will supply the wants of the Book and

Stationery Trade. Our "Gravity" Pencil is the LATEST and most desirable Pencil in the the market. Carrying the Artist's LARGE Lead, and working on the principle of gravitation, it is unexcelled for business purposes.

ENGLISH HAND-MADE PAPERS

ORIGINAL
EYNSFORD
MILLS,

WATER-MARK:
FELLOWS

KENT,
ENGLAND.

These papers, made from the purest fibre, without any foreign admixture, each sheet separately formed by hand in a mold, couched by vertical pressure and slowly dried by air, possess a toughness, hardness and strength unapproachable by any machine-made papers Lor Legal use, for Scrip or Bonds, and for all purposes demanding great durability, these hand-made papers are invaluable.

The heavier sorts are double sized, and they will bear repeated erasure and constant handling beyond all other makes, so that for Ledger and Account-Book purposes none can compare with them.

TESTIMONIALS.

"I am most emphatically pleased with the Prouty. I would not trade it for a C—press (price \$1,000.) It runs *easier*, it is much *simpler*, and does its work as rapidly and well"

J. F. MITCHELL, Greenville, Texas.

"Would not exchange it for any of the 'Big Injun' presses."

J. A. AVERY, Waukeegan, Ill.

"The Prouty is the 'Boss press.'"

C. G. STARKS, Berlin, Wis.

"For the country office, printing 1000 to 4000 circulation, there is no other press worthy to be compared with it."

Waterloo TRIBUNE, Waterloo, Iowa.

"We profess to be a practical pressman, and having had experience with nearly all kinds of presses, believe ourselves to be a competent judge. The Prouty is the simplest and easiest running power press in the market, and will do as good work as any machine made." F. M. HAISLET, Newhampton, Iowa.

THE CHEMICAL FEATURES OF A LEAD PENCIL.

Of the pencil, chemistry teaches us that the "lead," so-called, is not the element that properly bears that name. If we wish to be more accurate we speak of it as black lead or graphite. This graphite is carbon in one of its several forms, and carbon is an element. An element is a substance that cannot be resolved into two or more substances; it is a simple substance in distinction from those that are compounded of two or more elements. Some of the other forms of the element carbon are charcoal, common coal from the mines, lampblack, and the beautiful diamond.

This carbon is one of the essential elements in the structure of plants, and without it vegetation could not flourish. It is, therefore, important at the outset to get an idea of the nature of this substance in its simple form, and from that pass on to consider how the plant can make use of such material in building up its structure.

Now, a word as to the rest of the pencil. The carbon or "lead," or more properly graphite, is in a strip, and placed within and surrounded by wood, by which it is held in place. This wood is a vegetable product, while the graphite is dug from the mine. The cedar wood of the pencil was once a part of a living tree. The graphite is a simple substance; the wood is a compound. Three simple substances have combined to produce the wood, namely, carbon, hydrogen and oxygen. It will be seen, then, that the wood contains a quantity of the same element that makes up the graphite. One cannot see much resemblance between the graphite and the wood.

How did the carbon get into the wood, or, in other words, how did the three elements above mentioned combine to form the wood? If even a partial answer is given to this question, it is evident that it covers a host of similar questions, for the various tissues of plants are made up largely of wood. If it can be shown how the cedar wood was formed it will explain in good measure how all plant structures are built up.

In the first place, we must look to the source of the carbon. It passes, without an argument, that the carbon must enter the plant from some place. Plants and animals are similar in many respects, but among the higher forms of each group the methods of eating are very different. A man, for example, eats various solids, drinks liquids and breathes the atmosphere. Plants, on the other hand, are limited to liquids and gases, they not being able to take any solid food into their systems. Much of the food of plants enters from the soil through the roots, but it must all be in solution in the liquid that the roots absorb. If carbon enters the plant, and it must in large quantities to make such a quantity of charcoal as is found in the substance of plants when partly burned, it must pass in either solution with the soil water, or as a gas through the pores of the leaves.

Carbon in its simplest form, charcoal, stone coal, the diamond, &c., is very insoluble. Water may be poured through a dish filled with any form of pure carbon, and none of it will be washed away. It is clear, then, that this essential element must enter the plant in some combined form. The atmosphere everywhere and at all times contains a small percentage of a compound of carbon, known as carbonic acid gas. It is carbon united with oxygen, and is the gas so familiar to all in the froth of common soda water. This gas is given off by animals, both in their breath and from the surface of their bodies. This gas is invisible and much heavier than com-

mon air; it accumulates in old wells and coal mines, forming the fatal fire-damp. When present in larger quantities it is fatal to all forms of animal life. This substance, as a gas, is intimately mixed with the atmosphere and enters the plant through the thousands of small "breathing pores" that may be found with a microscope upon every leaf of any considerable size.

This carbon acid gas is also dissolved in water, and in this way quantities of it may enter the plant through the roots along with the other substances that are needed for the growth of the plant. After the carbonic acid is once within the leaves of the plant, it is acted upon by the sunlight; the carbon is separated from the oxygen, the latter being set free returns to the atmosphere, while the carbon is retained and enters into new combinations with the other elements, and thus forms a part of the wood, starch, sugar, or other vegetable compound.

A NEW MATERIAL FOR CASTS AND MODELS.

In the *British Medical Journal* Dr. Anthony Bowlby thus describes his process. The articles used are: Swinburne's prepared gelatine, 8 oz.; French chalk, 14 oz.; honey, 26 fl. oz.; glycerine, 6 fl. oz.; that is, the proportion of 1 part gelatine, $1\frac{1}{2}$ French chalk, $3\frac{1}{4}$ honey, $\frac{3}{4}$ glycerine. Prepare a coloring solution; rub down half a drachm of carmine in half an ounce of water; to this add $2\frac{1}{2}$ oz. of glycerine, and keep in a stoppered bottle; shake the mixture before use.

The French chalk should be perfectly white, and the honey of as light a color as possible ("Furber's strained California honey" and "Narbonne honey" are the best). The cost of these materials will be about seven shillings.

The implements required are two large china pudding dishes and two saucepans large enough to contain the same. Put all the gelatine into one of the dishes, and add plenty of cold water. Leave it to soak exactly half an hour. While the gelatine is soaking weigh out the French chalk into the other dish and add the glycerine. Stand the pots containing the honey in some hot water till it is fluid enough to pour, then add it to the mixture of chalk and glycerine. Mix all well together, and place the dish containing the mixture in a saucepan of boiling water; let it get nearly to boiling heat, and keep on stirring it gently.

To this mixture must now be added the coloring solution, sixty minims of which will make a good flesh-color. When the gelatine has finished soaking, turn it out into a clean cloth, and wring out every drop of superfluous water; put it back in the dish, and place the latter in a saucepan of boiling water, over a fire or gas jet.

As soon as the gelatine begins to dissolve around the edges of the dish, pour over it all the hot mixture of French chalk, &c., and keep on stirring for fifteen or twenty minutes, over the fire, till the whole is thoroughly homogeneous; then remove the dish, allow the liquid to cool to about the consistency of treacle, and pour it into the mold. It is better not to use the freshly prepared material for casts, but to pour it out into flat dishes, and, after it has set, keep it for a week or two before using, when it may be readily melted by putting the dish containing it into a pan of boiling water. Should the material have been kept very long, it may be necessary to add a very little water, to facilitate the melting. Considering that it takes some time to set at the temperature of the body, it is not

advisable to use the material for taking the mold, for plaster-of-paris is in every way better. Molds made of the latter material should be well dried and oiled, after which they should be painted with spirit varnish, and again oiled before use. The cost of the material is slight, and the time occupied in making a considerable quantity is about one hour, or rather more.

Casts thus prepared present a very great resemblance to human flesh, both in color, texture and translucency. They are very easily painted, and form an admirable groundwork for the depiction of skin diseases. As to their durability, I cannot speak with certainty, having none which have been made more than ten months. It is very necessary to keep them in a dry place.

EARLY MANUFACTURE OF PAPER IN SWITZERLAND.

At a recent meeting of the Historical and Archaeological Society at Geneva, one of the members, M. Moïse Briquet, read a communication on the manufacture of Paper in Switzerland, in which some facts were brought forward that are not generally known.

According to M. Briquet, Geneva was formerly the principal, if not the only, seat of the paper manufacture in Switzerland. It was of such great importance that various laws were passed for its regulation. From 1560 to 1625 more than a dozen of these laws, and of regulations connected with them, were issued. Some of these were necessitated by the conduct of the operatives and the attitude of the employes, but most of them had reference to the bad quality of the paper produced. To prevent the latter evil the government frequently ordered the confiscation of the entire stock of a manufacturer, and he was otherwise punished occasionally by fine or imprisonment.

In the middle of the sixteenth century the paper industry flourished vigorously. There were nine mills in full work in 1562 and eleven in 1563, but toward the close of the century, it appears that there were in existence only three paper mills. The manufacture had declined, owing to the bad quality of the product and the ill-regulated action of the producers. Before long the paper made in Switzerland became notorious for its uniform inferiority. The government then put forth the strongest efforts, with a view to improve the quality and to raise the tone of the trade. One of their remedial measures was to establish in each town a public store, where paper was to be stocked and sold. This store, it was ordered, should be visited once every week by some representative of the government, and each paper maker availing himself of the accommodation, was bound to distinguish his merchandise by his own trade-mark, and he then became responsible for the quality of the paper. These laws, though now obsolete in effect, have never yet been actually repealed.

During several subsequent years further regulations, some of them even still more strict, were issued. Rules of the most minute character were passed as to the weight and the quality of the paper, of which four grades were manufactured, and upon the sale of the raw materials, as well as of the chemicals used in the paper-making processes.

The study of water-marks is useful, as showing the origin of different specimens of paper, whose makers could not otherwise be identified. M. Briquet has devoted much time and attention to the subject, and has collected a great quantity of examples. He is able to classify these, and now ranges them under 250 species, each having its own distinctive features. His investigations in regard to the paper mills at Basle have resulted in much interesting information, and his discoveries concerning those that were flourishing in the year 1440 may have an important influence upon the settlement of several disputed historical questions.—*Ex.*

FANCY CABINETS.

Very pretty and inexpensive hanging cabinets are made, often of light woods, with doors painted in designs of birds and flowers. Some of these are only in reality hanging shelves, furnished with doors and curtains, but they answer the purpose as receptacles for bric-à-brac equally well, and hence are dignified with the name of cabinets. Those which are really intended as specimen cabinets are necessarily made upon a simple plan and specially adapted for this purpose. They should have shelves lined with dark velvet, and the glass cupboards should open easily, or, better still, glass panels should be easily removable.

A very pretty article of furniture for a lady's morning room is the cabinet desk; it is usually of white or light wood, and is in the form of a *se-retaire*, above which rise shelves, alcoves, and possibly tiny cupboards; it is surmounted by a railing upon the upper shelf, and altogether has the happiest effect. As a rule the work-work of a cabinet should match that of the other furniture, but a hanging cabinet should contrast with the background of the wall, light woods, oak, maple, &c., being best upon dark wall coverings, while ebonized and deep-toned woods show up better upon the white or tinted walls of new houses. Illuminated leather, which is so fashionable to-day in every department of furnishing, plays an important part also in cabinets, forming admirable panels.

It is very interesting to note the influence of fashionable articles of furniture. The cabinet made in answer to a demand to-day will probably lose its value as a salable article in a large measure in a year, and perhaps recover it again in the same lapse of time. Very elaborate pieces can be bought in many of the furniture stores at reduced prices, merely because made to meet a passing fashion; they are no longer in demand, and have remained on hand. Oddly enough, true as this is of actual fashion as regards modern things, it even affects those that are antique. To-day, as we have seen, the Moorish is the prevalent idea. Everything to be very high-toned to-day must be called Moorish, at least, and partake in some degree of the characteristic peculiarities of that style. And yet, absolute as this dictate of fashion is, it is questionable whether any cabinets will ever really drive those of China and Japan out of favor. They are, at all events, the very beau idéal of what cabinets should be, with their quaint designs, their many drawers, their folding shelves, and silver ornaments, to say nothing of the marvels of effect obtained by the use of appropriate coloring. It is safe to predict that, even if overshadowed for a while by the splendors of modern workmanship, the cabinets of Eastern fabrication will hold their own in the main. One strong point in their favor is the fact that they look well in every room and are adapted to every style of furnishing. It is safe to affirm that a Japanese cabinet never appears out of place, although, for the matter of that, a cabinet of any kind rarely does, probably because it always suggests possibilities. What greater interest exists than that search for the rare which inspires us all, when we inspect a cabinet, often enough, it is true, only to find stones instead of heads? Still, probably every one has at some time or other stumbled upon a real cabinet, in which treasures were laid away; treasures, perhaps, of the heart, or the intellect, or maybe those pathetic references to the past which embody only the sorrows of the individual. We all live in the past, more or less, and so long as we do so the

cabinet must hold its own. Thackeray realized this. How often in his works he refers to those hidden, and perhaps half-forgotten, relics, which may be found in an old cabinet. "Human nature," as some one has aptly remarked, "is strong," and human nature calls for a cabinet. In museums, in old stores, in modern dwellings, alike in the fashionable quarter and in the home of those whose mediocre income scarcely covers the demands made upon it, we shall find the cabinet in some form or other. Nay, in the very days of childhood we find it. The hidden treasures of a child's life may be found in many an old-fashioned cabinet. The bit of feldspar glittering in the sun, the first fossil, the shell that murmurs as it is lifted to the ear, the first bit of china, the pebble picked from the shore, often, laughable as it is, the first tooth, the cause of so much anxiety and terror, are hoarded up and find a resting place in the cabinet. How simple such tokens are! how universal! changing only in form—all alike recollections drifting into our lives from time to time.

Perhaps the less expensive ones, those which are bought for the actual requirements of a room, are even more interesting than those mar-

vols of art which are priced high up in the hundreds, just as more individual interest centres in that which is the result of individual effort than that which is purchasable by the expenditure of dollars. Be that as it may in this æsthetic age, the cabinet demands from us much consideration and attention, and anyone who does not possess one in one form or other should be incited to supply the deficiency, and at the earliest opportunity purchase one and commence collecting pretty and valuable articles to place in it. This may be a reversal of the proper order of things, which supposes that the "inmates" of a cabinet shall await it, but it is a very natural way, and it would be as hazardous to conjecture how many collections have owed their birth to the fact that a cabinet has existed as to endeavor to find out how many collections of curiosities, gems, fossils or bric-à-brac have been laid by waiting for a cabinet in which they might be profitably arranged.—*Crockery Journal*.

WANTED,

A Clerk, between 25 and 30 years of age, in a Wholesale Book House; one who has had experience, and is willing to go out of the city. Address, with references, BOOKS, office American Stationer.

SALESMAN WANTED,

Thoroughly acquainted with the Wholesale Stationers in New York, Philadelphia, Boston and Baltimore. Address "STATIONERY," office American Stationer.

FOR SALE—THE BUSINESS OF THE LATE Chas. A. Burnham, of Norwich, Conn., who died July 4th. This prosperous first-class Book, Stationery and Paper Hanging Store, to a man with a proper knowledge of the business, is an extraordinary good chance. It is well established and thoroughly known in all the adjacent manufacturing villages in the neighborhood, and bears an enviable reputation. It is now, and has been for years, returning a handsome income. The subscriber wishes to sell it without delay. In the meantime the stock will be kept complete and every endeavor made to keep it up to the high standard of its former owner. For further particulars, address WM. C. LANMAN, Administrator, Norwich, Conn.
